BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS

Manuscripts should be sent to one of the following editors:

JOHN N. ABELSON

Division of Biology 147-75
California Institute of Technology
Pasadena, California 91125
FAX: (818) 796-7066

ERNESTO CARAFOLI

Laboratorium für Biochemie
ETH-Zentrum
CH-8092 Zurich, Switzerland
FAX: 41-1-252-6323

I. C. GUNSALUS

420 RAL, 1209 W. California
University of Illinois
Urbana, Illinois 61801
FAX: (217) 333-9684

AKIRA ICHIHARA

Institute for Enzyme Research
Tokushima University
Tokushima 770, Japan
FAX: 81-88-633-0771

JAMES D. JAMIESON

Department of Cell Biology
Yale University School of Medicine
333 Cedar Street
P.O. Box 333
New Haven, Connecticut 06510
FAX: (203) 785-7446

YASUO KAGAWA

Department of Biochemistry
Jichi Medical School
Minamikawachi-Machi Kawachi-gun
Tochigi-ken 329-04, Japan
FAX: 81-28-544-1827

M. DANIEL LANE

Department of Biological Chemistry
The Johns Hopkins University
725 No. Wolfe Street
Baltimore, Maryland 21205
FAX: (301) 955-5759

WILLIAM J. LENNARZ

Department of Biochemistry and
Cell Biology
State University of New York
Stony Brook, New York 11794-5215
FAX: (516) 632-8575

MASAMI MURAMATSU

This journal is printed on acid-free paper.

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS
(ISSN 0006-291X)

Published semimonthly by Academic Press, Inc., 6277 Sea Harbor Drive, Orlando, FL 32887-4900

1992: Volumes 182–189. Price: \$856.00 U. S. A. and Canada; \$1054.00 all other countries

1993: Volumes 190–197. Price: \$996.00 U. S. A. and Canada; \$1222.00 all other countries

All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publishers. All correspondence and subscription orders should be addressed to the office of the Publishers at 6277 Sea Harbor Drive, Orlando, FL 32887-4900. Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send changes of address to *Biochemical and Biophysical Research Communications*, 6277 Sea Harbor Drive, Orlando, FL 32887-4900.

CUMULATIVE TABLE OF CONTENTS
FOR VOLUMES 182-189

Volume 182, Number 1, January 15, 1992

Isolation and Characterization of a 22-kDa Protein with Antifungal Properties from Maize Seeds	<i>Quang Khai Huynh, Jeffry R. Borgmeyer, and James F. Zobel</i>	1
Attachment of <i>Trypanosoma cruzi</i> to Host Cells: A Monoclonal Antibody Recognizes a Trypomastigote State-Specific Epitope on the gp 83 Required for Parasite Attachment	<i>Fernando Villalta, Maria F. Lima, Antonio Ruiz-Ruano, and Lin Zhou</i>	6
Molecular Cloning and Nucleotide Sequence of a Pectin Lyase Gene from <i>Pseudomonas marginalis</i> N6301	<i>Naoki Nikaidou, Yoshiyuki Kamio, and Kazuo Izaki</i>	14
Spermine Down-Regulates Superoxide Generation Induced by fMet-Leu-Phe in Electroporabilized Human Neutrophils	<i>Kenichi Ogata, Minoru Tamura, and Masazumi Takeshita</i>	20
The N-Terminal Segment of Protein AA Determines Its Fibrillogenic Property	<i>Gunilla T. Westermarck, Ulla Engström, and Per Westermarck</i>	27
Identification of Testis-Specific Calcineurin β Subunit Isoform by a Monoclonal Antibody and Detection of a Specific Six Amino Acid Sequence	<i>Hajime Nishio, Hideki Matsui, Seiji Etoh, Lizomar J. M. P. Moia, Masaaki Tokuda, Toshifumi Itano, and Osamu Hatase</i>	34
Actin Molecules Promote Neurite Outgrowth of Chick Telencephalic Neurons in Vitro	<i>Hiromi Nobusada and Takahisa Taguchi</i>	39
Suppressive Effect of Carbachol on Forskolin-Stimulated Neurite Outgrowth in Human Neuroblastoma NB-OK1 Cells	<i>Yuzo Nakagawa-Yagi, Yasunari Saito, Yoshihiro Takada, and Hiroshi Nakamura</i>	45
Chemical Cross-Linking of the Cytosolic and Nuclear Forms of the Ah Receptor in Hepatoma Cell Line 1c1c7	<i>Gary H. Perdew</i>	55
Reversible β -Pleated Sheet Formation of a Phosphorylated Synthetic τ Peptide	<i>Emma Lang, Gyorgyi I. Szendrei, Ilona Elekes, Virginia M-Y. Lee, and Easzlo Otvos, Jr.</i>	63
A Heterozygous Mutation (the Codon for Ser ⁴⁴⁷ $\rightarrow$ a Stop Codon) in Lipoprotein Lipase Contributes to a Defect in Lipid Interface Recognition in a Case with Type I Hyperlipidemia	<i>Junji Kobayashi, Tsutomu Nishida, Detlev Ameis, Gisela Stahnke, Michael C. Schotz, Hideyuki Hashimoto, Isamu Fukamachi, Kohji Shirai, Yasushi Saito, and Sho Yoshida</i>	70
Matrix Attachment Sites in the Murine α -Globin Gene	<i>Zoya Avramova and Elena Paneva</i>	78
Antileishmanial Activity of Hamycin: A Polyene Antibiotic	<i>Sibaji Sarkar, Tanmoy Mukherjee, Parameswar Patra, and Amar Bhaduri</i>	86

Inactivation of Purified Phenylalanine Hydroxylase by Dithiothreitol <i>Aurora Martínez, Sigridur Olafsdottir, Jan Haavik, and Torgeir Flatmark</i>	92
Genetic Analysis of a Japanese Family with Normotriglyceridemic Abetalipoproteinemia Indicates a Lack of Linkage to the Apolipoprotein B Gene <i>Satoshi Naganawa, Tatsuhiko Kodama, Hiroyuki Aburatani, Akiyo Matsumoto, Hiroshige Itakura, Yoshiki Takashima, Masahiko Kawamura, and Yasutoshi Muto</i>	99
Characterization of Protein Kinase C in <i>Xenopus</i> Oocytes <i>Setsuko Sahara, Ken-ichi Sato, Mamoru Aoto, Tetsuo Ohnishi, Hiroshi Kaise, Hiroshi Koide, Kouji Ogita, and Yasuo Fukami</i>	105
Critical Micelle Concentration and Hemolytic Activity—A Correlation Suggested by the Marine Sterol, Halistanol Trisulfate <i>Roger W. Moni, Peter G. Parsons, Ronald J. Quinn, and Roger J. Willis</i>	115
Differential Expression of Two <i>msh</i> -Related Homeobox Genes <i>Chox-7</i> and <i>Chox-8</i> during Chick Limb Development <i>Tsutomu Nohno, Sumihare Noji, Eiki Koyama, Kiyoshi Nishikawa, Fumio Myokai, Taiichi Saito, and Shigehiko Taniguchi</i>	121
The Mechanism of Activation of Protein Kinase FA (the Activator of Type-1 Protein Phosphatase) in Brain Synaptosomes <i>Shiaw-Der Yang, Jau-Song Yu, Yiu-Lian Fong, and Jen-Sing Liu</i>	129
<i>In Vitro</i> Reconstitution of an Erythropoietin Gene Transcription System Using Its 5'-Flanking Sequence and a Nuclear Extract from Anemic Kidney <i>Terumasa Tsuchiya, Hirokazu Ochiai, Shinobu Imajoh-Ohmi, Masatsugu Ueda, Toshio Suda, Michio Nakamura, and Shiro Kanegasaki</i>	137
Different Distribution of Endothelin Receptor Subtypes in Pulmonary Tissues Revealed by the Novel Selective Ligands BQ-123 and [Ala ^{1,3,11,15}]JET-1 <i>Kyoko Nakamichi, Masaki Ihara, Masahiko Kobayashi, Toshihiko Saeki, Kiyofumi Ishikawa, and Mitsuo Yano</i>	144
Formation of Nitric Oxide Hemoglobin in Erythrocytes Cocultured with Alveolar Macrophages Taken from Bleomycin-Treated Rats <i>A. E. Huot, H. Kruszyna, R. Kruszyna, R. P. Smith, and M. P. Hacker</i>	151
A New Metallo-endoropeptidase from Human Neuroblastoma NB-OK-1 Cells Which Inactivates Atrial Natriuretic Peptide by Selective Cleavage at the Ser ¹²³ —Phe ¹²⁴ Bond <i>Christine Delporte, Krishnamurti de Moraes Carvalho, Anne-Marie Leseney, Jacques Winand, Jean Christophe, and Paul Cohen</i>	158
Overexpression of Amyloid Precursor Protein Alters Its Normal Processing and Is Associated with Neurotoxicity <i>Ken-ichiro Fukuchi, Kouzin Kamino, Samir S. Deeb, Annette C. Smith, Thao Dang, and George M. Martin</i>	165
Interaction of Estrogen Receptor Complexes with the Promoter Region of Genes That Are Negatively Regulated by Estrogens: The α_{2u} -Globulins <i>Patrick Van Dijck and Guido Verhoeven</i>	174
Detection of Thyrotropin-Releasing Hormone mRNA by the Reverse Transcription-Polymerase Chain Reaction in the Human Normal and Tumoral Anterior Pituitary <i>Patrick Pagesy, Gilles Croissandeau, Michèle Le Dafniet, Françoise Peillon, and J. Yuan Li</i>	182

Characterization of Heparin-Binding Growth-Associated Factor Receptor in NIH 3T3 Cells	<i>Ming-Der Kuo, Shuan Shian Huang, and Jung San Huang</i>	188
Molecular Cloning of the cDNA for the Major Hemoglobin Component from <i>Paramecium caudatum</i>	<i>Kiyoshi Yamauchi, Masanori Mukai, Takehiko Ochiai, and Itaru Usuki</i>	195
Cisplatin-Induced Alterations in Oriented Fibers of DNA Studied by Atomic Force Microscopy	<i>Nicholas J. Rampino</i>	201
The Phospholipase A ₂ of Human Spermatozoa: Purification and Partial Sequence	<i>J. Langlais, J. G. Chafouleas, R. Ingraham, N. Vigneault, and K. D. Roberts</i>	208
Missense Mutations and a Deletion of the p53 Gene in Human Gastric Cancer	<i>Takashi Matozaki, Choitsu Sakamoto, Kohei Matsuda, Toshiya Suzuki, Yoshitaka Konda, Osamu Nakano, Ken Wada, Tohru Uchida, Hogara Nishisaki, Munehiko Nagao, and Masato Kasuga</i>	215
The Effects of Novel Cathepsin E Inhibitors on the Big Endothelin Pressor Response in Conscious Rats	<i>J. Eileen Bird, Thomas L. Waldron, Deborah K. Little, Magdi M. Asaad, Charles R. Dorso, Gerald DiDonato, and Jon A. Norman</i>	224
Characterization and Partial Purification of a Membrane Protein from Rabbit Skeletal Muscle Which Inhibits the cAMP-Dependent Protein Kinase	<i>Ruediger Woscholski and Dieter Marmé</i>	232
Detection of Point Mutations in Codon 331 of Mitochondrial NADH Dehydrogenase Subunit 2 in Alzheimer's Brains	<i>Fu-Hai Lin, Ruth Lin, Henryk M. Wisniewski, Yu-Wen Hwang, Inge Grundke-Iqbal, Gregory Healy-Louie, and Khalid Iqbal</i>	238
Therapy with Coenzyme Q ₁₀ of Patients in Heart Failure Who Are Eligible or Ineligible for a Transplant	<i>Karl Folkers, Peter Langsjoen, and Per H. Langsjoen</i>	247
Greater Importance of Ca ²⁺ -Calmodulin in Maintenance of Ang II- and K ⁺ -Mediated Aldosterone Secretion: Lesser Role of Protein Kinase C	<i>Arunabha Ganguly, Shirley Chiou, Naomi S. Fineberg, and John S. Davis</i>	254
Divergent Effects of Phorbol Esters and Insulin on Insulin-like Growth Factor Binding Protein-1 Production and mRNA in Rat H4IIE Hepatoma Cells	<i>T. G. Unterman, R. G. Lacson, J. J. Jentel, and D. T. Oehler</i>	262
A Rationale for the Prophylactic Use of Monophosphoryl Lipid A in Sepsis and Septic Shock	<i>Gary L. Gustafson and Michael J. Rhodes</i>	269
Human Cathepsin D Precursor Is Associated with a 60-kDa Glycosylated Polypeptide	<i>Susanne Grässel and Andrej Hasilik</i>	276
Kinins Mediate the Antiproliferative Effect of Ramipril in Rat Carotid Artery	<i>Rodolfo D. Farhy, Khang-Loon Ho, Oscar A. Carretero, and A. Guillermo Scicli</i>	283
Comparison between Synthetic Nuclear Localization Signal Peptides from the Steroid/Thyroid Hormone Receptors Superfamily	<i>François Hamy, Nicole Helbecque, and Jean-Pierre Henichart</i>	289
Structural Features of Carbohydrate Moieties in Snake Venom Glycoproteins	<i>D. Channe Gowda and Eugene A. Davidson</i>	294

High-Density Lipoprotein Antagonizes the Inhibitory Effects of Oxidized Low-Density Lipoprotein and Lysolecithin on Soluble Guanylyl Cyclase	Kurt Schmidt, Peter Klatt, Wolfgang F. Graier, Gerhard M. Kostner, and Walter R. Kukovetz	302
Nucleoside Triphosphate Binding and Hydrolysis by Histone H1	Riitta-Maaria Mannermaa and Jouko Oikarinen	309
Increased Expression of Retroviral Sequences in Progressionally Advanced Rat Prostatic Tumors	Marion J. G. Bussemakers, Adrie van Bokhoven, Jan J. M. van Groningen, Frans M. J. Debruyne, and Jack A. Schalken	318
Characterization of the 5'-Flanking Region of the Human Brain-Derived Neurotrophic Factor Gene	Asae Shintani, Yoshitaka Ono, Yoshihiko Kaisho, and Koichi Igarashi	325
Interleukin-1 β Induces Nitric Oxide Production and Inhibits the Activity of Aconitase without Decreasing Glucose Oxidation Rates in Isolated Mouse Pancreatic Islets	Nils Welsh and Stellan Sandler	333
Tumor Necrosis Factor α Inhibits the Stimulatory Effect of the Parathyroid Hormone-Related Protein on Cyclic AMP Formation in Osteoblast-like Cells via Protein Kinase C	Eberhard Blind, Valentin Knappe, Friedhelm Raue, Johannes Pfeilschifter, and Reinhard Ziegler	341
Structure of the Mouse Tyrosine Hydroxylase Gene	Nakao Iwata, Kazuto Kobayashi, Toshikuni Sasaoka, Hiroyoshi Hidaka, and Toshiharu Nagatsu	348
Drosophila Glutathione S-Transferases Have Sequence Homology to the Stringent Starvation Protein of <i>Escherichia coli</i>	Yann-Pyng S. Toung and Chen-Pie D. Tu	355
Glutathione Is the Reducing Agent for the Reductive Dehalogenation of Tetrachloro- <i>p</i> -hydroquinone by Extracts from a <i>Flavobacterium</i> sp.	L. Xun, E. Topp, and C. S. Orser	361
Phosphorylation of <i>Acinetobacter</i> Isocitrate Lyase	Jeffrey C. Hoyt and Henry C. Reeves	367
Activation of K ⁺ Current in Macrophages by Platelet Activating Factor	M. Ichinose, N. Hara, M. Sawada, and T. Maeno	372
A Novel Compound, Depudecin, Induces Production of Transformation to the Flat Phenotype of NIH3T3 Cells Transformed by <i>ras</i> -Oncogene	Kenji Sugita, Hiroshi Yoshida, Makoto Matsumoto, and Shigeru Matsutani	379
Identification and Characterization of a New Binding Site for Angiotensin II in Mouse Neuroblastoma Neuro-2A Cells	Shigeyuki Chaki and Tadashi Inagami	388
Endothelin Inhibits the Atrial Natriuretic Factor-Stimulated cGMP Production by Activating the Protein Kinase C in Rat Aortic Smooth Muscle Cells	Rama K. Jaiswal	395
Pituitary Adenylate Cyclase-Activating Polypeptide Provokes Cultured Rat Chromaffin Cells to Secrete Adrenaline	Takuya Watanabe, Yoshinori Masuo, Hirokazu Matsumoto, Nobuhiro Suzuki, Tetsuya Ohtaki, Yasushi Masuda, Chieko Kitada, Masao Tsuda, and Masahiko Fujino	403
Cloning and Characterization of a Highly Conserved HMG-like Protein (PF16) Gene from <i>Plasmodium falciparum</i>	Ramareddy V. Guntaka, Jagannadha C. Kandala, and V. Dashwantha Reddy	412

Inhibition of Endothelial Cell Clearance of Atrial Natriuretic Peptide (ANP) by Cyclic GMP Treatment	<i>Johji Kato, William F. Oehlenschlaeger, Walter H. Newman, and Mark G. Currie</i>	420
Ribulose-1,5-bisphosphate Carboxylase of Thermophilic Hydrogen-Oxidizing Microorganism <i>Bacillus schlegelii</i>	<i>Karel Mikulik, Oldrich Benada, and Miroslava Anderova</i>	425

Volume 182, Number 2, January 31, 1992

A Novel Primer Extension Method to Detect the Number of CAG Repeats in the Androgen Receptor Gene in Families with X-Linked Spinal and Bulbar Muscular Atrophy	<i>Yoichi Yamamoto, Hisaomi Kawai, Keiichi Nakahara, Mitsuhiro Osame, Yuji Nakatsuji, Tadimitsu Kishimoto, and Saburo Sakoda</i>	433
Leupeptin and Ammonium Chloride Inhibit Intrinsic Factor-Mediated Transcytosis of [⁵⁷ Co]Cobalamin across Polarized Renal Epithelial Cells	<i>Kalathur S. Ramanujam, Shakuntla Seetharam, and Bellur Seetharam</i>	439
Avian Species-Specific Tandem Repeats Contain Nuclear Protein Binding Sites	<i>Xiaoyi Zhu, Alessandro Testori, Sawyin Oh, Jenny D. Skinner, and Leigh A. Burgoyne</i>	447
PR ^{S3} Encoding an Essential Subunit of Yeast Proteasomes Homologous to Mammalian Proteasome Subunit C5	<i>Do Hee Lee, Keiji Tanaka, Tomohiro Tamura, Chin Ha Chung, and Akira Ichihara</i>	452
Purification and Characterization of a Calpain Activator from Human Platelets	<i>Eiichi Shiba, Hideo Ariyoshi, Yoshiko Yano, Tomio Kawasaki, Masato Sakon, Jun-ichi Kambayashi, and Takesada Mori</i>	461
Binding Site Mapping of a Photoaffinity-Labeled Juvenile Hormone Binding Protein	<i>Kazushige Touhara and Glenn D. Prestwich</i>	466
Analysis of the Close Relationship between Human Astrocytoma-Specific Antigens Detected by Murine Monoclonal Antibodies and c-kit Proto-Oncogene Product	<i>Seiji Kondo, Shin-ichi Miyatake, Masato Matsumoto, Shouji Nakatsu, Koh-ichi Iwasaki, Yoshifumi Oda, Haruhiko Kikuchi, and Yuzihiro Namba</i>	474
Evidence for the Expression of Growth Hormone Receptors in Human Placenta	<i>Francis Frankenne, Eliane Alsat, Marie-Louise Scippo, Ahmed Igout, Georges Hennen, and Danièle Evain-Brion</i>	481
Alkaline Phosphatase Activity during Differentiation of the Human Promyelocytic Leukemia Cell Line, HL-60	<i>Lillian L.-L. Wei, Eric K.-W. Hui, J. S. Wei, and Benjamin Y. M. Yung</i>	487
Partial Deletion of a Dystrophin Gene Leads to Exon Skipping and to Loss of an Intra-exon Hairpin Structure from the Predicted mRNA Precursor	<i>Masafumi Matsuo, Hisahide Nishio, Yoshihiko Kitoh, Uta Francke, and Hajime Nakamura</i>	495

Three Different NCA Species, CGM6/CD67, NCA-95, and NCA-90, Are Comprised in the Major 90- to 100-kDa Band of Granulocyte NCA Detectable upon SDS-Polyacrylamide Gel Electrophoresis	<i>Motomu Kuroki, Yoshino Matsuo, Tetsushi Kinugasa, and Yuji Matsuoka</i>	501
Immunoaffinity Purification and cDNA Cloning of Human Platelet Prostaglandin Endoperoxide Synthase (Cyclooxygenase)	<i>Yoshitaka Takahashi, Natsuo Ueda, Tanihiro Yoshimoto, Shozo Yamamoto, Chieko Yokoyama, Atsuro Miyata, Tadashi Tanabe, Ichiro Fuse, Akira Hattori, and Akira Shibata</i>	507
Nucleotide Sequence of cDNA for the Eclosion Hormone of the Silkworm, <i>Bombyx mori</i> , and the Expression in a Brain	<i>Takehiko Kamito, Hideo Tanaka, Bunji Sato, Hiromichi Nagasawa, and Akinori Suzuki</i>	514
A Novel Transthyretin Mutation Associated with Familial Amyloidotic Polyneuropathy	<i>Tatsufumi Murakami, Shuichiro Maeda, Shigehiro Yi, Shinichi Ikegawa, Eiji Kawashima, Soukichi Onodera, Kazunori Shimada, and Shukuro Araki</i>	520
Expression of the Signal Transducing Regions of CD4-like and LCK Genes in Murine Egg	<i>T. Mori, M. W. Gou, H. Yoshida, S. Saito, and E. Mori</i>	527
Isolation and Primary Structure of a Novel Pheromonotropic Neuropeptide Structurally Related to Leucopyrokinin from the Armyworm Larvae, <i>Pseudaletia separata</i>	<i>Shogo Matsumoto, Adrien Fónagy, Masaaki Kurihara, Kyoichi Uchiumi, Toshihiro Nagamine, Masao Chijimatsu, and Takashi Mitsui</i>	534
P2 Protamines from Human Sperm are Zinc-Finger Proteins with One Cys2/His2 Motif	<i>F. Bianchi, R. Rousseaux-Prevost, P. Sautiere, and J. Rousseaux</i>	540
Oxidized Low Density Lipoproteins Exert Arrhythmogenic Effects in Rabbit Purkinje Fibers	<i>M. M. Adamantidis, L. Moreau-Guedon, F. Martin-Nizard, H. Sqalli-Houssaini, P. Duriez, J. C. Fruchart, and B. Dupuis</i>	548
Synthesis and Characterization of a d(ApG) Platinated Nonanucleotide Duplex	<i>M. H. Fouchet, C. Gauthier, E. Guittet, J. P. Girault, J. Igolen, and J. C. Chottard</i>	555
Comparison of the Primary Structure of the Functional Domains of Human and Porcine von Willebrand Factor That Mediate Platelet Adhesion	<i>Bruce R. Bahnak, Jean-Maurice Lavergne, Valérie Ferreira, Danièle Kerbiriou-Nabias, and Dominique Meyer</i>	561
The Complex CD44 Transcriptional Unit: Alternative Splicing of Three Internal Exons Generates the Epithelial Form of CD44	<i>David L. Cooper, Graeme Dougherty, H.-J. Harn, Susan Jackson, Edward W. Baptist, Jeffrey Byers, Anil Datta, and Narayana R. Isola</i>	569
Differential Requirement of ATP and Extra-ribosomal Proteins for Ribosome Inactivation by Eight RNA N-Glycosidases	<i>Domenica Carnicelli, Maurizio Brigotti, Lucio Montanaro, and Simonetta Sperti</i>	579
An Amino Acid Exchange in Exon I of the Human Lecithin: Cholesterol Acyltransferase (LCAT) Gene Is Associated with Fish Eye Disease	<i>Grethe Skretting and Hans Prydz</i>	583
Chemical Cleavage of Plasmid DNA by Cu(II), Ni(II), and Co(III) Desferal Complexes	<i>Rajendra R. Joshi and K. Nagappa Ganesh</i>	588

Hypoxia-Ischemia Induces Transforming Growth Factor β_1 mRNA in the Infant Rat Brain	<i>N. D. Klempt, E. Sirimanne, A. J. Gunn, M. Klempt, K. Singh, C. Williams, and P. D. Gluckman</i>	593
Evidence for Heat-Stable Liver Cytosol Substance(s) Capable of Causing Oxidative Activation of Fructose-1,6-bisphosphatase	<i>Grace Han, Dale Mack, John Hang, Edward Hunter, Henry Zeidan, and Peter Han</i>	600
Stereochemistry of NADPH Oxidation by Dihydropyrimidine Dehydrogenase from Pig Liver	<i>Beate Podschun</i>	609
Regulation of Cytochrome P450 IID by Acute Phase Mediators in C3H/HeJ Mice	<i>C. Trautwein, G. Ramadori, G. Gerken, K.-H. Meyer zum Büschenfelde, and M. Manns</i>	617
Placental Alkaline Phosphatase Is Related to Human IgG Internalization in HEP2 Cells	<i>Ricardo Makiya and Torgny Stigbrand</i>	624
Tissue Specificity of S14 and Fatty Acid Synthase <i>in Vitro</i> Transcription	<i>Ormond A. MacDougald, Steven D. Clarke, and Donald B. Jump</i>	631
Inhibition of Ligand Binding and Antiproliferative Effects of Tumor Necrosis Factor and Lymphotoxin by Soluble Forms of Recombinant P60 and P80 Receptors	<i>Masahiro Higuchi and Bharat B. Aggarwal</i>	638
Effect of Extracellular Phosphatidylinositol on c-myc Gene-Expressed Human Renal Cancer Cell Line	<i>Sumio Noguchi, Yoshinobu Kubota, Taro Shuin, Etsuro Ito, Hiroko Inoue, and Tohru Yoshioka</i>	644
Role of the <i>metF</i> and <i>metJ</i> Genes on the Vitamin B ₁₂ Regulation of Methionine Gene Expression: Involvement of <i>N</i> ⁵ -Methyltetrahydrofolic Acid	<i>Xiao-Yan Cai, Hieronim Jakubowski, Betty Redfield, Brian Zaleski, Nathan Brot, and Herbert Weissbach</i>	651
Assembly of a Hybrid from the α Subunit of Na ⁺ /K ⁺ -ATPase and the β Subunit of H ⁺ /K ⁺ -ATPase	<i>Shunsuke Noguchi, Masatomo Maeda, Masamitsu Futai, and Masaru Kawamura</i>	659
Two High Molecular Mass Proteases from Sea Urchin Sperm	<i>Kazuo Inaba, Yasuhisa Akazome, and Masaaki Morisawa</i>	667
The Gene Encoding Vacuolar H ⁺ -ATPase Subunit C Is Overexpressed in Multidrug-Resistant HL60 Cells	<i>Liandong Ma and Melvin S. Center</i>	675
Differential Susceptibility of Phosphatidylcholine Small Unilamellar Vesicles to Phospholipases A ₂ , C, and D in the Presence of Membrane Active Peptides	<i>N. Madhusudhana Rao</i>	682
Sulfoglycolipids Bind to Adhesive Protein Amphoterin (P30) in the Nervous System	<i>Panaiyur S. Mohan, Jari Laitinen, Jussi Merenmies, Heikki Rauvala, and Firoze B. Jungalwala</i>	689
Changes in the Adenine Nucleotide Content of Beef-Heart Mitochondrial F ₁ ATPase during ATP Synthesis in Dimethyl Sulfoxide	<i>Seelochan Beharry and Philip D. Bragg</i>	697
Expression of Mouse-GLUT3 and Human-GLUT3 Glucose Transporter Proteins in Brain	<i>Frances Maher, Susan Vannucci, Jun Takeda, and Ian A. Simpson</i>	703
Decreased Fidelity of DNA Polymerases and Decreased DNA Excision Repair in Aging Mice: Effects of Caloric Restriction	<i>Vinod K. Srivastava and David L. Busbee</i>	712

Monoclonal Antibody to GABA Binding Protein, a Possible GABA _B Receptor <i>Hiroshi Nakayasu, Hiroshi Mizutani, Kazumitsu Hanai, Hiroshi Kimura, and Kinya Kuriyama</i>	722
The Effect of Interleukin-4 on the Macrophage Respiratory Burst Is Species Dependent <i>Wayne A. Phillips, Maryann Croatto, and John A. Hamilton</i>	727
Interleukin-1 Impairs Both Vascular Contraction and Relaxation in Rabbit Isolated Aorta <i>René Robert, Béatrice Chapelain, Thierry Jean, and Gervais Néliat</i>	733
Coordinate Regulation of Estrogen and Prolactin Receptor Expression by Sodium Butyrate in Human Breast Cancer Cells <i>Christopher J. Ormandy, Anna de Fazio, Paul A. Kelly, and Robert L. Sutherland</i>	740
Increased Expression of the 67-kDa Laminin Receptor Gene in Human Small Cell Lung Cancer <i>Ken Satoh, Koh Narumi, Mamoru Isemura, Toshihiko Sakai, Tatsuya Abe, Keiko Matsushima, Kazuhiro Okuda, and Masakichi Motomiya</i>	746
Different Expression of Tyrosine Aminotransferase and Serine Deydratase in Rat Livers after Partial Hepatectomy <i>Maria Agnese Della Fazia, Giuseppe Servillo, and Mariapia Viola-Magni</i>	753
Enhanced Intracellular Activation of Carboplatin in Hemoglobin-Synthesizing versus Undifferentiated Erythroleukemic Cells <i>Michela Tonetti, Anna Gasparini, Marco Giovine, Umberto Benatti, and Antonio De Flora</i>	760
Effect of High K ⁺ Exposure on Phosphoinositide Metabolism in Frog Skeletal Muscle <i>Zheng Dong, Ke-Ying Chen, and Pei-Hong Zhu</i>	767
Regulation of Activin β_A mRNA Level by cAMP <i>Keiji Tanimoto, Kouichi Tamura, Naoto Ueno, Satoshi Usuki, Kazuo Murakami, and Akiyoshi Fukamizu</i>	773
Investigation of Sulfur-Containing Amino Acids at the Lipxygenase Active Site Using a Platinum Complex <i>I. Michaud-Soret and J. C. Chottard</i>	779
Histamine and Calcium Are Independently Regulated Intracellular Mediators of Lymphocyte Mitogenesis <i>Lorne J. Brandes and Frank S. LaBella</i>	786
Sequence and Genomic Structure of the Human Adult Skeletal Muscle Sodium Channel α Subunit Gene on 17q <i>Jianzhou Wang, Cecilia V. Rojas, Jianhua Zhou, Lisa S. Schwartz, Hugh Nicholas, and Eric P. Hoffman</i>	794
Lung May Have an Endocrine Function Producing Hepatocyte Growth Factor in Response to Injury of Distal Organs <i>Kimihiko Yanagita, Mika Nagaike, Hiromi Ishibashi, Yoshiyuki Niho, Kunio Matsumoto, and Toshikazu Nakamura</i>	802
Production of Monoclonal Antibodies against Human 6-Pyruvoyl Tetrahydropterin Synthase and Immunocytochemical Localization of the Enzyme <i>Jaime Guzman, Gabriele Schoedon, and Nenad Blau</i>	810
The Role of 5'-Methylthioadenosine on Rat Calvaria Cell Differentiation <i>Shinji Kasahara, Seiji Nishikawa, Hiroshi Ishida, Toshihiko Nagata, Noriyuki Yamauchi, Keiji Ohishi, Yoichi Wakano, and Hideo Inoue</i>	817

Effects of HS-142-1, a Novel Nonpeptide ANP Antagonist, on Diuresis and Natriuresis Induced by Acute Volume Expansion in Anesthetized Rats <i>Tomoyuki Sano, Yoshikazu Morishita, Koji Yamada, and Yuzuru Matsuda</i>	824
Lysosome Inhibitors Enhance the Ability of Cyclic AMP-Elevating Agents to Induce the LDL Receptor in Human Vascular Smooth Muscle Cells <i>Bruce Middleton</i>	830
Extracellular ATP Stimulates Increases in Na ⁺ /K ⁺ Pump Activity, Intracellular pH, and Uridine Uptake in Cultures of Mammalian Cells <i>Ning-na Huang, Ahmed H. Ahmed, Ding-ji Wang, and Leon A. Heppel</i>	836
Translocation and Induction of α B Crystallin by Heat Shock in Rat Glioma (GA-1) Cells <i>Yutaka Inaguma, Haruo Shinohara, Sachiyo Goto, and Kanefusa Kato</i>	844
Expression of Guanylate Cyclase-A mRNA in the Rat Retina: Detection Using Polymerase Chain Reaction <i>R. Krishnan Kutty, R. Theodore Fletcher, Gerald J. Chader, and Gopal Krishna</i>	851
Galanin Inhibition of Cholecystokinin-8-Induced Increase in [Ca ²⁺] _i in Individual Rat Pancreatic B-Cells <i>Jian Wang, Yin Nam Kwok, Kenneth G. Baimbridge, and John C. Brown</i>	858
The Role of Calcium in Neutrophil Migration: The Effect of Calcium and Calcium Antagonists in Electroporated Neutrophils <i>J. G. R. Elferink, G. J. J. C. Boonen, and B. M. de Koster</i>	864
Effect of D ₂ O on Maize Plasmalemma ATPase and Electron Transport Coupled Proton Pumping <i>Olaf Döring and Michael Böttger</i>	870
Increased Sensitivity of an Adriamycin-Resistant Human Small Cell Lung Carcinoma Cell Line to Mitochondrial Inhibitors <i>S. de Jong, M. Holtrop, H. de Vries, E. G. E. de Vries, and N. H. Mulder</i>	877
Presence of Islet Amyloid Polypeptide in Rat Islet B and D Cells Determines Parallelism and Dissociation between Rat Pancreatic Islet Amyloid Polypeptide and Insulin Content <i>M. De Vroede, A. Foriers, M. Van De Winkel, O. Madsen, and D. Pipeleers</i>	886
Isoflavonoids, Genistein, Psi-Tectorigenin, and Orobol Increase Cytoplasmic Free Calcium in Isolated Rat Hepatocytes <i>Takeshi Tomonaga, Tetsuya Mine, Itaru Kojima, Masanori Taira, Haruyuki Hayashi, and Kaichi Isono</i>	894
Carbon 13 NMR Study of Glycogen Metabolism in the Baboon Liver <i>in Vivo</i> <i>Philippe Jehenson, Paul Canioni, Philippe Hantraye, and André Syrota</i>	900
Regulation of Intracellular Mg ²⁺ by Superoxide in Amnion Cells <i>Nobuyuki Masumoto, Keiichi Tasaka, Jirou Mizuki, Akira Miyake, and Osamu Tanizawa</i>	906
Significant Existence of Deleted Mitochondrial DNA in Cirrhotic Liver Surrounding Hepatic Tumor <i>Hideo Yamamoto, Masashi Tanaka, Makoto Katayama, Toshihiro Obayashi, Yuji Nimura, and Takayuki Ozawa</i>	913
Both Stimulatory and Inhibitory GDP/GTP Exchange Proteins, smg GDS and rho GDI, Are Active on Multiple Small GTP-Binding Proteins <i>Kunihiko Hiraoka, Kozo Kaibuchi, Satoshi Ando, Takashi Musha, Kenji Takaishi, Takakazu Mizuno, Makoto Asada, Luc Ménard, Eric Tomhave, John Didsbury, Ralph Snyderman, and Yoshimi Takai</i>	921

Pyruvate/Malate Antiporter in Rat Liver Mitochondria	
<i>Anna Atlante, Salvatore Passarella, and Ernesto Quagliariello</i>	931
Calpain Activation Is Essential for Membrane Fusion of Erythrocytes in the Presence of Exogenous Ca^{2+}	
<i>Masami Hayashi, Yumiko Saito, and Seiichi Kawashima</i>	939
Biochemical Characterization of Binding Sites for Dihydropyridine and ω -Conotoxin in Brain of Adult Chicken	
<i>A. Zgaga-Griesz, R. Woscholski, P. Straub, H. Hug, and D. Marmé</i>	947
6-Pyruvoyl Tetrahydropterin Synthase from Salmon Liver: Amino Acid Sequence Analysis by Tandem Mass Spectrometry	
<i>Charles R. Hauer, Walter Leimbacher, Peter Hunziker, Frank Neuheiser, Nenad Blau, and Claus W. Heizmann</i>	953
Hepatocyte Growth Factor Is a Paracrine Factor for Renal Epithelial Cells: Stimulation of DNA Synthesis and Na,K-ATPase Activity	
<i>Kenichi Ishibashi, Sei Sasaki, Hisato Sakamoto, Yoshiko Nakamura, Toshihiko Hata, Toshikazu Nakamura, and Fumiaki Marumo</i>	960
A ^1H -NMR Study of the Solution Conformation of Cyclo(GRGDSPA): Conformational Effects on the Physiological Activity	
<i>Ryuta Mizutani, Ichio Shimada, Yukio Ueno, Masafumi Yoda, Hiromichi Kumagai, and Yoji Arata</i>	966
Congenitally Defective Aldosterone Biosynthesis in Humans: The Involvement of Point Mutations of the P-450 _{C18} Gene (CYP11B2) in CMO II Deficient Patients	
<i>Yasuhiro Mitsuuchi, Takeshi Kawamoto, Ariel Rösler, Yasuhiro Naiki, Kaoru Miyahara, Katsumi Toda, Isao Kuribayashi, Tadao Orii, Keigo Yasuda, Kiyoshi Miura, Kazuwa Nakao, Hiroo Imura, Stanley Ulick, and Yutaka Shizuta</i>	974

Volume 182, Number 3, February 14, 1992

Importance of Histidine Residue 25 of Rat Heme Oxygenase for Its Catalytic Activity	
<i>Kazunobu Ishikawa, Michihiko Sato, Mariko Ito, and Tadashi Yoshida</i>	981
Identity of a Differentiation Inhibiting Factor for Mouse Myeloid Leukemia Cells with NM23/Nucleoside Diphosphate Kinase	
<i>Junko Okabe-Kado, Takashi Kasukabe, Yoshio Honma, Moriaki Hayashi, William J. Henzel, and Motoo Hozumi</i>	987
Molecular Cloning of Acetyl Coenzyme A: Deacetylcephalosporin C O-Acetyltransferase cDNA from <i>Acremonium chrysogenum</i> : Sequence and Expression of Catalytic Activity in Yeast	
<i>Akio Matsuda, Hiroyosi Sugiura, Kenji Matsuyama, Hideyuki Matsumoto, Sigeaki Ichikawa, and Ken-ichi Komatsu</i>	995
β -Oxidation of Long-Chain Fatty Acids by Human Fibroblasts: Evidence for a Novel Long-Chain Acyl-Coenzyme A Dehydrogenase	
<i>Richard I. Kelley</i>	1002
Growth Factors Promote Inositol Uptake in BC3H1 Cells	
<i>Gwendolyn Spizz and Linda J. Pike</i>	1008
Evidence for the α -Helicity of Class II MHC Molecular Binding Sites for the Superantigen, Staphylococcal Enterotoxin A	
<i>Jeffrey K. Russell, Michael A. Jarpe, and Howard M. Johnson</i>	1016

Affinity of Integrins for Damaged Extracellular Matrix: $\alpha_v\beta_3$ Binds to Denatured Collagen Type I through RGD Sites	George E. Davis	1025
Identification of Human, Mouse, and Rat Retinoic Acid Receptor α Using Monoclonal Antibodies	Masarrat Ali, Bruce E. Torian, and Wayne V. Vedeckis	1032
Sequence of a Putative Glutathione Synthetase II Gene and Flanking Regions from <i>Anaplasma centrale</i>	Jennifer M. Peters, Brian P. Dalrymple, and Wayne K. Jorgensen	1040
Iron Oxidation by Casein	T. Emery	1047
<i>Bodo caudatus</i> medRNA and 5S rRNA Genes: Tandem Arrangement and Phylogenetic Analyses	David A. Campbell	1053
Cyclic AMP-Dependent Modulation of Cardiac Ca Channels Expressed in <i>Xenopus laevis</i> Oocytes	Philippe Lory and Joel Nargeot	1059
The Exposure of Carcinogen-Initiated Primary Neonatal Rat Hepatocytes to Tumor Promoters Modulates Both the Transcripts and the Enzymatic Activity of Nuclear Poly(ADP-Ribose) Polymerase	U. Armato, Lucia Testolin, Marta Menegazzi, Lia Menapace, Maria Ribecco, Alessandra Carcereri dePrati, M. Miwa, and H. Suzuki	1066
Partial Characterization of the 30-kD Ig-Binding Protein from <i>Pseudomonas maltophilia</i>	Sanjeev Grover and William D. Odell	1075
Cystatin C Secretion by Rat Glomerular Mesangial Cells: Autocrine Loop for <i>in Vitro</i> Growth-Promoting Activity	C. Tavéra, J. Leung-Tack, D. Prévot, M. C. Gensac, J. Martinez, P. Fulcrand, and A. Collé	1082
In the GluR1 Glutamate Receptor Subunit a Glutamine to Histidine Point Mutation Suppresses Inward Rectification But Not Calcium Permeability	Pascale Curutchet, Pascal Bochet, Lia Prado de Carvalho, Bertrand Lambolez, Jacques Stinnakre, and Jean Rossier	1089
Regulation of the Expression of the Rat Angiotensin II Receptor mRNA	Naoharu Iwai and Tadashi Inagami	1094
Induction of Mn-Superoxide Dismutase by Tumor Necrosis Factor, Interleukin-1, and Interleukin-6 in Human Hepatoma Cells	Minoru Ono, Hironobu Kohda, Tetsuo Kawaguchi, Motoyuki Ohhira, Chihiro Sekiya, Masayoshi Namiki, Akira Takeyasu, and Naoyuki Taniguchi	1100
Effects of Inspired Oxygen Concentration on <i>in Vivo</i> Redox Reaction of Nitroxide Radicals in Whole Mice	Yuri Miura, Hideo Utsumi, and Akira Hamada	1108
Concomitant Expression of Receptor Subtype and Isopeptide of Endothelin by Human Adrenal Gland	Taihei Imai, Yukio Hirata, Satoru Eguchi, Kazuo Kanno, Kazuki Ohta, Toshiaki Emori, Aiji Sakamoto, Masashi Yanagisawa, Tomoh Masaki, and Fumiaki Marumo	1115
Tyrosine-7 Is an Essential Residue for the Catalytic Activity of Human Class Pi Glutathione S-Transferase: Chemical Modification and Site-Directed Mutagenesis Studies	Kwang-Hoon Kong, Motohiko Nishida, Hideshi Inoue, and Kenji Takahashi	1122
cDNA Cloning for, and Preparation of, Antibodies against Subunit d of H^+ -ATP Synthase in Rat Mitochondria	Kiyoto Motojima and Tsuneo Imanaka	1130
Reassignment of the Human Macrophage Colony Stimulating Factor Gene to Chromosome 1p13-21	D. L. Saltman, G. M. Dolganov, L. M. Hinton, and M. Lovett	1139

Cyclin A Is Required in S Phase in Normal Epithelial Cells <i>Frédérique Zindy, Eugénia Lamas, Xavier Chenivresse, Joëlle Sobczak, Jian Wang, Didier Fesquet, Berthold Henglein, and Christian Bréchet</i>	1144
Interleukin-10 Inhibits the Induction of Nitric Oxide Synthase by Interferon- γ in Murine Macrophages <i>F. Q. Cunha, S. Moncada, and F. Y. Liew</i>	1155
"Oxidative Stress" Response in Liver of an Untreated Newborn Mouse Having a 1.2- Centimorgan Deletion on Chromosome 7 <i>H.-C. Leonard Liang, Howard G. Shertzer, and Daniel W. Nebert</i>	1160
NADPH: A Stimulatory Cofactor for Nitric Oxide-Induced ADP-Ribosylation Reaction <i>Bernhard Brüne, Stefanie Dimmeler, and Eduardo G. Lapetina</i>	1166
Suboptimal and Optimal Activation Signals Modulate Differently the Expression of HIV-1 and Cytokine Genes <i>Norberto Serpente, Marc Sitbon, and Catherine Vaquero</i>	1172
Functional Expression of Rat M5 Muscarinic Acetylcholine Receptor in Yeast <i>Hao-jen Huang, Ching-fong Liao, Bei-chang Yang, and Tsong-teh Kuo</i>	1180
Evidence for Polyamine Channels in Protoplasts and Vacuoles of <i>Arabidopsis thaliana</i> Cells <i>Roberta Colombo, Raffaella Cerana, and Nello Bagni</i>	1187
Glucose Regulates the Expression of GI-Proteins in Cultured BC3H-1 Myocytes <i>Regina S. Moises and Kim A. Heidenreich</i>	1193
p53 Expression in Brain after Middle Cerebral Artery Occlusion in the Rat <i>Michael Chopp, Yi Li, Zheng G. Zhang, and Svend O. Freytag</i>	1201
Thrombospondin Sequence Motif (CSVTCG) Is Responsible for CD36 Binding <i>Adam S. Asch, Scott Silbiger, Edgar Heimer, and Ralph L. Nachman</i>	1208
Requirement for GLY-60 of <i>Escherichia coli</i> Adenylyl Cyclase for ATP Binding and Catalytic Activity <i>Niranjana Amin and Alan Peterkofsky</i>	1218
Okadaic Acid Inhibits Phosphatidylethanolamine Biosynthesis in Rat Hepatocytes <i>Lilian B. M. Tijburg, Pieter S. Vermeulen, Marion G. J. Schmitz, and Lambert M. G. van Golde</i>	1226
Stimulation of 5-Fluorouracil Metabolic Activation by Interferon- α in Human Colon Carcinoma Cells <i>Edward L. Schwartz, Mark Hoffman, Carolyn J. O'Connor, and Scott Wadler</i>	1232
Ba ²⁺ Current Oscillations Modulated by Cyclic AMP and Phorbol Esters in <i>ras</i> - Transformed Fibroblasts <i>Haruhiro Higashida, Naoto Hoshi, Mami Noda, Mohammad Shahidullah, Minako Hashii, and Yoshinori Nozawa</i>	1240
Purification and Characterization of a New Member of the S-100 Protein Family from Human Placenta <i>Yutaka Emoto, Ryoji Kobayashi, Hajime Akatsuka, and Hiroyoshi Hidaka</i>	1246
Differential Expression of Vimentin in Rat Prostatic Tumors <i>Marion J. G. Bussemakers, Gerald W. C. T. Verhaegh, Adrie van Bokhoven, Frans M. J. Debruyne, and Jack A. Schalken</i>	1254
Rapid Cloning of Rearranged Immunoglobulin Heavy Chain Genes from Human B- Cell Lines Using Anchored Polymerase Chain Reaction <i>Howard Ratech</i>	1260
Acceleration of the Oxygen Reaction in Cu _A -Deficient <i>Nitrosomonas europaea</i> Cytochrome <i>c</i> Oxidase as Revealed by the Flow-Flash Measurement <i>Yutaka Orii, Takeshi Sakamoto, Yoshihiro Fukumori, and Tateo Yamanaka</i>	1264

Characterization of Atrial Natriuretic Peptide in Urine from Rats Treated with a Neutral Endopeptidase Inhibitor	<i>Etsu Suzuki, Yasunobu Hirata, Hiroaki Matsuoka, Tokuichiro Sugimoto, Hiroshi Hayakawa, Tsuneaki Sugimoto, Kenji Kangawa, Naoto Minamino, and Hisayuki Matsuo</i>	1270
Inhibition of the Light-Induced H ⁺ Release from Uncoupled Thylakoid Membranes by N-Ethylmaleimide	<i>Hideo Yamasaki, Shigeki Okayama, Masatoshi Shibata, and Mitsuo Nishimura</i>	1277
FK-506 Binding Protein from <i>Tolypocladium inflatum</i> : Resistance of FKBP/FK-506 Complex against Proteolysis	<i>Chan Lee, Kai Hoffmann, and Rainer Zocher</i>	1282
Inhibition of Selectin-Dependent Tumor Cell Adhesion to Endothelial Cells and Platelets by Blocking O-Glycosylation of These Cells	<i>Naoya Kojima, Kazuko Handa, Walter Newman, and Sen-itiroh Hakomori</i>	1288
Involvement of the "Tethered-Ligand" Receptor in Thrombin Inhibition of Platelet Adenylate Cyclase	<i>Steven M. Seiler, Inge M. Michel, and John W. Fenton II</i>	1296
Brain Nicotinic Receptors Isolated by a Monospecific Antibody against a Synthetic α -3 Subunit Receptor Peptide Compared to a Monoclonal Anti-idiotypic (to Nicotine) Antibody	<i>T. C. Madhok, R. J. Bjercke, J. J. Langone, and B. M. Sharp</i>	1303
THR246 Mutations Decrease Substrate Inhibition in Lactate Dehydrogenase	<i>Roman Sakowicz, Helmut Kallwass, Wendy Parris, Marvin Gold, and J. Bryan Jones</i>	1309
Differential Staining of Human and Murine Chromatin <i>in Situ</i> by Hybridization with Species-Specific Satellite DNA Probes	<i>Heinz-Ulrich G. Weier, Horst F. Zitzelsberger, and Joe W. Gray</i>	1313
Arachidonic Acid Epoxxygenase: Structural Characterization and Quantification of Epoxyeicosatrienoates in Plasma	<i>Armando Karara, Shouzou Wei, David Spady, Larry Swift, Jorge H. Capdevila, and J. R. Falck</i>	1320
Cloning of the <i>Drosophila prospero</i> Gene and Its Expression in Ganglion Mother Cells	<i>Fumio Matsuzaki, Keita Koizumi, Chihiro Hama, Tohru Yoshioka, and Yo-ichi Nabeshima</i>	1326
Selective Changes in Protein Kinase C Isoenzymes in Rat Liver Nuclei during Liver Regeneration	<i>Alice Alessenko, Wasiuddin A. Khan, William C. Wetsel, and Yusuf A. Hannun</i>	1333
Glycosylation of Vascular Endothelial Growth Factor Is Not Required for Its Mitogenic Activity	<i>David Peretz, Hela Gitay-Goren, Michal Safran, Nina Kimmel, Denis Gospodarowicz, and Gera Neufeld</i>	1340
A Metabolite of Acetaminophen Covalently Binds to the 56-kDa Selenium-Binding Protein	<i>Neil R. Pumford, Brian M. Martin, and Jack A. Hinson</i>	1348
The Activation of cAMP-Dependent Protein Kinase Is Directly Linked to the Stimulation of Bone Resorption by Parathyroid Hormone	<i>Hiroshi Kaji, Toshitsugu Sugimoto, Masanori Kanatani, and Masaaki Fukase</i>	1356
Different Receptors Mediate Stimulation of Nitric Oxide-Dependent Cyclic GMP Formation in Neurons and Astrocytes in Culture	<i>Luis Agulló and Agustina García</i>	1362

Biological Activities of Rabbit Antibodies against Synthetic Human Thyrotropin Receptor Peptides Representing Thyrotropin Binding Regions	<i>Shigeki Sakata, Toru Ogawa, Ikuo Matsui, Taghi Manshouri, and M. Zouhair Atassi</i>	1369
Recombinant E-Selectin-Protein Mediates Tumor Cell Adhesion via Sialyl-Lea and Sialyl-Lex	<i>Marja-Leena Majuri, Pirkko Mattila, and Risto Renkonen</i>	1376
Biochemical Properties of Endothelin Converting Enzyme in Renal Epithelial Cell Lines	<i>Junji Takada, Mikiko Hata, Kenji Okada, Kenji Matsuyama, and Mitsuo Yano</i>	1383
Constitutive Expression of c-fos Gene Inhibits Type 1 Collagen Synthesis in Transfected Osteoblasts	<i>Yasuo Kuroki, Shunichi Shiozawa, Toshitsugu Sugimoto, and Takuo Fujita</i>	1389
Acidic Calmodulin Binding Protein, ACAMP-81, Is Marcks Protein Interacting with Synapsin I	<i>Akihiro Mizutani, Hiroshi Tokumitsu, and Hiroyoshi Hidaka</i>	1395
Purification of Recombinant SH2/SH3 Proteins of Phospholipase C- γ 1 and - γ 2 and Their Inhibitory Effect on PIP ₂ -Hydrolysis Induced by Both Types of Phospholipase C- γ	<i>Yoshimi Homma, Yasufumi Emori, and Tadaomi Takenawa</i>	1402
Effects of Activin A and Somatostatin on Intact FSH Secretion and Intracellular Ca ²⁺ Concentration in Human FSH-Secreting Pituitary Adenoma Cells	<i>Koji Takano, Naohide Yamashita, Itaru Kojima, Masafumi Kitaoka, Akira Teramoto, and Etsuro Ogata</i>	1408
Extracellular Signal-Regulated Kinases in T Cells: Characterization of Human ERK1 and ERK2 cDNAs	<i>Hajime Owaki, Robert Makar, Teri G. Boulton, Melanie H. Cobb, and Thomas D. Geppert</i>	1416
Phorbol Ester-Induced Reorganization of the Cytoskeleton in Human Fibroblasts during Ageing in Vitro	<i>Anastassia Derventzi, Suresh I. S. Rattan, and Brian F. C. Clark</i>	1423
Calcium-Activated Potassium Channels in Chondrocytes	<i>M. Grandolfo, P. D'Andrea, M. Martina, F. Ruzzier, and F. Vittur</i>	1429
1,25-Dihydroxycholecalciferol Attenuates Thyrotropin-Stimulated Iodide Accumulation in Rat Thyroid Follicular FRTL-5 Cells by Reducing Iodide Porter Number	<i>Christel Lamberg-Allardt and Elsa Valtonen</i>	1435
Occurrence of Differentiated Keratin Peptide(K1) in Cultured Human Squamous Cell Carcinomas	<i>Yohtaro Katagata, Kazuo Aso, Michihiko Sato, and Tadashi Yoshida</i>	1440
Effect of Chlorpromazine on the smg GDS Action	<i>Yong Sik Kim, Akira Kikuchi, and Yoshimi Takai</i>	1446
Mitochondrial DNA Detection and Copy Number Determination in the Spermatozoa of the Sea Urchin <i>Arbacia lixula</i>	<i>Carla De Giorgi, Alessandro D'Alessandro, and Cecilia Saccone</i>	1454
The Comparative Efficiencies of the Ser(P)-, Thr(P)-, and Tyr(P)-Residues as Specificity Determinants for Casein Kinase-1	<i>Flavio Meggio, John W. Perich, Oriano Marin, and Lorenzo A. Pinna</i>	1460

Phosphorylation of a Surface Receptor Bound Urokinase-Type Plasminogen Activator in a Human Metastatic Carcinomatous Cell Line	<i>Kei Takahashi, Hau C. Kwaan, Kazuho Ikeo, and Enki Koh</i>	1466
Enzymatic Properties of the Phosphorylated Urokinase-Type Plasminogen Activator Isolated from a Human Carcinomatous Cell Line	<i>Kei Takahashi, Hau C. Kwaan, Enki Koh, and Masataka Tanabe</i>	1473
Mutagenesis Studies on the Amino Acid Residues Involved in the Iron-Binding and the Activity of Human 5-Lipoxygenase	<i>Satoshi Ishii, Masato Noguchi, Masashi Miyano, Takashi Matsumoto, and Masana Noma</i>	1482
The Homologous Angiogenin and Ribonuclease N-Terminal Fragments Fold into Very Similar Helices when Isolated	<i>Francisco J. Blanco, M. Angeles Jiménez, Manuel Rico, Jorge Santoro, José Herranz, and José L. Nieto</i>	1491
Characterization of the Unprocessed and Processed Forms of RAB6 Expressed in Baculovirus/Insect Cell Systems	<i>Chenzhi Yang, Véronique Mayau, François Godeau, and Bruno Goud</i>	1499
Characterization of Immunoreactive Endothelin in Human Urine	<i>Koichi Arai, Tomoyuki Koshi, Yuriko Ehara, Toshiyuki Edano, Masao Ohkuchi, Mitsuteru Hirata, and Tetsuro Okabe</i>	1506
ERRATUM		
Volume 180, Number 2, October 31, 1991: Brian Hopkins, Steven J. Powell, Petra Danks, Ian Briggs, and Alexander Graham, "Isolation and Characterisation of the Human Lung NK-1 Receptor cDNA," pp. 1110-1117		1514
Author Index for Volume 182		1515

Volume 183, Number 1, February 28, 1992

Fluorometric Assay of a Calcium-Dependent, Paired-Basic Processing Endopeptidase Present in Insulinoma Granules	<i>Iris Lindberg, Beth Lincoln, and Christopher J. Rhodes</i>	1
Molecular Cloning and Sequencing of the Gene Encoding Human Angiotensin II Type 1 Receptor	<i>Hiroaki Furuta, Deng-Fu Guo, and Tadashi Inagami</i>	8
Demonstration of Receptors for Epidermal Growth Factor on Cultured Rabbit Chondrocytes and Regulation of Their Expression by Various Growth and Differentiation Factors	<i>Akihiro Kinoshita, Masaharu Takigawa, and Fujio Suzuki</i>	14
Biphasic Effect of Oleic Acid on Hepatic Cholesterogenesis	<i>Lauren M. Cagen, Thomas V. Fungwe, Henry G. Wilcox, and Murray Heimberg</i>	21
Angiotensin II Stimulation of the Rat Pituitary Tumoral Cell Proliferation <i>in Vitro</i>	<i>Jolanta Kunert-Radek and Marek Pawlikowski</i>	27
Autophosphorylation of β -Connectin (Titin 2) <i>in Vitro</i>	<i>H. Takano-Ohmuro, Y. Nakauchi, S. Kimura, and K. Maruyama</i>	31
N-Terminal Portion of Motilin Determines Its Biological Activity	<i>P. Poitras, D. Gagnon, and S. St-Pierre</i>	36

Evidence for a Novel Splice Variant of the α Subunit of G_0 in Rat Male Haploid Germ Cells	<i>Trine B. Haugen, Winnie Eskild, and Vidar Hansson</i>	41
Inhibition of IgE-Mediated Histamine Release by Myosin Light Chain Kinase Inhibitors	<i>Seiichi Kitani, Reiko Teshima, Yutaka Morita, Koji Ito, Yuzuru Matsuda, and Yoshiaki Nonomura</i>	48
Effect of Amiloride Analogues on Sodium Transport in Renal Brush Border Membrane Vesicles from Milan Hypertensive Rats	<i>Paolo Parenti, Patrizia Ferrari, Mara Ferrandi, Giorgio M. Hanozet, and Giuseppe Bianchi</i>	55
A Supercoil-Dependent Structural Alteration within the Regulatory Region of the Human Transferrin Receptor Gene	<i>Qian Ouyang and W. Keith Miskimins</i>	62
Purification of the Mitochondrial Citrate Transporter in Yeast	<i>Lars-Olof Persson and Paul A. Srere</i>	70
Characterization of Catechol 2,3-Dioxygenases	<i>Youngsoo Kim, Bongsoo Choi, Jeongrai Lee, Hogil Chang, and Kyung Rak Min</i>	77
Expression of the Heparin-Binding Growth Factor Receptor Genes in Human Megakaryocytic Leukemia Cells	<i>Osamu Katoh, Yutaka Hattori, Takeyuki Sato, Akiro Kimura, Atsushi Kuramoto, Takashi Sugimura, and Masaaki Terada</i>	83
Human Alcohol Dehydrogenase: Dependence of Secondary Alcohol Oxidation on the Amino Acids at Positions 93 and 94	<i>Thomas D. Hurley and William F. Bosron</i>	93
Study of an Antiestrogenic Effect of Retinoic Acid in MCF-7 Cells	<i>Ediz Demirpence, Michel Pons, Patrick Balaguer, and Didier Gagne</i>	100
Sequences of the Botulinal Neurotoxin E Derived from <i>Clostridium botulinum</i> Type E (Strain Beluga) and <i>Clostridium butyricum</i> (Strains ATCC 43181 and ATCC 43755)	<i>Sylvie Poulet, Daniel Hauser, Martin Quanz, Heiner Niemann, and Michel R. Popoff</i>	107
Increase in the ATP Signal after Treatment with Cisplatin in Two Different Cell Lines Studied by ^{31}P NMR Spectroscopy	<i>Kirsten Berghmans, Jesus Ruiz-Cabello, Henry Simpkins, Paul A. Andrews, and Jack S. Cohen</i>	114
Cytosolic Phospholipase A_2 from U937 Cells: Size of the Functional Enzyme by Radiation Inactivation	<i>Nathalie M. Tremblay, Donald Nicholson, Michel Potier, and Philip K. Weech</i>	121
Evidence for Distinct Dibasic Processing Endopeptidases with Lys-Arg and Arg-Arg Specificities in Neurohypophyseal Secretory Granules	<i>Yves Rouille, Anne Spang, Jacqueline Chauvet, and Roger Acher</i>	128
Regiospecific and Enantioselective Metabolism of 8,9-Epoxyeicosatrienoic Acid by Cyclooxygenase	<i>Ji Y. Zhang, Chandra Prakash, Kouwa Yamashita, and Ian A. Blair</i>	138
Calcium Is Required for the Mitogenic Activation of Lymphocytes by Periodic Acid Oxidation	<i>Francis J. Hornicek, George I. Malinin, and Theodore I. Malinin</i>	144
3-Amino-1,2,4-triazole Inhibits Macrophage NO Synthase	<i>Yolande Buchmüller-Rouiller, Pascal Schneider, Sally Betz-Corradin, Josiane Smith, and Jacques Mauël</i>	150
Lysolecithin Actions on Vascular Smooth Muscle Cells	<i>Rudolf Locher, Burkhard Weisser, Thomas Mengden, Claudia Brunner, and Wilhelm Vetter</i>	156

Cloning of Murine and Rat Vascular Cell Adhesion Molecule-1 <i>Catherine Hession, Pamela Moy, Richard Tizard, Patricia Chisholm, Cindy Williams, Mark Wysk, Linda Burkly, Kensuke Miyake, Paul Kincade, and Roy Lobb</i>	163
Thioredoxin Gene Expression Is Transcriptionally Up-Regulated by Retinol in Monkey Conducting Airway Epithelial Cells <i>Gang An and Reen Wu</i>	170
Isolation and Characterization of a Rat Ventricular cDNA Expressed Specifically in Cardiac and Skeletal Muscles <i>Madhu Gupta, Steven P. Smeekens, Mahesh P. Gupta, and Radovan Zak</i>	176
Differential Expression of the Transfected Liver-Specific α_1 -Inhibitor III Gene in Normal Hepatocytes and Hepatoma Cells in Culture <i>K. S. Koch, X. P. Lu, D. A. Brenner, and H. L. Leffert</i>	184
Differential Expression of Cytochrome P450 in Proliferating and Quiescent Cultures of Murine Lung Epithelial Cells <i>John J. Reiniers, Jr., Amy Pavone, Amador R. Cantu, Cathy Auerbach, and Alvin M. Malkinson</i>	193
The Unique N-Terminal Sequence of Testis Angiotensin-Converting Enzyme Is Heavily O-Glycosylated and Unessential for Activity or Stability <i>Mario R. W. Ehlers, Ying-Nan P. Chen, and James F. Riordan</i>	199
The Angiotensin AT ₂ Receptor Stimulates Protein Tyrosine Phosphatase Activity and Mediates Inhibition of Particulate Guanylate Cyclase <i>Serge P. Bottari, Isabelle N. King, Serge Reichlin, Ilse Dahlstroem, Nicholas Lydon, and Marc de Gasparo</i>	206
A Novel Kex2 Enzyme Can Process the Proregion of the Yeast α -Factor Leader in the Endoplasmic Reticulum Instead of in the Golgi <i>Bhabatosh Chaudhuri, Sarah E. Latham, Stephen B. Helliwell, and Peter Seeboth</i>	212
Malignant Transformation of Rat Thyroid Cells Transfected with the Human TSH Receptor cDNA <i>Michael Derwahl, Martina Broecker, Simon Aeschmann, Helmut Schatz, and Hugo Studer</i>	220
Creation of Amyloid Fibrils from Mutant Asn ₁₈₇ Gelsolin Peptides <i>C. P. J. Maury and E-L. Nurmiaho-Lassila</i>	227
Characterization by cDNA Cloning of the mRNA of a New Growth Factor from Bovine Seminal Plasma: Acidic Seminal Fluid Protein <i>F. Wempe, R. Einspanier, and K. H. Scheit</i>	232
Purification of Nitric Oxide Synthase from Bovine Brain: Immunological Characterization and Tissue Distribution <i>H. Ohshima, S. Oguchi, H. Adachi, S. Iida, H. Suzuki, T. Sugimura, and H. Esumi</i>	238
Isolation and Characterization of Recoverin-like Ca ²⁺ -Binding Protein from Rat Brain <i>Ken Takamatsu, Kunio Kitamura, and Tetsuya Noguchi</i>	245
Identification of a Soluble GM-CSF Binding Protein in the Supernatant of a Human Choriocarcinoma Cell Line <i>Ko Sasaki, Shigeru Chiba, Hiroyuki Mano, Yoshio Yazaki, and Hisamaru Hirai</i>	252
Total Synthesis of Horse Heart Cytochrome c <i>Carlo Di Bello, Claudio Vita, and Luigia Gozzini</i>	258
TSH Is Able to Induce Cell Cycle-Related Gene Expression in Rat Thyroid Cell <i>Giulia Colletta and Anna Maria Cirafici</i>	265

The Existence of Activin A/Erythroid Differentiation Factor and Its Inhibitor in Human Serum: Comparison of Normal and Chronic Renal Failure Sera <i>Makoto Shiozaki, Ryosei Sakai, Mari Tabuchi, Masayuki Shinohara, Masaaki Kosaka, Shiro Saito, and Yuzuru Eto</i>	273
Cloning and Increased Expression of an Insulin Receptor Substrate-1-like Gene in Human Hepatocellular Carcinoma <i>Masaki Nishiyama and Jack R. Wands</i>	280
Multifunctional Roles of a Histidine Residue in Human Pancreatic α -Amylase <i>Kazuhiko Ishikawa, Ikuo Matsui, Koichi Honda, and Hiroshi Nakatani</i>	286
Enhancement and Alteration of Bleomycin-Catalyzed Site-Specific DNA Cleavage by Distamycin A and Some Minor Groove Binders <i>Koji Yamamoto and Shosuke Kawanishi</i>	292
PAF-Induced Activation of Polyphosphoinositide-Hydrolyzing Phospholipase C in Cerebral Cortex <i>R. E. Catalán, A. M. Martínez, M. D. Aragonés, I. Fernández, M. Lombardía, and B. G. Miguel</i>	300
Involvement of Lysosomes in Substrate Stabilization of Tryptophan-2,3-dioxygenase in Rat Liver <i>Atsushi Sato, Yaeta Endo, and Yasuo Natori</i>	306
Studies on Cytosolic Guanylate Cyclase from Human Placenta <i>Soha D. Idriss, Renate B. Pilz, Vijay S. Sharma, and Gerry R. Boss</i>	312
Modification of Subsite Lys Residue Induced a Large Increase in Maltosidase Activity of Taka-amylase A <i>Mikihiko Kobayashi, Masami Miura, and Eiji Ichishima</i>	321
Site-Directed Mutagenesis of His-42, His-188, and Lys-263 of Human Aldose Reductase <i>Takashi Yamaoka, Yoshiharu Matsuura, Kamejiro Yamashita, Tsuyoshi Tanimoto, and Chihiro Nishimura</i>	327
A New Type of Hepatitis C Virus in Patients in Thailand <i>Shigehisa Mori, Nobuyuki Kato, Akiko Yagyu, Torahiko Tanaka, Yasuo Ikeda, Bencha Petchclai, Pimol Chiewsilp, Takashi Kurimura, and Kunitada Shimotohno</i>	334
Effects of the <i>flrA</i> Regulatory Locus on Biosynthesis and Excretion of Amino Acids in <i>Escherichia coli</i> B/r <i>Brian A. Nummer, Susan F. Barefoot, and Ellis L. Kline</i>	343
Diversity among the β Subunits of Heterotrimeric GTP-Binding Proteins: Characterization of a Novel β -Subunit cDNA <i>Elisabeth von Weizsäcker, Michael P. Strathmann, and Melvin I. Simon</i>	350

Volume 183, Number 2, March 16, 1992

Effects of Brefeldin A on the Synthesis of Chondroitin 4-Sulfate by Cultures of Mouse Mastocytoma Cells <i>Geetha Sugumaran, Maya Katsman, and Jeremiah E. Silbert</i>	357
The Human Serum Amyloid A Locus SAA4 Is a Pseudogene <i>George H. Sack, Jr.</i>	362
Recovery and Identification of DNA Sequences Harbored in Preserved Ancient Human Bones <i>H. Meijer, W. R. K. Perizonius, and J. P. M. Geraedts</i>	367

Isolation of the Neuropeptide <Glu-Trp-Leu-Lys-Gly-Arg-Phe-NH ₂ (Pol-RFamide II) from the Hydromedusa <i>Polyorchis penicillatus</i> <i>Cornelis J. P. Grimmelikhuijzen, Kenneth L. Rinehart, and Andrew N. Spencer</i>	375
Heparin-Binding Fibronectin Fragments Containing Cell-Binding Domains and Devoid of HEP2 and Gelatin-Binding Domains Promote Human Embryo Fibroblast Proliferation <i>A. D. Zlatopolsky, A. N. Chubukina, and A. E. Berman</i>	383
Tissue-Specific Expression of the Rat Secretin Precursor Gene <i>Mitsuhiro Ohta, Susumu Funakoshi, Toshisuke Kawasaki, and Nobuyuki Itoh</i>	390
Binding of a Phenethyl Ester Analogue of Cholecystokinin to the Solubilized Pancreatic Cholecystokinin Receptor: Use in Ligand-Affinity Chromatography <i>Laurence J. Miller, Elizabeth M. Hadac, Lawrence K. Gates, and Herbert Y. Gaisano</i>	396
Rat Lung Possesses the Mineralocorticoid Receptor <i>M. K. Agarwal and M. Mirshahi</i>	405
Phospholipase C- γ 1 and Phospholipase C- γ 2 Are Substrates of the B Cell Antigen Receptor-Associated Protein Tyrosine Kinase <i>Chaim M. Roifman and Guixi Wang</i>	411
Differential Regulation of Glucose Transporter Gene Expression in Adipose Tissue of Septic Rats <i>Jacqueline M. Stephens, Gregory J. Bagby, Phillip H. Pekala, Raymond E. Shepherd, John J. Spitzer, and Charles H. Lang</i>	417
Expression and Transforming Activity of a Variant of the Heparin-Binding Fibroblast Growth Factor Receptor (<i>flg</i>) Gene Resulting from Splicing of the α -Exon at an Alternate 3'-Acceptor Site <i>Guochen Yan, Fen Wang, Yoshitatsu Fukabori, Daniel Sussman, Jinzhao Hou, and Wallace L. McKeehan</i>	423
Protamine Kinase Phosphorylates Eukaryotic Protein Synthesis Initiation Factor 4E <i>Grayson D. Amick and Zahi Damuni</i>	431
Prostaglandin F2 α Inhibits the Differentiation of Adipocyte Precursors in Primary Culture <i>Ginette Serrero, Nancy M. Lepak, and Stephen P. Goodrich</i>	438
Human Liver Long-Chain 3-Hydroxyacyl-Coenzyme A Dehydrogenase Is a Multifunctional Membrane-Bound β -Oxidation Enzyme of Mitochondria <i>Karen Carpenter, Rodney J. Pollitt, and Bruce Middleton</i>	443
Thiol and Aspartyl Proteolytic Activities in Secretory Vesicles of Bovine Pituitary <i>Claudia S. Toomim and Vivian Y. H. Hook</i>	449
Visinin: Biochemical and Molecular Comparisons in Normal and <i>rd</i> Chick Retina <i>Susan L. Semple-Rowland and Hanke van der Wel</i>	456
Synthesis and Biochemical Properties of an ¹²⁵ I-Labeled Ryanodine Derivative <i>Dale E. Mais, Nancy Bowling, and August M. Watanabe</i>	462
<i>In Vivo</i> Farnesylation of Rat Rhodopsin Kinase <i>Janmeet S. Anant and Bernard K.-K. Fung</i>	468
Epidermal Inhibitory Pentapeptide Phosphorylated <i>in Vitro</i> by Calf Thymus Protein Kinase NII Is Protected from Serum Enzyme Hydrolysis <i>Massimo Bramucci, Antonino Miano, and Domenico Amici</i>	474
The Reducing Activity of S-Aminoethylcysteine Ketimine and Similar Sulfur-Containing Ketimines <i>S. P. Solinas, L. Pecci, G. Montefoschi, and D. Cavallini</i>	481

Differential Regulation of the Imipramine-Sensitive Serotonin Transporter by cAMP in Human JAr Choriocarcinoma Cells, Rat PC12 Pheochromocytoma Cells, and C33-14-B1 Transgenic Mouse Fibroblast Cells	Steven C. King, Anita A. Tiller, Albert Shu-Sen Chang, and Dominic Man-Kit Lam	487
Ear3/COUP-TF Binds Most Tightly to a Response Element with Tandem Repeat Separated by One Nucleotide	Yasunori Kadowaki, Kumao Toyoshima, and Tadashi Yamamoto	492
Plasma Membrane Calcium Pump Expression in Human Placenta and Small Intestine	Alison Howard, Stephen Legon, and Julian R.F. Walters	499
Glycosulfatase Activity of <i>Helicobacter pylori</i> toward Gastric Mucin	B. L. Slomiany, V. L. N. Murty, J. Piotrowski, Y. H. Liao, P. Sundaram, and A. Slomiany	506
Foam Cells from Aorta and Spleen Overexpress Apolipoprotein E in the Absence of Hypercholesterolemia	Piero Crespo, M. Angeles Ros, Jose M. Ordovás, Jose C. Rodriguez, Jose M. Ortiz, and Javier León	514
Insulin-like Growth Factor I Stimulates Transcription of the <i>c-jun</i> Protooncogene in Balb/c 3T3 Cells	Shean-Tai Chiou and Wen-Chang Chang	524
Propidium Iodide Staining Correlates with the Extent of DNA Degradation in Isolated Nuclei	Tessa Crompton, Manuel C. Peitsch, H. Robson MacDonald, and Jürg Tschopp	532
Infertility Induced in Rats by Immunization with Synthetic Peptide Segments of a Sperm Protein	G. Vanage, Y. A. Lu, J. P. Tam, and S. S. Koide	538
Extracellular RGD-Binding Proteins Modulate Cell Adhesion	Angela Ciarrocchi, Mary S. Rieber, and Manuel Rieber	544
Counting Target Molecules by Exponential Polymerase Chain Reaction: Copy Number of Mitochondrial DNA in Rat Tissues	Rudolf J. Wiesner, J. Caspar Rüegg, and Ingo Morano	553
Transforming Growth Factor α Inhibits Glycogen Synthesis and Counteracts the Stimulation by Insulin in Hepatocytes	M. Peak and L. Agius	560
Endothelin and Structurally Related Analogs Distinguish between Endothelin Receptor Subtypes	Robert L. Panek, Terry C. Major, Gary P. Hingorani, Annette M. Doherty, David G. Taylor, and Stephen T. Rapundalo	566
Importance of Secondary Structure for Endothelin Binding and Functional Activity	Robert L. Panek, Terry C. Major, David G. Taylor, Gary P. Hingorani, James B. Dunbar, Annette M. Doherty, and Stephen T. Rapundalo	572
Mutual Assistance of Hydrogen-Bond Pairing and Aromatic Stacking Interactions for Molecular Recognition: Spectroscopic Study on the Interaction of Guanine Base with Cytosine and Tryptophan Molecules	Mariko Tarui, Harumi Furumura, Yayoi Kafuku, Toshimasa Ishida, and Masatoshi Inoue	577
Identification of Guanidino Succinate as a Putative Endogenous Source of the Endothelium-Derived Relaxing Factor	George Thomas and Peter W. Ramwell	584
Protease Inhibitors but Not Proteases Inhibit the Glucose-6-Phosphatase of Native Rat Liver Microsomes	Maria Speth and Hans-Ulrich Schulze	590
Nitric Oxide Can Modify Amino Acid Residues in Proteins	Matsuaki Moriguchi, Lois R. Manning, and James M. Manning	598

The Role of the Exocyclic Amino Groups of Conserved Purines in Hammerhead Ribozyme Cleavage	<i>George Slim and Michael J. Gait</i>	605
Absence of a Putative ATP/GTP Binding Site in the Rat Prolactin Receptor	<i>Makoto Nagano and Paul A. Kelly</i>	610
Is the Osteoclast Calcium "Receptor" a Receptor-Operated Calcium Channel?	<i>C. M. R. Bax, V. S. Shankar, B. S. Moonga, C. L.-H. Huang, and M. Zaidi</i>	619
Developmental Changes in Intestinal Glucose Transporter mRNA Levels	<i>Ken-ichi Miyamoto, Kyoko Hase, Yutaka Taketani, Hisanori Minami, Tatsuzo Oka, Yukihiro Nakabou, and Hiroshi Hagihira</i>	626
Inhibitors of RNA and Protein Synthesis Stabilize Messenger RNA for the RII β Subunit of Protein Kinase A in Different Cellular Compartments	<i>Helle K. Knutsen, Kristin Austlid Taskén, Winnie Eskild, and Vidar Hansson</i>	632
C-Type Natriuretic Peptide Is a Potent Activator of Guanylate Cyclase in Endothelial Cells from Brain Microvessels	<i>Paul Vigne and Christian Frelin</i>	640
Human Mannose-Binding Protein Is Identical to a Component of Ra-Reactive Factor	<i>Misao Matsushita, Akiyoshi Takahashi, Hiromi Hatsuse, Masaya Kawakami, and Teizo Fujita</i>	645
Mitogenic Signal Transduction: A Common Target for Oncogenes That Induce Resistance to Ionizing Radiations	<i>Marco Ruggiero, Franco Casamassima, Lucia Magnelli, Stefania Pacini, Jaqueline H. Pierce, Joel S. Greenberger, and Vincenzo P. Chiarugi</i>	652
DNA Binding Factors Which Interact with the Sp1 Site of the Chicken δ 1-Crystallin Promoter Are Developmentally Regulated	<i>Jorge Alemany, John F. Klement, Teresa Borrás, and Flora De Pablo</i>	659
A Ca ²⁺ Calmodulin-Dependent Kinase Rather than Protein Kinase C Is Involved in Up-Regulation of the LHRH Receptor	<i>Pierre Leblanc, Andrée L' Héritier, and Claude Kordon</i>	666
Molecular Cloning and Characterization of a Novel Rat Activin Receptor	<i>Randy Legerski, Xin Zhou, Julie Dresback, Heidi Eberspaecher, Sandra McKinney, Patricia Segarini, and Benoit de Crombrughe</i>	672
Inefficient <i>in Vitro</i> Splicing of the Regulatory Intron of the L1 Ribosomal Protein Gene of <i>X. laevis</i> Depends on Suboptimal Splice Site Sequences	<i>Elisa Caffarelli, Paola Fragapane, and Irene Bozzoni</i>	680
Characterization of the Promoter Region of the Murine Fibroblast Growth Factor Receptor 1 Gene	<i>Hiroshi Saito, Haruhiko Kouhara, Soji Kasayama, Tadimitsu Kishimoto, and Bunzo Sato</i>	688
Endothelin-1 and Endothelin-3 Stimulate Calcium Mobilization by Different Mechanisms in Vascular Smooth Muscle	<i>P. J. Little, C. B. Neylon, V. A. Tkachuk, and A. Bobik</i>	694
Similarity of the Genomic Structure between the Two Members in a New Family of Heparin-Binding Factors	<i>Ayako Naito, Hiroshi Yoshikura, and Aikichi Iwamoto</i>	701
Direct Activation of Phospholipase A ₂ by GTP-Binding Protein in Human Peripheral Polymorphonuclear Leukocytes	<i>Morihide Ando, Hidehiko Furui, Kenji Suzuki, Fumio Taki, and Kenzo Takagi</i>	708

C-Terminal Truncation of Bovine Protein Disulfide Isomerase Increases Its Activity	<i>Chao-Hong Hu and Chen-Lu Tsou</i>	714
Dual Localization of the Mitochondrial Phospholipase A ₂ : Outer Membrane Contact Sites and Inner Membrane	<i>Christiane Levrat and Pierre Louisot</i>	719
Calmodulin-Binding Proteins of Calcium-Independent Type in Rat Brain Synaptosomal Membranes: Their Localization and Properties	<i>Naoki Natsukari, Akiko Miwa, and Michiya Fujita</i>	725
Proliferation of Hematopoietic Cells Is Accompanied by Suppressed Expression of Heat Shock Protein 70	<i>Wei Zhang, Johannes Drach, Michael Andreeff, and Albert Deisseroth</i>	733
The Gene of Hepatocyte Growth Factor Is Expressed in Fat-Storing Cells of Rat Liver and Is Downregulated during Cell Growth and by Transforming Growth Factor- β	<i>G. Ramadori, K. Neubauer, M. Odenthal, T. Nakamura, T. Knittel, S. Schwögler, and K.-H. Meyer zum Büschenfelde</i>	739
Cloning and Characterization of Two Forms of C-Type Natriuretic Peptide Receptor in Rat Brain	<i>Yoshio Ohyama, Kaoru Miyamoto, Yoshihiko Saito, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo</i>	743
Exon-Skipping Is Responsible for the 9 Amino Acid Residue Deletion Occurring near the N-Terminal of Human β -Casein	<i>Patrice Martin and Christine Leroux</i>	750
The Specific Cytotoxicity of Immunoconjugates Containing Blocked Ricin Is Dependent on the Residual Binding Capacity of Blocked Ricin: Evidence That the Membrane Binding and A-Chain Translocation Activities of Ricin Cannot Be Separated	<i>Victor S. Goldmacher, John M. Lambert, and Walter A. Blättler</i>	758
Verapamil Blocks Basal and Angiotensin II-Induced RNA Synthesis of Rat Aortic Vascular Smooth Muscle Cells	<i>Nabil S. Andrawis and Darrell R. Abernethy</i>	767
Reactivation of Denatured Fungal Glucose-6-phosphate Dehydrogenase and <i>Escherichia coli</i> Alkaline Phosphatase with <i>E. coli</i> Ribosome	<i>Biswadip Das, Subrata Chattopadhyay, and Chanchal Das Gupta</i>	774
Characterization of a Polyclonal Anti-peptide Antibody to the Angiotensin II Type-1 (AT ₁) Receptor	<i>Blanka Zelezna, Elaine M. Richards, Wei Tang, Di Lu, Colin Sumners, and Mohan K. Raizada</i>	781
Tyrosine Phosphorylation and Its Possible Role in Superoxide Production by Human Neutrophils Stimulated with FMLP and IgG	<i>T. Kusunoki, H. Higashi, S. Hosoi, D. Hata, K. Sugie, M. Mayumi, and H. Mikawa</i>	789
Production of Antibodies Specific for Double-Stranded Antigen DNA Cloned from Immune Complexes in Plasma of a SLE Patient	<i>Kunihiko Terada, Susumu Hirose, and Eiji Okuhara</i>	797
Placental Alkaline Phosphatase, a GPI-Anchored Protein, Is Clustered in Clathrin-Coated Vesicles	<i>Ricardo Makiya, Lars-Eric Thornell, and Torgny Stigbrand</i>	803
Intermediate Form of Mucopolysaccharidosis Type II (Hunter Disease): A C ¹³²⁷ to T Substitution in the Iduronate Sulfatase Gene	<i>Kazuko Sukegawa, Shunji Tomatsu, Katsuyuki Tamai, Masako Ikeda, Toshiya Sasaki, Michiya Masue, Seiji Fukuda, Yukiji Yamada, and Tadao Orii</i>	809

Insulin Stimulates Novel Protein Kinase C in Rat Adipocytes <i>Tatsuo Ishizuka, Mayumi Yamamoto, Kazuo Kajita, Toshihiko Nagashima, Keigo Yasuda, Kiyoshi Miura, Denise R. Cooper, and Robert V. Farese</i>	814
Human Intestinal Mucin-like Protein (MLP) Is Homologous with Rat MLP in the C-Terminal Region, and Is Encoded by a Gene on Chromosome 11 p 15.5 <i>G. Xu, L. Huan, I. Khatri, U. S. Sajjan, D. McCool, D. Wang, C. Jones, G. Forstner, and J. Forstner</i>	821
Whole Rat Electron Paramagnetic Resonance Imaging of a Nitroxide Free Radical by a Radio Frequency (280 MHz) Spectrometer <i>Valentina Quaresima, Marcello Alecci, Marco Ferrari, and Antonello Sotgiu</i>	829
Topogenesis of Carboxylesterases: A Rat Liver Isoenzyme Ending in -HTEHT- COOH Is a Secreted Protein <i>Mariette Robbi and Henri Beaufay</i>	836
2'-Amino-2'-deoxyguanosine Is a Cofactor for Self-Splicing in Group I Catalytic RNA <i>Roger Strömberg, Solveig Hahne, Ann-Sofie Sjögren, and Britt-Marie Sjöberg</i>	842
Interaction between Endothelium-Derived Relaxing Factors, S-Nitrosothiols, and Endothelin-1 on Ca ²⁺ Mobilization in Rat Vascular Smooth Muscle Cells <i>Miki Okishio, Shigenori Ohkawa, Yuzo Ichimori, and Koichi Kondo</i>	849
Vacuolar Type H ⁺ -ATPase Genes: Presence of Four Genes Including Pseudogenes for the 16-kDa Proteolipid Subunit in the Human Genome <i>Masahisa Hasebe, Hironori Hanada, Yoshinori Moriyama, Masatomo Maeda, and Masamitsu Futai</i>	856
Thrombin-Induced Calcium Oscillation in Human Platelets and MEG-01, a Megakaryoblastic Leukemia Cell Line <i>Yukio Ozaki, Yutaka Yatomi, Shinichi Wakasugi, Yoshiaki Shirasawa, Hidehiko Saito, and Shoji Kume</i>	864
Differential Localization of Sulfotransferase Isoenzymes in Rat Liver <i>Hiroshi Homma, Izumi Nakagome, and Michio Matsui</i>	872
Oligonucleotides Encapsulated in pH Sensitive Liposomes Are Efficient toward Friend Retrovirus <i>Catherine Ropert, Marc Lavignon, Catherine Dubernet, Patrick Couvreur, and Claude Malvy</i>	879
Molecular Cloning of a cDNA Encoding a Novel Member of the Mouse Glutamate Receptor Channel Family <i>Masatoshi Yamazaki, Kazuaki Araki, Akira Shibata, and Masayoshi Mishina</i>	886
Protein Kinase C Activity in Neonatal Cultured Rat Cardiomyocytes Supplemented with Docosahexaenoic Acid <i>Silvana Hrelia, Pier Luigi Biagi, Edoardo Turchetto, Carlo Alfonso Rossi, and Alessandra Bordoni</i>	893
<i>In Vitro</i> Apolipoprotein B mRNA Editing Activity Can Be Modulated by Fasting and Refeeding Rats with a High Carbohydrate Diet <i>Stanley G. Harris and Harold C. Smith</i>	899

Interaction of Inteferon- α with Interleukin-1 β or Tumor Necrosis Factor- α on Hepatitis B Virus Enhancer Activity	<i>Keisuke Hamasaki, Keisuke Nakata, Kazuhiko Nakao, Satoru Mitsuoka, Takuya Tsutsumi, Yuji Kato, Masayoshi Shima, Nobuko Ishii, Taiki Tamaoki, and Shigenobu Nagataki</i>	904
Molecular Cloning, Sequence Analysis, and Expression of a cDNA Encoding Human Type-1 Angiotensin II Receptor	<i>Ryoichi Takayanagi, Keizo Ohnaka, Yoshiyuki Sakai, Ryusuke Nakao, Toshihiko Yanase, Masafumi Haji, Tadashi Inagami, Hiroaki Furuta, Deng-Fu Gou, Makoto Nakamura, and Hajime Nawata</i>	910
The Human Multidrug Resistance 1 Promoter Has an Element That Responds to Serum Starvation	<i>Hideyuki Tanimura, Kimitoshi Kohno, Shin-ichi Sato, Takeshi Uchiumi, Miki Miyazaki, Michio Kobayashi, and Michihiko Kuwano</i>	917

Volume 183, Number 3, March 31, 1992

Expression of MBP-HCV NS1/E2 Fusion Protein in <i>Escherichia coli</i> and Detection of Anti-NS1/E2 Antibody in Type C Chronic Liver Disease	<i>Eiji Mita, Norio Hayashi, Keiji Ueda, Akinori Kasahara, Hideyuki Fusamoto, Akihisa Takamizawa, Kenichi Matsubara, Hiroto Okayama, and Takenobu Kamada</i>	925
ADP-Ribosylation of Small GTP-Binding Proteins by <i>Bacillus cereus</i>	<i>Ingo Just, Gisela Schallehn, and Klaus Aktories</i>	931
Gene Expression and Immunohistochemical Localization of Basic Fibroblast Growth Factor in Renal Cell Carcinoma	<i>Jiro Eguchi, Koichiro Nomata, Shigeru Kanda, Tsukasa Igawa, Masakatsu Taide, Shigehiko Koga, Fukuzo Matsuya, Hiroshi Kanetake, and Yutaka Saito</i>	937
Generation of Hydroxyl Radical from Linoleic Acid Hydroperoxide in the Presence of Epinephrine and Iron	<i>Kunio Yagi, Naoko Ishida, Sadaaki Komura, Nobuko Ohishi, Masako Kusai, and Masahiro Kohno</i>	945
Tandem Repeat of the 23S and 5S Ribosomal RNA Genes in <i>Borrelia burgdorferi</i> , the Etiological Agent of Lyme Disease	<i>Masahito Fukunaga and Masako Sohnaka</i>	952
Molecular Cloning and Characterization of Type VII Collagen cDNA	<i>Toshihiro Tanaka, Kenzo Takahashi, Fukumi Furukawa, and Sadao Imamura</i>	958
Structural Requirements of C-Type Natriuretic Peptide for Elevation of Cyclic GMP in Cultured Vascular Smooth Muscle Cells	<i>Mayumi Furuya, Yasunori Tawaragi, Yoshiharu Minamitake, Yasuo Kitajima, Kayoko Fuchimura, Shoji Tanaka, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo</i>	964
Interaction of Myosin Subfragment-1 with F- and G-Actin in Equilibrium	<i>Marie-France Carlier and Dominique Didry</i>	970

Expression of Prostaglandin Endoperoxide Synthase-1 in a Baculovirus System <i>Teruhiko Shimokawa and William L. Smith</i>	975
Oxidation of Dithiothreitol during Turnover of Nitric Oxide Reductase: Evidence for Generation of Nitroxyl with the Enzyme from <i>Paracoccus denitrificans</i> <i>Tom Turk and Thomas C. Hollocher</i>	983
Cloning and Characterization of a Human Angiotensin II Type 1 Receptor <i>Derk J. Bergsma, Catherine Ellis, Chandrika Kumar, Parvathi Nuthulaganti, Hans Kersten, Nabil Elshourbagy, Elayne Griffin, Jeffrey M. Stadel, and Nambi Aiyar</i>	989
Analysis of Upstream Sequences of the Human Estrogen Receptor Gene <i>Roberta Piva, Roberto Gambari, Francesco Zorzato, Lakshmi Kumar, and Laura del Senno</i>	996
Identification of the Insulin-like Growth Factor Binding Proteins 5 and 6 in Human Breast Cancer Cells <i>M. Saeed Sheikh, Zhi-Ming Shao, David R. Clemmons, Derek LaRoith, Charles T. Roberts, Jr., and Joseph A. Fontana</i>	1003
A Toxic Protein from <i>Bryonia dioica</i> Jacq. Fruits: The Brydiofin <i>Saturnino M. Muñoz, Stephanie M. Salvarelli, M. Isabel Saiz, and Francisco P. Conde</i>	1011
Cross-Talk between M ₂ Muscarinic and D ₁ Dopamine Receptors in the Cat Adrenal Medulla <i>A. Albillos, F. Abad, and A. G. García</i>	1019
The Genomic Organization of the Rat AT ₁ Angiotensin Receptor <i>Kimberly Langford, Kristen Frenzel, Brian M. Martin, and Kenneth E. Bernstein</i>	1025
Differential Regulation of cAMP by Endogenous versus Transfected Formylpeptide Chemoattractant Receptors: Implications for G _i -Coupled Receptor Signaling <i>Ronald J. Uhing, Tom W. Gettys, Eric Tomhave, Ralph Snyderman, and John R. Didsbury</i>	1033
Detection of Antibodies to Ovine Lentivirus Using a Recombinant Antigen Derived From the <i>env</i> Gene <i>J. Kwang and R. Cutlip</i>	1040
Effect of an Essential Fatty Acid Deficiency on the Phospholipid Composition in Anterior Pituitary Membranes <i>M. L. Alessio, D. E. Wandscheer, M. C. F. Soares, H. Clauser, A. Enjalbert, C. Kordon, and C. L. Léger</i>	1047
Fragmentation of DNA in the Retina of Chicken Embryos Coincides with Retinal Ganglion Cell Death <i>Susanne U. Ilschner and Paul Waring</i>	1056
GMP-140 (P-Selectin) Inhibits Human Neutrophil Activation by Lipopolysaccharide: Analysis by Proton Magnetic Resonance Spectroscopy <i>George L. May, Lindsay C. Dunlop, Krystyna Sztelma, Michael C. Berndt, and Tania C. Sorrell</i>	1062
Insulin and Isoproterenol Induce Phosphorylation of the Particulate Cyclic GMP- Inhibited, Low K _m Cyclic AMP Phosphodiesterase (cGI PDE) in 3T3-L1 Adipocytes <i>Valeria Vasta, Carolyn J. Smith, Juan Calvo, Per Belfrage, and Vincent C. Manganiello</i>	1070
Stem Cell Factor Has Histamine Releasing Activity in Rat Connective Tissue-Type Mast Cells <i>Kazunori Nakajima, Koichi Hirai, Masao Yamaguchi, Toshiaki Takaishi, Ken Ohta, Yutaka Morita, and Koji Ito</i>	1076

Induction and Peak Gene Expression of Insulin-like Growth Factor II Follow That of Myogenin during Differentiation of BC3H-1 Muscle Cells	<i>Eric J. Brown, Don Hsiao, and Stephen M. Rosenthal</i>	1084
Angiotensin II Type-1 Receptor Subtype cDNAs: Differential Tissue Expression and Hormonal Regulation	<i>Sham S. Kakar, Jeffrey C. Sellers, Daniel C. Devor, Lois C. Musgrove, and Jimmy D. Neill</i>	1090
Effects of Gastrin on Cytosolic-Free Ca^{2+} in Individual, Acid-Secreting Rat Parietal Cells	<i>José Luis Cabero, Eva Grapengiesser, Erik Gylfe, Zhao-qi Li, and Sven Mårdh</i>	1097
A Cold-Regulated <i>Arabidopsis</i> Gene Encodes a Polypeptide Having Potent Cryoprotective Activity	<i>Chentao Lin and Michael F. Thomashow</i>	1103
Protein D Is Differentially Expressed and Regulated in the Rat Epididymis	<i>Joseph C. Hall and Nagi G. Reddy</i>	1109
Tissue Angiotensin I-Converting Enzyme Activity in Spontaneously Hypertensive Hamsters	<i>I. Rubinstein, M. Houmsse, R. G. Davis, and J. K. Vishwanatha</i>	1117
Lineage- and Stage-Specific Expression of HOX 1 Genes in the Human Hematopoietic System	<i>Isabelle Vieille-Grosjean, Valérie Roullot, and Gilles Courtois</i>	1124
Structure-Activity Analyses of HIV-1 Reverse Transcriptase	<i>Amaresh Basu, Subhalakshmi Basu, and Mukund J. Modak</i>	1131
Mutations in the P53 Tumor Suppressor Gene in Primary Lung Cancer in Japan	<i>Kazuya Kondo, Atsushi Umemoto, Shigeru Akimoto, Tadashi Uyama, Kenshi Hayashi, Yoshinari Ohnishi, and Yasumasa Monden</i>	1139
Enhanced DNA Synthesis in Rat Hepatoma Cells by Conditioned Media from Kupffer Cells Incubated with Supernatants of Tumor Necrosis Factor- α -Pretreated Hepatocytes	<i>Shohtarō Tsuruta, Keisuke Nakata, Noriaki Ohata, Yoshihiko Gondo, Yoshiaki Sato, Toshihiro Nakayama, Kazuhiko Nakao, Masayoshi Shima, Nobuko Ishii, Toshihiko Koji, and Shigenobu Nagataki</i>	1147
Stimulation of Osteoclastic Bone Resorption by Hydrogen Peroxide	<i>Bridget E. Bax, A.S.M. Towhidul Alam, Bashab Banerji, Christopher M.R. Bax, Peter J. R. Bevis, Clifford R. Stevens, Baljit S. Moonga, David R. Blake, and Mone Zaidi</i>	1153
Nucleotide and Predicted Amino Acid Sequence of a cDNA Clone Encoding Part of Human Transketolase	<i>Mahin Abedinia, Roy Layfield, Sheelagh M. Jones, Peter F. Nixon, and John S. Mattick</i>	1159
AIDS-Associated Kaposi's Sarcoma Cells in Culture Express Vascular Endothelial Growth Factor	<i>Karin Weindel, Dieter Marmé, and Herbert A. Weich</i>	1167
Inhibition of DNA Synthesis by TGF- β 1 Coincides with Inhibition of Phosphorylation and Cytoplasmic Translocation of p53 Protein	<i>Katsuo Suzuki, Tetsuo Ono, and Kazuhide Takahashi</i>	1175
Genomic Differences between O^6 -Methylguanine-DNA Methyltransferase Proficient (MEX ⁺) and Deficient (MEX ⁻) Cell Lines: Possible Role of Genetic and Epigenetic Changes in Conversion of MEX ⁺ into MEX ⁻	<i>Gerhard Fritz and Bernd Kaina</i>	1184
Effect of 17 β -Estradiol on the Generation Time of Old Cells of the Yeast <i>Saccharomyces cerevisiae</i>	<i>Mitsuyoshi Motizuki and Kunio Tsurugi</i>	1191

ET-1-Induced Bronchoconstriction in the Early Phase but Not Late Phase of Anesthetized Dogs Is Inhibited by Indomethacin and ICI 198615 <i>Yoshiyuki Uchida, Motonobu Hamada, Masaaki Kameyama, Hirotaka Ohse, Akihiro Nomura, Shizuo Hasegawa, and Fusao Hirata</i>	1197
Transport of Sulfobromophthalein and Taurocholate in HepG2 Cell Line in Relation to the Expression of Membrane Carrier Proteins <i>Patrizia Marchegiano, Francesca Carubbi, Claudio Tiribelli, Sergio Amarri, Marco Stebel, Gian Carlo Lunazzi, Daniel Levy, and Stefano Bellentani</i>	1203
Reconstitution of Apomyoglobin with Extended Biliverdins <i>Marcelo Fernández, Rosalia B. Frydman, Sara Bari, and Benjamin Frydman</i>	1209
Effects of Epidermal Growth Factor on Glycolysis in A431 Cells <i>Josep Baulida, Rafael Onetti, and Anna Bassols</i>	1216
Apolipoprotein B Genetic Polymorphisms in Several Human Hepatoma-Derived Liver Cell Lines <i>Miguel T. Robinson, Mark R. McCall, Edward Rubin, Stephen Lauer, Michael La Belle, and Trudy M. Forte</i>	1224
Secretion of Insulin-like Growth Factor II into Milk <i>C. G. Prosser and I. R. Fleet</i>	1230
A Lung Type Prostaglandin F Synthase Is Expressed in Bovine Liver: cDNA Sequence and Expression in <i>Escherichia coli</i> <i>Wolfgang Kuchinke, Oleg Barski, Kikuko Watanabe, and Osamu Hayaishi</i>	1238
Protein kinase C β -Isoform Triggers the Formation of Prostanoids and Superoxide in Liver Macrophages <i>Justus Duyster, Hiroyoshi Hidaka, Karl Decker, and Peter Dieter</i>	1247
Effect of a 5 α -Reductase Inhibitor on the Metabolism of 19-Norandrogens by Porcine Leydig Cells <i>J. I. Raeside, R. L. Renaud, and D. E. Marshall</i>	1254
Endothelin Stimulates Cardiac α - and β -Myosin Heavy Chain Gene Expression <i>D. L. Wang, J. J. Chen, N. L. Shin, Y. C. Kao, K. H. Hsu, W. Y. Huang, and C. C. Liew</i>	1260
The 4 β -Methyl Group of Substrate Does Not Affect the Activity of Lanosterol 14 α -Demethylase (P450 _{14DM}) of Yeast: Difference between the Substrate Recognition by Yeast and Plant Sterol 14 α -Demethylases <i>Yuri Aoyama and Yuzo Yoshida</i>	1266
The Complete Nucleotide Sequence of the Gene Coding for the Nontoxic Nonhemagglutinin Component of <i>Clostridium botulinum</i> Type C Progenitor Toxin <i>K. Tsuzuki, K. Kimura, N. Fujii, N. Yokosawa, and K. Oguma</i>	1273
Lipopolysaccharide and Serum Cause the Translocation of G-Protein to the Membrane and Prime Neutrophils via CD14 <i>Kozo Yasui, Elmer L. Becker, and Ramadan I. Sha'afi</i>	1280
Estrogen and Osteoarthritis: A Study of Synovial Estradiol and Estradiol Receptor Binding in Human Osteoarthritic Knees <i>C. L. Tsai, T. K. Liu, and T. J. Chen</i>	1287
Author Index for Volume 183	1292

Volume 184, Number 1, April 15, 1992

Cisplatin-Induced Imbalances in the Pattern of Chimeric Marker Gene Expression in HeLa Cells	<i>Gregory L. Evans and Jay D. Gralla</i>	1
Association of a Polymorphism of the Angiotensin I-Converting Enzyme Gene with Essential Hypertension	<i>Robert Y. L. Zee, Yi-kun Lou, Lyn R. Griffiths, and Brian J. Morris</i>	9
UV Photoelectron and Theoretical Characterization of 2'-Deoxyguanosine-5'-phosphate Valence Electronic Properties: Changes in Structure Associated with the B- to Z-DNA Conformational Transition	<i>Min Yu, Ho Soon Kim, and Pierre R. LeBreton</i>	16
Identification of the Contact Sites of a Factor That Interacts with Motif I (α CE1) of the Chicken α A-Crystallin Lens-Specific Enhancer	<i>Isao Matsuo, Masayuki Takeuchi, and Kunio Yasuda</i>	24
Characterization of a cDNA Clone from the Hemoparasite <i>Babesia bovis</i> Encoding a Protein Containing an "HMG-Box"	<i>Brian P. Dalrymple and Jennifer M. Peters</i>	31
Direct Measurement of Nitric Oxide in Headspace Gas Produced by a Chicken Macrophage Cell Line in a Closed Culture System	<i>Yen-Jen Sung, Joseph H. Hotchkiss, Richard E. Austic, and Rodney R. Dietert</i>	36
The Regulatory Subunit of the Type II cAMP-Dependent Protein Kinase in Rabbit Ovaries Is the RII β Isoform	<i>Victoria Jackiw and Mary Hunzicker-Dunn</i>	43
Production of a Soluble and Secreted Antigenic Fragment of HBsAg in Yeast	<i>Elio Hideo Baba and Ira Berkower</i>	50
Evolutionary Relationship of NAD ⁺ -Dependent D-Lactate Dehydrogenase: Comparison of Primary Structure of 2-Hydroxy Acid Dehydrogenases	<i>Sunil Kochhar, Peter E. Hunziker, Phaik Leong-Morgenthaler, and Herbert Hottinger</i>	60
Lack of Bone Resorption in Osteosclerotic (<i>oc/oc</i>) Mice Is Due to a Defect in Osteoclast Progenitors Rather than the Local Microenvironment Provided by Osteoblastic Cells	<i>Nobuyuki Udagawa, Takahisa Sasaki, Takuhiko Akatsu, Naoyuki Takahashi, Sakae Tanaka, Tatsuya Tamura, Hirofumi Tanaka, and Tatsuo Suda</i>	67
Neurotrophic Factor-like Activity in <i>Drosophila</i>	<i>Izumi Hayashi, Martha Perez-Magallanes, and John M. Rossi</i>	73
Staurosporine Is a Potent Inhibitor of p34 ^{cdc2} and p34 ^{cdc2} -like Kinases	<i>Donna M. Gadbois, Joyce Hamaguchi, Richard A. Swank, and E. Morton Bradbury</i>	80
Identification and Isolation of Endogenous Insect Phenoloxidase Inhibitors	<i>Takuji Tsukamoto, Yoshiki Ichimaru, Naomasa Kanegae, Keiichi Watanabe, Izumi Yamaura, Yoshio Katsura, and Masaru Funatsu</i>	86
Expression of Thymosin β 4 Gene during <i>Xenopus laevis</i> Embryogenesis	<i>Masaya Yamamoto, Akihito Shoda, Naoto Minamino, Hisayuki Matsuo, Shin-ichiro Nishimatsu, Naoto Ueno, and Kazuo Murakami</i>	93

Venous Smooth Muscle Contains Vasoconstrictor ET _B -like Receptors <i>Suzanne Moreland, Diane M. McMullen, Carol L. Delaney, Ving G. Lee, and John T. Hunt</i>	100
Effect of MNU on the Methylation Pattern of Hepatic DNA during Compensatory Cell Proliferation <i>D. Kanduc, A. Aresta, E. Quagliariello, and E. Farber</i>	107
Na ⁺ /H ⁺ Exchange in Porcine Cerebral Capillary Endothelial Cells Is Inhibited by a Benzoylguanidine Derivative <i>Andreas Schmid, Wolfgang Scholz, Hans J. Lang, and Rüdiger Popp</i>	112
Macrophage Arachidonate-Mobilizing Phospholipase A ₂ : Role of Ca ²⁺ for Membrane Binding but Not for Catalytic Activity <i>Jonny Wijkander and Roger Sundler</i>	118
Inhibitors of Glycoprotein Processing Act at an Early Stage of Myogenesis <i>Geralyn C. Trudel and Paul C. Holland</i>	125
Partial Amino Acid Sequence of a Somatostatin Receptor Isolated from GH ₄ C ₁ Pituitary Cells <i>Jeffrey D. Hulmes, Marty Corbett, John R. Zysk, Peter Böhlen, and C. Mark Eppler</i>	131
Structure of Acidic Phospholipase A ₂ for the Venom of <i>Agkistrodon halys blomhoffii</i> at 2.8 Å Resolution <i>Koji Tomoo, Hirofumi Ohishi, Mitsunobu Doi, Toshimasa Ishida, Masatoshi Inoue, Kiyoshi Ikeda, Yasuo Hata, and Yuji Samejima</i>	137
Chemical Modification of L-Asparaginase with a Comb-Shaped Copolymer of Polyethylene Glycol Derivative and Maleic Anhydride <i>Yoh Kodera, Hideki Tanaka, Ayako Matsushima, and Yuji Inada</i>	144
Musk Xylene Is a Novel Specific Inducer of Cytochrome P-450IA2 <i>Nobuhisa Iwata, Ken-ichiro Minegishi, Kazuhiro Suzuki, Yasuo Ohno, Toru Kawanishi, and Atsushi Takahashi</i>	149
Resolution of 9-(<i>c</i> -4, <i>t</i> -5-Bishydroxymethylcyclopent-2-en- <i>r</i> -1-yl)-9 <i>H</i> -adenine and Selective Inhibition of Human Immunodeficiency Virus by the (-) Enantiomer <i>Nobuya Katagiri, Takuya Shiraishi, Hiroshi Sato, Akemi Toyota, Chikara Kaneko, Keisuke Yusa, Tomoko Oh-hara, and Takashi Tsuruo</i>	154
The Impenetrability of 5-(<i>N</i> -Hexadecanoyl)aminofluorescein through Endothelial Cell Monolayers Is Dependent upon Its Solution Properties, Not the Presence of Tight Junctions <i>Donna Beer Stolz, Mÿ G. Mahoney, and Bruce S. Jacobson</i>	160
HSP70 Binds Specifically to a Peptide Derived from the Highly Conserved Domain (I) Region of p53 <i>Kelvin T. Lam and Stuart K. Calderwood</i>	167
Two γ-Subunit, γ-I and γ-II, Complex with the Same β-Subunits in Bovine Brain G- Proteins (Gi/o) <i>Hitoshi Sohma, Hideki Hashimoto, Hiroshi Ohguro, and Toyooki Akino</i>	175
ω-Hydroxylation of Z9-Octadecenoic, Z9,10-Epoxy stearic, and 9,10-Dihydroxystearic Acids by Microsomal Cytochrome P450 Systems from <i>Vicia sativa</i> <i>Franck Pinot, Jean-Pierre Salaün, Hubert Bosch, Agnès Lesot, Charles Mioskowski, and Francis Durst</i>	183

Tyrosine-7 in Human Class Pi Glutathione S-Transferase Is Important for Lowering the pK_a of the Thiol Group of Glutathione in the Enzyme-Glutathione Complex <i>Kwang-Hoon Kong, Kazue Takasu, Hideshi Inoue, and Kenji Takahashi</i>	194
Activation of Calcium Channel by Shear-Stress in Cultured Renal Distal Tubule Cells <i>Katsumasa Kawahara and Kenzo Matsuzaki</i>	198
Direct Involvement of the C-Terminal Extremity of Pancreatic Lipase (403-449) in Colipase Binding <i>Catherine Chaillan, Brigitte Kerfelec, Edith Foglizzo, and Catherine Chapus</i>	206
The Phosphorylation of Retinoblastoma Gene Product in Human Myeloid Leukemia Cells during the Cell Cycle <i>Wei Zhang, Walter Hittelman, Nguyen Van, Michael Andreeff, and Albert Deisseroth</i>	212
The Second Messenger Pathway for Germ Cell-Mediated Stimulation of Sertoli Cells <i>Michael J. Welsh and Mark E. Ireland</i>	217
Receptor-Mediated Formation of Multilayer Aggregates of Primary Cultured Adult Rat Hepatocytes on Lactose-Substituted Polystyrene <i>Seishiro Tobe, Yuka Takei, Kazukiyo Kobayashi, and Toshihiro Akaike</i>	225
Endothelin-1 Stimulates c-fos mRNA Expression and Acts as a Modulator on Cell Proliferation of Rat FRTL5 Thyroid Cells <i>Megumi Miyakawa, Toshio Tsushima, Osamu Isozaki, Hiroshi Demura, Kazuo Shizume, and Mariko Arai</i>	231
Interaction of Caldesmon and Myosin Subfragment 1 with the C-Terminus of Actin <i>Rachelle H. Crosbie, Joseph M. Chalovich, and Emil Reisler</i>	239
cDNA Cloning and Structure of Mouse Putative Ah Receptor <i>M. Ema, K. Sogawa, N. Watanabe, Y. Chujoh, N. Matsushita, O. Gotoh, Y. Funae, and Y. Fujii-Kuriyama</i>	246
Selenocysteyl-tRNAs Recognize UGA in <i>Beta vulgaris</i> , a Higher Plant, and in <i>Gliocladium virens</i> , a Filamentous Fungus <i>Dolph Hatfield, In Soon Choi, Sue Mischke, and L. D. Owens</i>	254
Cloning and Pharmacological Characterization of a Human Bradykinin (BK-2) Receptor <i>J. Fred Hess, Joseph A. Borkowski, Gretchen S. Young, Catherine D. Strader, and Richard W. Ransom</i>	260
Some Properties of a Partially Purified Inhibitor of Protein Synthesis Isolated from Bovine Cornea <i>Joseph M. Wu and Anthony Herp</i>	269
Molecular Cloning of a Subtilisin J Gene ⁺ from <i>Bacillus stearothermophilus</i> and Its Expression in <i>Bacillus subtilis</i> <i>Jeong Su Jang, Dae Ook Kang, Moon Jin Chun, and Si Myung Byun</i>	277
Protein Kinase C mRNA Levels and Activity in Reconstituted Normal Human Epidermis: Relationships to Cell Differentiation <i>Roberto Gherzi, Bianca Sparatore, Mauro Patrone, Andrea Sciutto, and Paola Briata</i>	283
Dynamics of Gene Expression for Microtubule-Associated Protein MAP1B, Embryonic α -Tubulin and Late Neural β -Tubulin mRNAs in the Hippocampus of Aged Rats <i>Aurel Popa Wagner, Gunhild Reck, and Dieter Platt</i>	292
Role of CFTR in Lysosome Acidification <i>Rebecca W. Van Dyke, Karen V. Root, James H. Schreiber, and James M. Wilson</i>	300
The Functional Role of Tyrosine-200 in Human Testis Angiotensin-Converting Enzyme <i>Ying-Nan P. Chen, Mario R. W. Ehlers, and James F. Riordan</i>	306

Molecular Cloning and Binding Properties of the Human Type II Activin Receptor <i>Cynthia J. Donaldson, Lawrence S. Mathews, and Wylie W. Vale</i>	310
Evidence for Possible Structural Changes of Particular H3 and H2B Histone Genes in Different Chicken Tissues (Cells) <i>Tatsuo Nakayama and Yoshiko Setoguchi</i>	317
Peptide Amidating Enzymes Are Present in Cultured Endothelial Cells <i>Charlie D. Oldham, Cuizhen Li, Peggy R. Girard, Robert M. Nerem, and Sheldon W. May</i>	323
Improved Gene Expression by a U3-Based Retroviral Vector <i>Bing-Fang Chen, Chia-Ling Hsieh, Ding-Shinn Chen, and Lih-Hwa Hwang</i>	330
Exocyclic-Keto Reductase Activities for Progesterone and S-Warfarin in Hepatic Microsomes from Adult Male Rats <i>Don Apanovitch, Sutisak Kitareewan, and Frederick G. Walz, Jr.</i>	338
Differential Recognition of Secretory Vesicles by Annexins <i>Carl E. Creutz, Stephen Moss, J. Michael Edwardson, Izumi Hide, and Bastien Gomperts</i>	347
Ca ²⁺ -Channels and Adrenoceptors in Diabetic Skeletal Muscle <i>Sheu L. Lee and Naranjan S. Dhalla</i>	353
Biological Activities of Thionated Thyrotropin-Releasing Hormone Analogs <i>Leszek Lankiewicz, Cyril Y. Bowers, G. A. Reynolds, Virender Labroo, Louis A. Cohen, Stefan Vonhof, Anna-Leena Sirén, and Arno F. Spatola</i>	359
Differential Regulation of Thyrotropin-Releasing Hormone Receptor mRNA Levels by Thyroid Hormone <i>in Vivo</i> and <i>in Vitro</i> (GH3 Cells) <i>Masanobu Yamada, Tuyoshi Monden, Teturou Satoh, Masahiko Iizuka, Masami Murakami, Tokuji Iriuchijima, and Masatomo Mori</i>	367
Human Fibroblast Cells Synthesize and Secrete Nerve Growth Factor in Culture <i>Katsuhito Murase, Yutaka Murakami, Kaori Takayanagi, Yoshiko Furukawa, and Kyoze Hayashi</i>	373
Cysteamine Selectively Enhances Neuropeptide Y ₂ Receptor Binding Activity <i>Wei Li and Terry D. Hexum</i>	380
Evidence for a Fourth Rat Isoform of the Plasma Membrane Calcium Pump in the Kidney <i>Juan M. Gonzalez, William Dalmeida, Joel Abramowitz, and Wadi N. Suki</i>	387
Hsp85 Conformational Change within the Heat Shock Temperature Range <i>Karl W. Lanks, Erwin London, and Dennis Long-Yu Dong</i>	394
Further Analysis of a Transcript Nested within the Actin 5C Gene of <i>Drosophila melanogaster</i> <i>J. Papa Rao and Ann Sodja</i>	400
Inhibition by Mepacrine of Amylase Secretion from Intact and Permeabilized Rat Pancreatic Acini <i>K. Grosfils, F. Gomez, and J. P. Dehaye</i>	408
ADPRibosylation of Chicken Red Cell Tubulin and Inhibition of Microtubule Self- Assembly <i>in Vitro</i> by the NAD ⁺ -Dependent Avian ADPRibosyl Transferase <i>Nadia Raffaelli, Robin M. Scaife, and Daniel L. Purich</i>	414
Isolation and Characterization of Possible Target Proteins Responsible for Neurite Outgrowth Induced by a Tripeptide Aldehyde in PC12H Cells <i>Yumiko Saito, Satoshi Tsubuki, Hisashi Ito, and Seiichi Kawashima</i>	419

Pleiotrophin Gene Expression Is Highly Restricted and Is Regulated by Platelet-Derived Growth Factor	<i>Yue-Sheng Li, Maria Gurrieri, and Thomas F. Deuel</i>	427
Increased Protein Kinase C Activity in the Central Nervous System of the Newt during Limb Regeneration	<i>Mustapha Oudkhir, Isabelle Martelly, Benoni Boilly, and Monique Castagna</i>	433
Skew Orientation of Biological Samples <i>Anacystis nidulans</i> Cyanobacteria and Their Fragments in a Polymer Matrix	<i>D. Frackowiak, A. Skibinski, B. Zelent, and R. M. Leblanc</i>	441
Fumarate Reductase System of Filarial Parasite <i>Setaria digitata</i>	<i>L. S. Unnikrishnan and R. Kaleysa Raj</i>	448
Half-Lives of Different Sized mRNAs for the PKA Subunit R1 α Are Regulated Differently in Response to Inhibition of Transcription and Translation	<i>Helle K. Knutsen, Kristin Austlid Taskén, Winnie Eskild, Tore Jahnsen, and Vidar Hansson</i>	454
Carriers of the Mouse <i>rd</i> Gene Have Reduced Levels of the β Subunit of the Retinal Cyclic GMP Phosphodiesterase	<i>Jess Cunnick and Dolores J. Takemoto</i>	461
Thymidine Inhibits the Incorporation of 5-Fluoro-2'-deoxyuridine to DNA of Mouse Mammary Tumor	<i>R. Nayak</i>	467
Expression and Transport into Mitochondria of Bovine Cytochrome P-450(SCC) in Insect Cells Using the Baculovirus Expression System	<i>Yasumitsu Takagi, Hisamitsu Ogawa, Nobuhiro Harada, Hideo Shimada, Yuzuru Ishimura, and Yasuyuki Takagi</i>	471
Identity Determinants of <i>Escherichia coli</i> Threonine tRNA	<i>Tsunemi Hasegawa, Masaaki Miyano, Hyouta Himeno, Yoichi Sano, Koichi Kimura, and Mikio Shimizu</i>	478
Tryptophan Residue of Trp-Ser-X-Trp-Ser Motif in Extracellular Domains of Erythropoietin Receptor Is Essential for Signal Transduction	<i>Tomoki Chiba, Hiroshi Amanuma, and Kazuo Todokoro</i>	485
Testosterone Destroys the Transcortin-Receptor Complex	<i>Sergey A. Krupenko and Oleg A. Strel' chyonok</i>	491
Intracellular Distribution of Endothelin-1 Receptors in Rat Liver Cells	<i>Berthold Hocher, Christoph Rubens, Johannes Hensen, Peter Gross, and Christian Bauer</i>	498
BQ-123, Cyclo(-D-Trp-D-Asp-Pro-D-Val-Leu), Is a Noncompetitive Antagonist of the Actions of Endothelin-1 in SK-N-MC Human Neuroblastoma Cells	<i>C. Robin Hiley, David J. Cowley, John T. Pelton, and Andrew C. Hargreaves</i>	504
Presence of Paralytic Shellfish Poisoning Toxins and Soluble Proteins in Toxic Butter Clams (<i>Saxidomus giganteus</i>)	<i>D. D. Kitts, D. S. Smith, M. K. Beitler, and J. Liston</i>	511
Endothelin-1 Inhibits and Enhances Contraction of Porcine Coronary Arterial Strips with an Intact Endothelium	<i>Masuko Ushio-Fukai, Junji Nishimura, Hiroki Aoki, Sei Kobayashi, and Hideo Kanaide</i>	518

The Direct Involvement of cAMP-Dependent Protein Kinase in the Regulation of Collagen Synthesis by Parathyroid Hormone (PTH) and PTH-Related Peptide in Osteoblast-like Osteosarcoma Cells (UMR-106)	<i>Junichi Kano, Toshitsugu Sugimoto, Masaaki Fukase, and Kazuo Chihara</i>	525
The Localization, Partial Purification, and Regulation of Pea Plastid HMG-CoA Reductase	<i>Theresa M. Wilson and David W. Russell</i>	530
Characterization of "Depolarization"-Induced Calcium Release from Sarcoplasmic Reticulum <i>in Vitro</i> with the Use of Membrane Potential Probe	<i>Noriaki Ikemoto, Bozena Antoniu, and Jaw-Jou Kang</i>	538
The α -Glycosidic Bonds of Poly(ADP-Ribose) Are Acid-Labile	<i>Phyllis L. Panzeter, Barbara Zweifel, and Felix R. Althaus</i>	544
ERRATUM		
Volume 182, Number 2, January 31, 1992: Grethe Skretting and Hans Prydz, "An Amino Acid Exchange in Exon I of the Human Lecithin: Cholesterol Acyltransferase (LCAT) Gene Is Associated with Fish Eye Disease," pp. 583-587		549

Volume 184, Number 2, April 30, 1992

Synergistic Action of Tiazofurin and Difluorodeoxycytidine on Differentiation and Cytotoxicity	<i>Jasna Ban and George Weber</i>	551
Additive Enhancement of Neutrophil Collagenase Activity by HOCl and Cathepsin G	<i>W. Winn Chatham, Warren D. Blackburn, Jr., and Louis W. Heck</i>	560
Downstream Region of the Human Tyrosinase-Related Protein Gene Enhances Its Promoter Activity	<i>Koushi Shibata, Kazuhisa Takeda, Yasushi Tomita, Hachiro Tagami, and Shigeki Shibahara</i>	568
Analysis of Carrot Genes for Proliferating Cell Nuclear Antigen Homologs with the Aid of the Polymerase Chain Reaction	<i>Shingo Hata, Toshiro Tsukamoto, Takashi Osumi, Junji Hashimoto, and Iwao Suzuka</i>	576
Isolation of a cDNA That Encodes a Novel Granulocyte N-Formyl Peptide Receptor	<i>Richard D. Ye, Stacey L. Cavanagh, Oswald Quehenberger, Eric R. Prossnitz, and Charles G. Cochrane</i>	582
Evolutionary Grouping of the Transforming Growth Factor- β Superfamily	<i>David W. Burt</i>	590
Structure of the Human α -2 Macroglobulin Gene and Its Promotor	<i>Gert Matthijs, Koen Devriendt, Jean-Jacques Cassiman, Herman Van den Berghe, and Peter Marynen</i>	596
Isolation and Sequencing of a cDNA Clone Encoding the 85-kDa Human Lysosomal Sialoglycoprotein (hLGP85) in Human Metastatic Pancreas Islet Tumor Cells	<i>Hideaki Fujita, Yutaka Takata, Akira Kono, Yoshitaka Tanaka, Takeshi Takahashi, Masaru Himeno, and Keitaro Kato</i>	604
Prediction and Fourier Transform Infrared Spectroscopy Estimation of the Secondary Structure of a <i>Bacillus licheniformis</i> Endo- β -1,3-1,4-D-Glucanase	<i>Enrique Querol, Esteve Padrós, Miquel Juncosa, Antoni Planas, and Jorge Lloberas</i>	612

Differential Expression of DNA Topoisomerase I Gene between CPT-11 Acquired- and Native-Resistant Human Pancreatic Tumor Cell Lines: Detected by RNA/PCR-Based Quantitation Assay	<i>Sachi Takeda, Takao Shimazoe, Keiki Sato, Yoshikazu Sugimoto, Takashi Tsuruo, and Akira Kono</i>	618
Carbachol Stimulation of Triacylglycerol Lipase Activity in Pancreatic Acinar Cells	<i>Thomas R. Hundley and Ronald P. Rubin</i>	626
Identification of <i>Escherichia coli</i> Proteins Cross-Reacting with Antibodies against Region 2.2 Peptide of RNA Polymerase σ Subunit	<i>Rei Ueshima, Nobuyuki Fujita, and Akira Ishihama</i>	634
Molecular Cloning and Nucleotide Sequence of Leukocidin F-Component Gene (<i>lukF</i>) from Methicillin Resistant <i>Staphylococcus aureus</i>	<i>Arifur Rahman, Hirobumi Nariya, Kazuo Izaki, Iwao Kato, and Yoshiyuki Kamio</i>	640
Arachidonic Acid Induces an Increase in the Cytosolic Calcium Concentration in Single Pancreatic Islet β Cells	<i>Sasanka Ramanadham, Richard Gross, and John Turk</i>	647
D-Galactosamine-Induced Cell Damage Enhances Specific Binding of Prostaglandin E_1 to Rat Hepatocytes	<i>Masami Matsumoto, Eiryo Kikuchi, Yasuyuki Okamoto, Masashi Morimura, Hiroyuki Kitano, Hiroshi Fukui, Hiroshi Nakano, and Tadasu Tsujii</i>	654
Production and Characterization of a Monoclonal Antibody to Dopamine D2 Receptor: Comparison with a Polyclonal Antibody to a Different Epitope	<i>Shakeel M. Farooqui, Chandan Prasad, and Massarat Ali</i>	661
Molecular Cloning and Serological Characterization of a New <i>Plasmodium vivax</i> Recombinant Antigen Which Contains Apolipoprotein B-100-like Sequences	<i>Pratima Ray and Y. D. Sharma</i>	668
Barbiturates Suppress Glucose Utilization by Inhibition of Hexokinase in Neuroblastoma Cells	<i>Hiroshi Okazaki, Hidenori Tokuda, Kyoko Ishii, and Sadahiko Ishibashi</i>	673
Differential Distribution of Nitric Oxide Synthase between Cell Fractions Isolated from the Rat Gastric Mucosa	<i>J. F. Brown, B. L. Tepperman, P. J. Hanson, B. J. R. Whittle, and S. Moncada</i>	680
Covalent Modification of Alzheimer's Amyloid β -Peptide in Formic Acid Solutions	<i>Ron Orlando, Peter T. M. Kenny, and Michael G. Zagorski</i>	686
Characterization of the pH-Mediated Solubility of <i>Bacillus thuringiensis</i> var. <i>san diego</i> Native δ -Endotoxin Crystals	<i>C. N. Koller, L. S. Bauer, and R. M. Hollingworth</i>	692
A New Peptide (1150 Da) Selectively Activates the Calcium-Calmodulin Sensitive Isoform of Cyclic Nucleotide Phosphodiesterase from Human Myometrium	<i>M. J. Leroy, I. Dumler, C. Lugnier, N. D. Shushakova, and F. Ferré</i>	700
Site-Specific Mutagenesis of Two Histidine Residues in Fatty Acid Ethyl Ester Synthase-III	<i>Puran S. Bora, Xiaolin Wu, and Louis G. Lange</i>	706
Interleukin-1 β Stimulates Cytosolic Phospholipase A_2 in Rheumatoid Synovial Fibroblasts	<i>Keren I. Hulkower, William C. Hope, Ting Chen, Celia M. Anderson, John W. Coffey, and Douglas W. Morgan</i>	712

Mechanism of Inhibition of Cholinesterases by Huperzine A	
<i>Yacov Ashani, James O. Peggins III, and Bhupendra P. Doctor</i>	719
Endocytosis of Superoxide Dismutase by Rat Liver	
<i>Li Li, Simone Wattiaux-De Coninck, and Robert Wattiaux</i>	727
cDNA Cloning of a Human 25-kDa FK506 and Rapamycin Binding Protein	
<i>Deborah T. Hung and Stuart L. Schreiber</i>	733
Developmental Expression of mRNAs from a Rat C-erbA Genomic Locus	
<i>E. A. Jannini, T. Mitsuhashi, and V. M. Nikodem</i>	739
Effects of Congenital Hyperammonemia on the Cerebral and Hepatic Levels of the Intermediates of Energy Metabolism in spf Mice	
<i>L. Ratnakumari, Ijaz A. Qureshi, and Roger F. Butterworth</i>	746
Molecular Cloning and Functional Characterization of a Human 5-HT _{1B} Serotonin Receptor: A Homologue of the Rat 5-HT _{1B} Receptor with 5-HT _{1D} -like Pharmacological Specificity	
<i>Mark W. Hamblin, Mark A. Metcalf, Robert W. McGuffin, and Sharon Karpells</i>	752
Demonstration of a Boar Testicular Protein Band That Is Immunoreactive to Proacrosin and Proacrosin Binding Protein Antibodies	
<i>Lee S. H. Yi, Christine M. Runion, and Kenneth L. Polakoski</i>	760
Marine Sponge Polyketide Inhibitors of Protein Tyrosine Kinase	
<i>Rita H. Lee, Doris L. Slate, Robert Moretti, Khisal A. Alvi, and Phillip Crews</i>	765
Fucoidan Is a Nonanticoagulant Inhibitor of Intimal Hyperplasia	
<i>Timothy A. McCaffrey, Domenick J. Falcone, Wolfgang Borth, Cory F. Brayton, and Babette B. Weksler</i>	773
Mathematical Models for the Cellular Concentrations of Cyclin and MPF	
<i>Mandri N. Obeyesekere, Susan L. Tucker, and Stuart O. Zimmerman</i>	782
Minimal Sequence Requirement of Thrombin Receptor Agonist Peptide	
<i>Kwan Y. Hui, Joseph A. Jakubowski, Virginia L. Wyss, and Eddie L. Angleton</i>	790
Sugar-Modified Oligonucleotides: Synthesis, Nuclease Resistance, and Base Pairing of Oligodeoxynucleotides Containing 1-(4'-Thio- β -D-ribofuranosyl)-thymine	
<i>Laurent Bellon, François Morvan, Jean-Louis Barascut, and Jean-Louis Imbach</i>	797
Hypotonic Solution Increases the Slowly Activating Potassium Current I _{SK} Expressed in <i>Xenopus</i> Oocytes	
<i>Andreas E. Busch, Michael Varum, John P. Adelman, and R. Alan North</i>	804
Identification of Three Types of PDGF-A Chain Gene Transcripts in Rabbit Vascular Smooth Muscle and Their Regulated Expression during Development and by Angiotensin II	
<i>Ken-ichi Nakahara, Hiroshi Nishimura, Makoto Kuro-o, Shun-ichi Takewaki, Misaki Iwase, Akiyuki Ohkubo, Yoshio Yazaki, and Ryoza Nagai</i>	811
The Purification and Properties of Cancer Procoagulant from Murine Tumors	
<i>William R. Moore</i>	819
c-Myc Expression Is Down-Regulated by Cell-Cell and Cell-Extracellular Matrix Contacts in Normal Hepatocytes, but Not in Hepatoma Cells	
<i>Naoki Shimbara, Makoto Takashina, Chiharu Sato, Masahiko Iizuka, Shigeyasu Kobayashi, Keiji Tanaka, and Akira Ichihara</i>	825

Glial Cells as a Model for the Role of Cobalamin in the Nervous System: Impaired Synthesis of Cobalamin Coenzymes in Cultured Human Astrocytes following Short-Term Cobalamin-Deprivation	<i>Ewa H. Pezacka, Donald W. Jacobsen, Kathy Luce, and Ralph Green</i>	832
Intracellular Histamine and Liver Regeneration: High Affinity Binding of Histamine to Chromatin, Low Affinity Binding to Matrix, and Depletion of a Nuclear Storage Pool following Partial Hepatectomy	<i>Lorne J. Brandes, R. Patricia Bogdanovic, Jiangang Tong, James R. Davie, and Frank S. LaBella</i>	840
Sequence Analysis of Leukocyte Chemoattractant Peptides Secreted by Periovarian Ovine Follicles	<i>William J. Murdoch and Richard J. McCormick</i>	848
Affinity of a Highly Repetitive Bent DNA for Nuclear Scaffold Proteins from Rat Liver	<i>Yasuhide Hibino, Kouichi Nakamura, Satoshi Asano, and Nobuhiko Sugano</i>	853
Molecular Cloning and Sequencing of cDNA Encoding Urinary Stone Protein, Which Is Identical to Osteopontin	<i>Kenjiro Kohri, Yasuyuki Suzuki, Koji Yoshida, Kazuhiko Yamamoto, Naoya Amasaki, Takanori Yamate, Tohru Umekawa, Masanori Iguchi, Hyogo Sinohara, and Takashi Kurita</i>	859
Deletion of C-Terminal 12 Amino Acids of GLUT1 Protein Does Not Abolish the Transport Activity	<i>Jiann-Liang Lin, Tomoichiro Asano, Hideki Katagiri, Katsunori Tsukuda, Hisamitsu Ishihara, Kouichi Inukai, Yoshio Yazaki, and Yoshitomo Oka</i>	865
Effects of Focal Cerebral Ischemia on Inositol 1,4,5-Trisphosphate 3-Kinase and 5-Phosphatase Activities in Rat Cortex	<i>T-A. Lin, T-N. Lin, Y. Y. He, C. Y. Hsu, and G. Y. Sun</i>	871
Effects of CCK-8 on the Cytoplasmic Free Calcium Concentration in Isolated Rat Islet Cells	<i>T. Fridolf, S. Karlsson, and B. Ahrén</i>	878
Mutational Analysis Reveals Only One Catalytic Histidine in Neutral Endopeptidase ("Enkephalinase")	<i>Young-Ae Kim, Brent Shriver, and Louis B. Hersh</i>	883
A Unique Secretory Behavior for GP2 in the Exocrine Pancreas	<i>L. Laforest, P. St-Jean, and A. R. Beaudoin</i>	888
Cyclic AMP-Dependent Phosphorylation of the Inositol-1,4,5-Trisphosphate Receptor Inhibits Ca^{2+} Release from Platelet Membranes	<i>Todd M. Quinton and William L. Dean</i>	893
Photolabeled Sites with a Tetrodotoxin Derivative in the Domain III and IV of the Electrophysiological Sodium Channel	<i>Hitoshi Nakayama, Yasumaru Hatanaka, Eiichi Yoshida, Kozo Oka, Mayumi Takanohashi, Yuuka Amano, and Yuichi Kanaoka</i>	900
Transcription Initiation and Temporal Expression of Thymidine Kinase mRNA in Chinese Hamster Cells	<i>Jean M. Gudas</i>	908
Ionophore-Induced Cl^- Transport in Human Erythrocyte Suspensions. A Multinuclear Magnetic Resonance Study	<i>Lisa Wittenkeller, Duarte Mota de Freitas, and Ravichandran Ramasamy</i>	915
Rat KC cDNA Cloning and mRNA Expression in Lung Macrophages and Fibroblasts	<i>Songliu Huang, Joseph D. Paulauskis, and Lester Kobzik</i>	922
Selective Binding to AT Sequences in DNA by an Acridine-Linked Peptide Containing the SPKK Motif	<i>Fabrice Bailly, Christian Bailly, Michaël J. Waring, and Jean-Pierre Hénichart</i>	930

A Genetically Engineered Purpurin/Retinol-Binding Protein Hybrid That Binds to Transthyretin	<i>Håkan Melhus and Lars Rask</i>	938
Heterogeneity of 3' Untranslated Region of Bovine Acidic FGF Transcripts	<i>Flore Renaud, Sophie Desset, Kuyas Bugra, Cécile Halley, Jean-Marc Philippe, Yves Courtois, and Maryvonne Laurent</i>	945
A Potent and Specific Agonist, Suc-[Glu ⁹ ,Ala ^{11,15}]-Endothelin-1(8-21), IRL 1620, for the ET _B Receptor	<i>Michihiro Takai, Ichiro Umemura, Keiko Yamasaki, Tadashi Watakabe, Yasushi Fujitani, Kyoko Oda, Yoshihiro Urade, Takashi Inui, Takaki Yamamura, and Toshikazu Okada</i>	953
Interleukin-6 Down Regulates the Expression of Transcripts Encoding Cytochrome P450 IAI, IAI2 and IIIA3 in Human Hepatoma Cells	<i>Yoshiaki Fukuda, Nobuhiro Ishida, Teruhisa Noguchi, Attallah Kappas, and Shigeru Sassa</i>	960
cDNA Sequence and Heterologous Expression of the Human Neurokinin-3 Receptor	<i>Ruey-Ruey C. Huang, Anne H. Cheung, Kathryn E. Mazina, Catherine D. Strader, and Tung Ming Fong</i>	966
Cyclic Inhibition-Potential of the Crosslinking of Synapsin I with Brain Microtubules by Protein Kinase FA (An Activator of ATP.Mg-Dependent Protein Phosphatase)	<i>Shiaw-Der Yang, Jen-Shin Song, Yao-Tsung Hsieh, Wen-Hsiung Chan, and Hui-Wen Liu</i>	973
Inhibition of HIV-1 Protease by Short Peptides Derived from the Terminal Segments of the Protease	<i>Hans J. Schramm, Gerhard Breipohl, Jutta Hansen, Stephan Henke, Ernst Jaeger, Christoph Meichsner, Günther Rieß, Dieter Ruppert, Karl-Peter Rücknagel, Wolfram Schäfer, and Wolfgang Schramm</i>	980
Contribution of the P51 Subunit of HIV-1 Reverse Transcriptase to Enzyme Processivity	<i>S. C. Huang, J. R. Smith, and L. K. Moen</i>	986
The Spinach Chloroplast Chromosome Is Bound to the Thylakoid Membrane in the Region of the Inverted Repeat	<i>Jian-Wei Liu and Ray J. Rose</i>	993
Determination of Nucleotide Sequence of Active Site for Catalytic Properties of ADH3 Genes	<i>Fumika Tanaka, Masao Omata, Osamu Yokosuka, Yoshio Tsukada, and Masao Ohto</i>	1001
Peptide/Protein Structure Analysis Using the Chemical Shift Index Method: Upfield α -CH Values Reveal Dynamic Helices and α_L Sites	<i>Niels H. Andersen, Bolong Cao, and Chinpan Chen</i>	1008
tsBN75 and tsBN423, Temperature-Sensitive X-Linked Mutants of the BHK21 Cell Line, Can Be Complemented by the Ubiquitin-Activating Enzyme E1 cDNA	<i>Hideo Nishitani, Hiroshige Goto, Sumiko Kaneda, Fumiaki Yamao, Takesi Seno, Patricia Handley, Alan L. Schwartz, and Takeharu Nishimoto</i>	1015
Detection of a Novel Carbon-Phosphorus Bond Cleavage Activity in Cell-Free Extracts of an Environmental <i>Pseudomonas fluorescens</i> Isolate	<i>G. McMullan and J. P. Quinn</i>	1022
Pyruvate Transport across the Plasma Membrane of the Bloodstream Form of <i>Trypanosoma brucei</i> Is Mediated by a Facilitated Diffusion Carrier	<i>Erik A. C. Wiemer, Benno H. Ter Kuile, Paul A. M. Michels, and Fred R. Opperdoes</i>	1028

Evidence for a Band III Analogue in the Near-Infrared Absorption Spectra of Cytochrome c Oxidase	Ólöf Einarisdóttir, Katy E. Georgiadis, and Timothy D. Dawes	1035
Identification and Characterization of Chiroinositol-Containing Phospholipids from Bovine Liver	Yunbae Pak and Joseph Lerner	1042
Comparison of L-Selectin and E-Selectin Ligand Specificities: The L-Selectin Can Bind the E-Selectin Ligands Sialyl Le ^x and Sialyl Le ^a	Ellen L. Berg, John Magnani, R. Aaron Warnock, Martyn K. Robinson, and Eugene C. Butcher	1048
Tumor Necrosis Factor- α Pretreatment Is Protective in a Rat Model of Myocardial Ischemia-Reperfusion Injury	Lynne J. Eddy, Grace H. W. Wong, and David V. Goeddel	1056
Isolation of a Hemoglobin-Derived Opioid Peptide from Cerebrospinal Fluid of Patients with Cerebrovascular Bleedings	Eva-Lena Glämsta, Björn Meyerson, Jerzy Silberring, Lars Terenius, and Fred Nyberg	1060
Isolation of Two Distinct Type I Angiotensin II Receptor Genes	Terry S. Elton, Clifford C. Stephan, Gregory R. Taylor, Mary G. Kimball, Mickey M. Martin, Joan N. Durand, and Suzanne Oparil	1067
Can Enzymes Adopt a Self-Inhibited Form? Results of X-Ray Crystallographic Studies of Chymosin	Natalia Andreeva, Jonathan Dill, and Gary L. Gilliland	1074
The <i>Drosophila per</i> Gene Homologs Are Expressed in Mammalian Suprachiasmatic Nucleus and Heart as well as in Molluscan Eyes	Thomas Maler, Martin R. Ralph, Reginald M. Gorczynski, Harvey Moldofsky, Brian F. O'Dowd, and Daisy Chin Du	1082
Ca ²⁺ -Sensitive Reduction of 5,5'-Dithiobis-(2-nitrobenzoic acid) by Rat Liver Mitochondria	Ewa Lenartowicz	1088
Evidence for Direct Interaction between the Chlorophyll-Proteins CP29 and CP47 in Photosystem II	Fernanda Rigoni, Roberto Barbato, Giulia Friso, and Giorgio M. Giacometti	1094
A Possible New Class of Ribonucleotide Reductase from <i>Methanobacterium thermoautotrophicum</i>	Isaac S.-Y. Sze, Sara C. McFarlan, Alfred Spormann, Harry P. C. Hogenkamp, and Hartmut Follmann	1101
Glucocorticoid, Androgen, and Retinoic Acid Regulation of Glutathione S-Transferase Gene Expression in Hamster Smooth Muscle Tumor Cells	David A. Schwartz and James S. Norris	1108
Developmental Expression of Ornithine and S-Adenosylmethionine Decarboxylases in Mouse Brain	Anne Suorsa, Oili Hietala, and Antti Pajunen	1114
Detection of Nitric Oxide Production in Lipopolysaccharide-Treated Rats by ESR Using Carbon Monoxide Hemoglobin	Hiroaki Kosaka, Manabu Watanabe, Harumasa Yoshihara, Noboru Harada, and Takeshi Shiga	1119
Chemical Glycosylation of Peptide T at Natural and Artificial Glycosylation Sites Stabilizes or Rearranges the Dominant Reverse Turn Structure	Laszlo Urge, Livia Gorbics, and Laszlo Otvos, Jr.	1125

1531

Volume 185, Number 1, May 29, 1992

- The Product of the Human MUC1 Gene when Secreted by Mouse Cells Transfected with the Full-Length cDNA Lacks the Cytoplasmic Tail *Martina Boshell, El-Nasir Lalani, Lucy Pemberton, Joy Burchell, Sandra Gendler, and Joyce Taylor-Papadimitriou* 1
- In Vitro* Assays of Three Carotenogenic Membrane-Bound Enzymes from *Escherichia coli* Transformed with Different *crt* Genes *Paul D. Fraser and Gerhard Sandmann* 9
- 31-P NMR Characterization of the Metabolic Anomalies Associated with the Lack of Glycogen Phosphorylase Activity in Human Forearm Muscle *David Bendahan, Sylviane Confort-Gouny, Geneviève Kozak-Ribbens, and Patrick J. Cozzone* 16
- Effects of Protein Kinase Inhibitors on the Mitogenic Activity of Human Hepatocyte Growth Factor on Rat Hepatocytes in Primary Culture *Naokatu Arakaki, Shuichi Hirono, Shuichi Kawakami, Hirohito Tsubouchi, Takehisa Ishii, Hiroto Hara, and Yasushi Daikuhara* 22
- Cloning and Nucleotide Sequence of a Full-Length cDNA for Human Liver γ -Glutamylcysteine Synthetase *Jerry J. Gipp, Chawnschang Chang, and R. Timothy Mulcahy* 29
- Sodium-Dependent Potassium ($^{86}\text{Rb}^+$) Efflux Moderates Volume Regulation by Cells in Rat Renal Inner Medullary Slices Exposed to Strongly Hyperosmotic Media *R. O. Law* 36
- Expression of *Escherichia coli* tag Gene Encoding 3-Methyladenine Glycosylase I in NIH-3T3 Murine Fibroblasts *Pietro Taverna, Enrico Garattini, Lorenzo Citti, Giovanna Damia, and Maurizio D'Incalci* 41
- A New Mathematical Model to Study Bone Turnover in Growing Rats *G. Reina, L. Moro, A. Rubinacci, P. Bettica, P. Villani, L. Rovis, G. L. Moro, B. de Bernard, and A. Pecile* 47
- Subcellular Localization of Guinea Pig Hepatic Molybdenum Hydroxylases *David J. P. Crichtley, David J. Rance, and Christine Beedham* 54

The Enantioselective Participation of (S)- and (R)-Diaminovaleric Acids in the Formation of δ -Aminolevulinic Acid in Cyanobacteria	<i>Herbert C. Friedmann, Mark E. Duban, Aldonia Valasinas, and Benjamin Frydman</i>	60
Cloning and Structural Characterization of a Rabbit Genomic DNA for α_1 Acid Glycoprotein	<i>Bimal K. Ray and Alpna Ray</i>	69
Cloning and Characterization of the Human Thyroid Hormone Receptor β_1 Gene Promoter	<i>Akihiro Sakurai, Takahide Miyamoto, and Leslie J. DeGroot</i>	78
Inhibition of HIV-1 Integration Protein by Aurintricarboxylic Acid Monomers, Monomer Analogs, and Polymer Fractions	<i>Mark Cushman and Paula Sherman</i>	85
<i>lyn</i> , a <i>src</i> -like Tyrosine-Specific Protein Kinase, Is Expressed in HL60 Cells Induced to Monocyte-like or Granulocyte-like Cells	<i>R. W. Meier, W. Bielke, T. Chen, G. Niklaus, R. R. Friis, and A. Tobler</i>	91
Structures of Poly(dA-dT, ip ⁵ dU) Containing Various Small Amounts of the Antiherpetic 5-Isopropyl-2'-Deoxyuridine	<i>János Sági, Jitka Štokrová, Michaela Vorlíčková, Alena Spánová, Jaroslav Kypr, Éva Ruff, and László Ötövs</i>	96
Androgen-Responsive Expression and Mitogenic Activity of Schwannoma-Derived Growth Factor on an Androgen-Dependent Shionogi Mouse Mammary Carcinoma Cell Line	<i>Hikaru Sonoda, Tsuyoshi Yamaguchi, and Sachihiko Watanabe</i>	103
9-Aminoacridine Inhibits the B-Z Transition of Poly(dA-dT)	<i>Pere Garriga, David Garcia-Quintana, and Joan Manyosa</i>	110
Expression of <i>Drosophila</i> 's 27-kDa Heat Shock Protein into Rodent Cells Confers Thermal Resistance	<i>Emmanuelle Rollet, Josée N. Lavoie, Jacques Landry, and Robert M. Tanguay</i>	116
Effects of the Histamine H ₃ Receptor Ligands Thioperamide and (R)- α -Methylhistamine on Histidine Decarboxylase Activity of Mouse Brain	<i>Naruhiko Sakai, Atsushi Sakurai, Eiko Sakurai, Kazuhiko Yanai, Kazutaka Maeyama, and Takehiko Watanabe</i>	121
Identification of Cellular Differentiation-Dependent Nuclear Factors That Bind to a Human Gene for Thymidylate Synthase	<i>Nobuyuki Horie, Ryushi Nozawa, and Keiichi Takeishi</i>	127
Isolation and Characterization of Peptides Which Act on Rat Platelets, from a Pheochromocytoma	<i>Kazuo Kitamura, Kenji Kangawa, Mari Kawamoto, Yosinari Ichiki, Hisayuki Matsuo, and Tanenao Eto</i>	134
Two Distinct Pathways in the Down-Regulation of Type-1 Angiotensin II Receptor Gene in Rat Glomerular Mesangial Cells	<i>Naomasa Makita, Naoharu Iwai, Tadashi Inagami, and Kamal F. Badr</i>	142
Full Sequence of Neurocalcin, a Novel Calcium-Binding Protein Abundant in Central Nervous System	<i>Katsuo Okazaki, Masato Watanabe, Yuhko Ando, Masatoshi Hagiwara, Motomu Terasawa, and Hiroyoshi Hidaka</i>	147
Lipopolysaccharide, Latex Beads, and Residual Bodies Are Potent Activators of Sertoli Cell Interleukin-1 α Production	<i>Nadine Gérard, Viqar Syed, and Bernard Jégou</i>	154

Ion Selectivity of Ba ²⁺ Inward Current Oscillations in <i>ras</i> -Transformed Fibroblasts That Elicit Cytoplasmic Ca ²⁺ Oscillations by Bradykinin	<i>H. Higashida, M. Shahidullah, N. Hoshi, M. Noda, M. Hashii, Z. G. Zhong, and Y. Nozawa</i>	162
Antibodies to the Cytoplasmic Domain of the MUC1 Mucin Show Conservation throughout Mammals	<i>Lucy Pemberton, Joyce Taylor-Papadimitriou, and Sandra J. Gendler</i>	167
Characteristics of α -Adrenoceptors in Two Human Colorectal Cancer Cell Lines	<i>Devendra K. Agrawal, David M. Wildrick, and Bruce M. Boman</i>	176
Substrate Level Modulation of the Activity of Phospholipase A2 <i>in Vitro</i> by 12-O-Tetradecanoylphorbol-13-acetate	<i>Pekka Mustonen and Paavo K. J. Kinnunen</i>	185
22-Oxacalcitriol Suppresses 25-Hydroxycholecalciferol-1 α -hydroxylase in Rat Kidney	<i>M. Grieff, A. Dusso, T. Mori, Y. Nishii, E. Slatopolsky, and A. J. Brown</i>	191
Cell Cycle Progression Is Associated with Distinct Patterns of Phosphorylation of Op18	<i>John R. Strahler, Barbara J. Lamb, David R. Ungar, David A. Fox, and Samir M. Hanash</i>	197
Characterization of an Angiotensin Type-1 Receptor Partial cDNA from Rat Kidney: Evidence for a Novel AT _{1B} Receptor Subtype	<i>Ming Q. Ye and Dennis P. Healy</i>	204
Regulation of Rat Hepatic Peroxisomal Enoyl-CoA Hydratase-3-hydroxyacyl-CoA Dehydrogenase Bifunctional Enzyme by Thyroid Hormone	<i>Teiji Takeda, Kazuo Ichikawa, Takahide Miyamoto, Mutsuhiro Kobayashi, Yutaka Nishii, Satoru Suzuki, Akihiro Sakurai, and Kiyoshi Hashizume</i>	211
Cellular Retinoic Acid Binding Protein Type II Was Preferentially Localized in Medium and Posterior Parts of the Progress Zone of the Chick Limb Bud	<i>Sachiko Miyagawa-Tomita, Toshihiro Kitamoto, Kazuo Momma, Atsuyoshi Takao, and Takashi Momoi</i>	217
Expression and Purification of Biologically Active Human OSF-1 in <i>Escherichia coli</i>	<i>Hiroyuki Takamatsu, Motofumi Itoh, Michio Kimura, Denis Gospodarowicz, and Egon Amann</i>	224
Isolation of a cDNA Clone Encoding the RNase-Superfamily-Related Gene Highly Expressed in Chicken Bone Marrow Cells	<i>Elena M. Klenova, Irina Botezato, Vincent Laudet, Graham H. Goodwin, James C. Wallace, and Victor V. Lobanenko</i>	231
Primary Structure of the Human Elafin Precursor Preproelafin Deduced from the Nucleotide Sequence of Its Gene and the Presence of Unique Repetitive Sequences in the Prosegment	<i>Toshihiko Saheki, Futoshi Ito, Hiromi Hagiwara, Yasuyoshi Saito, Jun Kuroki, Shinro Tachibana, and Shigehisa Hirose</i>	240
Fc- γ - and Complement Receptor-Mediated Elevation in the Cytosolic Calcium Level in Human Neutrophils	<i>Helena Tuominen, Lasse Leino, and Karl Åkerman</i>	246
Cloning, Characterization, and Expression of Two Angiotensin Receptor (AT-1) Isoforms from the Mouse Genome	<i>Hiroyuki Sasamura, Lutz Hein, Jose E. Krieger, Richard E. Pratt, Brian K. Kobilka, and Victor J. Dzau</i>	253
Differential Regulation of Rat Liver Selenoprotein mRNAs in Selenium Deficiency	<i>Kristina E. Hill, P. Reid Lyons, and Raymond F. Burk</i>	260

The Identification of a Tandem H-DNA Structure in the <i>c-myc</i> Nuclease Sensitive Promoter Element	<i>Anthony B. Firulli, Douglas C. Maibenco, and Alan J. Kinniburgh</i>	264
Mouse and Human Hemopoietic Cell Lines of Erythroid Lineage Express Lamins A, B, and C	<i>Alberto M. Martelli, Anna Maria Billi, R. Stewart Gilmour, Lucia Manzoli, Roberto Di Primio, and Lucio Cocco</i>	271
Alternative Splicing of the Human Isoaspartyl Protein Carboxyl Methyltransferase RNA Leads to the Generation of a C-Terminal -RDEL Sequence in Isozyme II	<i>Duncan C. MacLaren, Ron M. Kagan, and Steven Clarke</i>	277
Functionally Active Homodimer of P-Glycoprotein in Multidrug-Resistant Tumor Cells	<i>Mikihiko Naito and Takashi Tsuruo</i>	284
Gene Expressions and Activities of Protein Phosphatases PP1 and PP2A in Rat Liver Regeneration after Partial Hepatectomy	<i>Yasutaka Kakinoki, Kazuki Kitamura, Shu-ichi Matsuzawa, Yusuke Mizuno, Tamotsu Miyazaki, and Kunimi Kikuchi</i>	291
Isolation of a Human cDNA Encoding a 25-kDa FK-506 and Rapamycin Binding Protein	<i>Greg Wiederrecht, Mary M. Martin, Nolan H. Sigal, and John J. Siekierka</i>	298
Molecular Cloning of a Novel Adenosine Receptor Gene from Rat Brain	<i>Yijuang Chern, Klim King, Hsing-Lin Lai, and Hsing-Tsu Lai</i>	304
An Amino Acid Change in the DNA-Binding Region of <i>Sry</i> , Found in <i>Mus musculus domesticus</i> and Other Species, Does Not Explain C57BL/6J-Y ^{DOM} Sex-Reversal	<i>Penelope E. Graves and Robert P. Erickson</i>	310
Inactivation of 5-Enolpyruvylshikimate 3-Phosphate Synthase by Its Substrate Analogue Pyruvate in the Presence of Sodium Cyanoborohydride	<i>Q. Khai Huynh</i>	317
Epoxidation of 2,3-Oxidosqualene to 2,3;22,23-Squalene Dioxide by Squalene Epoxidase	<i>Mei Bai, Xiao-yi Xiao, and Glenn D. Prestwich</i>	323
CCP II: A Novel Calcitonin Carboxy Terminal Peptide Is Expressed in Normal Thyroid Tissue	<i>R. Cohen, M. C. Delehaye, S. Minvielle, N. Segond, J. Taboulet, M. Noel, J. M. Guliana, C. Calmettes, G. Milhaud, and F. Lasmoles</i>	330
Structural and Functional Similarity between Fish Antifreeze Proteins and Calcium-Dependent Lectins	<i>K. Vanya Ewart, Boris Rubinsky, and Garth L. Fletcher</i>	335
Design and Functional Expression in <i>Escherichia coli</i> of a Synthetic Gene Encoding <i>Clostridium pasteurianum</i> 2[4Fe-4S] Ferredoxin	<i>Valérie Davaise and Jean-Marc Moulis</i>	341
Ontogeny of Cytosolic Phospholipase A ₂ Activity in Rat Brain	<i>Yoshihiro Yoshihara, Mie Yamaji, Miwa Kawasaki, and Yasuyoshi Watanabe</i>	350
The Primary Structure of Rat Ribosomal Protein L11	<i>Yuen-Ling Chan, Joe Olvera, Veronica Paz, and Ira G. Wool</i>	356
Effects of Changes in Membrane Potential on the Cyclosporin-Induced Inhibition of T-Cell Proliferation	<i>Attila Tordai, Reuven Or, and Erwin W. Gelfand</i>	363
HIV-1 and HIV-2 Reverse Transcriptases: A Comparative Study of Sensitivity to Inhibition by Selected Natural Products	<i>Ghee T. Tan, James F. Miller, A. Douglas Kinghorn, Stephen H. Hughes, and John M. Pezzuto</i>	370

Substrate-Based Inhibitors of Smooth Muscle Myosin Light Chain Kinase <i>Suzanne Moreland, Mitsuo Ikebe, John T. Hunt, and Robert S. Moreland</i>	379
Effect of Atrial Natriuretic Factor on the Water Permeability of Endothelial Cells <i>Th. Battle, J. B. Michel, and B. Corman</i>	386
Extraction and Characterization of the Intact Form of Bovine Vitreous Type IX Collagen <i>Paul Bishop, David McLeod, and Shirley Ayad</i>	392
Kex2-like Proteolytic Activity in Adrenal Medullary Chromaffin Granules <i>Anahit V. Azaryan and Vivian Y. H. Hook</i>	398
Structure of the Mouse Activin Receptor Type II Gene <i>Martin M. Matzuk and Allan Bradley</i>	404
Acetylation and Methylation of Histones H3 and H4 in Chicken Immature Erythrocytes Are Not Directly Coupled <i>Michael J. Hendzel and James R. Davie</i>	414
Identification of an Interleukin-6 Responsive Element and Characterization of the Proximal Promoter Region of the Rat Hemopexin Gene <i>Yasuhiro Nagae and Ursula Muller-Eberhard</i>	420
Endotoxin and TNF α Directly Stimulate Nitric Oxide Formation in Cultured Rat Hepatocytes from Chronically Endotoxemic Rats <i>Richard A. Pittner and Judy A. Spitzer</i>	430
Genomic Structure of the ME491/CD63 Antigen Gene and Functional Analysis of the 5'-Flanking Regulatory Sequences <i>Hak Hotta, Hajime Miyamoto, Isao Hara, Nobuo Takahashi, and Morio Homma</i>	436
Trichloroethylene Oxidation by Toluene Dioxygenase <i>Shuying Li and Lawrence P. Wackett</i>	443
Formation of Nitric Oxide by Cytochrome P450-Catalyzed Oxidation of Aromatic Amidoximes <i>V. Andronik-Lion, J. L. Boucher, M. Delaforge, Y. Henry, and D. Mansuy</i>	452
Heterogeneity in Smooth Muscle Cell Population Accumulating in the Neointimas and the Media of Poststenotic Dilatation of the Rabbit Carotid Artery <i>Ei-ichi Okamoto, Kohji Imataka, Jun Fujii, Makoto Kuro-o, Ken-ichi Nakahara, Hiroshi Nishimura, Yoshio Yazaki, and Ryozo Nagai</i>	459
Phospholipase A ₂ -Modified LDL Is Taken Up at Enhanced Rate by Macrophages <i>Michael Aviram and Irit Maor</i>	465
Cooperative Function of <i>rho</i> GDS and <i>rho</i> GDI to Regulate <i>rho</i> p21 Activation in Smooth Muscle <i>Shinya Kuroda, Akira Kikuchi, Ken-ichi Hirata, Tadayuki Masuda, Kiyohiko Kishi, Takuya Sasaki, and Yoshimi Takai</i>	473
Conformational Changes of Actin Induced by Calponin <i>Seiichiro Noda, Masaya Ito, Satoshi Watanabe, Katsuhito Takahashi, and Koscak Maruyama</i>	481

Volume 185, Number 2, June 15, 1992

Cloning of the Guinea Pig 5-Lipoxygenase Gene and Nucleotide Sequence of Its Promoter <i>Arvind Chopra, Dalton L. Ferreira-Alves, Pierre Sirois, and Jean-Paul Thirion</i>	489
---	-----

Glycation of MP26 and MP22 in Bovine Lens Membranes	<i>Malladi Prabhakaram and Beryl J. Ortwerth</i>	496
A New Biological Activity of the Complement Factor H: Identification of the Precursor of the Major Macrophage-Chemotactic Factor in Delayed Hypersensitivity Reaction Sites of Guinea Pigs	<i>Takahisa Imamura, Hirokazu Ohtsuka, Misao Matsushita, Junji Tsuruta, Hidechika Okada, and Takeshi Kambara</i>	505
bFGF Enhances the Development of the Collateral Circulation after Acute Arterial Occlusion	<i>J. O. Chleboun, R. N. Martins, C. A. Mitchell, and T. V. Chirila</i>	510
Cloning and Expression of the Human 5-HT _{1B} -Type Receptor Gene	<i>Daisuke Mochizuki, Yuko Yuyama, Ryuichi Tsujita, Hisayuki Komaki, and Hitoshi Sagai</i>	517
Phosphorylation of Interleukin-6 at Serine ⁵⁴ : An Early Event in the Secretory Pathway in Human Fibroblasts	<i>Lester T. May and Pravin B. Sehgal</i>	524
Ca ²⁺ -Dependent and Ca ²⁺ -Independent Mechanisms Modulate Whole-Cell Cationic Currents in Human Neutrophils	<i>Muhammad A. Schumann, Toshimori Tanigaki, Daniel N. Heller, and Thomas A. Raffin</i>	531
The Primary Structure of Rat Ribosomal Protein L8	<i>Yuen-Ling Chan and Ira G. Wool</i>	539
Copper-Metallothionein Induction in the Liver of LEC Rats	<i>Hiromu Sakurai, Hiroko Kamada, Akihito Fukudome, Masahiro Kito, Sigeo Takeshima, Masami Kimura, Noriko Otaki, Katsuyuki Nakajima, Kazuya Kawano, and Takuroh Hagino</i>	548
<i>In Vitro</i> Inhibition of c-myc Transcription by Mithramycin	<i>Paul Hardenbol and Michael W. Van Dyke</i>	553
Kinetics of Phosphofructokinase from Granulocytes Isolated from Patients with Insulin Resistance	<i>Gilberto Campos, Elena Ryder, Luz Marina Morales, and Xiomara Raleigh</i>	559
Structure-Function Studies of the Epidermal Growth Factor Domains of Human Thrombomodulin	<i>John F. Parkinson, Mariko Nagashima, Irene Kuhn, Jill Leonard, and John Morser</i>	567
Unexpected Growth-Stimulatory Effect of Somatostatin Analogue on Cultured Human Pancreatic Carcinoid Cells	<i>Jin Ishizuka, R. Daniel Beauchamp, B. Mark Evers, Courtney M. Townsend, Jr., and James C. Thompson</i>	577
Heparan Sulfate Proteoglycans Are Involved in the Lipoprotein Lipase-Mediated Enhancement of the Cellular Binding of Very Low Density and Low Density Lipoproteins	<i>Monique Mulder, Paola Lombardi, Hans Jansen, Theo J. C. van Berkel, Rune R. Frants, and Louis M. Havekes</i>	582
Polymorphisms of Human Cholesterol 7 α -Hydroxylase (CYP7)	<i>Walid G. Karam and John Y. L. Chiang</i>	588
Membrane-Altering Effects of Velnacrine and <i>N</i> -Methylacridinium: Relevance to Tacrine and Alzheimer's Disease	<i>D. Allan Butterfield and Anuradha Rangachari</i>	596
Chemotactic LTB ₄ Metabolites Produced by Hepatocytes in the Presence of Ethanol	<i>Michael A. Shirley, Charles T. Reidhead, and Robert C. Murphy</i>	604

Partial Purification of Phosphoramidon-Sensitive Endothelin Converting Enzyme in Porcine Aortic Endothelial Cells: High Affinity for <i>Ricinus communis</i> Agglutinin	
<i>Keizo Ohnaka, Motoaki Nishikawa, Ryoichi Takayanagi, Masafumi Haji, and Hajime Nawata</i>	611
Effects of Endogenous Soluble β -Galactoside Binding Lectins and Protein Inhibitor of Fucosyltransferase on the Enzymes Involved in the Intestinal Fucosylation Process	
<i>D. Ruggiero-Lopez, P. Louisot, and A. Martin</i>	617
Cigarette Smoke Exposure Increases in the Cell Water Organization and Membrane Order of Cultured T Cells	
<i>Yuichiro J. Suzuki, Masahiko Tsuchiya, Yasuko Shindo, and Lester Packer</i>	624
The Potassium Channel Opener BRL 38227 Inhibits Binding of 125 I-Labeled Endothelin-1 to Rat Cardiac Membranes	
<i>Christopher J. Waugh, Mark E. C. Dockrell, William G. Haynes, Henry J. Olverman, Brent C. Williams, and David J. Webb</i>	630
1,25-Dihydroxyvitamin D Effects in the Kidney: Induction of Calmodulin Binding Proteins	
<i>Steve D. Antrobus and Marian R. Walters</i>	636
Functional Coexpression of Human Oxidoreductase and Cytochrome P450 1A1 in <i>Saccharomyces cerevisiae</i> Results in Increased EROD Activity	
<i>Hans-Pietro Eugster, Stephan Bärtsch, Friedrich E. Würgler, and Christian Sengstag</i>	641
Characterization of a Rat Variant α -Fetoprotein	
<i>Takeshi Watanabe, Juan L. Jimenez-Molina, and Janice Yang Chou</i>	648
Antibodies Directed against Synthetic Peptides Distinguish between the Catalytic Subunits of Protein Phosphatases 1 and 2A	
<i>Wei Wang, Richard D. Lane, and Keith K. Schlender</i>	657
Molecular Cloning and Chromosomal Assignment of Human Calbindin-D9K	
<i>Alison Howard, Stephen Legon, Nigel K. Spurr, and Julian R. F. Walters</i>	663
Interleukin-3 Induces Translocation and Down-Regulation of Protein Kinase C in Human Platelets	
<i>Paul P. Cook, Jianming Chen, and D. Kirk Ways</i>	670
Pretranslational Induction of Pentoxyresorufin <i>O</i> -Depentylase by Pyridine	
<i>Kwang Sik Park, Dong Hwan Sohn, Richard L. Veech, and Byoung J. Song</i>	676
Identification of a Processed Protein Related to the Human Chaperonins (HSP 60) Protein in Mammalian Kidney	
<i>Willie R. Ross, William S. Bertrand, and Aubrey R. Morrison</i>	683
Differential Expression of Angiotensin II Receptor Subtype mRNAs (AT-1A and AT-1B) in the Brain	
<i>Sham S. Kakar, Kristen K. Riel, and Jimmy D. Neill</i>	688
Kinins Mediate Kallikrein-Induced Endothelium-Dependent Relaxations in Isolated Canine Coronary Arteries	
<i>Jean-Vivien Mombouli and Paul M. Vanhoutte</i>	693
Butylated Hydroxytoluene Prevents Cumene Hydroperoxide-Induced Ca^{2+} Release from Liver Mitochondria by Inhibiting Pyridine Nucleotide Hydrolysis	
<i>V. Gogvadze, G. E. N. Kass, C. S. Boyer, A. Zhukova, Y. Kim, and S. Orrenius</i>	698

Cloning and Overexpression of the <i>Lactobacillus bulgaricus</i> NAD ⁺ -Dependent D-Lactate Dehydrogenase Gene in <i>Escherichia coli</i> : Purification and Characterization of the Recombinant Enzyme	<i>Sunil Kochhar, Nathalie Chuard, and Herbert Hottinger</i>	705
Enhancement of Ca ²⁺ -Induced Ca ²⁺ Release in Calpain Treated Rabbit Skinned Muscle Fibers	<i>Masamitsu Iino, Hiromi Takano-Ohmuro, Yoko Kawana, and Makoto Endo</i>	713
Brefeldin A Affects the Cellular Distribution of Endocytic Receptors Differentially	<i>Hanna Damke, Judith Klumperman, Kurt von Figura, and Thomas Bräulke</i>	719
20-Hydroxyeicosatetraenoic Acid Is Excreted as a Glucuronide Conjugate in Human Urine	<i>Chandra Prakash, Ji Y. Zhang, J. R. Falck, Kamlesh Chauhan, and Ian A. Blair</i>	728
A Ring-Reversed Analog of Atrial Natriuretic Peptide Retains Receptor Binding, Guanylate Cyclase Stimulation	<i>Thomas W. von Geldern, Gerald P. Budzik, and Terry P. Dillon</i>	734
Regulation of Flagellar Motility by Temperature-Dependent Phosphorylation of a 43-kDa Axonemal Protein in Fowl Spermatozoa	<i>Koji Ashizawa, Seiichi Katayama, and Yasuhiro Tsuzuki</i>	740
Human Brain Peptidase Activity with the Specificity to Generate the N-Terminus of the Alzheimer β -Amyloid Protein from Its Precursor	<i>J. R. McDermott, J. A. Biggins, and A. M. Gibson</i>	746
Calmodulin Specifically Binds Three Proteins of the Dystrophin-Glycoprotein Complex	<i>Raghavan Madhavan, Larry R. Massom, and Harry W. Jarrett</i>	753
Concentrations and Molecular Forms of Human Brain Natriuretic Peptide in Plasma	<i>Hitone Tateyama, Jun Hino, Naoto Minamino, Kenji Kangawa, Takazo Minamino, Kei Sakai, Toshio Ogihara, and Hisayuki Matsuo</i>	760
Alternative Splicing Products of the Tenascin Gene Distinguish Rat Liver Fat Storing Cells from Arterial Smooth Muscle Cells and Skin Fibroblasts	<i>S. Schwöglar, M. Odenthal, K.-H. Meyer zum Büschenfelde, and G. Ramadori</i>	768
Selective Cell-Surface Expression of Dipeptidyl Peptidase IV with Mutations at the Active Site Sequence	<i>Toshiyuki Fujiwara, Emiko Tsuji, Yoshio Misumi, Noboru Takami, and Yukio Ikehara</i>	776
Identification of Homeobox-Containing Genes Expressed in Hematopoietic Blast Cells	<i>Isabelle Vieille-Grosjean, Valérie Roullot, and Gilles Courtois</i>	785
A Calcium-Dependent Cation Channel in Mast Cell Granule Membranes Reconstituted into a Lipid Bilayer	<i>Naohide Hirashima and Yutaka Kirino</i>	793
Volume 184, Number 1, April 15, 1992: Brian P. Dalrymple and Jennifer M. Peters, "Characterization of a cDNA Clone from the Haemoparasite <i>Babesia bovis</i> Encoding a Protein Containing an 'HMG-Box', pp. 31-35"		800

Volume 185, Number 3, June 30, 1992

Post-translational Modifications in the Collagen of Human Osteoporotic Femoral Head	<i>A. J. Bailey, S. F. Wotton, T. J. Sims, and P. W. Thompson</i>	801
---	---	-----

The Protein Kinase C Inhibitor, Calphostin C, Inhibits Succinate-Dependent Mitochondrial Reduction of MTT by a Mechanism That Does Not Involve Protein Kinase C	<i>Michael V. Berridge and An S. Tan</i>	806
Rat Guanylin cDNA: Characterization of the Precursor of an Endogenous Activator of Intestinal Guanylate Cyclase	<i>Roger C. Wiegand, Johji Kato, and Mark G. Currie</i>	812
The cDNA Cloning, Nucleotide Sequence and Expression of an Intracellular Protein Tyrosine Phosphatase from Mouse Testis	<i>Hitoshi Miyasaka and Steven S.-L. Li</i>	818
Structures and Properties of Seven Isoforms of the NMDA Receptor Generated by Alternative Splicing	<i>Hidemitsu Sugihara, Koki Moriyoshi, Takahiro Ishii, Masayuki Masu, and Shigetada Nakanishi</i>	826
Increase in Cytoplasmic Ca ²⁺ and Stimulation of Calcitonin Secretion from Human Medullary Thyroid Carcinoma Cells by the Gastrin-Releasing Peptide	<i>Yoshifumi Abe, Akira Kanamori, Yoshitada Yajima, and Toru Kameya</i>	833
N- and O-Acetylation of Aromatic and Heterocyclic Amine Carcinogens by Human Monomorphic and Polymorphic Acetyltransferases Expressed in COS-1 Cells	<i>R. F. Minchin, P. T. Reeves, C. H. Teitel, M. E. McManus, B. Mojarrabi, K. F. Ilett, and F. F. Kadlubar</i>	839
Molecular Cloning of Rabbit Cytochrome B5 Genes: Evidence for the Occurrence of Two Separate Genes Encoding the Soluble and Microsomal Forms	<i>Hiromu Takematsu, Yasunori Kozutsumi, Akemi Suzuki, and Toshisuke Kawasaki</i>	845
Activation of TIMP-2/Progelatinase A Complex by Stromelysin	<i>Kaoru Miyazaki, Fuminori Umenishi, Kayano Funahashi, Naohiko Koshikawa, Hidetaro Yasumitsu, and Makoto Umeda</i>	852
Hepatocyte Growth Factor Rapidly Induces the Tyrosine Phosphorylation of 41-kDa and 43-kDa Proteins in Mouse Keratinocytes	<i>Yuji Chatani, Akio Itoh, Eiko Tanaka, Akira Hattori, Toshikazu Nakamura, and Michiaki Kohno</i>	860
A Reversible Radioligand Specific for the ET _B Receptor: [¹²⁵ I]Tyr ¹³ -Suc-[Glu ⁹ ,Ala ^{11,15}]-Endothelin-1(8-21), [¹²⁵ I]IRL 1620	<i>Tadashi Watakabe, Yoshihiro Urade, Michihiro Takai, Ichiro Umemura, and Toshikazu Okada</i>	867
The N-Terminal Region of HIV-1 Integrase Is Required for Integration Activity, but Not for DNA-Binding	<i>Michael Schauer and Andreas Billich</i>	874
Regulation of 1,25-Dihydroxyvitamin D ₃ Receptor Gene Expression by Parathyroid Hormone and cAMP-Agonists	<i>J. P. T. M. van Leeuwen, J. C. Birkenhäger, T. Vink-van Wijngaarden, G. J. C. M. van den Bemd, and H. A. P. Pols</i>	881
The Endothelin Receptor Antagonist, BQ-123, Inhibits Angiotensin II-Induced Contractions in Rabbit Aorta	<i>Maria L. Webb, Kenneth E. J. Dickinson, Carol L. Delaney, Eddie C.-K. Liu, Randy Serafino, Robert B. Cohen, Hossain Monshizadegan, and Suzanne Moreland</i>	887
Ubiquitous Nuclear Factors Bind Specifically to a 5'-Region Conserved in Carcinoembryonic Antigen-Related Genes	<i>Fritz Rudert, John Thompson, and Wolfgang Zimmermann</i>	893

Enhancement of IL-6 Receptor β Chain (gp130) Expression by IL-6, IL-1, and TNF in Human Epithelial Cells	<i>Luc Snyders and Jean Content</i>	902
Nitroprusside-Sensitive and Insensitive Guanylate Cyclases in Retinal Rod Outer Segments	<i>A. Margulis, R. K. Sharma, and A. Sitaramayya</i>	909
Growth Inhibition of N1E-115 Mouse Neuroblastoma Cells by c-myc or N-myc Antisense Oligodeoxynucleotides Causes Limited Differentiation but Is Not Coupled to Neurite Formation	<i>Jean Christophe Larcher, Monique Basseville, Jean Luc Vayssiere, Laurence Cordeau-Lossouarn, Bernard Croizat, and François Gros</i>	915
Site-Specific Mutations of Conserved C-Terminal Residues in Aminoglycoside 3'-Phosphotransferase II: Phenotypic and Structural Analysis of Mutant Enzymes	<i>Semra Kocabiyik and Michael H. Perlin</i>	925
A Common Enzyme May Be Responsible for the Conversion of Organic Nitrates to Nitric Oxide in Vascular Microsomes	<i>Suk-Jae Chung and Ho-Leung Fung</i>	932
Nonoxidative Ethanol Metabolism: Expression of Fatty Acid Ethyl Ester Synthase III in Cultured Neural Cells	<i>Keith E. Isenberg, Puran S. Bora, Xia Zhou, Xiaolin Wu, Blake W. Moore, and Louis G. Lange</i>	938
Estrogen Receptor-Induced Bending of the <i>Xenopus</i> Vitellogenin A2 Gene Hormone Response Element	<i>Michèle Sabbah, Sophie Le Ricousse, Gérard Redeuilh, and Etienne-Emile Baulieu</i>	944
Prothymosin α Expression Occurs during G1 in Proliferating B or T Lymphocytes	<i>Paul Szabo, Desiree Ehleiter, Emmerson Whittington, and Marc E. Weksler</i>	953
Nitric Oxide Synthase from Cerebellum Catalyzes the Formation of Equimolar Quantities of Nitric Oxide and Citrulline from L-Arginine	<i>Peggy A. Bush, Norma E. Gonzalez, Jeanette M. Griscavage, and Louis J. Ignarro</i>	960
Synthesis and Structure-Activity Relationships of Elafin, an Elastase-Specific Inhibitor	<i>Masahiko Tsunemi, Hisao Kato, Yuji Nishiuchi, Shin-ichiro Kumagaye, and Shumpei Sakakibara</i>	967
Activin A Increases Cytosolic Free Calcium Concentration in Rat Pituitary Somatotropes	<i>Keiichi Tasaka, Kanji Kasahara, Nobuyuki Masumoto, Jirou Mizuki, Hirohisa Kurachi, Akira Miyake, and Osamu Tanizawa</i>	974
Prostacyclin Administration Suppresses the Increase in Hepatic Levels of COL1A(I) and Glyceraldehyde-3-phosphate Dehydrogenase mRNAs in the Rat Treated with Carbon Tetrachloride	<i>Hiroyuki Itoh, Hirohisa Koyata, Terumi Takahara, Akiharu Watanabe, and Koichi Hiraga</i>	981
Identification of Two Types of Homologous DNA Pairing Activity in Mouse Cells	<i>Yuji Mishina, Toshibumi Shimokawa, Katsumi Kawasaki, Naoto Arai, Takehiko Shibata, and Hideki Koyama</i>	987
Cloning of the Rat Insulin-like Growth Factor Binding Protein-1 Gene and Analysis of Its 5' Promoter Region	<i>Terry G. Unterman, Raul G. Lacson, Eric McGary, Chad Whalen, Christopher Purple, and Rajendra G. Goswami</i>	993
Proteolytic Processing of Amyloid β Protein Precursor (APP) by Thrombin	<i>Kenji Igarashi, Hitoshi Murai, and Jun-ichiro Asaka</i>	1000

Variable tRNA Content in HIV-1_{IIIb}

*Min Jiang, Johnson Mak, Mark A. Wainberg, Michael A. Parniak,
Eric Cohen, and Lawrence Kleiman* 1005

Inhibition of Ca²⁺-Dependent Catecholamine Release by Myosin Light Chain Kinase Inhibitor, Wortmannin, in Adrenal Chromaffin Cells

*Mica Ohara-Imaizumi, Takashi Sakurai, Seiji Nakamura,
Satoshi Nakanishi, Yuzuru Matsuda, Shun Muramatsu,
Yoshiaki Nonomura, and Konosuke Kumakura* 1016

Functional Expression of Soluble ICAM-1 by Baculovirus-Infected Sf9 Cells

Ronald R. Cobb, Jeffrey S. Dubins, Janet Warner, and Leslie Molony 1022

Association of the Carboxy-Terminus of β -Amyloid Protein Precursor with Alzheimer Paired Helical Filaments

*Claudia B. Caputo, Irene R. Evangelista Sobel,
Clay W. Scott, William F. Brunner, Peter T. Barth, and David P. Blowers* 1034

Interaction between Phosphoinositide Turnover System and Cyclic AMP Pathway for the Secretion of Pancreastatin and Somatostatin from QGP-1N Cells

*Kayoko Tateishi, Akihiro Funakoshi,
Noboru Kitayama, and Yuji Matsuoka* 1041

Gene Expression of Metalloproteinase and Its Inhibitor in Mesangial Cells Exposed to High Glucose

*Masanori Kitamura, Akiko Kitamura, Tetsuya Mitarai,
Naoki Maruyama, Ryuji Nagasawa, Tetsuya Kawamura, Hiroaki Yoshida,
Takamune Takahashi, and Osamu Sakai* 1048

Nonspecific Primer and PCR-Generated Hybridization Probes for Physical Ordering Large Restriction Fragments in Complex Genome of *S. aureus*

Saibal K. Poddar and Michael McClelland 1055

Ethanol Modulates Epidermal Growth Factor-Stimulated Tyrosine Kinase and Phosphorylation of PLC- γ_1

*Archie W. Thurston, Jr. and
Shivendra D. Shukla* 1062

Evidence for the Involvement of Tryptophan 38 in the Active Site of Glutathione S-Transferase P

*Jun Nishihira, Teruo Ishibashi, Masaharu Sakai,
Shinzo Nishi, and Takashi Kumazaki* 1069

Cold Exposure Increases Glucose Utilization and Glucose Transporter Expression in Brown Adipose Tissue

*Hideki Nikami, Yasutake Shimizu, Daiji Endoh,
Hideki Yano, and Masayuki Saito* 1078

Suppressive Effect of Interleukin-1 on Pulmonary Cytochrome P450 and Superoxide Anion Production

*Hironori Sakai, Toshihiro Okamoto,
Reiko Yamamoto, Ram K. Sindhu, and Yutaka Kikkawa* 1083

The Phosphate Groups of the High Mobility Group-like Protein P1 Strengthens Its Affinity for DNA

*Anne Carine Østvold, Ingunn Hullstein,
and Søren G. Laland* 1091

Structure-Function Relationship of Basic Fibroblast Growth Factor: Site-Directed Mutagenesis of a Putative Heparin-Binding and Receptor-Binding Region

*M. Presta, M. Statuto, A. Isacchi, P. Caccia, A. Pozzi,
A. Gualandris, M. Rusnati, L. Bergonzoni, and P. Sarmientos* 1098

Metal-Inducible Activities of Metallothionein Promoters in Fish Cells and Fry

*Koji Inoue, Noriko Akita, Tadayoshi Shiba,
Mikio Satake, and Shinya Yamashita* 1108

Zinc Hydroxide Stimulates Superoxide Production by Rat Alveolar Macrophages <i>Keiki Ogino, Yukie Izumi, Hironobu Ishiyama, Tomoko Murata, Haruo Kobayashi, and Tatsuya Houbara</i>	1115
Procalpain I in Cytoplasm Is Translocated onto Plasma and Granule Membranes during Platelet Stimulation with Thrombin and Then Activated on the Membranes <i>Masaaki Kuboki, Hidemi Ishii, Shuichi Horie, and Mutsuyoshi Kazama</i>	1122
Protein-Tyrosine Kinase p72 ^{syk} Is Activated by Wheat Germ Agglutinin in Platelets <i>Shinji Ohta, Takanobu Taniguchi, Momoyo Asahi, Yoshiro Kato, Gizo Nakagawara, and Hirohei Yamamura</i>	1128
Inhibition of DNA Polymerases by Tripeptide Derivative Protease Inhibitors <i>Takahiko Taguchi, Akio Matsukage, Hisashi Ito, Yumiko Saito, and Seiichi Kawashima</i>	1133
A Putative New Juvenile Peptide Hormone in Lepidopteran Insects <i>Yoichi Hayakawa</i>	1141
Competitive Protein Binding Assay for Activin A/EDF Using Follistatin Determination of Activin Levels in Human Plasma <i>R. Demura, T. Suzuki, S. Tajima, S. Mitsuhashi, E. Odagiri, Y. Eto, H. Sugino, and H. Demura</i>	1148
Identification of a Set of Genes with Developmentally Down-Regulated Expression in the Mouse Brain <i>Sharad Kumar, Yasuhiro Tomooka, and Makoto Noda</i>	1155
ERRATA	
Volume 184, Number 1, April 15, 1992: Jonny Wijkander and Roger Sundler, "Macrophage Arachidonate-Mobilizing Phospholipase A ₂ : Role of Ca ²⁺ for Membrane Binding but Not for Catalytic Activity," pp. 118–124	1162
Volume 184, Number 1, April 15, 1992: Mustapha Oudkhir, Isabelle Martelly, Benoni Boilly, and Monique Castagna, "Increased Protein Kinase C Activity in the Central Nervous System of the Newt during Limb Regeneration," pp. 433–440	1163

Androst-5-ene-7,17-dione: A Novel Class of Suicide Substrate of Aromatase <i>Mitsuteru Numazawa, Ayako Mutsumi, Kumiko Hoshi, and Yuko Tanaka</i>	32

Cloning and Disruption of the cefG Gene Encoding Acetyl Coenzyme A:Deacetyl- cephalosporin C O-Acetyltransferase from <i>Acremonium chrysogenum</i> <i>Akio Matsuda, Hiroyosi Sugiura, Kenji Matsuyama, Hideyuki Matsumoto,</i> <i>Sigeaki Ichikawa, and Ken-ichi Komatsu</i>	40
Mitochondrial tRNA ^{11c} Mutation in Fatal Cardiomyopathy <i>M. Taniike, H. Fukushima, I. Yanagihara, H. Tsukamoto,</i> <i>J. Tanaka, H. Fujimura, T. Nagai, T. Sano, K. Yamaoka,</i> <i>K. Inui, and S. Okada</i>	47
Stimulatory Effects of Estrogen and Progesterone on Proliferation and Differentiation of Normal Human Osteoblast-like Cells <i>in Vitro</i> <i>Ben A. A. Scheven,</i> <i>Cora A. Damen, Nicola J. Hamilton, Harald J. J. Verhaar,</i> <i>and Sijmen A. Duursma</i>	54
Primary Structure of Squid Sodium Channel Deduced from the Complementary DNA Sequence <i>Chikara Sato and Gen Matsumoto</i>	61
A Parathyroid-Related Peptide (PTHrP) Induces Transcaltachia (the Rapid, Hor- monal Stimulation of Intestinal Ca ²⁺ Transport) <i>Li-Xin Zhou, Ilka Nemere,</i> <i>and Anthony W. Norman</i>	69
NADPH-Dependent Inhibition of Lipid Peroxidation in Rat Liver Microsomes <i>Valerian E. Kagan, Elena A. Serbinova, Asaad Safadi,</i> <i>Judith D. Catudioc, and Lester Packer</i>	74
Feedback Repression of Polyamine Uptake into Mammalian Cells Requires Active Protein Synthesis <i>John L. A. Mitchell, Roger R. Diveley, Jr.,</i> <i>and Aviva Bareyal-Leyser</i>	81
Identification of Water-Soluble Proteases in Myelin Preparations <i>G. M. Liuzzi, A. Ventola, P. Riccio, and E. Quagliariello</i>	89
Apolipoprotein A-1 Interacts with the N-Terminal Fusogenic Domains of SIV (Simian Immunodeficiency Virus) GP32 and HIV (Human Immunodeficiency Virus) GP41: Implications in Viral Entry <i>I. Martin, M.-C. Dubois,</i> <i>T. Saermark, and J.-M. Ruysschaert</i>	95
Novel Glycosylation-Defective Baby Hamster Kidney Cells <i>James Ripka and Michael Pierce</i>	102
Properties of 1-Methyladenine Receptors in Starfish Oocyte Membranes: Involvement of Pertussis Toxin-Sensitive GTP-Binding Protein in the Receptor-Mediated Signal Transduction <i>Hirohiko Tadenuma, Katsunobu Takahashi,</i> <i>Kazuyoshi Chiba, Motonori Hoshi, and Toshiaki Katada</i>	114
Computer Modeling of Two Inorganic Pyrophosphatases <i>Mauno Vihinen, Maria Lundin, and Herrick Baltscheffsky</i>	122
Direct <i>in Vivo</i> Gene Introduction into Rat Kidney <i>Naruya Tomita, Jitsuo Higaki, Ryuichi Morishita, Keiko Kato,</i> <i>Hiroshi Mikami, Yasufumi Kaneda, and Toshio Ogiwara</i>	129
Two Novel Monoclonal Antibodies to Fibronectin That Recognize the Hep II and CS- I Regions, Respectively: Their Differential Effect on Lymphocyte Adhesion <i>Angeles Garcia-Pardo, Paloma Sánchez-Aparicio,</i> <i>and Elizabeth A. Wayner</i>	135
Gene Synthesis and Expression in <i>Escherichia coli</i> for Pump, a Human Matrix Metalloproteinase <i>Qi-Zhuang Ye, Linda L. Johnson,</i> <i>and Vijaykumar Baragi</i>	143

Nitric Oxide from Endothelium and Smooth Muscle Modulates Responses to Sympathetic Nerve Stimulation: Implications for Endotoxin Shock <i>C. Gonzalez, A. Fernandez, C. Martin, S. Moncada, and C. Estrada</i>	150
Biosynthesis of <i>trans,trans,trans</i> -Geranylgeranyl Diphosphate by the Cytosolic Fraction from Rat Tissues <i>Mårten Runquist, Johan Ericsson, Anders Thelin, Tadeusz Chojnacki, and Gustav Dallner</i>	157
Induction of Thermotolerance in T Cells Protects Nuclear DNA Topoisomerase I from Heat Stress <i>Richard P. Ciavarra, Weijia Duvall, and Frank J. Castora</i>	166
P-Selectin (CD62) Binds to Subpopulations of Human Memory T Lymphocytes and Natural Killer Cells <i>Kevin L. Moore and Linda F. Thompson</i>	173
Correlation among Oxysterol Potencies in the Regulation of the Degradation of 3-Hydroxy-3-methylglutaryl CoA Reductase, the Repression of 3-Hydroxy-3-methylglutaryl CoA Synthase, and Affinities for the Oxysterol Receptor <i>Frederick R. Taylor</i>	182
cDNA Sequence Analysis of CP94: Rat Lens Fiber Cell Beaded-Filament Structural Protein Shows Homology to Cytokeratins <i>Shigeo Masaki and Tomomasa Watanabe</i>	190
Effects of Epidermal Growth Factor on APO B mRNA Levels and APO B Accumulation in the Media of Primate Hepatocytes in Culture <i>William L. Blake, Thomas J. Vidmar, and George W. Melchior</i>	199
Pertussis Toxin Blocks Activin A-Induced Production of Inositol Phosphates in Rat Hepatocytes <i>Tetsuya Mine, Itaru Kojima, and Etsuro Ogata</i>	205
Intermolecular Homologies of Human Interferon- α <i>Fedor E. Romantsev, Nikolai N. Khodarev, and Igor I. Votrin</i>	211
The Sarcoplasmic Reticulum Ca^{2+} -ATPase, SERCA1A, Contains Endoplasmic Reticulum Targeting Information <i>Norman J. Karin and Valerie J. Settle</i>	219
Enhanced Expression of Membrane Phosphoproteins Tyrosine Phosphorylation in Estrogen-Induced Kidney Tumors <i>Satya Narayan and Deodutta Roy</i>	228
Cytokines Stimulate Lipolysis and Decrease Lipoprotein Lipase Activity in Cultured Fat Cells by a Prostaglandin Independent Mechanism <i>Ingibjörg Hardardóttir, William Doerrler, Kenneth R. Feingold, and Carl Grünfeld</i>	237
Analysis of the Order of Autophosphorylation of Human Insulin Receptor Tyrosines 1158, 1162, and 1163 <i>Martin Dickens and Jeremy M. Tavaré</i>	244
cAMP-Regulated Chloride Currents in CHO Cells <i>Allen W. Mangel, Srisaila Basavappa, John R. Raymond, and J. Gregory Fitz</i>	251
The Human Complement C4B/Steroid 21-Hydroxylase (CYP21) and Complement C4A/21-Hydroxylase Pseudogene (CYP21P) Intergenic Sequences: Comparison and Identification of Possible Regulatory Elements <i>Patricia A. Donohoue and Malia M. Collins</i>	256
Inhibition of Receptor-Stimulated Guanylyl Cyclase by Intracellular Calcium Ions in <i>Dictyostelium</i> Cells <i>Romi Valkema and Peter J. M. Van Haastert</i>	263
Characterization of a Novel Arachidonic Acid-Derived Neutrophil Chemoattractant <i>F. Joseph Roll, H. Daniel Perez, and Charles N. Serhan</i>	269

Cloning, Expression, and Characterization of a Gene Encoding the Human Angiotensin II Type 1A Receptor	C. A. Mauzy, O. Hwang, A. M. Egloff, L.-H. Wu, and F.-Z. Chung	277
Angiotensin II Receptor Subtypes Play Opposite Roles in Regulating Phosphatidylinositol Hydrolysis in Rat Skin Slices	Robert Gyurko, Birgitta Kimura, Pawels Kurian, Fulton T. Crews, and M. Ian Phillips	285
Characterization of Mouse Inhibin α Gene and Its Promoter	Jyan-Gwo J. Su and Aaron J. W. Hsueh	293
Human Insulin-like Growth Factor Binding Protein-6 Is O-Glycosylated	Leon A. Bach, N. Rao Thotakura, and Matthew M. Rechler	301
Biosynthesis of Nitric Oxide and Citrulline from L-Arginine by Constitutive Nitric Oxide Synthase Present in Rabbit Corpus Cavernosum	Peggy A. Bush, Norma E. Gonzalez, and Louis J. Ignarro	308
Low Density Lipoprotein Inhibits Accumulation of Nitrites in Murine Brain Endothelial Cell Cultures	Michal Bereta, Joanna Bereta, Stanley Cohen, and Marion C. Cohen	315
Suppression of Crossbridge Motions of Isolated Thick Myofilaments in ATP-Free Medium by Thiourea	Shih-fang Fan, M. M. Dewey, and B. Chu	321
Photothermal Spectroscopy of Bacteriochlorophyll-Lipoprotein Complexes	D. Frackowiak, R. Cegielski, I. Abdourakhmanov, and R. M. Leblanc	327
Amide Bond Cleavage Monitored Continuously Through Detection of a Dansyl-cadaverine Leaving Group	L. Lorand, S. N. P. Murthy, K. N. Parameswaran, P. T. Velasco, and J. Wilson	334
Level of ET _B Receptor mRNA Is Down-Regulated by Endothelins through Decreasing the Intracellular Stability of mRNA Molecules	Takeshi Sakurai, Hiroaki Morimoto, Yosohitoshi Kasuya, Yoh Takuwa, Hiromitsu Nakauchi, Tomoh Masaki, and Katsutoshi Goto	342
Invasion of Brain Tissue by Primary Glioma: Evidence for the Involvement of Urokinase-Type Plasminogen Activator as an Activator of Type IV Collagenase	Alison Reith and Garry J. Rucklidge	348
Action of Endothelin-1 on Rat Astrocytes through the ET _B Receptor	Hiroshi Hama, Takeshi Sakurai, Yoshitoshi Kasuya, Motoo Fujiki, Tomoh Masaki, and Katsutoshi Goto	355
Differential Expression of the <i>Neu</i> Oncogene in Mouse Liver and Pancreatic Cell Lines	Duen-Hwa Yan, Maria Carmen Marin, and Mien-Chie Hung	363
Hsp60/Chaperonin Gene Expression and Differentiation of Human Colon Adenocarcinoma and Multipotent Leukemic Cells	Xiang Lu and Vern L. Seligy	371
Membrane Fusion of Influenza Virus with Phosphatidylcholine Liposomes Containing Viral Receptors	Kazunori Kawasaki and Shun-ichi Ohnishi	378
An Immunomodulatory Protein, Ling ZHI-8 (LZ-8), Facilitates Cellular Interaction through Modulation of Adhesion Molecules	Nobuyuki Miyasaka, Hiroko Inoue, Tetsuya Totsuka, Ryuji Koike, Kohsuke Kino, and Hajime Tsunoo	385
Role of Mg ²⁺ in Activation of NADPH Oxidase of Human Neutrophils: Evidence That Mg ²⁺ Acts through G-Protein	Kunihiko Aoyagi, Koichiro Takeshige, Hideki Sumimoto, Hiroyuki Nunoi, and Shigeki Minakami	391

Increased Plasma Post-Heparin Diamine Oxidase Activity and Plant Sterol Levels in Streptozotocin Diabetic Rat	<i>Hideito Kojima, Yumiko Omoto, Hideki Hidaka, Takahiko Aoki, Takaaki Nakamura, Toshihiro Kawabata, Kazunori Konaka, Atsunori Kashiwagi, Ryuichi Kikkawa, and Yukio Shigeta</i>	398
A Novel Saccharide Structure, Xyl 1 $\rightarrow$ 3 Gal 1 $\rightarrow$ (So ₃ -)3,4 Fuc $\rightarrow$, Is Present in Acrosome Reaction-Inducing Substance (ARIS) of the Starfish, <i>Asterias amurensis</i>	<i>Tatsuyuki Okinaga, Yoko Ohashi, and Motonori Hoshi</i>	405
Purification and Characterization of S-Modulin, a Calcium-Dependent Regulator, on cGMP Phosphodiesterase in Frog Rod Photoreceptors	<i>Satoru Kawamura, Ken Takamatsu, and Kunio Kitamura</i>	411
Rat Hypothalamic Proopiomelanocortin Messenger RNA Is Unaffected by Adrenalectomy	<i>Martin N. Scanlon, Eliane Lazar-Wesley, Tamas Csikos, and George Kunos</i>	418
Amplification of P450c21 Expression in Cultured Mammalian Cells	<i>Michael H. Ricketts, Eric Chiao, Meng-Chun Hu, and Bon-chu Chung</i>	426
Morphological and Biochemical Evidence for Partial Nuclear Localization of Annexin 1 in Endothelial Cells	<i>Patrick Raynal, Paul M. P. van Bergen en Henegouwen, Francoise Hullin, Jeannie M. F. Ragab-Thomas, Josette Fauvel, Arie Verkleij, and Hugues Chap</i>	432
Epinephrine Induces Association of pp60 ^{src} with G _{1α} in Human Platelets	<i>Mauro Torti, Michael F. Crouch, and Eduardo G. Lapetina</i>	440
Post-translational Isoprenylation of Rho Protein Is a Prerequisite for Its Interaction with Mastoparan and Other Amphiphilic Agents	<i>G. Koch, C. Mohr, I. Just, and K. Aktories</i>	448
Kupffer Cells Play a Major Role in Insulin-Mediated Hepatic Glucose Uptake <i>in Vivo</i>	<i>Zoltán Spolarics, Aurél Ottlakán, Charles H. Lang, and John J. Spitzer</i>	455
Complement Inhibitor C4-Binding Protein in Amyloid Deposits Containing Serum Amyloid P in Alzheimer's Disease	<i>R. N. Kalaria and S. N. Kroon</i>	461
<i>In Vitro</i> Interaction between <i>Saccharomyces cerevisiae</i> CDC25 and RAS2 Proteins	<i>Maurizio D. Baroni, Giulia Marconi, M. Carla Parrini, Paolo Monti, and Lilia Alberghina</i>	467
Nitric Oxide Mediates Tumor Necrosis Factor- α Cytotoxicity in Endothelial Cells	<i>C. Estrada, C. Gómez, C. Martín, S. Moncada, and C. González</i>	475
A Gradient in Expression of the <i>Escherichia coli</i> Heat-Stable Enterotoxin Receptor Exists along the Villus-to-Crypt Axis of Rat Small Intestine	<i>Mitchell B. Cohen, Elizabeth A. Mann, Chantal Lau, Susan J. Henning, and Ralph A. Giannella</i>	483
Is a Point Mutation in the Mitochondrial ND2 Gene Associated with Alzheimer's Disease?	<i>Vittoria Petruzzella, Xi Chen, and Eric A. Schon</i>	491
A Novel Low-Density Lipoprotein with Large Amounts of Phospholipid Found in the Egg Yolk of Crustacea Sand Crayfish <i>Ibacus ciliatus</i> : Its Function as Vitellogenin-Degrading Proteinase	<i>Masaharu Komatsu and Seiichi Ando</i>	498

Glucagonlike Peptide-1(7-36)Amide Suppresses Glucagon Secretion and Decreases Cyclic Amp Concentration in Cultured In-R1-G9 Cells <i>Toshiko Matsumura, Hidehiko Itoh, Nobuaki Watanabe, Yasuo Oda, Misuzu Tanaka, Mitsuyoshi Namba, Norio Kono, Tatsuo Matsuyama, Ryoya Komatsu, and Yuji Matsuzawa</i>	503
Reconstitution and Characterization of the Human Neutrophil Respiratory Burst Oxidase Using Recombinant p47-phox, p67-phox and Plasma Membrane <i>David J. Uhlinger, K. Leigh Inge, Mary L. Kreck, Shiv Raj Tyagi, Nickolas Neckelmann, and J. David Lambeth</i>	509
Insulin Induced Phosphorylation and Activation of the cGMP-Inhibited cAMP Phosphodiesterase in Human Platelets <i>Pilar López-Aparicio, Ana Rascón, Vincent C. Manganiello, Karl-Erik Andersson, Per Belfrage, and Eva Degerman</i>	517
Okadaic Acid Induces the Rapid and Reversible Disruption of the Neurofilament Network in Rat Dorsal Root Ganglion Neurons <i>Michael G. Sacher, Eric S. Athlan, and Walter E. Mushynski</i>	524
Stearoyl-CoA Desaturase Gene Expression in Lymphocytes <i>Paul W. Tebbey and Thomas M. Buttk</i>	531
p56 ^{lck} Stably Associates with a 115-kDa Substrate <i>Pothur R. Srinivas, Jill E. Hutchcroft, Brian D. Aube, and Marietta L. Harrison</i>	537
Growth Inhibition of Leukemia Cell Line CEM-C1 by Farnesol: Effects of Phosphatidylcholine and Diacylglycerol <i>George Melnykovich, Jeffrey S. Haug, and Cheryl M. Goldner</i>	543
The Cysteine Residues in the Carboxy Terminal Domain of Tropoelastin Form an Intrachain Disulfide Bond That Stabilizes a Loop Structure and Positively Charged Pocket <i>Patricia L. Brown, Lisa Mecham, Clarina Tisdale, and Robert P. Mecham</i>	549
Ga ³⁺ Inhibits Parathyroid Hormone Release without Interacting with the CA ²⁺ Re- ceptor of the Parathyroid Cell <i>Peter Ridefelt, Per Hellman, Östen Ljunggren, Sverker Ljunghall, Göran Åkerström, Jonas Rastad, and Erik Gylfe</i>	556
Two Distinct Membrane-Bound Phosphatidylinositol-4-Phosphate Phosphatases in Bovine Brain <i>Shi-Mei Wang and Barry R. Ganong</i>	562
Synergistic Action of Two Oxysterols in the Lowering of HMG-CoA Reductase Activity in CHO-K1 Cells <i>Frederick D. Pinkerton, Ronald P. Pelley, and George J. Schroepfer, Jr.</i>	569
On the Mechanisms of KU Protein Binding to DNA <i>Wei-Wei Zhang and Mariana Yaneva</i>	574
Product Analyses in DNA Strand Scission by Antitumor Antibiotic Elsamicin A <i>Motonari Uesugi and Yukio Sugiura</i>	580
Cloning and Expression of Rat Preproendothelin-3 cDNA <i>Reiko Shiba, Takeshi Sakurai, Goro Yamada, Hiroaki Morimoto, Akira Saito, Tomoh Masaki, and Katsutoshi Goto</i>	588

Volatile Anesthetics Selectively Alter [³ H]Ryanodine Binding to Skeletal and Cardiac Ryanodine Receptors	<i>Timothy J. Connelly, Roque-El Hayek, Ben F. Rusy, and Roberto Coronado</i>	595
---	---	-----

ERRATA

Volume 175, Number 3, March 29, 1991: Clifford A. Lingwood, Michael Cheng, Howard C. Krivan, and Donald Woods, "Glycolipid Receptor Binding Specificity of Exoenzyme S from <i>Pseudomonas aeruginosa</i> ," pp. 1076-1081		601
Volume 185, Number 2, June 15, 1992: Yuichiro J. Suzuki, Masahiko Tsuchiya, Yasuko Shindo, and Lester Packer, "Cigarette Smoke Exposure Increases in the Cell Water Organization and Membrane Order of Cultured T Cells," pp. 624-629		601

Volume 186, Number 2, July 31, 1992

Correlation between Up-Regulation of Lymphokine mRNA and Down-Regulation of TcR, CD4, CD8, and lck mRNA as Shown by the Effect of CsA on Activated T Lymphocytes	<i>Florence Paillard, Ghyslaine Sterkers, and Catherine Vaquero</i>	603
Hydrogen/Deuterium Isotope Effect in the Oscillating Peroxidase-Oxidase Reaction	<i>Paul Rys and Junkuan Wang</i>	612
Thyroid Hormone Modulates Apolipoprotein B Gene Expression in HepG2 Cells	<i>Andre Theriault, Godwin Ogbonna, and Khosrow Adeli</i>	617
The Inhibition of Phosphatidylinositol 3-Kinase by Quercetin and Analogs	<i>William F. Matter, Raymond F. Brown, and Chris J. Vlahos</i>	624
Glycation of Lens MIP26 Affects the Permeability in Reconstituted Liposomes	<i>M. S. Swamy and E. C. Abraham</i>	632
Proteolytic Machinery of Glomerular Epithelial Cells against IgG	<i>Ashok K. Singh</i>	639
Porin of <i>Pseudomonas aeruginosa</i> Forms Low Conductance Ion Channel in Planar Lipid Bilayers	<i>Makoto Obara and Taiji Nakae</i>	645
ABA-Induced "Lipid Melting" and Its Reversal by Umbelliferone in the Plasmalemma of Guard Cell Protoplasts: A Breakthrough in Plant Hormone-Receptor Binding and Hormone Action	<i>Sadhna Purohit, Pradeep Kumar G., Malini Laloraya, Sudhakar Bharti, and Manmohan M. Laloraya</i>	652
Low-Affinity Ca ²⁺ -Binding Sites versus Zn ²⁺ -Binding Sites in Histidine-Rich Ca ²⁺ -Binding Protein of Skeletal Muscle Sarcoplasmic Reticulum	<i>Enzo Picello, Ernesto Damiani, and Alfredo Margreth</i>	659
Calreticulin Is Present in the Acrosome of Spermatids of Rat Testis	<i>Masahisa Nakamura, Yuichi Michikawa, Tadashi Baba, Shoichi Okinaga, and Kiyoshi Arai</i>	668
The Regulation of the Intracellular Sodium Ion Concentration in Cultured Chick Embryo Heart Cells	<i>Barbara Ahlemeyer, Horst Weintraut, and Wilhelm Schoner</i>	674

Interleukin-8 Inhibits the Induction of Nitric Oxide Synthase in Rat Peritoneal Neutrophils	<i>T. B. McCall, R. M. J. Palmer, and S. Moncada</i>	680
Identification of the Iron-Binding Histidine Residues in Soybean Lipoxygenase L-1	<i>Janusz Steczko and Bernard Axelrod</i>	686
The <i>Lux</i> Genes in <i>Photobacterium leiognathi</i> Are Closely Linked with Genes Corresponding in Sequence to Riboflavin Synthesis Genes	<i>Chan Yong Lee and Edward A. Meighen</i>	690
Quinone Dependent NADH Dehydrogenation in Mitochondria-like Particles from <i>Setaria digitata</i> , a Filarial Parasite	<i>V. M. Sivan and R. Kaleysa Raj</i>	698
A Novel Endothelial Tyrosine Kinase cDNA Homologous to Platelet-Derived Growth Factor Receptor cDNA	<i>Riccardo Sarzani, Giorgio Arnaldi, Roberto De Pirro, Paolo Moretti, Stefano Schiaffino, and Alessandro Rappelli</i>	706
Transactivation of the Human c-Myc Gene by c-Myb	<i>Andrea Zobel, Frank Kalkbrenner, Gerd Vorbrueggen, and Karin Moelling</i>	715
Identification of Four Genomic Loci Highly Related to Casein Kinase-2- α cDNA and Characterization of a Casein Kinase-2- α Pseudogene within the Mouse Genome	<i>Brigitte Boldyreff, Klaus Wehr, Roland Hecht, and Olaf-Georg Issinger</i>	723
Purification and Properties of a Functional 47-kDa Cytosolic Factor Required for NADPH-Oxidase Activation in Bovine Neutrophils	<i>Marie-Claire Pilloud-Dagher, Alain Jouan, and Pierre V. Vignais</i>	731
Functional Characterization of Serum DNase I in MRL ^{-lpr/lpr} Mice	<i>Manuel C. Peitsch, Thomas Hestekamp, Bernhard Polzar, Hans Georg Mannherz, and Jürg Tschopp</i>	739
A Mathematical Approach to Lipolysis Based on the Interrelationship of Physicochemical and Biochemical Data	<i>A. Tavridou, A. Avranas, and P. Arzoglou</i>	746
Human Preproendothelin-1 Is Converted into Active Endothelin-1 by Baculovirus-Infected Insect Cells	<i>Luca Benatti, Liviana Cozzi, Moreno Zamai, Monica Tamburin, Fabrizio Vaghi, Valeria R. Caiolfa, Maria Serena Fabbri, and Paolo Sarmientos</i>	753
Species Heterogeneity of Hepatic α_1 -Adrenoceptors: α_{1A} -, α_{1B} -, and α_{1C} -Subtypes	<i>J. Adolfo García-Sáinz, M. Teresa Romero-Avila, Rocío Alcántara Hernández, Marina Macías-Silva, Alberto Olivares-Reyes, and Claudia González-Espinosa</i>	760
A Highly Conserved Tyrosine Residue at Codon 845 within the Kinase Domain Is Not Required for the Transforming Activity of Human Epidermal Growth Factor Receptor	<i>Noriko Gotoh, Arinobu Tojo, Masayuki Hino, Yoshio Yazaki, and Masabumi Shibuya</i>	768
Evaluation of Nitrite Production by Human Monocyte-Derived Macrophages	<i>Eric L. Padgett and Stephen B. Pruet</i>	775
Endonuclease Activation during Apoptosis: The Role of Cytosolic Ca ²⁺ and pH	<i>Michael A. Barry and Alan Eastman</i>	782

Regulation of Phosphoinositide Hydrolysis in Cultured Astrocytes by Sphingosine and Psychosine	<i>Terry Ritchie, Abraham Rosenberg, and Ernest P. Noble</i>	790
Interaction of P-Glycoprotein with a Hydrophobic Component of Rat Urine	<i>Jeffrey H. M. Charuk and Reinhart A. F. Reithmeier</i>	796
Purified Estrogen Receptor Enhances <i>in Vitro</i> Transcription	<i>Vincenzo Nigro, Anna Maria Molinari, Ignazio Armetta, Antonietta de Falco, Ciro Abbondanza, Nicola Medici, and Giovanni Alfredo Puca</i>	803
Signal Peptide for Peroxisomal Targeting: Replacement of an Essential Histidine Residue by Certain Amino Acids Converts the Amino-Terminal Presequence of Peroxisomal 3-Ketoacyl-CoA Thiolase to a Mitochondrial Signal Peptide	<i>Takashi Osumi, Toshiro Tsukamoto, and Shingo Hata</i>	811
Novel Bovine Heart Calmodulin-Dependent Protein Kinase Which Phosphorylates a High Molecular Weight Calmodulin-Binding Protein	<i>Junor A. Barnes, Martin J. King, Jawahar Kalra, and Rajendra K. Sharma</i>	819
Isolation and Sequence Determination of cDNA Encoding PMP-22 (PAS-II/SR13/Gas-3) of Human Peripheral Myelin	<i>Kiyoshi Hayasaka, Masato Himoro, Kenji Nanao, Wataru Sato, Masayuki Miura, Keiichi Uyemura, Eiichi Takahashi, and Goro Takada</i>	827
Inhibition of Class II MHC Gene Expression by Anti-sense RNA in Transgenic Mice	<i>Nobuhiko Miki and Takeshi Tokuhisa</i>	832
Protein Transport in the Permeabilized Cell of <i>Schizosaccharomyces pombe</i>	<i>Hideko Kambe-Honjoh, Koji Yoda, and Makari Yamasaki</i>	838
Evidence for Elevation of Cytochrome P450E1 (Alcohol-Inducible Form) mRNA Levels in Rat Kidney Following Pyridine Administration	<i>Hyesook Kim, Sang G. Kim, Min-Young Lee, and Raymond F. Novak</i>	846
Lipopolysaccharide and Cytokines Induce a Macrophage-Type of Nitric Oxide Synthase in Bovine Retinal Pigmented Epithelial Cells	<i>O. Goureau, M. Lepoivre, and Y. Courtois</i>	854
<i>In Vivo</i> Targeting of Inflamed Areas by Electroloaded Neutrophils	<i>S. Sixou and J. Teissié</i>	860
The Endothelin ET _B Receptor Mediates Both Vasodilation and Vasoconstriction <i>in Vivo</i>	<i>Martine Clozel, Gillian A. Gray, Volker Breu, Bernd-Michael Löffler, and Rolf Osterwalder</i>	867
Kinetic Analysis of Duck ε-Crystallin with L-Lactate Dehydrogenase Activity: Determination of Kinetic Constants and Comparison of Substrate Specificity	<i>Chi-Yue Wu, Shui-Tein Chen, Shyh-Horng Chiou, and Kung-Tsung Wang</i>	874
Homotypic and Heterotypic Ca ²⁺ -Independent Cell Adhesion Activities of Biliary Glycoprotein, a Member of the Carcinoembryonic Antigen Family, Expressed on CHO Cell Surface	<i>Shinzo Oikawa, Motomu Kuroki, Yuji Matsuoka, Goro Kosaki, and Hiroshi Nakazato</i>	881
Regulatory Role of Microsomal 3-Hydroxy-3-methylglutaryl-Coenzyme A Reductase in a Tobacco Mutant That Overproduces Sterols	<i>Laurence Gondet, Thomas Weber, Pascale Maillot-Vernier, Pierre Benveniste, and Thomas J. Bach</i>	888

Association of Annexin V with Prolactin in the Rat Anterior Pituitary Gland <i>Mitsumori Kawaminami, Kouji Tanaka, Tamae Asawa, Sachiko Osugi, Hiroshi Kawauchi, Shiro Kurusu, and Inoru Hashimoto</i>	894
Alterations in Expression and Structure of the DNA Repair Gene <i>XRCC1</i> <i>Heahyun Yoo, Li Li, Peter G. Sacks, Larry H. Thompson, Frederick F. Becker, and John Y.-H. Chan</i>	900
Identification of Osteopontin in Isolated Rabbit Osteoclasts <i>Ken-ichi Tezuka, Takuya Sato, Hiroshi Kamioka, Peter J. Nijweide, Kayo Tanaka, Tetsu Matsuo, Mitsue Ohta, Noriyoshi Kurihara, Yoshiyuki Hakeda, and Masayoshi Kumegawa</i>	911
A Homology Domain Shared between <i>Drosophila optomotor-blind</i> and Mouse <i>Brachyury</i> Is Involved in DNA Binding <i>Gert O. Pflugfelder, Helmut Roth, and Burkhard Poeck</i>	918
Mapping of the DOPA Decarboxylase Gene to the 11A Band of the Murine Genome <i>Gilles Bruneau, Jean Thibault, François Gros, and Marie-Geneviève Mattei</i>	926
¹³ C NMR Spectroscopic Measurement of Glutathione Synthesis and Antioxidant Metabolism in the Intact Ocular Lens <i>James A. Willis and Thomas Schleich</i>	931
Rat Copper/Zinc Superoxide Dismutase Gene: Isolation, Characterization, and Species Comparison <i>Jan-Ling Hsu, Gary A. Visner, Ian A. Burr, and Harry S. Nick</i>	936
Vitamin E Protects Nerve Cells from Amyloid β Protein Toxicity <i>Christian Behl, John Davis, Greg M. Cole, and David Schubert</i>	944
Ceruloplasmin Stimulates NADH Oxidation of Pig Liver Plasma Membrane <i>F. J. Alcaín, J. M. Villalba, H. Löw, F. L. Crane, and P. Navas</i>	951
Footprinting Evidence for Close Contacts of the Yeast tRNA ^{Asp} Anticodon Region with Aspartyl-tRNA Synthetase <i>Angela Garcia and Richard Giege</i>	956
DNA Supercoiling Facilitates the Assembly of Transcriptionally Active Chromatin on the Adenovirus Major Late Promoter <i>Reiko Ohba, Hisahiro Tabuchi, and Susumu Hirose</i>	963
Phorbol Ester-Mediated Suppression of Cytochrome P450 <i>Cyp1a-1</i> Induction in Murine Skin: Involvement of Protein Kinase C <i>John J. Reiniers, Jr., Amador R. Cantu, and Alfred Schöller</i>	970
Identification of Synthetic Retinoids with Selectivity for Human Nuclear Retinoic Acid Receptor γ <i>Bruno A. Bernard, Jean-Michel Bernardon, Chantal Delescluse, Bernard Martin, Marie-Cécile Lenoir, Jean Maignan, Bruno Charpentier, William R. Pilgrim, Uwe Reichert, and Braham Shroot</i>	977
Antisera to Calreticulin Inhibits Sperm Motility in Mice <i>Masahisa Nakamura, Shigeru Oshio, Akihiro Tamura, Shoichi Okinaga, and Kiyoshi Arai</i>	984
Marked Induction of Hepatocyte Growth Factor mRNA in Intact Kidney and Spleen in Response to Injury of Distant Organs <i>Seiho Kono, Mika Nagaike, Kunio Matsumoto, and Toshikazu Nakamura</i>	991
Relaxin Increases Rat Heart Rate by a Direct Action on the Cardiac Atrium <i>David G. Ward, G. Roger Thomas, and Michael J. Cronin</i>	999

Calmodulin Is Involved in Catecholamine Secretion from Digitonin-Permeabilized Bovine Adrenal Medullary Chromaffin Cells	<i>Toshio Okabe, Nakaba Sugimoto, and Morihiro Matsuda</i>	1006
Conjugal Transfer of Plasmid and Transposon DNA from <i>Escherichia coli</i> into <i>Porphyromonas gingivalis</i>	<i>D. W. Dyer, G. Bilalis, J. H. Michel, and R. Malek</i>	1012
Replication-Defective Virus Infection of Feather Buds Produces a Localized Region of β -Galactosidase Activity	<i>Randall B. Widelitz and Cheng-Ming Chuong</i>	1020
Proliferative Effect of Phospholipase A ₂ in Rat Chondrocyte via Its Specific Binding Sites	<i>Junji Kishino, Masahiro Tohkin, and Hitoshi Arita</i>	1025
Effect of Photosensitizers in Chemical and Biological Processes: The MTO Mechanism in Photodynamic Therapy	<i>Dezső Gál</i>	1032
Incorporation into Planar Lipid Bilayers of ATP-Regulated K ⁺ Channels from Membranes of the Insulin Secreting β -Cell Line, HIT T15	<i>Yoshio Oosawa</i>	1037
Analysis of the Evolution of Angiotensin II Type 1 Receptor Gene in Mammals (Mouse, Rat, Bovine, and Human)	<i>Hiroaki Yoshida, Junji Kakuchi, Deng-Fu Guo, Hiroaki Furuta, Naoharu Iwai, Riet van der Meer-de Jong, Tadashi Inagami, and Iekuni Ichikawa</i>	1042
Nerve Growth Factor Suppresses Apoptosis of Murine Neutrophils	<i>Yukiko Kannan, Kaori Usami, Mitsuhiro Okada, Shinya Shimizu, and Hiroshi Matsuda</i>	1050
Small-Angle X-Ray Scattering Study by Synchrotron Orbital Radiation Reveals That High Molecular Weight Subunit of Glutenin Is a Very Anisotropic Molecule	<i>Norio Matsushima, Gen-ichi Danno, Naoki Sasaki, and Yoshinobu Izumi</i>	1057
Establishment of Hypersensitive Radioimmunoassay for Islet Amyloid Polypeptide Using Antiserum Specific for Its N-Terminal Region	<i>Kazutaka Shiomi, Masamitsu Nakazato, Mikiya Miyazato, Kenji Kangawa, Hisayuki Matsuo, and Shigeru Matsukura</i>	1065
Characterization of Human Thyrotropin Receptor-Related Peptide-like Immunoreactivity in Peripheral Blood of Graves' Disease	<i>Masami Murakami, Kazuya Miyashita, Masanobu Yamada, Tokuji Iriuchijima, and Masatomo Mori</i>	1074
Phosphorylation of the Recombinant Spliced Variants of the α -Subunit of the Stimulatory Guanine-Nucleotide Binding Regulatory Protein (G _s) by the Catalytic Subunit of Protein Kinase A	<i>Nigel J. Pyne, Michael Freissmuth, and Susan Pyne</i>	1081
A High Involvement of O ₂ Possibly Generated in Inner Membranes for Iron-Induced Microsomal Lipid Peroxidation	<i>Satoshi Koga and Minoru Nakano</i>	1087
The Rat Angiotensin II AT _{1A} Receptor Couples with Three Different Signal Transduction Pathways	<i>Junji Ohnishi, Masami Ishido, Takeshi Shibata, Tadashi Inagami, Kazuo Murakami, and Hitoshi Miyazaki</i>	1094
Mineralocorticoid Hormone Action in Plant Cells	<i>M. Mirshahi, A. Mirshahi, A. Nato, and M. K. Agarwal</i>	1102
A Plasminogen-Related Gene Is Expressed in Cancer Cells	<i>Lawrence Weissbach and Benjamin V. Treadwell</i>	1108

pH-Dependent Conformational Changes in the T- and R-States of Insulin in Solution: Circular Dichroic Studies in the pH Range of 6 to 10	<i>Yesook Kim and James E. Shields</i>	1115
Effect of pH on Quercetin-Induced Suppression of Heat Shock Gene Expression and Thermotolerance Development in HT-29 Cells	<i>Yong J. Lee, Linda Li Curetty, Zi-zheng Hou, Sang H. Kim, Jae H. Kim, and Peter M. Corry</i>	1121
Detection of the GLUT3 Facilitative Glucose Transporter in Rat L6 Muscle Cells: Regulation by Cellular Differentiation, Insulin, and Insulin-like Growth Factor-I	<i>Philip J. Bilan, Yasuhide Mitsumoto, Frances Maher, Ian A. Simpson, and Amira Klip</i>	1129
High Level Expression, Purification, and Characterization of the Kunitz-Type Protease Inhibitor Domain of Protease Nexin-2/Amyloid β -Protein Precursor	<i>Steven L. Wagner, Robert S. Siegel, Thomas S. Vedvick, William C. Raschke, and William E. Van Nostrand</i>	1138
Rhamnose Moiety of Phosphoramidon Is Not Required for <i>in Vivo</i> Inhibition of Endothelin-Converting Enzyme	<i>David M. Pollock, Kazumi Shiosaki, Gerard M. Sullivan, and Terry J. Opgenorth</i>	1146
The Generation of Inositolglycan Mediators from Rat Liver Plasma Membranes: The Role of Guanine Nucleotide Binding Proteins	<i>Elaine Kilgour, Joseph Larner, and Guillermo Romero</i>	1151
Proposed Tertiary Structure of the Sodium Channel	<i>Chikara Sato and Gen Matsumoto</i>	1158
PCR Cloning of the cDNA of Rabbit Skeletal Muscle Protein Phosphatase Inhibitor-2	<i>Zhongjian Zhang, Ge Bai, and Ernest Y. C. Lee</i>	1168
Hammerhead Ribozyme Cleavage of Hamster Prion Pre-mRNA in Complex Cell-Free Model Systems	<i>Robert B. Denman, Benjamin Purow, Richard Rubenstein, and David L. Miller</i>	1171
Leukocyte Chemotactic Activity of FKBP and Inhibition by FK506	<i>Maria C. Leiva and C. Richard Lyttle</i>	1178

Volume 186, Number 3, August 14, 1992

The Origin of the Electrophoretic Doublet of Thyroglobulin	<i>Fabrizio Gentile, Giuseppe Palumbo, and Gaetano Salvatore</i>	1185
Identification of the Hepatocyte Mitogen in Bovine Spleen as Heparin-Binding Growth Factors	<i>Masashi Suzuki, Takehiro Itoh, Tohru Suzuki, Nobumitsu Koga, Katsuya Kato, Takao Saito, and Youji Mitsui</i>	1192
Expression of TAPA-1 in Preimplantation Mouse Embryos	<i>Matthew L. Andria, Gregory S. Barsh, and Shoshana Levy</i>	1201
Neurocalcin, a Novel Calcium Binding Protein with Three EF-Hand Domains, Expressed in Retinal Amacrine Cells and Ganglion Cells	<i>Akio Nakano, Motomu Terasawa, Masato Watanabe, Nobuteru Usuda, Takashi Morita, and Hiroyoshi Hidaka</i>	1207

Propagation of a Calcium Pulse between Osteoblastic Cells	<i>Shen-Ling Xia and Jack Ferrier</i>	1212
Reactive Oxygen-Reducing and Protein-Refolding Activities of Adult T Cell Leukemia-Derived Factor/Human Thioredoxin	<i>Akira Mitsui, Tadashi Hirakawa, and Junji Yodoi</i>	1220
Molecular Cloning of Rabbit CAP-50, a Calyculin-Associated Annexin Protein	<i>Hiroshi Tokumitsu, Akihiro Mizutani, Masa-aki Muramatsu, Takashi Yokota, Ken-ichi Arai, and Hiroyoshi Hidaka</i>	1227
Functionally Essential Cytoplasmic Domain of the Erythropoietin Receptor	<i>Tomoki Chiba, Atsushi Kishi, Masahide Sugiyama, Hiroshi Amanuma, Mitsuru Machide, Yuka Nagata, and Kazuo Todokoro</i>	1236
Evaluation of the Holoenzyme Content of Aromatic L-Amino Acid Decarboxylase in Brain and Liver Tissues	<i>Yasuhiro Kawasaki, Hideyuki Hayashi, Kazuyuki Hatakeyama, and Hiroyuki Kagamiyama</i>	1242
Template. Phosphorothioate Oligonucleotides Duplexes as Inhibitors of HIV-1 Reverse Transcriptase	<i>Georges Maury, Abdelaziz El alaoui, François Morvan, Barbara Müller, Jean-Louis Imbach, and Roger S. Goody</i>	1249
Augmented Expression of HSP72 Protein in Normal Human Fibroblasts Irradiated with Ultraviolet Light	<i>Keiji Suzuki and Masami Watanabe</i>	1257
The Characterization of 5 Histidine-Serine Mutants of Human 5-Lipoxygenase	<i>M. David Percival and Marc Ouellet</i>	1265
Construction of a tRNA-Embedded-Ribozyme Trimming Plasmid	<i>Noriko Yuyama, Jun Ohkawa, Yoshio Inokuchi, Makoto Shirai, Akio Sato, Satoshi Nishikawa, and Kazunari Taira</i>	1271
Cloning and Expression of the Mouse Homolog of the Human α_2 -C2 Adrenergic Receptor	<i>Andrzej J. Chruscinski, Richard E. Link, David A. Daunt, Greg S. Barsh, and Brian K. Kobilka</i>	1280
Effects of a Bone Lysine-Rich 18-kDa Protein on Osteoblast-like MC3T3-E1 Cells	<i>Hai-Yan Zhou, Yohko Ohnuma, Hiroko Takita, Ryuichi Fujisawa, Morimichi Mizuno, and Yoshinori Kuboki</i>	1288
Effect of Glycolipids on the Phase Behavior and Dynamic Properties of Phospholipid Liposomes	<i>Jian-Wen Chen, Ke Shi, Langping Zhang, and Fen Huang</i>	1294
Novel Generation of Hormone Receptor Specificity by Amino Terminal Processing of Peptide YY	<i>D. Grandt, S. Teyssen, M. Schimiczek, J. R. Reeve, Jr., F. Feth, W. Rascher, H. Hirche, M. V. Singer, P. Layer, H. Goebell, F. J. Ho, and V. E. Eysselein</i>	1299
Adhesion Promotes Transcellular Leukotriene Biosynthesis during Neutrophil-Glomerular Endothelial Cell Interactions: Inhibition by Antibodies against CD18 and L-Selectin	<i>Hugh R. Brady and Charles N. Serhan</i>	1307
Rapamycin Inhibits the Phosphorylation of p70 S6 Kinase in IL-2 and Mitogen-Activated Human T Cells	<i>Naohiro Terada, Joseph J. Lucas, Agota Szepesi, Richard A. Franklin, Kozo Takase, and Erwin W. Gelfand</i>	1315
Pyrogenic Action of Endothelin in Conscious Rabbit	<i>Tomoyuki Koshi, Toshiyuki Edano, Koichi Arai, Chiyoka Suzuki, Yuriko Ehara, Mitsuteru Hirata, Masao Ohkuchi, and Tetsuro Okabe</i>	1322

- 4-Amino-6-methylhept-2-enoic Acid: A Leucine Analogue and Potential Probe for Localizing Sites of Proteolytic Control in the Hepatocyte *John J. Wert, Jr., Giovanni Miotto, Motoni Kadowaki, and Glenn E. Mortimore* 1327
- The Cell Cycle Regulator, Human p50^{weel}, Is a Tyrosine Kinase and Not a Serine/Tyrosine Kinase *Reiko Honda, Yoshiki Ohba, and Hideyo Yasuda* 1333
- Temperature-Dependent Protein Folding *in Vivo*: Lower Growth Temperature Increases Yield of Two Genetic Variants of *Xenopus laevis* Cu,Zn Superoxide Dismutase in *Escherichia coli* *Andrea Battistoni, M. Teresa Carri, A. Paola Mazzetti, and Giuseppe Rotilio* 1339
- Localization of *smg* p25A/*rab3A* p25, a Small GTP-Binding Protein, at the Active Zone of the Rat Neuromuscular Junction *Akira Mizoguchi, Masahiko Arakawa, Motomaru Masutani, Akira Tamekane, Hideyuki Yamaguchi, Naoki Minami, Yoshimi Takai, and Chizuka Ide* 1345
- Nuclear Proteins from Capan-2 Cell Line Form Specific Complexes with the 17-1A Antigen Gene Promoter *Barbara Siemieniako and Ewa Wiland* 1353
- Heterotopic Bone Formation Induced by Bone Morphogenetic Protein in Mice with Collagen-Induced Arthritis *Youichi Fujimori, Takashi Nakamura, Shinichiro Ijiri, Kazuya Shimizu, and Takao Yamamuro* 1362
- Cytochrome *b*₅₅₈, a Component of the Phagocyte NADPH Oxidase, Is a Flavoprotein *Hideki Sumimoto, Norihiro Sakamoto, Masahiko Nozaki, Yoshiyuki Sakaki, Koichiro Takeshige, and Shigeki Minakami* 1368
- Internalization of V₂-Vasopressin Receptors in LLC-PK₁-Cells: Evidence for Receptor-Mediated Endocytosis *Berthold Hofer, Hans-Joachim Merker, Jacques A. Dürr, Sigrud Schiller, Peter Gross, and Johannes Hensen* 1376
- Phospholipid Import into Mitochondria: Possible Regulation Mediated through Lipid Polymorphism *D. Ardail, F. Lermé, and P. Louisot* 1384
- Heterogeneous Responses of Recombinant Human Thyrotropin Receptor to Immunoglobulins from Patients with Graves' Disease *Toyoshi Endo, Masayuki Ohmori, Masato Ikeda, Emiko Anzai, and Toshimasa Onaya* 1391
- Regulatory Role of GM3 Ganglioside in Integrin Function, as Evidenced by Its Effect on Function of $\alpha 5 \beta 1$ -Liposomes: A Preliminary Note *Mingzhe Zheng, Tsutomu Tsuruoka, Tsutomu Tsuji, and Sen-itiroh Hakomori* 1397
- Expression of the B Cell-Associated Tyrosine Kinase Gene *lyn* in Primary Neuroblastoma Tumors and Its Modulation during the Differentiation of Neuroblastoma Cell Lines *Wolfgang Bielke, Andrew Ziemieki, Ludwig Kappos, and Guido C. Miescher* 1403
- Induction of Platelet-Derived Growth Factor Chain A Gene Expression in Human Smooth Muscle Cells by Oxidized Low Density Lipoproteins *Renate M. L. Zwijsen, Sandra C. Japenga, Astrid M. P. Heijen, Rommert C. van den Bos, and Jan H. Koeman* 1410
- Interaction of DNA with Cationic Liposomes: Ability of Transfecting Lentil Protoplasts *Mauro Maccarrone, Luciana Dini, Luisa Di Marzio, Antonio Di Giulio, Antonello Rossi, Giuseppe Mossa, and Alessandro Finazzi-Agrò* 1417

γ -Irradiation Potentiates L-Arginine-Dependent Nitric Oxide Formation in Mice <i>Nina V. Voevodskaya and Anatoly F. Vanin</i>	1423
Microbial Oxidation of Adamantanone by <i>Pseudomonas putida</i> Carrying the Camphor Catabolic Plasmid <i>Sergey A. Selifonov</i>	1429
Development of Hydrophobicity Parameters for Prenylated Proteins <i>Shaun D. Black</i>	1437
Age-Associated Decreases in Prostaglandin Contents in Human Gastric Mucosa <i>Hidemi Goto, Satoru Sugiyama, Atsushi Ohara, Hiroshi Hoshino, Eiji Hamajima, Shin-ichi Kanamori, Yoshihisa Tsukamoto, and Takayuki Ozawa</i>	1443
Mapping the Orientation of an Antigenic Peptide Bound in the Antigen Binding Groove of H-2K ^b Using a Monoclonal Antibody <i>Sebastian Joyce, Rui Sun, and Stanley G. Nathenson</i>	1449
Conjugated Bile Acid Uptake by <i>Xenopus laevis</i> Oocytes Induced by Microinjection with Ileal Poly A ⁺ mRNA <i>Steven Sorscher, Jan Lillienau, Judy L. Meinkoth, Joseph H. Steinbach, Claudio D. Schteingart, James Feramisco, and Alan F. Hofmann</i>	1455
Alteration of RNA I Metabolism in a Temperature-Sensitive <i>Escherichia coli</i> RNPA Mutant Strain <i>Young Hwan Jung, Inwon Park, and Younghoon Lee</i>	1463
A Model System for Tumor Angiogenesis: Involvement of Transforming Growth Factor- α in Tube Formation of Human Microvascular Endothelial Cells Induced by Esophageal Cancer Cells <i>Kazuki Okamura, Akio Morimoto, Ryoji Hamanaka, Mayumi Ono, Kimitoshi Kohno, Yuzo Uchida, and Michihiko Kuwano</i>	1471
Synthesis of Phosphatidylinositol 3,4-Bisphosphate but Not Phosphatidylinositol 3,4,5-Trisphosphate Is Closely Correlated with Protein-Tyrosine Phosphorylation in Thrombin-Activated Human Platelets <i>Yutaka Yatomi, Yukio Ozaki, and Shoji Kume</i>	1480
Genes for Bone Morphogenetic Proteins Are Differentially Transcribed in Early Amphibian Embryos <i>Shin-ichiro Nishimatsu, Atsushi Suzuki, Akihito Shoda, Kazuo Murakami, and Naoto Ueno</i>	1487
Platelet-Derived Growth Factor Activation of Gastric Mucosal Calcium Channels <i>B. L. Slomiany, J. Liu, and A. Slomiany</i>	1496
Sensitive Detection and Identification of Mycoplasma-like Organisms in Plants by Polymerase Chain Reactions <i>Dennis Schaff, Ing-Ming Lee, and Robert E. Davis</i>	1503
PDGF AA Homodimers Are Potent Chemoattractants for Fibroblasts and Neutrophils, and for Monocytes Activated by Lymphocytes or Cytokines <i>Deborah Shure, Robert M. Senior, Gail L. Griffin, and Thomas F. Deuel</i>	1510
Methylation Inhibits the Interaction of DNA Binding Proteins with a Potential C-Abl Intron Regulatory Element <i>Jamie A. Hengst-Zhang and Sigmund A. Weitzman</i>	1515
Enhanced Photorelaxation in Aorta, Pulmonary Artery, and Corpus Cavernosum Produced by BAY K 8644 or N-Nitro-L-arginine <i>Xiu Chen and C. N. Gillis</i>	1522

Assembly-Dependent Phosphorylation of Myosin and Paramyosin of Native Thick Filaments in *Caenorhabditis elegans* Chinmoy S. Dey, Philip R. Deitiker, and Henry F. Epstein 1528

Isolation and Structural Characterization of a New Crosslinking Amino Acid, Cyclopentenosine, from the Acid Hydrolysate of Elastin Fumihiko Nakamura, Kazuyuki Yamazaki, and Kyoza Suyama 1533

SK&F96365 Inhibits Histamine-Induced Formation of Endothelium-Derived Relaxing Factor in Human Endothelial Cells Wolfgang F. Graier, Klaus Groschner, Kurt Schmidt, and Walter R. Kukovetz 1539

Solubilization of Ribosomes in Reverse Micelles Giordano Palazzo and Pier Luigi Luisi 1546

Synthesis and Purification of Biologically Active Rat Brain-Derived Neurotrophic Factor from *Escherichia coli* Alessandro Negro, Vincenza Corsa, Carlo Moretto, Stephen D. Skaper, and Lanfranco Callegaro 1553

Serotonin Stimulates a Ca^{2+} Permeant Nonspecific Cation Channel in Hepatic Endothelial Cells Ulrike Brauneis, Zenaïda Gatmaitan, and Irwin M. Arias 1560

The Binding of Bridged Bis-Pyridinium Oximes to DNA and Its Relevance to the Induction of Mitochondrial Dysfunction in Yeast Guy Dodin, Jean-Marc Kühnel, Pierre Demersemann, Dietrich Aeverbeck, and Sylvano Nocentini 1567

Study of *O*-Glycan Sialylation in C6 Cultured Glioma Cells: Regulation of a β -Galactoside α 2,3 Sialyltransferase Activity by Ca^{2+} /Calmodulin Antagonists and Phosphatase Inhibitors Pascal Reboul, Pascal George, Jocelyne Geoffroy, Pierre Louisot, and Pierre Broquet 1575

Inhibition of Phosphatidylserine Synthesis by Glutamate, Acetylcholine, Thapsigargin, and Ionophore A23187 in Glioma C6 Cells M. Czarny, P. Sabała, A. Ucieklak, L. Kaczmarek, and J. Barańska 1582

An Endogenous Membrane-Bound Protein Inhibits the Phosphorylation of the L-Type Calcium Channel by the cAMP-Dependent Protein Kinase Ruediger Woscholski and Dieter Marmé 1588

Regulation of Endothelin-1 Synthesis in Cultured Guinea Pig Airway Epithelial Cells by Various Cytokines Takeo Endo, Yoshiyuki Uchida, Hirokazu Matsumoto, Nobuhiro Suzuki, Akihiro Nomura, Fusao Hirata, and Shizuo Hasegawa 1594

Cytotoxicity of a New IMP Dehydrogenase Inhibitor, Benzamide Riboside, to Human Myelogenous Leukemia K562 Cells Hiremagalur N. Jayaram, Kamran Gharehbaghi, Nagesh H. Jayaram, Jason Rieser, Karsten Krohn, and Kenneth D. Paull 1600

Molecular Cloning and Chromosomal Mapping of a Human Protein-Tyrosine Phosphatase LC-PTP Masaaki Adachi, Masuo Sekiya, Masaharu Isobe, Yoshinori Kumura, Zen-ichi Ogita, Yuji Hinoda, Kohzoh Imai, and Akira Yachi 1607

Peptide Tyrosine Phenylalanine (PYF): A Novel, Neuropeptide F-Related Nonapeptide from the Brain of the Squid, *Loligo vulgaris* David Smart, Christopher Shaw, Colin Johnston, Lars Thim, David Halton, and Keith Buchanan 1616

Evidence for Thiophene-S-Oxide as a Primary Reactive Metabolite of Thiophene <i>in Vivo</i> : Formation of a Dihydrothiophene Sulfoxide Mercapturic Acid	<i>P. M. Dansette, Do Cao Thang, H. El Amri, and D. Mansuy</i>	1624
Transcriptional Activation of the Urokinase Receptor Gene by Endothelin-1	<i>Ci-Jiang He, Geneviève Nguyen, Xiao Mei Li, Marie-Noëlle Peraldi, Colette Adida, Eric Rondeau, and Jean-Daniel Sraer</i>	1631
Immunosuppressive Molecules Produced by Sertoli Cells Cultured <i>in Vitro</i> : Biological Effects on Lymphocytes	<i>P. De Cesaris, A. Filippini, C. Cervelli, A. Riccioli, S. Muci, G. Starace, M. Stefanini, and E. Ziparo</i>	1639
Cholesterylene, a Newly Recognized Tissue Lipid, Found at High Levels in the Cornea	<i>Richard J. Cenedella, Lana L. Linton, and Cecil P. Moore</i>	1647
Interaction of Ubiquinone and Vitamin K ₃ with Mitochondrial Succinate-Ubiquinone Oxidoreductase	<i>Alexander B. Kotlyar, Menahem Gutman, and Brian A. C. Ackrell</i>	1656
Delimitation of Cohesive Ends Site (<i>cos</i>) of <i>Streptomyces</i> Temperate Bacteriophage R4	<i>Hisayuki Mitsui and Hideo Takahashi</i>	1663
Electrophoretic Profiles of Mitochondrial Plasmids in <i>Neurospora</i> Suggest They Replicate by a Rolling Circle Mechanism	<i>R. Maleszka</i>	1669
Dichotomy in the Laminin-Binding Properties of Soluble and Membrane-Bound Human Galactoside-Binding Protein	<i>Josiah Ochieng, Mark Gerold, and Avraham Raz</i>	1674
Modulation of K ⁺ Channels by Hydrogen Peroxide	<i>E. Vega-Saenz de Miera and B. Rudy</i>	1681
The Primary Structure of Rat Ribosomal Protein S25	<i>Yuen-Ling Chan and Ira G. Wool</i>	1688
Phosphorylation of the Epstein-Barr Virus Nuclear Antigen 2	<i>Friedrich A. Grässer, Susanne Göttel, Peter Haiss, Brigitte Boldyreff, Olaf G. Issinger, and Nikolaus Mueller-Lantzsch</i>	1694
Author Index for Volume 186		1702

Volume 187, Number 1, August 31, 1992

A Novel Gene Encoding a Smooth Muscle Protein Is Overexpressed in Senescent Human Fibroblasts	<i>Ray Thweatt, Charles K. Lumpkin, Jr., and Samuel Goldstein</i>	1
N-Terminal Truncation of Salmon Calcitonin Leads to Calcitonin Antagonists: Structure Activity Relationship of N-Terminally Truncated Salmon Calcitonin Fragments <i>in Vitro</i> and <i>in Vivo</i>	<i>Jean H. M. Feyen, Francis Cardinaux, Rainer Gamse, Christian Bruns, MoTse Azria, and Ulrich Trechsel</i>	8
Cell Cycle-Dependent Changes in Tissue Transglutaminase mRNA Levels in Bovine Endothelial Cells	<i>Kiyomitsu Nara, Yasunori Aoyama, Tomoko Iwata, Hiromi Hagiwara, and Shigehisa Hirose</i>	14

Effect of Semi-random Mutagenesis at the C-Terminal 4 Amino Acids of Human Interleukin-6 on Its Biological Activity	<i>Hisashi Yasueda, Yuko Miyasaka, Toshiro Shimamura, and Hiroshi Matsui</i>	18
PCR-Derived cDNA Clones for X-Linked Phosphoglycerate Kinase-1 in a Marsupial, the Tammar Wallaby (<i>Macropus eugenii</i>)	<i>R. Zehavi-Feferman and D. W. Cooper</i>	26
Affinity Labeling of Vertebrate Oxidosqualene Cyclases with a Tritiated Suicide Substrate	<i>Ikuro Abe, Mei Bai, Xiao-yi Xiao, and Glenn D. Prestwich</i>	32
On the Stability of Bovine Gamma II Crystallin	<i>Frederick A. Bettelheim, Mark B. Reid, Peter McPhie, and Donita Garland</i>	39
Direct Demonstration of Transcriptional Activation of Collagen Gene Expression in Systemic Sclerosis Fibroblasts: Insensitivity to TGF β 1 Stimulation	<i>K. Kikuchi, C. W. Hartl, E. A. Smith, E. C. LeRoy, and M. Trojanowska</i>	45
Okadaic Acid Is a Potent Inducer of AP-1, NF- κ B, and Tumor Necrosis Factor- α in Human B Lymphocytes	<i>P. Rieckmann, C. Thévenin, and J. H. Kehrl</i>	51
The Primary Structure of Rat Ribosomal Protein L3	<i>Yuh Kuwano and Ira G. Wool</i>	58
Nucleoside Diphosphate Kinase Does Not Directly Interact with Tubulin nor Microtubules	<i>Ronald Melki, Ioan Lascu, Marie-France Carlier, and Michel Véron</i>	65
The Sulfhydrylreagent <i>N</i> -Ethylmaleimide Induces Hyperphosphorylation on Tyrosine Residues in the Jurkat T-Cell Line	<i>Anders Ståhls</i>	73
Induction of Differentiation of the Human Promyelocytic Cell Line HL-60 by Activin/EDF	<i>Ryutaro Yamada, Toshiya Suzuki, Makoto Hashimoto, Yuzuru Eto, Koichiro Shiokawa, and Masami Muramatsu</i>	79
Molecular Cloning and Expression of an Adenosine A2b Receptor from Human Brain	<i>Kerrie D. Pierce, Timothy J. Furlong, Lisa A. Selbie, and John Shine</i>	86
The Oxygenated Flavohemoglobin from <i>Escherichia coli</i> : Evidence from Photodissociation and Rapid-Scan Studies for Two Kinetic and Spectral Forms	<i>Yutaka Oriti, Nikolaos Ioannidis, and Robert K. Poole</i>	94
Identification of an Amino Acid Residue Involved in the Substrate-Binding Site of Rat Liver Uricase by Site-Directed Mutagenesis	<i>Masaki Ito, Seiya Kato, Masamichi Nakamura, Mitiko Go, and Yasuyuki Takagi</i>	101
<i>Trypanosoma cruzi</i> : Inhibition of Metacyclogenesis by Mannose	<i>M. A. Barbieri, E. M. Lammel, E. L. D. Isola, and F. Bertini</i>	108
Discrete Subcellular Localization of Phosphoinositidase C β , γ , and δ in PC12 Rat Pheochromocytoma Cells	<i>Meri Mazzoni, Valeria Bertagnolo, Luca Maria Neri, Cinzia Carini, Marco Marchisio, Daniela Milani, Francesco A. Manzoli, and Silvano Capitani</i>	114
Heterogeneity among Human Nasopharyngeal Carcinoma Cell Lines for Inflammatory Cytokines mRNA Expression Levels	<i>Yann Mahé, Kunitaka Hirose, Bernard Clausse, Salem Chouaib, Thomas Tursz, and Bernard Mariamé</i>	121
Two Gonadotropin-Releasing Hormones from African Catfish (<i>Clarias gariepinus</i>)	<i>Jan Bogerd, Ka Wan Li, Coby Janssen-Dommerholt, and Henk Goos</i>	127

An Apparently Allosteric Effect Involving N ₂ O with the Nitrous Oxide Reductase from <i>Wolinella succinogenes</i>	Chunqing Zhang, Alison M. Jones, and Thomas C. Hollocher	135
Selective and Potent Inhibition of Different Hepatic UDP-Glucuronosyltransferase Activities by ω,ω,ω -Triphenylalcohols and UDP Derivatives	M. Said, D. Noort, J. Magdalou, J. C. Ziegler, G. A. van der Marel, J. H. van Boom, G. J. Mulder, and G. Siest	140
Crystallization and Preliminary Characterization of Three Crystal Forms of Human Recombinant Transforming Growth Factor- α	Avis T. Danishefsky, Louis E. Burton, and J. Ronald Rubin	146
The Cloning and Expression of a Human α -1,3-Fucosyltransferase Capable of Forming the E-Selectin Ligand	Kari L. Koszdin and Benjamin R. Bowen	152
Inositol Hexakisphosphate Receptor Identified as the Clathrin Assembly Protein AP-2	Susan M. Voglmaier, James H. Keen, Jo-Ellen Murphy, Christopher D. Ferris, Glenn D. Prestwich, Solomon H. Snyder, and Anne B. Theibert	158
Effects of Taxotere on Murine and Human Tumor Cell Lines	Jean-François Riou, Annette Naudin, and François Lavelle	164
Enantioselectivity of the Hydrolysis of Linoleic Acid Monoepoxides Catalyzed by Soybean Fatty Acid Epoxide Hydrolase	Elizabeth Blee and Francis Schuber	171
Purification of Human Placenta Diamine Oxidase	Françoise Morel, Anny Surla, and Pierre V. Vignais	178
Amphotropic Retroviruses with a Hybrid Long Terminal Repeat as a Tool for Gene Therapy of Cystic Fibrosis	Martina Wilke, Bram Bout, Elly Verbeek, Wendy Kappers, Ton Verkerk, Dinko Valerio, and Bob Scholte	187
CD11b Is a Calcium-Dependent Epitope in Human Neutrophils	Lasse Leino and Katja Sorvajärvi	195
Effects of Osmotic Stress and Hyperglycemia on Aldose Reductase Gene Expression in Human Renal Proximal Tubule Cells	J. Mark Petrash, Mary Flath, Don Sens, and John Bylander	201
Changes in Bioactive Lipids, Alkylacylglycerol and Ceramide, Occur in HIV-Infected Cells	Paul P. Van Veldhoven, Tom J. Matthews, Dani P. Bolognesi, and Robert M. Bell	209
Cancer-Associated Glycoproteins Defined by a Monoclonal Antibody, MLS 128, Recognizing the Tn Antigen	Hiroshi Nakada, Mizue Inoue, Yoshito Numata, Nobuhiro Tanaka, Ikuo Funakoshi, Shigeyuki Fukui, and Ikuo Yamashina	217
TGF β Inhibits Rat Thyroid Cell Proliferation without Alterations in the Expression of TSH-Induced Cell Cycle-Related Genes	Anna Maria Cirafici, Stefano Pepe, Gabriella Mincione, Diana Esposito, and Giulia Colletta	225
Isolation of Human Retinal Genes: Recoverin cDNA and Gene	Akira Murakami, Toshihiro Yajima, and George Inana	234
Retinoic Acid Ambivalently Regulates the Expression of MyoD1 in the Myogenic Cells in the Limb Buds of the Early Developmental Stages	Takashi Momoi, Sachiko Miyagawa-Tomita, Seiji Nakamura, Ichirou Kimura, and Mariko Momoi	245

Nucleotide-Activated Chloride Channels in Lysosomal Membranes <i>Ben C. Tilly, Grazia M. S. Mancini, Jan Bijman, Pieter G. M. van Gageldonk, Cecile E. M. T. Beerens, Robert J. Bridges, Hugo R. de Jonge, and Frans W. Verheijen</i>	254
Photo-Induced Crosslinking of Histones H3 and H1 to DNA in Deoxyribonucleo- protein: Implication in Studying Histone-DNA Interactions <i>Lidija Kurochkina and Galina Kolomijtseva</i>	261
Pretreatment Effects of Jelly Components on the Sperm Acrosome Reaction and Histone Degradation in the Starfish, <i>Asterina pectinifera</i> <i>Tosikazu Amano, Yoshihito Okita, Taei Matsui, and Motonori Hoshi</i>	268
Egg Jelly Components Responsible for Histone Degradation and Acrosome Reaction in the Starfish, <i>Asterina pectinifera</i> <i>Tosikazu Amano, Yoshihito Okita, Tatsuyuki Okinaga, Taei Matsui, Ichiro Nishiyama, and Motonori Hoshi</i>	274
The N-Terminal Hexapeptide Fragment of IGF II Stimulates Thymidine Incorp- oration into Fibroblasts <i>G. Haselbacher, M. Custer, U. Lutz, and R. E. Humbel</i>	279
Human Platelet Factor 4 Is a Direct Inhibitor of Human Osteoblast-like Osteo- sarcoma Cell Growth <i>Dimitris N. Tatakis</i>	287
Demonstration of Antigenic Similarities and Variations in Excretory/Secretory Anti- gens of <i>Toxoplasma gondii</i> <i>N. Rahmah and A. Khairul Anuar</i>	294
Expression of Two S-Ribonucleases of <i>Petunia inflata</i> Using Baculovirus Expres- sion System <i>Jinghong Mu and Teh-hui Kao</i>	299
Effect of 5-Fluorouracil on Interleukin-2 Expression <i>K. N. Balaji and R. Nayak</i>	305
Reconstitution of Cytochrome P4502B4 (LM2) Activity with Camphor and Lina- loul Monooxygenase Electron Donors <i>Rita Bernhardt and I. C. Gunsalus</i>	310
Identification of Novel RNA-Binding Proteins That Interact in the Coding Region of Protein D Sense RNA <i>in Vitro</i> <i>Nagi G. Reddy, Joseph C. Hall, John G. Kochins, and Frank M. Perez</i>	318
Conformational Feature of Neuroactive Domoic Acid: X-Ray Structural Compar- ison with Isodomoic Acid A and α -Kainic Acid <i>Kyosuke Nomoto, Tsunematsu Takemoto, Mitsuru Maeda, Yasuko In, Mitsunobu Doi, Masatoshi Inoue, and Toshimasa Ishida</i>	325
Expression of Two Types of Neurofibromatosis Type 1 Gene Transcripts in Gastric Cancers and Comparison of GAP Activities <i>Tohru Uchida, Takashi Matozaki, Toshiya Suzuki, Kohei Matsuda, Ken Wada, Osamu Nakano, Yoshitaka Konda, Hogara Nishisaki, Munehiko Nagao, Choitsu Sakamoto, and Masato Kasuga</i>	332
Metabolic Studies in a Mouse Model of Hepatorenal Tyrosinemia: Absence of Perinatal Abnormalities <i>Janna C. Collins, Douglas N. Buchanan, Jess G. Thoene, Robert P. Erickson, Susan Sklower Brooks, and Salome Gluecksohn-Waelsch</i>	340
Specific Erythroid Differentiation of Mouse Erythroleukemia Cells by Activins and Its Enhancement by Retinoic Acids <i>Hideho Uchiyama and Makoto Asashima</i>	347

Acyl-Trafficking in Membrane Phospholipid Fatty Acid Turnover: The Transfer of Fatty Acid from the Acyl-L-Carnitine Pool to Membrane Phospholipids in Intact Human Erythrocytes	Arduino Arduini, Vladimir Tyurin, Yulia Tyuruna, Edoardo Arrigoni-Martelli, Francesco Molajoni, Secondo Dottori, and Giorgio Federici	353
Multiple mRNA Forms of Human GTP Cyclohydrolase I	Akifumi Togari, Hiroshi Ichinose, Shosei Matsumoto, Keisuke Fujita, and Toshiharu Nagatsu	359
Human Histo-Blood Group A ² Transferase Coded by a A ² Allele, One of the A Subtypes, Is Characterized by a Single Base Deletion in the Coding Sequence, Which Results in an Additional Domain at the Carboxyl Terminal	Fumi-ichiro Yamamoto, Patricia D. McNeill, and Sen-itiroh Hakomori	366
Molecular Cloning of Nucleobindin, a Novel DNA-Binding Protein That Contains Both a Signal Peptide and a Leucine Zipper Structure	Keiji Miura, Koiti Titani, Yoshikazu Kurosawa, and Yoshiyuki Kanai	375
Calcitonin Gene-Related Peptide: An Autocrine Growth Factor with Regulatory Activity <i>in Vitro</i>	Nadine Segond, Pascale Gerbaud, Michèle Cressent, Françoise Lasmoles, Jacqueline Taboulet, Annick Jullienne, Françoise Raynaud, Mohsen S. Moukhtar, and Danièle Evain-Brion	381
Characterization of a Protease with α - and β -Fibrinogenase Activity from the Western Diamondback Rattlesnake, <i>Crotalus atrox</i>	Shyh-Horng Chiou, Chin-Chun Hung, and Kai-Fa Huang	389
A Novel Transthyretin Mutation at Position 30 (Leu for Val) Associated with Familial Amyloidotic Polyneuropathy	Tatsufumi Murakami, Tetsushi Atsumi, Shuichiro Maeda, Sumio Tanase, Kuniko Ishikawa, Shuji Mita, Toshihide Kumamoto, Shukuro Araki, and Masayuki Ando	397
Production and Properties of Novel Human Thyroid Cancer Specific Monoclonal Antibodies	Hideo Sugawa, Masumi Miyamoto, Kayoko Higuchi, Ernest Smith, Toru Mori, and Hiroo Imura	404
Negative Regulation of the Murine Cytosolic Aldehyde Dehydrogenase-3 (<i>Aldh-3c</i>) Gene by Functional CYP1A1 and CYP1A2 Proteins	Vasilis Vasiliou, Alvaro Puga, and Daniel W. Nebert	413
Polymerase Chain Reaction—Amplification of the Coding Sequence of the Type X Collagen Gene from Genomic DNA and Identification of a Polymorphism That Changes Gly to Arg at Position 545 by Single-Strand Conformation Polymorphism Analysis	Rita M. Dharmavaram, Minzhong Peng, Rendall R. Strawbridge, and Sergio A. Jimenez	420
Site-Directed Mutagenesis of Two Cysteine Residues in the <i>Escherichia coli</i> OGT O ⁶ -Alkylguanine DNA Alkyltransferase Protein	L. C. Harris, P. M. Potter, and G. P. Margison	425
8-Azidoadenosine and Ribonucleotide Reductase	B. Roy, M. Lepoivre, J. L. Decout, J. Lhomme, and M. Fontecave	432
IL-3 and GM-CSF Induce the Expression of the Inositol Trisphosphate Receptor in K562 Myeloblast Cells	Peter G. Bradford, Youyu Jin, Pei Hui, and Xiaohong Wang	438
Recovery of Ornithine Decarboxylase Activity after Inhibition with α -Difluoromethylornithine	John L. A. Mitchell, Robert J. Kurzeja, John F. Marsh, and Roger R. Diveley, Jr.	443

Molecular Cloning of the Alcohol/Hydroxysteroid Form (<i>hST_a</i>) of Sulfotransferase from Human Liver	<i>Ah-Ng Tony Kong, Linding Yang, Meihui Ma, Deling Tao, and Thorir D. Bjornsson</i>	448
12(<i>R</i>)-Hydroxyeicosatetraenoic Acid Synthesis by 3-Methylcholanthrene- and Clofibrate-Inducible Cytochrome P450 in Porcine Ciliary Epithelium	<i>Tadashi Asakura and Hitoshi Shichi</i>	455
Novel Variant Transthyretin Gene (Ser ⁵⁰ to Ile) in Familial Cardiac Amyloidosis	<i>Hirofumi Nishi, Akinori Kimura, Haruhito Harada, Yasuo Hayashi, Motoomi Nakamura, and Takehiko Sasazuki</i>	460
cDNA Cloning of the Neutrophil Bactericidal Peptide Indolicidin	<i>Giannino Del Sal, Paola Storici, Claudio Schneider, Domenico Romeo, and Margherita Zanetti</i>	467
Ozonation of Lysozyme in the Presence of Oleate in Reverse Micelles of Sodium Di-2-ethylhexylsulfosuccinate	<i>Rao M. Uppu and William A. Pryor</i>	473
Isolation and Characterization of a 25-kDa Antifungal Protein from Flax Seeds	<i>Jeffrey R. Borgmeyer, Christine E. Smith, and Q. Khai Huynh</i>	480
Comparative Effects of Protein Phosphatase Inhibitors (Okadaic Acid and Calyculin A) on Human Leukemia HL60, HL60/ADR, and K562 Cells	<i>Keisuke Sakurada, Bin Zheng, and J. F. Kuo</i>	488
Enhanced Papilloma Formation in Response to Skin Tumor Promotion in Transgenic Mice Overexpressing the Human Ornithine Decarboxylase Gene	<i>Maria Halmekytö, Kari Syrjänen, Juhani Jänne, and Leena Alhonen</i>	493
Complex Role of Protein Kinase C in Mediating the Supramaximal Inhibition of Pancreatic Secretion Observed with Cholecystokinin	<i>Herbert Y. Gaisano and Laurence J. Miller</i>	498
Cell Cycle Dependent Gene Expressions and Activities of Protein Phosphatases PP1 and PP2A in Mouse NIH3T3 Fibroblasts	<i>Koji Nakamura, Toshiaki Koda, Mitsuaki Kakinuma, Shu-ichi Matsuzawa, Kazuki Kitamura, Yusuke Mizuno, and Kunimi Kikuchi</i>	507
A Point Mutation of c-Ki- <i>ras</i> Gene Was Found in Human Esophageal Carcinoma Cell Lines but Not in Primary Esophageal Carcinomas	<i>Chizuko Shiga, Kiyoto Shiga, Hironobu Sasano, and Shozo Mori</i>	515
Methotrexate Decreases Thymidine Kinase Activity	<i>Margit Abonyi, Noemi Prajda, Yuki Hata, Hiroyuki Nakamura, and George Weber</i>	522
Augmentation of Transient Low-Threshold Ca ²⁺ Current Induced by GTP-Binding Protein Signal Transduction System in GH ₃ Pituitary Cells	<i>Nobuyuki Suzuki, Hiroshi Takagi, Tohru Yoshioka, Akihiro Tanakadate, and Masaakira Kano</i>	529
Structure and Expression of Two Isoforms of the Murine Calmodulin-Dependent Protein Phosphatase Regulatory Subunit (Calcineurin B)	<i>Kazue Ueki, Taro Muramatsu, and Randall L. Kincaid</i>	537

- Expression, Purification, and Biochemical Comparison of Natural and Recombinant Human Non-pancreatic Phospholipase A2 *Berit Johansen, Ruth M. Kramer, Catherine Hession, Paula McGray, and R. Blake Pepinsky* 544
- Vascular Smooth Muscle Cells Exhibit Increased Growth in Response to Elevated Glucose *R. Natarajan, N. Gonzales, L. Xu, and J. L. Nadler* 552

ERRATUM

Regulation of the 202 Gene Expression by Interferons in L929 Cells	
<i>D. Lembo, M. Gaboli, A. Caliendo, F. Falciani, E. Garattini, and S. Landolfo</i>	628
Dual Modulation of Protein Kinase C Activity by Sphingosine	
<i>Guillermo Senisterra and Richard M. Epand</i>	635
Genomic Amplification and Expression of δ -Endotoxin Fragment of <i>Bacillus thuringiensis</i>	
<i>Pranab Roy</i>	641
Cytosolic Ca^{2+} -Induced Modulation of Ion Selectivity and Amiloride Sensitivity of a Cation Channel and β Agonist Action in Fetal Distal Lung Epithelium	
<i>Yoshinori Marunaka, Hideoki Tohda, Nobuko Hagiwara, and Hugh O' Brodovich</i>	648
The Structure and Biological Activities of the Widely Used Protein Kinase Inhibitor, H7, Differ Depending on the Commercial Source	
<i>James Quick, J. Anthony Ware, and Paul E. Driedger</i>	657
High Glucose and Hyperosmolarity Increase Platelet-Derived Growth Factor mRNA Levels in Cultured Human Vascular Endothelial Cells	
<i>Masakazu Mizutani, Yukichi Okuda, Takashi Yamaoka, Kenichiro Tsukahara, Masaaki Isaka, Chieko Bannai, and Kamejiro Yamashita</i>	664
Leukotriene B_4 -Induced Steady-State Calcium Rise and Superoxide Anion Generation in Guinea Pig Eosinophils Are Not Related Events	
<i>N. Subramanian</i>	670
Activation of Human Multidrug Resistance-1 Gene Promoter in Response to Heat Shock Stress	
<i>Miki Miyazaki, Kimitoshi Kohno, Takeshi Uchiumi, Hideyuki Tanimura, Ken-ichi Matsuo, Masaru Nasu, and Michihiko Kuwano</i>	677
Epinephrine Administration Stimulates GLUT4 Translocation but Reduces Glucose Transport in Muscle	
<i>A. Bonen, L. A. Megeney, S. C. McCarthy, J. C. McDermott, and M. H. Tan</i>	685
Functional Implication of Disulfide Bond, Cys250-Cys283, in Bovine Chymosin	
<i>Kai Huang, Zhenglian Zhang, Nianjuan Liu, Yuying Zhang, Guobao Zhang, and Kaiyu Yang</i>	692
Efficient Purification of a Full-Length and Biochemically-Active p110Rb, the Retinoblastoma Gene Product	
<i>Erica Savoysky, Motoshi Suzuki, Katsuyuki Tamai, Takeshi Sakurai, Tohru Ohuchi, Tetsu Akiyama, Kiyohide Kojima, and Shonen Yoshida</i>	697
Protein Kinase C Activity Is Altered in Diabetic Rat Hearts	
<i>Hong Xiang and John H. McNeill</i>	703
Synthesis of a Biospecific Adsorbent for the Purification of the Three Human Retinoic Acid Receptors (hRARs) by Affinity Chromatography	
<i>William Bourguet, Bernard Sablonnière, Pierre Formstecher, Jia-Yang Chen, Jean-Luc Bernier, and Jean-Pierre Hénichart</i>	711
Low Concentration Endothelin-1 Enhanced Histamine-Mediated Bronchial Contractions of Guinea Pigs <i>in Vivo</i>	
<i>Hiroshi Kanazawa, Naotsugu Kurihara, Kazuto Hirata, Hiroshi Fujiwara, Haruhiko Matsushita, and Tadanao Takeda</i>	717

Binding Selectivity of Rhizoxin, Phomopsin A, Vinblastine, and Ansamitocin P-3 to Fungal Tubulins: Differential Interactions of These Antimitotic Agents with Brain and Fungal Tubulins	<i>Yin Li, Hisayoshi Kobayashi, Yuichi Hashimoto, and Shigeo Iwasaki</i>	722
Inhibition of DNA Binding by the Phosphorylation of Poly ADP-Ribose Polymerase Protein Catalyzed by Protein Kinase C	<i>Pal I. Bauer, Gyongyi Farkas, Laszlo Buday, Gabor Mikala, Gyorgy Meszaros, Ernest Kun, and Anna Farago</i>	730
Mammalian and Viral DNA Sequences Which Interfere with the Maintenance of a Centromeric Vector in Yeast	<i>Anne Blangy, Georges F. Carle, Valérie Pierrefite, Minoo Rassoulzadegan, and François Cuzin</i>	737
<i>De Novo</i> Biosynthesis of Heme Offers a New Chemotherapeutic Target in the Human Malarial Parasite	<i>Namita Surolia and Govindarajan Padmanaban</i>	744
Modulation of Inhibitory Efficiency of Rat Skeletal Muscle Calpastatin by Phosphorylation	<i>S. Pontremoli, P. L. Viotti, M. Michetti, F. Salamino, B. Sparatore, and E. Melloni</i>	751
Human Hepatic 3 α -Hydroxysteroid Dehydrogenase: Possible Identity with Human Hepatic Chlordecone Reductase	<i>Judith M. Binstock, Radha B. Iyer, Carl V. Hamby, Victor A. Fried, Ira S. Schwartz, Bernard I. Weinstein, and A. Louis Southren</i>	760
Expression of Platelet Activating Factor Receptor in Renal Tubular Cell Line (LLC-PK1)	<i>K. M. Asif Jamil, Tomoko Takano, Akihide Nakao, Zen-ichiro Honda, Takao Shimizu, Tsuyoshi Watanabe, and Kiyoshi Kurokawa</i>	767
Purification of the Murine Heat-Stable Antigen from Erythrocytes	<i>Yasuo Hitsumoto, Akihiro Nakano, Hiroshi Ohnishi, Fumihiko Hamada, Shuichi Saheki, and Nozomu Takeuchi</i>	773
Insulin-Responsive Tyrosine Aminotransferase Transcription Requires Multiple Promoter Regions	<i>Douglas Carmichael and John Koontz</i>	778
Immunological and Conformational Characterization of a Phosphorylated Immunodominant Epitope on the Paired Helical Filaments Found in Alzheimer's Disease	<i>Emma Lang, Gyorgyi I. Szendrei, Virginia M.-Y. Lee, and Laszlo Otvos, Jr.</i>	783
Two New Cyclophilins from <i>Fusarium sambucinum</i> and <i>Aspergillus niger</i> : Resistance of Cyclophilin/Cyclosporin A Complexes against Proteolysis	<i>Till Hornbogen, Rembert Pieper, Kai Hoffmann, Horst Kleinkauf, and Rainer Zocher</i>	791
The Nonspecificity of Specific Nitric Oxide Synthase Inhibitors	<i>D. A. Peterson, D. C. Peterson, S. Archer, and E. K. Weir</i>	797
Effects of Insulin and Tyrosine Kinase Inhibitor on Ion Transport in the Alveolar Cell of the Fetal Lung	<i>Nobuko Hagiwara, Hideoki Tohda, Yasuo Doi, Hugh O'Brodivich, and Yoshinori Marunaka</i>	802
Photosensitized Formation of 8-Hydroxydeoxyguanosine in Cellular DNA by Riboflavin	<i>Fuyumi Yamamoto, Susumu Nishimura, and Hiroshi Kasai</i>	809
Vitamin K ₂ Modulates Proliferation and Function of Osteoblastic Cells <i>in Vitro</i>	<i>Yoko Akedo, Takayuki Hosoi, Satoshi Inoue, Akira Ikegami, Yuzo Mizuno, Masao Kaneki, Tetsuro Nakamura, Yasuyoshi Ouchi, and Hajime Orimo</i>	814

Interaction Mode of <i>n</i> -Dodecylphosphorylcholine, a Substrate Analogue, with Bovine Pancreas Phospholipase A ₂ as Determined by X-Ray Crystal Analysis <i>Koji Tomoo, Hirofumi Ohishi, Mitsunobu Doi, Toshimasa Ishida, Masatoshi Inoue, Kiyoshi Ikeda, and Hiroshi Mizuno</i>	821
The Evidence for Postmeiotic Expression of a Testis-Specific Isoform of a Regulatory Subunit of Calcineurin Using a Monoclonal Antibody <i>Hajime Nishio, Hideki Matsui, Lizomar J. M. P. Moia, Shigeo Taketa, Kazuhiro Miyamoto, Masaaki Tokuda, Toshifumi Itano, Sukita Nakahara, and Osamu Hatase</i>	828
Complement Component C1r-Mediated Cleavage of the Heavy Chain of the Major Histocompatibility Class I Antigens <i>Håkan Eriksson and Mogens H. Nissen</i>	832
Inhibition of Nerve Growth Factor-Induced B-50/GAP-43 Expression by Antisense Oligomers Interferes with Neurite Outgrowth of PC12 Cells <i>Etienne R. A. Jap Tjoen San, Marleen Schmidt-Michels, A. Beate Oestreicher, Willem Hendrik Gispen, and Peter Schotman</i>	839
Involvement of Calponin and Caldesmon in Sustained Contraction of Arterial Smooth Muscle <i>Kate Bárány, Erzsébet Polyák, and Michael Bárány</i>	847
Tyrosine-Protein Kinase Inhibition in Human Erythrocytes by Polyphosphoinositides (PIP and PIP ₂) <i>L. Bordin, G. Clari, B. Baggio, and V. Moret</i>	853
Human Interleukin-3 Contains a Discontinuous Zinc Binding Domain <i>V. Smit, P. A. van Veelen, U. R. Tjaden, J. van der Greef, and J. J. Haaijman</i>	859
The Mechanism of Inhibition of the Actin-Activated Myosin MgATPase by Calponin <i>Masao Miki, Michael P. Walsh, and David J. Hartshorne</i>	867
High External Ca ²⁺ Levels Trigger Membrane Potential Oscillations in Mouse Pancreatic β -Cells during Blockade of K(ATP) Channels <i>Rosa M. Santos, Rui M. Barbosa, Amélia M. Silva, Célia M. Antunes, and Luis M. Rosario</i>	872
Cytochrome P450 Catalyzes the Oxidation of <i>N</i> ^ω -Hydroxy-L-Arginine by NADPH and O ₂ to Nitric Oxide and Citrulline <i>Jean-Luc Boucher, Agnès Genet, Sandrine Vadon, Marcel Delaforge, Yann Henry, and Daniel Mansuy</i>	880
Single Subunit Structure of the Human Thyrotropin Receptor <i>Toyoshi Endo, Masato Ikeda, Masayuki Ohmori, Emiko Anzai, Kazutaka Haraguchi, and Toshimasa Onaya</i>	887
Dantrolene and Azumolene Inhibit [³ H]PN200-110 Binding to Porcine Skeletal Muscle Dihydropyridine Receptors <i>Roque El-Hayek, Jerome Parness, Hector H. Valdivia, Roberto Coronado, and Kirk Hogan</i>	894
Characterization by cDNA Cloning of the mRNA of a Highly Basic Human Protein Homologous to the Yeast Ribosomal Protein YL41 <i>J. Klaudiny, H. von der Kammer, and K. H. Scheit</i>	901
Activation and Inactivation of the Osteoclast Ca ²⁺ Receptor by the Trivalent Cation, La ³⁺ <i>Vijai S. Shankar, A. S. M. Towhidul Alam, Christopher M. R. Bax, Bridget E. Bax, Michael Pazianas, Christopher L.-H. Huang, and Mone Zaidi</i>	907

The Osteoclast Ca^{2+} Receptor Is Highly Sensitive to Activation by Transition Metal Cations	<i>Vijai S. Shankar, Christopher M. R. Bax, A. S. M. Towhidul Alam, Bridget E. Bax, Christopheher L.-H. Huang, and Mone Zaidi</i>	913
Cloning and Functional Characterization of a Human A1 Adenosine Receptor	<i>Frédéric Libert, Jacqueline Van Sande, Anne Lefort, Armin Czernilofsky, Jacques E. Dumont, Gilbert Vassart, Helmut A. Ensinger, and Klaus D. Mendla</i>	919
Genomic Structure and Expression of the Human Fau Gene: Encoding the Ribosomal Protein S30 Fused to a Ubiquitin-like Protein	<i>Koen Kas, Luc Michiels, and Jozef Merregaert</i>	927
A New Member of the Insulin Receptor Family, Insulin Receptor-Related Receptor, Is Expressed Preferentially in the Kidney	<i>Hironori Kurachi, Katsue Jobo, Mitsuhiro Ohta, Toshisuke Kawasaki, and Nobuyuki Itoh</i>	934
A Carboxy-Terminal Peptide from p47-phox Is a Substrate for Phosphorylation by Protein Kinase C and by a Neutrophil Protein Kinase	<i>David J. Uhlinger and David K. Perry</i>	940
Cloning and Sequencing of a Gene Encoding Yeast Thioltransferase	<i>Zhong-Ru Gan</i>	949
Analysis of Binding Protein for Tissue-Type Plasminogen Activator in Human Endothelial Cells	<i>Hideharu Fukao, Yasuhiro Hagiya, Tohgo Nonaka, Kiyotaka Okada, and Osamu Matsuo</i>	956
Binding Specificity of Lung Surfactant Protein SP-D for Glucosylceramide	<i>Yoshio Kuroki, Shinsei Gasa, Yoshinori Ogasawara, Masanori Shiratori, Akira Makita, and Toyooki Akino</i>	963
Association of <i>oriC</i> Region of <i>Escherichia coli</i> Chromosome with Outer Membrane: Effects of Culture Condition	<i>Hideko Kambe-Honjoh, Gakuzo Tamura, and Kazuo Nagai</i>	970
Suppression of Glutathione Transferase P Expression by Glucocorticoid	<i>Masaharu Sakai, Masami Muramatsu, and Shinzo Nishi</i>	976
Molecular Cloning of a cDNA Coding for Neurofibromatosis Type 1 Protein Isoform Lacking the Domain Related to ras GTPase-Activating Protein	<i>Hiroyuki Suzuki, Kazuhiro Takahashi, Yasuhiko Kubota, and Shigeki Shibahara</i>	984
A Fluorescence-Microscopic and Flow-Cytometric Study of HeLa Cells with an Experimentally Induced Respiratory Deficiency	<i>Peter Skowronek, Otto Haferkamp, and Gerhard Rödel</i>	991
Design, Synthesis, and Conformational Analysis of γ -Turn Peptide Mimetics of Bradykinin	<i>M. Sato, Jessie Y.H. Lee, Hiroshi Nakanishi, Michael E. Johnson, R. Alan Chrusciel, and Michael Kahn</i>	999
Effectors of ATP-Sensitive K^+ Channels Inhibit the Regulatory Effects of Somatostatin and GH-Releasing Factor on Growth Hormone Secretion	<i>Jan R. De Wille, Michel Fosset, Jacques Epelbaum, and Michel Lazdunski</i>	1007
Anti-epidermal Growth Factor (EGF) Antibody Inhibits Compensatory Renal Hyperplasia but Not Hypertrophy after Unilateral Nephrectomy in Mice	<i>Shigeru Kanda, Tukasa Igawa, Hideki Sakai, Koichiro Nomata, Hiroshi Kanetake, and Yutaka Saito</i>	1015

Molecular Cloning of Bovine Actin-like Protein, Actin2	
<i>Tomoyuki Tanaka, Futoshi Shibasaki, Masaharu Ishikawa, Naoto Hirano, Ryuichi Sakai, Junji Nishida, Tadaomi Takenawa, and Hisamaru Hirai</i>	1022
Tumor Necrosis Factor- α Gene Is Expressed in Stimulated Retinal Pigment Epithelial Cells in Culture	
<i>Hidenobu Tanihara, Munenori Yoshida, and Nagahisa Yoshimura</i>	1029
Synthesis and Theoretical Conformational Studies of Gonadotropin-Releasing Hormone Analogs Containing Tetrahydroisoquinoline Carboxylic Acid	
<i>Steven C. Koerber, Michel Ibea, Arnold T. Hagler, Catherine L. Rivier, and Jean E. Rivier</i>	1035
Conformational Study of Cyclo(1,5)-Ac-Pen-Arg-Gly-Asp-Cys-NH ₂ in Water by NMR and Molecular Dynamics	
<i>Teruna J. Siahaan, Soma Chakrabarti, and David Vander Velde</i>	1042
Cloning and Properties of a Cyanide Hydratase Gene from the Phytopathogenic Fungus <i>Gloeocercospora sorghi</i>	
<i>Ping Wang and Hans D. VanEtten</i>	1048
Effects of EGF on the Mass of Inositol 1,4,5-Trisphosphate and SN(1,2)-Diacylglycerol in Freshly Isolated Rat Hepatocytes: Comparison with Vasopressin	
<i>Paul F. Cerpovicz and Raymond S. Ochs</i>	1055
Structural Study and Preliminary Crystallographic Data for the Hemoglobin from Reindeer (<i>Rangifer tarandus tarandus</i>)	
<i>Elena Conti, Elena Casale, Paolo Ascenzi, Massimo Coletta, Saverio G. Condo, Angelo Merli, Bruno Giardina, Domenico Bordo, and Martino Bolognesi</i>	1063
Polypeptide Composition of the 8S Form of Prolyl-tRNA Synthetase from Rat Liver	
<i>Cristina Bianchi, Roberto Perego, and Ugo Del Monte</i>	1071
Evidence for a New Inositol Phospholipid in Rat Brain Mitochondria	
<i>J. Bothmer, M. Markerink, and J. Jolles</i>	1077
Changes in Skin Angiotensin II Receptors in Rats during Wound Healing	
<i>Birgitta Kimura, Colin Sumners, and M. Ian Phillips</i>	1083
Engineering the Ca ²⁺ -Activated Photoprotein Aequorin with Reduced Affinity for Calcium	
<i>Jonathan M. Kendall, Graciela Sala-Newby, Veena Ghalaut, Robert L. Dormer, and Anthony K. Campbell</i>	1091
Effect of Liposomes on P-Glycoprotein Function in Multidrug Resistant Cells	
<i>Alain R. Thierry, Anatoly Dritschilo, and Aquilur Rahman</i>	1098
Maintenance of Repression Control of the <i>ilvGMEDA</i> Operon in a Temperature-Sensitive Leucyl-Transfer RNA Synthetase Mutant of <i>Escherichia coli</i> K-12 at a Restrictive Temperature	
<i>Joseph J. Whittaker and Julius H. Jackson</i>	1106
Structure of the Human Heparin-Binding Growth Factor Gene Pleiotrophin	
<i>Shoupeng Lai, Frank Czubayko, Anna Tate Riegel, and Anton Wellstein</i>	1113
Lipopolysaccharide Induces Prostaglandin H Synthase-2 in Alveolar Macrophages	
<i>M. G. O'Sullivan, E. M. Huggins, Jr., E. A. Meade, D. L. DeWitt, and C. E. McCall</i>	1123
Differential Effect of 1,25-Dihydroxycholecalciferol on Phosphoinositide Turnover in the Antipodal Plasma Membranes of Colonic Epithelial Cells	
<i>Ramesh K. Wali, Merry J. G. Bolt, Xiao-Ying Tien, Thomas A. Brasitus, and Michael D. Sitrin</i>	1128

Cloning and Sequencing of a 1.3-kb Variant of Human Thyrotropin Receptor mRNA Lacking the Transmembrane Domain	<i>Peter N. Graves, Yaron Tomer, and Terry F. Davies</i>	1135
Neuron-Specific Antigen HPC-1 from Bovine Brain Reveals Strong Homology to Epimorphin, an Essential Factor Involved in Epithelial Morphogenesis: Identification of a Novel Protein Family	<i>Akihiro Inoue and Kimio Akagawa</i>	1144
Cloning and Characterization of Gastrin Receptor from ECL Carcinoid Tumor of <i>Mastomys natalensis</i>	<i>Hirohisa Nakata, Toshimitsu Matsui, Mitsuhiro Ito, Taizo Taniguchi, Yoko Naribayashi, Noriyuki Arima, Akira Nakamura, Yoshikazu Kinoshita, Kazuo Chihara, Shuyn Hosoda, and Tsutomu Chiba</i>	1151
Common Peptide Epitopes in Glycophorin and the Endothelial Sialoglycoprotein GP60	<i>Jan E. Schnitzer, Jeffrey B. Ulmer, and George E. Palade</i>	1158
Nuclear Internalization and DNA Binding Activities of Interleukin-1, Interleukin-1 Receptor, and Interleukin-1/Receptor Complexes	<i>M. Neale Weitzmann and Nerina Savage</i>	1166
Alterations in the Subcellular Distribution of p21 ^{ras} -GTPase Activating Protein in Proliferating Rat Acinar Cells	<i>Yoichi Nakagawa, Karnam R. Purushotham, Pao-Li Wang, James E. Fischer, William A. Dunn, Charlotte A. Schneyer, and Michael G. Humphreys-Beher</i>	1172
Site-Directed Mutagenesis of an Apolipoprotein E Mutant, Apo E5(Glu ₃ →Lys), and Its Binding to Low Density Lipoprotein Receptors	<i>Li-Ming Dong, Taku Yamamura, Shoji Tajima, and Akira Yamamoto</i>	1180
Human Thymocytes Secrete Luteinizing Hormone: An Autocrine Regulator of T-Cell Proliferation	<i>P. Sabharwal, S. Varma, and W. B. Malarkey</i>	1187
Incomplete Process of Recombinant Human Platelet-Derived Growth Factor Produced in Yeast and Its Effect on the Biological Activity	<i>María Calderón-Cacia, Patricia Tekamp-Olson, Judith Allen, and Carlos George-Nascimento</i>	1193

A Recombinant Rat Vascular AT ₁ Receptor Confers Growth Properties to Angiotensin II in Chinese Hamster Ovary Cells	<i>Betty Teutsch, Claire Bihoreau, Catherine Monnot, Kenneth E. Bernstein, T. J. Murphy, R. Wayne Alexander, Pierre Corvol, and Eric Clauser</i>	1381
Steric and Electronic Requirements for Muscarinic Receptor-Stimulated Phosphoinositide Turnover in the CNS in a Series of Arecoline Bioisosteres	<i>Dan Ngur, Scott Roknich, Charles H. Mitch, Steven J. Quimby, John S. Ward, Leander Merritt, Per Sauerberg, William S. Messer, Jr., and Wayne Hoss</i>	1389
A Single-Stranded DNA Binding Protein Which Interacts with Sequences within the Bovine Preprotachykinin Promoter: Regulation by Nerve Growth Factor	<i>Carol A. Gilchrist, Christine F. Morrison, and Anthony J. Harmar</i>	1395

- Tissue- and Cell-Specific Control of Guinea Pig Cathepsin E Gene Expression
*Shinko Tsukada, Masao Ichinose, Kazumasa Miki, Masae Tatematsu,
 Satoshi Yonezawa, Masashi Matsushima, Nobuyuki Kakei, Hiroshi
 Fukamachi, Sadao Yasugi, Kiyoshi Kurokawa,
 Takashi Kageyama, and Kenji Takahashi* 1401
- Quinobene, a New Potent Anti-HIV Agent
Ewa Gruszecka-Kowalik, Rudiger D. Haugwitz, and Leon H. Zalkow 1409
- Cell Cycle-Dependent Phosphorylation of HSP28 by TGF β 1 and H₂O₂ in Normal
 Mouse Osteoblastic Cells (MC3T3-E1), but Not in Their *ras*-Transformants
Motoko Shibanuma, Toshio Kuroki, and Kiyoshi Nose 1418
- Identification of Amino Acid Residues of Rat Angiotensin II Receptor for Ligand
 Binding by Site-Directed Mutagenesis
*Yoshiaki Yamano,
 Kenji Ohyama, Shigeyuki Chaki,
 Deng-Fu Guo, and Tadashi Inagami* 1426
- Molecular Characterization and Expression of the Cell-Associated Glucosyltrans-
 ferase Gene from *Streptococcus mutans*
*Taku Fujiwara,
 Shigetada Kawabata, and Shigeyuki Hamada* 1432
- Oxidation-Induced Persistent Activation of Protein Kinase C in Hippocampal
 Homogenates
*Elizabeth J. Palumbo, J. David Sweatt,
 Shu-Jen Chen, and Eric Klann* 1439
- A POU-Domain Gene of Zebrafish, *ZFPOU1*, Specifically Expressed in the
 Developing Neural Tissues
*Takashi Matsuzaki, Hiroshi Amanuma,
 and Hiroyuki Takeda* 1446
- Expressions of Receptor Gene for Hepatocyte Growth Factor in Kidney after
 Unilateral Nephrectomy and Renal Injury
*Kenichi Ishibashi, Sei Sasaki,
 Hisato Sakamoto, Yuji Hoshino,
 Toshikazu Nakamura, and Fumiaki Marumo* 1454
- Diacylglycerol Formation from Phosphatidylcholine in Angiotensin II-Stimulated
 Vascular Smooth Muscle Cells
*Takao Kondo, Fumiko Konishi,
 Hiroshi Inui, and Tadashi Inagami* 1460
- Purification and Characterization of a New 120-kDa Alkaline Proteinase of
Trypanosoma cruzi
*Jaime Martins Santana, Philippe Grellier,
 Marie-Hélène Rodier, Joseph Schrevel, and Antonio Teixeira* 1466
- Identification of Calcitonin Gene-Related Peptide in Ovine Hypothalamic Extract
*Atsuro Miyata, Lun Jiang,
 Naoto Minamino, and Akira Arimura* 1474
- In Vitro* Synthesis of Bacterio-Opsin: Integration into Microsomal Membranes
*Ulrich Bauer, Volker Hildebrandt,
 Norbert A. Dencher, and Paul Wrede* 1480
- Adenosine Modulates Cell Growth in Human Epidermoid Carcinoma (A431) Cells
H. B. Tey, H. E. Khoo, and C. H. Tan 1486
- Structure of the Human Spermidine/Spermine N¹-Acetyltransferase Gene: Exon/
 Intron Gene Organization and Localization to Xp22.1
*Lei Xiao, Paul Celano, Amy R. Mank, Constance Griffin,
 Ethylin Wang Jabs, Anita L. Hawkins, and Robert A. Casero, Jr.* 1493

1,10-Phenanthroline-Copper, a Footprinting Reagent for Single-Stranded Regions of RNAs	Abhijit Mazumder, C.-h. B. Chen, Richard Gaynor, and David S. Sigman	1503
Neointima Formation after Vascular Injury Is Angiotensin II Mediated	Stéphane Laporte and Emanuel Escher	1510
Activation of Phospholipase C by the Agonist U46619 Is Inhibited by Cromakalim-Induced Hyperpolarization in Porcine Coronary Artery	Toshio Yamagishi, Teruyuki Yanagisawa, and Norio Taira	1517
RNA Hydrolysis via an Oxyphosphorane Intermediate	Tadafumi Uchimaru, Joey W. Storer, Kazutoshi Tanabe, Masami Uebayasi, Satoshi Nishikawa, and Kazunari Taira	1523
Evidence That the Type 2 Copper Centers Are the Site of Nitrite Reduction by <i>Achromobacter cycloclastes</i> Nitrite Reductase	Eduardo Libby and Bruce A. Averill	1529
Cross-Linking of Surface Immunoglobulin Activates SRC-Related Tyrosine Kinases in WEHI 231 Cells	Zhen-Hong Li, Sandeep Mahajan, Margaret M. Prendergast, Joseph Fagnoli, Xiaoyun Zhu, Sabine Klages, Dieter Adam, Gary L. Schieven, James Blake, Joseph B. Bolen, and A. L. Burkhardt	1536
Synthesis of 6-Substituted Tetrazolo[1,5-c]pyrimidin-5(6H)ones: New Modification of 3'-Azido-3'-deoxythymidine	Krzysztof Ciszewski, Lech Celewicz, and Krzysztof Golankiewicz	1545
An ND-6 Mitochondrial DNA Mutation Associated with Leber Hereditary Optic Neuropathy	Donald R. Johns, Michael J. Neufeld, and Raymond D. Park	1551
A Retinoic Acid Response Element from the Rat CRBPI Promoter Is Activated by an RAR/RXR Heterodimer	Matthias Husmann, Birgit Hoffmann, Donald G. Stump, Frank Chytil, and Magnus Pfahl	1558
Two Different Signal Transductions of Neuropeptide Y1 Receptor in SK-N-MC Cells	Yasushi Shigeri and Masafumi Fujimoto	1565
Expression of Recombinant Myeloperoxidase Using a Baculovirus Expression System	Kathryn L. Taylor, David J. Uhlinger, and Joseph M. Kinkade, Jr.	1572
Identification of the KDR Tyrosine Kinase as a Receptor for Vascular Endothelial Cell Growth Factor	Bruce I. Terman, Maureen Dougher-Vermazen, Miguel E. Carrion, Dragan Dimitrov, Douglas C. Armellino, Denis Gospodarowicz, and Peter Böhlen	1579
Organ Distribution and Characterization of Porcine Peptides (VIP, CGRP, and PHI) That Increase cAMP in Rat Platelets	Yoshinari Ichiki, Kazuo Kitamura, Kenji Kangawa, Mari Kawamoto, Hisayuki Matsuo, and Tanenao Eto	1587
A Novel Fluorescent Fatty Acid, 5-Methyl-BDY-3-dodecanoic Acid, Is a Potential Probe in Lipid Transport Studies by Incorporating Selectively to Lipid Classes of BHK Cells	Juha Kasurinen	1594
ERRATUM		
Volume 185, Number 2, June 15, 1992: Keizo Ohnaka, Motoaki Nishikawa, Ryoichi Takayanagi, Masafumi Haji, and Hajime Nawata, "Partial Purification of Phosphoramidon-Sensitive Endothelin Converting Enzyme in Porcine Aortic Endothelial Cells: High Affinity for <i>Ricinus communis</i> Agglutinin," pp. 611-616		1602
Author Index for Volume 187		1603

Volume 188, Number 1, October 15, 1992

DNA Strand Cleavage at 8-Hydroxyguanine Residues by Hot Piperidine Treatment	<i>Myung-Hee Chung, Haruo Kiyosawa, Eiko Ohtsuka, Susumu Nishimura, and Hiroshi Kasai</i>	1
Expression and Possible Function of Glucose Transporter Protein GLUT1 during Preimplantation Mouse Development from Oocytes to Blastocysts	<i>Yutaka Morita, Osamu Tsutsumi, Iwao Hosoya, Yuji Taketani, Yoshitomo Oka, and Takahiko Kato</i>	8
A New Synthetic Hypoglycemic Polysaccharide	<i>Kenichi Hatanaka, Soo-Chang Song, Atsushi Maruyama, Akira Kobayashi, Hiroyoshi Kuzuhara, and Toshihiro Akaike</i>	16
Analysis of Antibody Response to Ovine Lentivirus by Using Viral Gene Products Expressed in a Prokaryotic System	<i>J. Kwang and R. Cutlip</i>	20
Graves' IgG Recognizes Linear Epitopes in the Human Thyrotropin Receptor	<i>Endre V. Nagy, Henry B. Burch, Karen Mahoney, Yvonne G. Lukes, John C. Morris III, and Kenneth D. Burman</i>	28
cDNA Cloning of Rat LRP, a Receptor Like Protein Tyrosine Phosphatase, and Evidence for Its Gene Regulation in Cultured Rat Mesangial Cells	<i>Toshiki Moriyama, Yoshihiro Fujiwara, Enyu Imai, Masaru Takenaka, Sachio Kawanishi, Takuya Inoue, Tamio Noguchi, Takehiko Tanaka, Takenobu Kamada, and Naohiko Ueda</i>	34
Mutations at the Putative Junction Sites of the Yeast VMA1 Protein, the Catalytic Subunit of the Vacuolar Membrane H ⁺ -ATPase, Inhibit Its Processing by Protein Splicing	<i>Ryogo Hirata and Yasuhiro Anraku</i>	40
The Interplay between Basicity, Conformation, and Enzymatic Reduction in Biliverdins	<i>Sara Bari, Rosalía B. Frydman, Claudio Grosman, and Benjamín Frydman</i>	48
Structure and Chromosomal Location of the Human Granulin Gene	<i>Vijay Bhandari and Andrew Bateman</i>	57
Further Evidence of the SA Gene as a Candidate Gene Contributing to the Hypertension in Spontaneously Hypertensive Rat	<i>Naoharu Iwai, Theodore W. Kurtz, and Tadashi Inagami</i>	64
Camptothecin Analog (CPT-11)-Sensitive Human Pancreatic Tumor Cell Line QGP-1N Shows Resistance to SN-38, an Active Metabolite of CPT-11	<i>Sachi Takeda, Takao Shimazoe, Hiroshi Kuga, Keiki Sato, and Akira Kono</i>	70
Effect of a Mechanical Tension on the Hydration of DNA in Fibers	<i>M. Harmouchi, G. Albiser, and S. Premilat</i>	78
An Assessment of Human Insulin Receptor Phosphorylation and Exogenous Kinase Activity Following Deletion of 69 Residues from the Carboxyl-Terminus of the Receptor β -Subunit	<i>Jeremy M. Tavaré, Purita Ramos, and Leland Ellis</i>	86
Binding of Myosin Subfragment-1 to F-Actin	<i>O. Andreev and J. Borejdo</i>	94

Respiratory Chain Enzymes in Muscle of Endurance Athletes: Effect of L-Carnitine	<i>Rosa Huertas, Yolanda Campos, Enrique Díaz, Jesús Esteban, Leonardo Vechietti, Giuseppe Montanari, Stefania D'Iddio, Marco Corsi, and Joaquín Arenas</i>	102
Detection of Endothelin-1 mRNA by RT-PCR in Isolated Rat Renal Tubules	<i>Shunya Uchida, Fumi Takemoto, Etsuro Ogata, and Kiyoshi Kurokawa</i>	108
Mouse Hepatic Microsomal Oxidation of Aliphatic Aldehydes (C ₈ to C ₁₁) to Carboxylic Acids	<i>Kazuhito Watanabe, Tamihide Matsunaga, Shizuo Narimatsu, Ikuo Yamamoto, and Hidetoshi Yoshimura</i>	114
Differential Regulation of Putrescine Uptake in <i>Trypanosoma cruzi</i> and Other Trypanosomatids	<i>N. S. González, C. Ceriani, and I. D. Algranati</i>	120
Identification of Heptanal and Nonanal in Bronchoalveolar Lavage from Rats Exposed to Low Levels of Ozone	<i>Rafael Cueto, Giuseppe L. Squadrito, Eliezer Bermudez, and William A. Pryor</i>	129
Hormonal and Nutritional Stimuli Modulate Apolipoprotein B mRNA Editing in Mouse Liver	<i>Raj Ajit K. Srivastava, Jingjing Tang, Dirk Baumann, and Gustav Schonfeld</i>	135
Direct Evidence for Protein Kinase C Involvement in Insulin-Stimulated Hexose Uptake	<i>Denise R. Cooper, James E. Watson, Herman Hernandez, Bingzhi Yu, Mary L. Standaert, D. Kirk Ways, Thomas Arnold, Tatsuo Ishizuka, and Robert V. Farese</i>	142
Distribution of GLUT3 Glucose Transporter Protein in Human Tissues	<i>Peter R. Shepherd, Gwyn W. Gould, Caroline A. Colville, Scott C. McCoid, E. Michael Gibbs, and Barbara B. Kahn</i>	149
Activation of Transforming G Protein-Coupled Receptors Induces Rapid Tyrosine Phosphorylation of Cellular Proteins, Including p125 ^{FAK} and p130 v-src Substrate	<i>J. Silvio Gutkind and Keith C. Robbins</i>	155
A Serine→Proline Change in the Alzheimer's Disease-Associated Epitope Tau 2 Results in Altered Secondary Structure, but Phosphorylation Overcomes the Conformational Gap	<i>Emma Lang and Laszlo Orvos, Jr.</i>	162
Presence of Nuclear Factors Bound to Both cAMP-Responsive Element and AP1 Factor Binding Site in the Porcine Anterior Pituitary	<i>Toshihiko Ezashi, Takako Kato, Katsumi Wakabayashi, and Yukio Kato</i>	170
The Adenovirus E3 Region 14.7 kDa Protein, Heat, and Sodium Arsenite Inhibit the TNF-Induced Release of Arachidonic Acid	<i>Deborah Zilli, Christina Voelkel-Johnson, Timothy Skinner, and Scott M. Laster</i>	177
Effect of the Weak Ca ²⁺ -Binding Site of Subtilisin J by Site-Directed Mutagenesis on Heat Stability	<i>Jeong Su Jang, Kwang Hee Bae, and Si Myung Byun</i>	184
Electron Transport between Cytochrome c and α -Tocopherol	<i>John J. Maguire, Valerian E. Kagan, and Lester Packer</i>	190
Diacylglycerol Rather Than Ca ²⁺ Mediates GnRH Inhibition of FSH-Induced Steroidogenesis in Ovarian Granulosa Cells	<i>Luisa F. Fanjul, Antonio Déniz, José Quintana, Pino Santana, Juan Gonzalez, Francisco Estevez, and Carlos M. Ruiz de Galarreta</i>	198
High Reactivity of Aortic Fibroblasts to Vasoactive Agents: Endothelins, Bradykinin, and Nucleotides	<i>Robert Marsault, Paul Vigne, and Christian Frelin</i>	205

Glucocorticoids Do Not Affect the Induction of a Novel Calcium-Dependent Nitric Oxide Synthase in Rabbit Chondrocytes	<i>Richard M. J. Palmer, Tara Andrews, Neale A. Foxwell, and Salvador Moncada</i>	209
High Pressure Induced Inactivation of Ferrous Cytochrome P-450 LM2 (IIB4) CO Complex: Evidence for the Presence of Two Conformers in the Oligomer	<i>Dmitri R. Davydov, Tatyana V. Knyushko, and Gaston Hui Bon Hoa</i>	216
Tyr-179 and Lys-183 Are Essential for Enzymatic Activity of 11 β -Hydroxysteroid Dehydrogenase	<i>Jihad Obeid and Perrin C. White</i>	222
Casein Kinase-2 Structure-Function Relationship: Creation of a Set of Mutants of the β Subunit That Variably Surrogate the Wildtype β Subunit Function	<i>Brigitte Boldyreff, Flavio Meggio, Lorenzo A. Pinna, and Olaf-Georg Issinger</i>	228
Up-Regulation of Hepatocyte Growth Factor Gene Expression by Interleukin-1 in Human Skin Fibroblasts	<i>Kunio Matsumoto, Hiroko Okazaki, and Toshikazu Nakamura</i>	235
High Affinity Binding of the Leucocyte Adhesion Molecule L-Selectin to 3'-Sulfated-Le ^a and -Le ^x Oligosaccharides and the Predominance of Sulfate in This Interaction Demonstrated by Binding Studies with a Series of Lipid-Linked Oligosaccharides	<i>P. J. Green, T. Tamatani, T. Watanabe, M. Miyasaka, A. Hasegawa, M. Kiso, C-T. Yuen, M. S. Stoll, and T. Feizi</i>	244
Dityrosine Formation Is Impaired by Tyrosine Phosphorylation	<i>Seelos Christian, Gmeiner Bernhard, Rainer Patrizia, and Marian Brigitte</i>	252
Angiotensin II Stimulates the pp44 and pp42 Mitogen-Activated Protein (MAP) Kinases in Cultured Rat Aortic Smooth Muscle Cells	<i>J. L. Duff, B. C. Berk, and M. A. Corson</i>	257
Molecular Cloning and Chromosomal Mapping of the Human Gene for the Testis-Specific Catalytic Subunit of Calmodulin-Dependent Protein Phosphatase (Calcineurin A)	<i>Taro Muramatsu and Randall L. Kincaid</i>	265
Iodothyronine 5-Deiodinase in Rat Posterior Pituitary	<i>Kiyoshi Tanaka, Akira Shimatsu, and Hiroo Imura</i>	272
Anchored Anti-HLA Class I Monoclonal Antibody Fails to Induce Inhibition of PHA-Activated Lymphocytes Proliferation	<i>Michele Rubini, Rita Selvatici, Patrizia Orlando, Alessandra Balboni, Sara Boninsegna, and Enrico Gandini</i>	278
Endothelin-1 Stimulates Its Own Synthesis in Human Endothelial Cells	<i>Outi Saijonmaa, Tuulikki Nyman, and Frej Fyhrquist</i>	286
Deletion Mutagenesis of Stem Cell Factor Defines the C-Terminal Sequences Essential for Its Biological Activity	<i>Mitsuo Nishikawa, Arinobu Tojo, Kenji Ikebuchi, Kanako Katayama, Nobuyoshi Fujii, Keiya Ozawa, and Shigetaka Asano</i>	292
Differential Regulation of Rat AT1a and AT1b Receptor mRNA	<i>Naoharu Iwai, Tadashi Inagami, Nobuyuki Ohmichi, Yasuyuki Nakamura, Yukikazu Saeki, and Masahiko Kinoshita</i>	298
Molecular Cloning of the Acid-Labile Subunit of the Rat Insulin-like Growth Factor Binding Protein Complex	<i>Jin Dai and Robert C. Baxter</i>	304

Tumor Necrosis Factor and Interleukin-1 Induce Activin A Gene Expression in a Human Bone Marrow Stromal Cell Line	Shunji Takahashi, Kaoru Uchimaru, Ken-ichi Harigaya, Shigetaka Asano, and Takayuki Yamashita	310
Binding of Mutant Insulins to a Mutated Insulin Receptor	Ronit Rafaeloff, Cecil C. Yip, and Ira D. Goldfine	318
A Vasopressor Factor Partially Purified from Human Parathyroid Glands	H. Schlüter, C. Quante, B. Buchholz, K. H. Dietl, C. Spieker, M. Karas, and W. Zidek	323
Insulin Inhibits Norepinephrine Overflow from Peripheral Sympathetic Nerve Ending	Tatsuo Shimosawa, Katsuyuki Ando, Ayumu Ono, Katsutoshi Takahashi, Masashi Isshiki, Miki Kanda, Etsuro Ogata, and Toshiro Fujita	330
Expression of Only One of Two Types of mRNA Transcribed from the Serine Dehydratase Gene Is Repressed in Hepatoma Cells	Koichi Matsuda, Chiseko Noda, and Akira Ichihara	336
Hepatitis B Virus DNA Integration and Expression of an erb B-like Gene in Human Hepatocellular Carcinoma	Xiao-Kun Zhang, Jack O. Egan, Dao-pei Huang, Zhi-lin Sun, Victoria K. Y. Chien, and Jen-Fu Chiu	344
Interleukin-2 (IL-2) Induces Erythroid Differentiation and Tyrosine Phosphorylation in ELM-I-1 Cells Transfected with a Human IL-2 Receptor Chain cDNA	Kazunori Imada, Mitsuru Tsudo, Tai-ichi Kodaka, Katsuhiko Itoh, Nobuyoshi Arima, Toshio Hattori, Minoru Okuma, and Takashi Uchiyama	352
Effect of Sphingoid Bases on Basal and Insulin-Stimulated 2-Deoxyglucose Transport in Skeletal Muscle	Jiri Turinsky and G. William Nagel	358
Organotin-Flavone Complexes: A New Class of Fluorescent Probes for F ₁ F ₀ ATPase	Julnar Usta and David E. Griffiths	365
Deficiency of 8-Hydroxyguanine DNA Endonuclease Activity and Accumulation of the 8-Hydroxyguanine in Mutator Mutant (<i>mutM</i>) of <i>Escherichia coli</i>	Tadayoshi Bessho, Keizo Tano, Hiroshi Kasai, and Susumu Nishimura	372
Novel Missense Mutation in Cardiac β Myosin Heavy Chain Gene Found in a Japanese Patient with Hypertrophic Cardiomyopathy	Hirofumi Nishi, Akinori Kimura, Haruhito Harada, Hironori Toshima, and Takehiko Sasazuki	379
The Synthesis of Cadystins, Heavy Metal Chelating Peptides, Is Induced in the Fission Yeast by Wounds of the Cell Wall or by Incubation with Chitosan	Yukimasa Hayashi, Shu-Ichi Morikawa, Masao Kawabata, and Yasuo Hotta	388
Cloning of a Major Heparan Sulfate Proteoglycan from Brain and Identification as the Rat Form of Glypican	L. Karthikeyan, P. Maurel, U. Rauch, R. K. Margolis, and R. U. Margolis	395
Presence and Turnover of Adenosine Diphosphate Ribose in Human Erythrocytes	Lucrezia Guida, Elena Zocchi, Luisa Franco, Umberto Benatti, and Antonio De Flora	402
Interferon- γ Inhibits Proliferation of Rat Vascular Smooth Muscle Cells by Nitric Oxide Generation	Y. Youichi Nunokawa and Shoji Tanaka	409

Preliminary Characterization of a Nuclear Factor Interacting with the Silencer Element at the 3'-Side of the Chicken α -Globin Gene Domain <i>Félix Recillas Targa, Michèle Huesca, and Klaus Scherrer</i>	416
Characterization of Cysteine Residues of Glutathione S-Transferase P: Evidence for Steric Hindrance of Substrate Binding by a Bulky Adduct to Cysteine 47 <i>Jun Nishihira, Teruo Ishibashi, Masaharu Sakai, Shinzo Nishi, Takashi Kumazaki, Yasumaru Hatanaka, Sakae Tsuda, and Kunio Hikichi</i>	424
An S1 Nuclease-Sensitive Homopurine/Homopyrimidine Domain in the PDGF A-Chain Promoter Contains a Novel Binding Site for the Growth Factor-Inducible Protein EGR-1 <i>Zhao-Yi Wang and Thomas F. Deuel</i>	433
P-Glycoprotein Possesses a 1,4-Dihydropyridine-Selective Drug Acceptor Site Which Is Allosterically Coupled to a Vinca-Alkaloid-Selective Binding Site <i>David R. Ferry, Michael A. Russell, and Michael H. Cullen</i>	440
Differential Gene Expression and Regulation of Type-1 Angiotensin II Receptor Subtypes in the Rat <i>Yutaka Kitami, Takafumi Okura, Kazumasa Marumoto, Rumi Wakamiya, and Kunio Hiwada</i>	446
Regulation of Manganese Superoxide Dismutase: IL-1 and TNF Induction in Pulmonary Artery and Microvascular Endothelial Cells <i>Gary A. Visner, Sarah E. Chesrown, Joan Monnier, Una S. Ryan, and Harry S. Nick</i>	453
γ -Interferon Counteracts Interleukin-1 α -Stimulated Expression of Urokinase-Type Plasminogen Activator in Human Endothelial Cells <i>in Vitro</i> <i>Johann Wojta, Hans Zoellner, Marisa Gallicchio, John A. Hamilton, and Katherine McGrath</i>	463
Localization of an Adipocyte-Specific Retinoic Acid Response Domain Controlling S14 Gene Transcription <i>Ormond A. MacDougald and Donald B. Jump</i>	470
Isolation of [Pro ² , Met ¹³] Somatostatin-14 and Somatostatin-14 from the Frog Brain Reveals the Existence of a Somatostatin Gene Family in a Tetrapod <i>Hubert Vaudry, Nicolas Chartrel, and J. Michael Conlon</i>	477

Volume 188, Number 2, October 30, 1992

Two Reactions Are Simultaneously Catalyzed by a Single Enzyme: The Arginine-Dependent Simultaneous Formation of Two Products, Ethylene and Succinate, from 2-Oxoglutarate by an Enzyme from <i>Pseudomonas syringae</i> <i>Hideo Fukuda, Takahira Ogawa, Masato Tazaki, Kazuhiro Nagahama, Takao Fujii, Sumio Tanase, and Yoshimasa Morino</i>	483
Double Antenna Structure of Chicken Prolactin Receptor Deduced from the cDNA Sequence <i>Minoru Tanaka, Kayoko Maeda, Takeshi Okubo, and Kunio Nakashima</i>	490
Fatty Acid-Enhanced Binding of Flavin Mononucleotide to Bacterial Luciferase Measured by Steady-State Fluorescence <i>Zhi Li and Edward A. Meighen</i>	497

Identification of the Binding Site of 55-kDa Tumor Necrosis Factor Receptor by Synthetic Peptides	<i>Byong-Lyul Lie, Daiei Tunemoto, Hiromichi Hemmi, Yukiko Mizukami, Hiroko Fukuda, Hiroshi Kikuchi, Seishi Kato, and Naganori Numao</i>	503
Enhancing Effect of Wortmannin on Muscarinic Stimulation of Phospholipase D in Rat Pheochromocytoma PC12 Cells	<i>Hiroyuki Kanoh, Hidenari Ohbayashi, Yuzuru Matsuda, Yoshiaki Nonomura, and Yoshinori Nozawa</i>	510
Structural Analysis of Human Pyruvate Kinase L-Gene and Identification of the Promoter Activity in Erythroid Cells	<i>Hitoshi Kanno, Hisaichi Fujii, and Shiro Miwa</i>	516
Platelet-Derived Growth Factor AA Homodimer Stimulates Protein Synthesis Rather Than DNA Synthesis in Vascular Smooth Muscle Cells from Spontaneously Hypertensive Rats but Not from Normotensive Rats	<i>Hiroshi Inui, Takao Kondo, and Tadashi Inagami</i>	524
Cloning of a Human DNA Sequence That Restores Expression of Hepatic Functions in a Dedifferentiated Rat Hepatoma Cell	<i>Kim H. Ng, Joelle Maigné, Michèle Meunier-Rotival, and Jean Deschatrette</i>	531
Cell Killing and Induction of Manganous Superoxide Dismutase by Tumor Necrosis Factor- α Is Mediated by Lipxygenase Metabolites of Arachidonic Acid	<i>David J. Chang, Gordon M. Ringold, and Renu A. Heller</i>	538
Regulation of Human Cardiac Myosin Heavy Chain Genes: The Effect of Catecholamine	<i>J. J. Chen, D. L. Wang, N. L. Shih, K. H. Hsu, W. P. Lien, and C. C. Liew</i>	547
Glycosylation of Annexin I and Annexin II	<i>Francine Goulet, K. Gregory Moore, and Alan C. Sartorelli</i>	554
Rapid Structural Changes in Nerve Fibers Evoked by Electric Current Pulses	<i>I. Tasaki and P. M. Byrne</i>	559
Intracellular Signal Transduction for Interleukin-1 β -Induced Endothelin Production in Human Umbilical Vein Endothelial Cells	<i>Takuyuki Katabami, Makoto Shimizu, Kazutoshi Okano, Yohko Yano, Ken Nemoto, Mika Ogura, Tatsuto Tsukamoto, Satoshi Suzuki, Kiyoshi Ohira, Yukio Yamada, Noriaki Sekita, Akihiro Yoshida, and Kazuhiko Someya</i>	565
Detection of Topoisomerase I Gene Point Mutation in CPT-11 Resistant Lung Cancer Cell Line	<i>Naohiro Kubota, Fumihiko Kanzawa, Kazuto Nishio, Yuichirou Takeda, Tohru Ohmori, Yasuhiro Fujiwara, Yoshiteru Terashima, and Nagahiro Saijo</i>	571
Isolation and Primary Structure of Urotensin II from the Brain of a Tetrapod, the Frog <i>Rana ridibunda</i>	<i>J. Michael Conlon, Finbarr O'Harte, D. David Smith, Marie-Christine Tonon, and Hubert Vaudry</i>	578
C-1' Hydrogen Abstraction of Deoxyribose in DNA Strand Scission by Dynemicin A	<i>Takashi Shiraki, Motonari Uesugi, and Yukio Sugiura</i>	584
N ^G -Monomethyl-L-Arginine Causes Nitric Oxide Synthesis in Isolated Arterial Rings: Trouble in Paradise	<i>Stephen L. Archer and Václav Hampl</i>	590

Comparison of the Aflatoxin B ₁ -8,9-Epoxy Conjugating Activities of Two Bacterially Expressed α Class Glutathione S-Transferase Isozymes from Mouse and Rat	<i>Timo M. Buetler, Dennis Slone, and David L. Eaton</i>	597
Structure-Activity Studies of the Thrombin Receptor Activating Peptide	<i>T. Sabo, D. Gurwitz, L. Motola, P. Brodt, R. Barak, and E. Elhanaty</i>	604
Reduction-Driven Polypeptide Folding by the ΔT_i Mechanism	<i>Dan W. Urry, Larry C. Hayes, D. Channe Gowda, Cynthia M. Harris, and R. Dean Harris</i>	611
Cholesterol Ozonation Products as Biomarkers for Ozone Exposure in Rats	<i>William A. Pryor, Keyang Wang, and Eliezer Bermúdez</i>	618
Non-peptidic Anti-AIDS Agents: Inhibition of HIV-1 Proteinase by Disulfonates	<i>Ross I. Brinkworth and David P. Fairlie</i>	624
Flavones Are Inhibitors of HIV-1 Proteinase	<i>Ross I. Brinkworth, Martin J. Stoermer, and David P. Fairlie</i>	631
Heat Stress of Cultured GC Cells Enhances Triiodothyronine-Induced Growth Hormone Production by Action within the 5'-Flanking Region of the Rat Growth Hormone Gene	<i>SriPrakash Mokshagundam, Lawrence E. Shapiro, and Martin I. Surks</i>	638
Processing of Atriopeptin Prohormone by Nonmyocytic Atrial Cells	<i>James E. Greenwald, Philip Needleman, Ned Siegel, Erica Tetens, Brook Biel, and Detlef Ritter</i>	644
N $^{\epsilon}$ (γ -Glutamyl)lysine Crosslinks in the Blood Clot of the Horseshoe Crab, <i>Limulus polyphemus</i>	<i>James Wilson, Frederick R. Rickles, Peter B. Armstrong, and Laszlo Lorand</i>	655
Calcitonin Gene-Related Peptide Stimulates Intracellular cAMP via a Protein Kinase C-Controlled Mechanism in Human Ocular Ciliary Epithelial Cells	<i>Richard B. Crook and Julie M. Yabu</i>	662
A Peptide Sequence on Carcinoembryonic Antigen Binds to an 80-kD Protein on Kupffer Cells	<i>Peter Thomas, Anthony T. Petrick, Carol A. Toth, Eben S. Fox, James J. Elting, and Glenn Steele, Jr.</i>	671
Interaction of Dopamine- β -Monooxygenase with Chromaffin Granule Membrane Lipids	<i>Armine G. Pogosyan, Anna S. Boyajian, Marietta Y. Mkrtchyan, and Konstantin G. Karagezyan</i>	678
Enhancer-Site Downstream Binding Protein Activity Is Enriched in Rat Tissues That Express the Class I Alcohol Dehydrogenase Gene	<i>Marcia F. Canto, Maria M. Oliva, James J. Potter, Esteban Mezey, and Vincent W. Yang</i>	684
Determination of Hippocampal Protein Kinase C Using a Frozen Tissue Method: Comparison of Synaptosomal and Total Activity in C57BL/6 and DBA/2 Mice	<i>Diana E. Fordyce and Jeanne M. Wehner</i>	690
Genomic Organization of the Human Retinoic Acid Receptor β 2	<i>Bas-jan M. van der Leede, Gert E. Folkers, Frank A. E. Kruyt, and Paul T. van der Saag</i>	695
The Binding of Plasminogen Fragments to Cultured Human Umbilical Vein Endothelial Cells	<i>Hua-Lin Wu, Ing-Shiang Wu, Ro-Yun Fang, Jen-Shau Hau, Dung-Ho Wu, Bi-Ing Chang, Tsun-Mei Lin, and Guey-Yueh Shi</i>	703

Selective Assays for Thymidine Kinase 1 and 2 and Deoxycytidine Kinase and Their Activities in Extracts from Human Cells and Tissues	
<i>Elias S. J. Arnér, Tatjana Spasokoukotskaja, and Staffan Eriksson</i>	712
cAMP Induces Up-Regulation of ET _A Receptor mRNA and Increases Responsiveness to Endothelin-1 of Rat Aortic Smooth Muscle Cells in Primary Culture	
<i>Junji Nishimura, Xi Chen, Hasna Jahan, Tomomi Shikasho, Sei Kobayashi, and Hideo Kanaide</i>	719
Single-Stranded DNA of 5'-Upstream Region of the <i>rolC</i> Gene Interacts with Nuclear Proteins of Carrot Cell Cultures	
<i>Akihiro Suzuki, Atsushi Kato, and Hirofumi Uchimiya</i>	727
Oxidation of Nitric Oxide by Oxygen in Biological Systems Monitored by Porphyrinic Sensor	
<i>Ziad Taha, Frederick Kiechle, and Tadeusz Malinski</i>	734
Selective Endothelial Growth Inhibition by Tetracyclines That Inhibit Collagenase	
<i>Christopher Guerin, John Laterra, Taras Masnyk, Lorne M. Golub, and Henry Brem</i>	740
Kinetics of the Sodium-Dependent Glutamine Transporter in Human Intestinal Cell Confluent Monolayers	
<i>Wiley W. Souba, Ming Pan, and Bruce R. Stevens</i>	746
Casein Kinase II-Catalyzed Phosphorylation of Calmodulin Is Altered by Amino Acid Deletions in the Central Helix of Calmodulin	
<i>David B. Sacks, Harold W. Davis, Dan L. Crimmins, Anthony Persechini, and Jay M. McDonald</i>	754
The Glycoprotease of <i>Pasteurella haemolytica</i> A1 Eliminates Binding of Myeloid Cells to P-Selectin but Not to E-Selectin	
<i>Christina N. Steininger, Christopher A. Eddy, Richard M. Leimgruber, Alan Mellors, and Joseph K. Welply</i>	760
Tetracyclines Inhibit Intracellular Muscle Proteolysis <i>in Vitro</i>	
<i>Bruce S. Schneider, Jonathan Maimon, Lorne M. Golub, N. S. Ramamurthy, and Robert A. Greenwald</i>	767
Selective Inhibition of Protein Tyrosine Phosphatase Activities by H ₂ O ₂ and Vanadate <i>in Vitro</i>	
<i>Dalit Hecht and Yehiel Zick</i>	773
Post-transcriptional Regulation of the Pro α 1(I) Collagen Gene in Pro α 1(I)-Deficient, Chemically Transformed Syrian Hamster Embryo Fibroblasts	
<i>Elaine M. Schalk, Anna Gosiewska, Willie Prather, and Beverly Peterkofsky</i>	780
Functional Expression of the Bradykinin-B ₂ Receptor cDNA in Chinese Hamster Lung CCL39 Fibroblasts	
<i>Linda Taylor, Dennis Ricupero, Jyh-Chang Jean, Bruce A. Jackson, Javier Navarro, and Peter Polgar</i>	786
Identification of Sialic Acids in Cell Adhesion Molecule, Contact Site A from <i>Dictyostelium discoideum</i>	
<i>Motonobu Yoshida, Goro Fuse, Taei Matsui, and Seiji Ouchi</i>	794
Specific Repression of Transthyretin Gene Expression in Rat Liver by a Peroxisome Proliferator Clofibrate	
<i>Kiyoto Motojima, Sataro Goto, and Tsuneo Imanaka</i>	799
Insulin and Lipogenesis in Rat Adipocytes. I. Effect of Insulin Incubation on Lipid Synthesis by Isolated Rat Adipocytes	
<i>Luz Marina Morales, Gilberto Campos, Elena Ryder, and Angel Casanova</i>	807

Glycinergic Ligands Modulate the Rate of Phosphorylation of the Glycine Receptor by Protein Kinase C	Maria-Luisa Vaello, Ana Ruiz-Gómez, and Federico Mayor, Jr.	813
Omeprazole, an Inducer of Human CYP1A1 and 1A2, Is Not a Ligand for the Ah Receptor	Martine Daujat, Bogumila Peryt, Pierre Lesca, Gilles Fournanier, Jacques Domergue, and Patrick Maurel	820
Molecular Cloning in <i>Escherichia coli</i> , Expression, and Nucleotide Sequence of the Gene for the Ethylene-Forming Enzyme of <i>Pseudomonas syringae</i> PV. <i>Phaseolicola</i> PK2	Hideo Fukuda, Takahira Ogawa, Katsuya Ishihara, Takao Fujii, Kazuhiro Nagahama, Tatsuo Omata, Yorinao Inoue, Sumio Tanase, and Yoshimasa Morino	826
A 16 Amino Acid Synthetic Peptide Derived from Human C3d Triggers Proliferation and Specific Tyrosine Phosphorylation of Transformed CR2-Positive Human Lymphocytes and of Normal Resting B Lymphocytes	Raymond Frade, Jacques Hermann, and Monique Barel	833
Cloning of Two Different 5' Untranslated Exons of Bovine Acidic Fibroblast Growth Factor by the Single Strand Ligation to Single-Stranded cDNA Methodology	Jean-Marc Philippe, Flore Renaud, Sophie Desset, Maryvonne Laurent, Jacques Mallet, Yves Courtois, and Jean-Baptiste Dumas Milne Edwards	843
The Neurofibromatosis 1 Gene Transcripts Expressed in Peripheral Nerve and Neurofibromas Bear the Additional Exon Located in the GAP Domain	C. Teinturier, G. Danglot, R. Slim, D. Pruliere, J. M. Launay, and A. Bernheim	851
Purification of Lipoxygenase and Hydroperoxide Dehydrase in Flaxseeds: Interaction between These Enzymatic Activities	Hélène Rabinovitch-Chable, Jeanne Cook-Moreau, Jean-Christian Breton, and Michel Rigaud	858
HIV-1 Protease Inhibitors Containing Statine: Inhibitory Potency and Antiviral Activity	J. A. Fehrentz, B. Chomier, E. Bignon, S. Venaud, J. C. Chermann, and D. Nisato	865
Statine-Based Tripeptides as Potent Inhibitors of HIV-1 Replication	J. A. Fehrentz, B. Chomier, E. Bignon, S. Venaud, J. C. Chermann, and D. Nisato	873
EPR Stopped-Flow Studies of the Reaction of the Tyrosyl Radical of Protein R2 from Ribonucleotide Reductase with Hydroxyurea	Günter Lassmann, Lars Thelander, and Astrid Gräslund	879
Production and Ligand-Binding Characteristics of the Soluble Form of Murine Erythropoietin Receptor	Masaya Nagao, Seiji Masuda, Satoshi Abe, Masatsugu Ueda, and Ryuzo Sasaki	888
Preferential Cyclization of 2,3(S):22(S),23-Dioxidosqualene by Mammalian 2,3-Oxidosqualene-Lanosterol Cyclase	Olivier Boutaud, Danièle Dolis, and Francis Schuber	898
Sequence and Methylation in the β /A4 Region of the Rabbit Amyloid Precursor Protein Gene	Jeffery S. Davidson, Roger L. West, Padma Kotikalapudi, and Leonard E. Maroun	905

A Synthetic Peptide Corresponding to 86-93 of the Human Type I IL-1 Receptor Binds Human Recombinant IL-1 (α and β) and Inhibits IL-1 Actions <i>in Vitro</i> and <i>in Vivo</i>	Masao Tanihara, Yasuo Suzuki, Chie Fujiwara, Chiyuki Abe, Etsuko Abe, Tatsuo Suda, and Yutaka Mizushima	912
The Measurement of Activin/EDF in Mouse Serum: Evidence for Extragonadal Production	Ryosei Sakai, Makoto Shiozaki, Mari Tabuchi, and Yuzuru Eto	921
Identification of a Highly Conserved Region at the 5' Flank of the Phospholamban Gene	David C. Johns and Arthur M. Feldman	927
Glucocorticoids Increase Ca^{2+} Influx through Dihydropyridine-Sensitive Channels Linked to Activation of Protein Kinase C in Vascular Smooth Muscle Cells	Hiroshi Kato, Takio Hayashi, Yusuke Koshino, Yasunori Kutsumi, Tsuguhiko Nakai, and Susumu Miyabo	934
Ursodeoxycholic Acid-Dependent Activation of the Glucocorticoid Receptor	Hirotooshi Tanaka and Isao Makino	942
Analysis of IL-2 Functional Structure by Multiple Cysteine Substitutions	Yang Rong, Nancy Lee, and Shu-Mei Liang	949

Differential Regulation of mRNAs Encoding Three Protein-Tyrosine Phosphatases by Insulin and Activation of Protein Kinase C	<i>Naotake Hashimoto and Barry J. Goldstein</i>	1305
Phospholipase A ₂ Activity Is Not Involved in the Tumor Necrosis Factor-Triggered Apoptotic DNA Fragmentation in Bovine Aortic Endothelial Cells	<i>Bernard Robaye and Jacques E. Dumont</i>	1312
Human Neutrophil Proteinase 3: Mapping of the Substrate Binding Site Using Peptidyl Thiobenzyl Esters	<i>Michael J. Brubaker, William C. Groutas, John R. Hoidal, and Narayanam V. Rao</i>	1318
Up-Regulation of MSH Receptors by MSH in Cloudman Melanoma Cells	<i>Ashok K. Chakraborty and John M. Pawelek</i>	1325
Evidence That a Ryanodine Receptor Triggers Signal Transduction in the Osteoclast	<i>Mone Zaidi, Vijai S. Shankar, A. S. M. Towhidul Alam, Baljit S. Moonga, Michael Pazianas, and Christopher L.-H. Huang</i>	1332
Author Index for Volume 188		1337

Volume 189, Number 1, November 30, 1992

Synthesis and Characterization of Rat Interleukin-10 (IL-10) cDNA Clones from the RNA of Cultured OX8 ⁺ OX22 ⁺ Thoracic Duct T Cells	<i>Richard E. Goodman, Jeb Oblak, and Robin G. Bell</i>	1
Stimulation of Serum-Free Cell Proliferation by Coenzyme Q	<i>I. L. Sun, E. E. Sun, and F. L. Crane</i>	8
Biosynthesis of Sphingolipids: Dihydroceramide and Not Sphinganine Is Desaturated by Cultured Cells	<i>Jürgen Rother, Gerhild van Echten, Günter Schwarzmann, and Konrad Sandhoff</i>	14
Substrate Preference of Metalloproteinases Secreted by ts-110 Moloney Murine Sarcoma Virus-Transformed Normal Rat Kidney Cells	<i>Hua-Zhong Zhang, M. Scanlon, J. L. Murray III, and J. C. Chan</i>	21
Differentiative Changes in Fucosyltransferase Activity in Newborn Rat Epidermal Cells	<i>Jianming Xiang and I. A. Bernstein</i>	27
Activation of an Adrenergic Pro-drug through Sequential Stereoselective Action of Tandem Target Enzymes	<i>Jayanta Debnath, Philip A. Husain, and Sheldon W. May</i>	33
Immunocytochemical Expression and Localization of Protein Kinase C in Bovine Aortic Endothelial Cells	<i>Oscar R. Rosales, Carlos Isaacs, Michael Nathanson, and Bauer E. Sumpio</i>	40
Relation of Superoxide Generation and Lipid Peroxidation to the Inhibition of NADH-Q Oxidoreductase by Rotenone, Piericidin A, and MPP ⁺	<i>Rona R. Ramsay and Thomas P. Singer</i>	47
Developmental Change in Subcellular Location of BP-1 Protein with an Ability to Interact with Both Identifier Sequence and Its Brain-Specific Transcript, BC-1 RNA	<i>Shunsuke Kobayashi, Tatsuya Tokuno, Keiko Suzuki, Noriko Higashi, Sataro Goto, and Kaijiro Anzai</i>	53

Protein Tyrosine Phosphorylation as an Indicator of 2,3,7,8-Tetrachloro- <i>p</i> -Dioxin Exposure <i>in Vivo</i> and <i>in Vitro</i>	Xinfang Ma, Naheed A. Mufti, and John G. Babish	59
Platelet-Derived Growth Factor Gene Expression in Cultured Human Retinal Pigment Epithelial Cells	Munenori Yoshida, Hidenobu Tanihara, and Nagahisa Yoshimura	66
Production of Catecholamines in the Human Epidermis	Karin U. Schallreuter, John M. Wood, Regina Lemke, Caroline LePoole, Pranab Das, Wiete Westerhof, Mark R. Pittelkow, and Anthony J. Thody	72
Thapsigargin Induces Meiotic Maturation in Surf Clam Oocytes	François Dubé	79
Ergosterol Depletion and 4-Methyl Sterols Accumulation in the Yeast <i>Saccharomyces cerevisiae</i> Treated with an Antifungal, 6-Amino-2- <i>n</i> -pentylthiobenzothiazole	Thomáš Kuchta, Katarína Bartková, and Róbert Kubinec	85
Multidrug Resistant HOB1 Lymphoma Cells Express P-Glycoprotein That Does Not Play the Major Role in the Development of Drug Resistance to Adriamycin	Wei-Ping Lee, Chao-Lin Lee, and Ming-Ching Kao	92
Isolation and Characterization of Two Opioid Peptides from a Bovine Hemoglobin Peptic Hydrolysate	Jean-Marie Piot, Qiuyu Zhao, Didier Guillochon, Guy Ricart, and Daniel Thomas	101
<i>In Vitro</i> Evolution of Cisplatin/DNA Monoadducts into Diadducts Is Dependent upon Superhelical Density	K. Bouayadi, P. Calsou, A. M. Pedrini, and B. Salles	111
Characterization of Hypervariable Regions in the Putative Envelope Protein of Hepatitis C Virus	Nobuyuki Kato, Yuko Ootsuyama, Showgo Ohkoshi, Takahide Nakazawa, Hitomi Sekiya, Makoto Hijikata, and Kunitada Shimotohno	119
Inhibition of Insulin Secretion by KN-62, a Specific Inhibitor of the Multifunctional Ca ²⁺ /Calmodulin-Dependent Protein Kinase II	Robert M. Wenham, Michael Landt, Steven M. Walters, Hiroyoshi Hidaka, and Richard A. Easom	128
Functional Study of the Germinal Angiotensin I-Converting Enzyme Promoter	Sophie Nadaud, Anne-Marie Houot, Christine Hubert, Pierre Corvol, and Florent Soubrier	134
Memory of Butyrate Induction by the Moloney Murine Sarcoma Virus Enhancer-Promoter Element	De-chu Tang and Milton W. Taylor	141
Loss of Collagenase Gene Expression in Immortalized Clones of SV40 T Antigen-Transformed Human Diploid Fibroblasts	Shin-ichiro Imai and Toshiya Takano	148
Animal Histo-blood Group ABO Genes	Yoshihiko Kominato, Patricia D. McNeill, Miyako Yamamoto, Mai Russell, Sen-itiroh Hakomori, and Fumi-ichiro Yamamoto	154
The Interaction of Decorin Core Protein Fragments with Type I Collagen	Gábor Pogány and Kathryn G. Vogel	165
<i>Escherichia coli</i> γ -Glutamyltranspeptidase Mutants Deficient in Processing to Subunits	Wataru Hashimoto, Hideyuki Suzuki, Satoko Nohara, and Hidehiko Kumagai	173

Phenylmethylsulfonyl Fluoride Stimulates Proteolysis of Nuclear Proteins from Chick Liver	<i>Tatsuzo Oka, Mahendra Kumar Thakur, Ken-ichi Miyamoto, Toshihiro Sassa, Isao Suzuki, and Yasuo Natori</i>	179
Brevinin-1 and -2, Unique Antimicrobial Peptides from the Skin of the Frog, <i>Rana brevipoda porsa</i>	<i>Noriyuki Morikawa, Ken'ichi Hagiwara, and Terumi Nakajima</i>	184
Therapeutic Effects of Superoxide Dismutase Derivatives Modified with Mono- or Polysaccharides on Hepatic Injury Induced by Ischemia/Reperfusion	<i>Takuya Fujita, Hisao Furitsu, Yoshinobu Takakura, Hitoshi Sezaki, and Mitsuru Hashida</i>	191
Identification of the Fatty Acid Binding Site on Glutathione S-Transferase P	<i>Jun Nishihira, Teruo Ishibashi, Masaharu Sakai, Shinzo Nishi, Hidemasa Kondo, and Akira Makita</i>	197
Dual Role of S-Nitrosocaptopril as an Inhibitor of Angiotensin-Converting Enzyme and a Nitroso Group Carrier	<i>Jeen-Woo Park</i>	206
A Receptor-Binding Peptide from Human Interleukin-6: Isolation and a Proton Nuclear Magnetic Resonance Study	<i>Teiji Ekida, Chiaki Nishimura, Susumu Masuda, Shun-ichi Itoh, Ichio Shimada, and Yoji Arata</i>	211
cDNA Cloning and Sequence Determination of the Pheromone Biosynthesis Activating Neuropeptide of the Silkworm, <i>Bombyx mori</i>	<i>Tsuyoshi Kawano, Hiroshi Kataoka, Hiromichi Nagasawa, Akira Isogai, and Akinori Suzuki</i>	221
Frequent Amplification of the C-met Gene in Scirrhou Type Stomach Cancer	<i>Hiroki Kuniyasu, Wataru Yasui, Yasuhiko Kitadai, Hiroshi Yokozaki, Hisao Ito, and Eiichi Tahara</i>	227
Invertebrate Aspartyl/Asparaginyl β -Hydroxylase: Potential Modification of Endogenous Epidermal Growth Factor-like Modules	<i>Don D. Monkovic, William J. VanDusen, Christopher J. Petroski, Victor M. Garsky, Mohinder K. Sardana, Peter Zavodszky, Andrew M. Stern, and Paul A. Friedman</i>	233
Constitutive Nitric Oxide Synthase from Cerebellum Is Reversibly Inhibited by Nitric Oxide Formed from L-Arginine	<i>Norma E. Rogers and Louis J. Ignarro</i>	242
A Tat Antagonist Inhibits HIV-1 Induction in Naturally Infected and Experimentally Infected T Cells	<i>Mary Jane Potash, Galina Bentsman, George McKinley, and David J. Volsky</i>	250
Regulation by Thyroid Hormone of the Synthesis of a Cytosolic Thyroid Hormone Binding Protein during Liver Regeneration	<i>Toru Obata and Sheue-yann Cheng</i>	257
Regulation of ATP-Citrate Lyase at Transcriptional and Post-transcriptional Levels in Rat Liver	<i>Kyung-Sup Kim, Sahng-Wook Park, and Yoon-Soo Kim</i>	264
Novel Inhibitor of Phospholipase A ₂ with Topical Anti-inflammatory Activity	<i>Kenneth M. Trampusch, Steven A. Steiner, Paul L. Stanley, David O. Nettleton, R. C. Franson, Anita H. Lewin, and F. Ivy Carroll</i>	272
Dipeptide Inhibitors of Ubiquitin-Mediated Protein Turnover Prevent Growth Factor-Induced Neurite Outgrowth in Rat Pheochromocytoma PC12 Cells	<i>Hubert Hondermarck, Jose Sy, Ralph A. Bradshaw, and Stuart M. Arfin</i>	280

Cloning, Sequencing, and Expression of Human Gonadotropin Releasing Hormone (GnRH) Receptor	<i>Sham S. Kakar, Lois C. Musgrove, Daniel C. Devor, Jeffrey C. Sellers, and Jimmy D. Neill</i>	289
Molecular Cloning of the Human Brain and Gastric Cholecystokinin Receptor: Structure, Functional Expression, and Chromosomal Localization	<i>Joseph R. Pisegna, Andreas de Weerth, Konrad Huppi, and Stephen A. Wank</i>	296
Methyl Jasmonate Conditions Parsley Suspension Cells for Increased Elicitation of Phenylpropanoid Defense Responses	<i>Heinrich Kauss, Karin Krause, and Wolfgang Jeblick</i>	304
The Glutathione Conjugates of <i>tert</i> -Butyl Hydroquinone as Potent Redox Cycling Agents and Possible Reactive Agents Underlying the Toxicity of Butylated Hydroxyanisole	<i>Ben van Ommen, Arjen Koster, Hans Verhagen, and Peter J. van Bladeren</i>	309
Cancer Cell Binding to E-Selectin-Transfected Human Endothelia	<i>June Rae Merwin, Joseph A. Madri, and Mark Lynch</i>	315
Guanosine 5'-O-(3-Thiotriphosphate) Causes Endothelium-Dependent, Pertussis Toxin-Sensitive Relaxations in Porcine Coronary Arteries	<i>Toshiro Shibano, Juan Codina, Lutz Birnbaumer, and Paul M. Vanhoutte</i>	324
Characterization of a Gly 19 $\rightarrow$ Val Mutant of <i>ram</i> p25, a Low M_r GTP-Binding Protein: Loss of GTP/GDP-Binding Activity in the Mutated <i>ram</i> p25	<i>Koh-ichi Nagata, Takeshi Suzuki, Yukio Okano, Michinari Hamaguchi, and Yoshinori Nozawa</i>	330
Stable Expression of Natriuretic Peptide Receptors: Effects of HS-142-1, a Non-peptide ANP Antagonist	<i>Yoshio Ohyama, Kaoru Miyamoto, Yoshikazu Morishita, Yuzuru Matsuda, Yoshihiko Saito, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo</i>	336
Prevalence of Three Mutations in the $G_s\alpha$ Gene among 24 Families with Pseudohypoparathyroidism Type Ia	<i>Cal K. Lin, Michael J. Hakakha, Jon M. Nakamoto, Anna T. Englund, Arnold S. Brickman, Marilyn L. Scott, and Cornelis Van Dop</i>	343
Changes in Cell Attachment by RSV Transformation in Rat Liver Epithelial Cells	<i>Keisuke Mashima and Junko Mizuguchi</i>	350
Molecular Cloning and Characterization of the Human and Porcine Transforming Growth Factor- β Type III Receptors	<i>Anita Morén, Hidenori Ichijo, and Kohei Miyazono</i>	356
DRG: A Novel Developmentally Regulated GTP-Binding Protein	<i>Takashi Sazuka, Yasuhiro Tomooka, Yoji Ikawa, Makoto Noda, and Sharad Kumar</i>	363
Expression of DRG during Murine Embryonic Development	<i>Takashi Sazuka, Makoto Kinoshita, Yasuhiro Tomooka, Yoji Ikawa, Makoto Noda, and Sharad Kumar</i>	371
Re-examination of [3 H]Mepyramine Binding Assay for Histamine H_1 Receptor Using Quinine	<i>Ye Qi Liu, Yoshiyuki Horio, Hiroyuki Mizuguchi, Katsumi Fujimoto, Ikuo Imamura, Yoshiyuki Abe, and Hiroyuki Fukui</i>	378

Hepatocyte Growth Factor Down-Regulates the α -Fetoprotein Gene Expression in PLC/PRF/5 Human Hepatoma Cells	Masahiko Hatano, Keisuke Nakata, Kazuhiko Nakao, Takuya Tsutsumi, Akira Ohtsuru, Toshikazu Nakamura, Taiki Tamaoki, and Shigenobu Nagataki	385
Synergistic Stimulation of Nitric Oxide Hemoglobin Production in Rats by Recombinant Interleukin 1 and Tumor Necrosis Factor	Hiroaki Kosaka, Noboru Harada, Manabu Watanabe, Harumasa Yoshihara, Yasuo Katsuki, and Takeshi Shiga	392
Possible Activity of Acidic Fibroblast Growth Factor as a Progression Factor Rather than a Transforming Factor	Jun B. Takahashi, Minoru Hoshimaru, Michael Jaye, Haruhiko Kikuchi, and Masakazu Hatanaka	398
Purification of a Mammary-Derived Growth Inhibitor (MDGI) Related Polypeptide Expressed during Pregnancy	Ralf Brandt and Richard Grosse	406
Metabolism of Halogenated Bisphosphonates by the Cellular Slime Mold <i>Dictyos- telium discoideum</i>	M. J. Rogers, R. G. G. Russell, G. M. Blackburn, M. P. Williamson, and D. J. Watts	414
Molecular Cloning of the Mouse S-Adenosylmethionine Decarboxylase cDNA: Specific Protein Binding to the Conserved Region of the mRNA 5'-Untranslated Region	Tiina Waris, Ritva Ihalaainen, Marja-Riitta Keränen, and Antti Pajunen	424
Modulation of Transient Type K Channel Cloned from Rat Heart	Hitoshi Okada, Kuniaki Ishii, Kazuo Nunoki, Takaaki Abe, and Norio Taira	430
³ H-Uridine Uptake in Human Leukemia HL-60 Cells Exposed to Extremely Low Frequency Electromagnetic Fields	Mitra Azadniv and Morton W. Miller	437
Increased Mitochondrial Activities in Pigmented (Melanized) Fish Cells and Nucleotide Sequence of Mitochondrial Large rRNA	Gang Peng, John D. Taylor, and T. T. Tchen	445
Purification and Characterization of Bovine Brain γ -Aminobutyraldehyde Dehydrogenase	Jong Eun Lee and Young Dong Cho	450
Regulation of the GTPase Activity of the Ras-Related rap2 Protein	Isabelle Janoueix-Lerosey, Paul Polakis, Armand Tavittian, and Jean de Gunzburg	455
Phospholipid Transverse Mobility Modifications in Plasma Membranes of Activated Platelets: An ESR Study	François Bassé, Patrick Gaffet, Francine Rendu, and Alain Bienvenüe	465
Amino Acid Transport Systems in the Human Hepatoma Cell Line Hep G2	Sylvie Goenner, Audrey Boutron, Theophile Soni, Alain Lemonnier, and Nicole Moatti	472
Methylation-Sensitive Protein-DNA Interaction at the Cell Cycle Regulatory Domain of Human Thymidine Kinase Promoter	Zee-Fen Chang and Su-Mei Cheng	480
Ethylbenzene Hydroxylation by Cytochrome P450cam	D. Filipovic, M. D. Paulsen, P. J. Loida, S. G. Sligar, and R. L. Ornstein	488
The COUP Transcription Factor (COUP-TF) Is Directly Involved in the Regulation of Oxytocin Gene Expression in Luteinizing Bovine Granulosa Cells	Uwe Wehrenberg, Richard Ivell, and Norbert Walther	496

A Repressor Region in the Human β -Myosin Heavy Chain Gene That Has a Partial Position Dependency	<i>J. G. Edwards, J. J. Bahl, I. Flink, J. Milavetz, S. Goldman, and E. Morkin</i>	504
Molecular Cloning of Hippocalcin, a Novel Calcium-Binding Protein of the Recoverin Family Exclusively Expressed in Hippocampus	<i>Masaaki Kobayashi, Ken Takamatsu, Shigeharu Saitoh, Masayuki Miura, and Tetsuya Noguchi</i>	511
Comparison of Plasma Levels of Lipid Hydroperoxides and Antioxidants in Hyperlipidemic Nagase Analbuminemic Rats, Sprague-Dawley Rats, and Humans	<i>Yorihiro Yamamoto, Keiji Wakabayashi, Etsuo Niki, and Minako Nagao</i>	518
Purification and Characterization of a Sialidase from <i>Bacteroides fragilis</i> SBT3182	<i>Hiroshi Tanaka, Fumio Ito, and Taisuke Iwasaki</i>	524
Gene Structure of Human Indoleamine 2,3-Dioxygenase	<i>Akihiko Kadoya, Shigenobu Tone, Hiroyasu Maeda, Yohsuke Minatogawa, and Ryo Kido</i>	530
Inhibition of Low pH Evoked Activation of Airway Sensory Nerves by Capsazepine, a Novel Capsaicin-Receptor Antagonist	<i>Ya-Ping Lou and Jan M. Lundberg</i>	537
Circadian Rhythm of Covalent Modifications in Liver DNA	<i>Raghu G. Nath, Suryanarayana V. Vulimiri, and Kurt Randerath</i>	545
The MDR1 Gene Product, P-Glycoprotein, Mediates the Transport of the Cardiac Glycoside, Digoxin	<i>Inés A. M. de Lannoy and Melvin Silverman</i>	551
Co-purification of 130-kDa Nitric Oxide Synthase and a 22-kDa Link Protein from Human Neutrophils	<i>J. L. Bryant, Jr., P. Mehta, A. Von der Porten, and J. L. Mehta</i>	558
Detection of Antibody to Hepatitis C E2/NS1 Protein in Patients with Type C Hepatitis	<i>Osamu Yokosuka, Yoshimi Ito, Fumio Imazeki, Masao Ohto, and Masao Omata</i>	565
Stimulation of Glucose Transport by Guanine Nucleotides in Permeabilized Rat Adipocytes	<i>Yoich Suzuki, Hiroshi Shibata, Shuji Inoue, and Itaru Kojima</i>	572
Isolation and Characterization of Y Chromosome DNA Probes	<i>Solange B. Farah, Dieter C. Gruenert, Jacques A. Lepercq, Jane Chueh, Andrew Metzger, Edi L. Sartorato, Roger V. Lebo, and Mitchell S. Golbus</i>	581
Mouse Dopamine β -Hydroxylase: Primary Structure Deduced from the cDNA Sequence and Exon/Intron Organization of the Gene	<i>Tamotsu Nakano, Kazuto Kobayashi, Shigeru Saito, Keisuke Fujita, and Toshiharu Nagatsu</i>	590

Volume 189, Number 2, December 15, 1992

Induction of Human Microvascular Endothelial Tubular Morphogenesis by Human Keratinocytes: Involvement of Transforming Growth Factor- α	<i>Mayumi Ono, Kazuki Okamura, Yoshifumi Nakayama, Mika Tomita, Yasufumi Sato, Yasuhiro Komatsu, and Michihiko Kuwano</i>	601
--	---	-----

Widespread Co-localization of mRNAs Encoding the Guanylate Cyclase-Coupled Natriuretic Peptide Receptors in Rat Tissues	<i>Teresa Tallerico-Melnyk, Cecil C. Yip, and Valerie M. Watt</i>	610
Molecular Cloning and Characterization of the Platelet-Activating Factor Receptor Gene Expressed in the Human Heart	<i>Toru Sugimoto, Hidetsugu Tsuchimochi, Christopher G. A. McGregor, Hiroyuki Mutoh, Takao Shimizu, and Yoshihisa Kurachi</i>	617
Generation of Specificity-Variant Antibodies by Alteration of Carbohydrate in Light Chain of Human Monoclonal Antibodies	<i>Hirofumi Tachibana, Sanetaka Shirahata, and Hiroki Murakami</i>	625
Reactivity of [Fe] and [Ni-Fe-Se] Hydrogenases with Their Oxido-reduction Partner: The Tetraheme Cytochrome c_3	<i>Pierre Bianco, Jean Haladjian, Mireille Bruschi, and Françoise Guerlesquin</i>	633
Comparison of Three Forms of Antigens in the Demonstration of Cell-Mediated Immune Response in Murine Toxoplasmosis	<i>N. Rahmah and A. Khairul Anuar</i>	640
Elevation of Hepatic Levels of Metallothionein and Zinc in Mice Bearing Experimental Tumors	<i>Atsushi Takeda, Tetsu Sato, Haruna Tamano, and Shoji Okada</i>	645
Identification of a Disulfide Bridge Connecting the α -Subunits of the Extracellular Domain of the Insulin Receptor	<i>Lauge Schäffer and Lene Ljungqvist</i>	650
Purification and Characterization of a Novel Growth Factor (FF-GF) Synthesized by a Rat Hepatoma Cell Line, FF101	<i>Hiroko Matsuda, Masahiro Matsumoto, Hirofumi Kitahara, Soichi Haraguchi, and Koichi Kanai</i>	654
Surfactant-Producing Rabbit Pulmonary Alveolar Type II Cells Synthesize and Secrete an Anti-inflammatory Protein, Uteroglobulin	<i>Jeffrey Guy, Ramasubbareddy Dhanireddy, and Anil B. Mukherjee</i>	662
Ginsenosides Protect Pulmonary Vascular Endothelium against Free Radical-Induced Injury	<i>Hyeyoung Kim (Jun), Xiu Chen, and C. Norman Gillis</i>	670
Domains for G-Protein Coupling in Angiotensin II Receptor Type I: Studies by Site-Directed Mutagenesis	<i>Kenji Ohyama, Yoshiaki Yamano, Shigeyuki Chaki, Takao Kondo, and Tadashi Inagami</i>	677
Growth Stimulation of Rat Fetal Hepatocytes in Response to Hepatocyte Growth Factor: Modulation of <i>c-myc</i> and <i>c-fos</i> Expression	<i>Isabel Fabregat, Carmen de Juan, Toshikazu Nakamura, and Manuel Benito</i>	684
A Na Pump Inhibitor from Bovine Posterior Pituitary: Purification, Structure Determination, and Its Cardiovascular Effect in Rat	<i>Takao Hamakubo, Hiroaki Furuta, Michio Ichimura, Martin Appalsamy, Rogelio Mosqueda-Garcia, David Robertson, and Tadashi Inagami</i>	691
Isolation and Identification of C-Type Natriuretic Peptide in Human Monocytic Cell Line, THP-1	<i>Yushiro Ishizaka, Kenji Kangawa, Naoto Minamino, Koichi Ishii, Satoshi Takano, Tanenao Eto, and Hisayuki Matsuo</i>	697

Spectral and Sequence Similarity between Vasoactive Intestinal Peptide and the Second Conserved Region of Human Immunodeficiency Virus Type I Envelope Glycoprotein (gp120): Possible Consequences on Prevention and Therapy of AIDS	<i>Veljko Veljkovic, Radmila Metlas, Jadranka Raspopovic, and Sandor Pongor</i>	705
N^G -Hydroxy-L-arginine and Hydroxyguanidine Potentiate the Biological Activity of Endothelium-Derived Relaxing Factor Released from the Rabbit Aorta	<i>Artur Zembowicz, Stefan Chłopicki, Waldemar Radziszewski, John R. Vane, and Richard J. Gryglewski</i>	711
Partial Purification of a GTPase-Activating Protein for rap2b from Bovine Brain Membranes	<i>Francis X. Farrell and Eduardo G. Lapetina</i>	717
Effect of Phosphate Ion on the Activity of Bovine Plasma Amine Oxidase	<i>Alessandra Corazza, Roberto Stevanato, Maria Luisa Di Paolo, Marina Scarpa, Bruno Mondovi, and Adelio Rigo</i>	722
Two Types of Inositol Trisphosphate Binding in Cardiac Microsomes	<i>Yoshiyuki Kijima and Sidney Fleischer</i>	728
A Novel Membrane-Associated Carbonyl-Reducing Enzyme Is Present in Smooth Endoplasmic Reticulum of Mouse Liver	<i>Thomas Ahlers, Hans-Peter Bode, Karl J. Netter, and Edmund Maser</i>	736
Cleavage of Hepatitis B Virus RNA by Three Ribozymes Transcribed from a Single DNA Template	<i>Fritz von Weizsäcker, Hubert E. Blum, and Jack R. Wands</i>	743
Cloning and Nucleotide Sequence of Human Liver cDNA Encoding for Cystathionine γ -Lyase	<i>Yilli Lu, Brian F. O'Dowd, Hector Orrego, and Yedy Israel</i>	749
Metabolism of 22-Oxacalcitriol by a Vitamin D-Inducible Pathway in Cultured Parathyroid Cells	<i>A. J. Brown, M. Berkoben, C. Ritter, N. Kubodera, Y. Nishii, and E. Slatopolsky</i>	759
The Role of Transferrin in Heme Transport	<i>Daniel L. Stout</i>	765
Enhancement by Staurosporine of Platelet-Activating Factor Formation in <i>N</i> -Formyl Peptide-Challenged Human Neutrophils Is Mediated by Intracellular Platelet-Activating Factor Binding Sites	<i>Stefan Müller and Santosh Nigam</i>	771
Free Hemoglobin Interferes with Detection of Endothelin Peptides	<i>Anette Hemsén and Jan M. Lundberg</i>	777
Isolation of a DNA Endonuclease Complex in XPD Cells Which Is Defective in Ability to Incise Nucleosomal DNA Containing Pyrimidine Dimers	<i>David D. Parrish, Xue Feng, and Muriel W. Lambert</i>	782
Insect Immunity: Two Proteinase Inhibitors from Hemolymph of <i>Locusta migratoria</i>	<i>R-A. Boigegrain, H. Mattras, M. Brehélin, P. Paroutaud, and M-A. Coletti-Previero</i>	790
Protein Kinase C Activity Is Rate Limiting for Shedding of the Interleukin-6 Receptor	<i>Jürgen Müllberg, Heidi Schooltink, Tanja Stoyan, Peter C. Heinrich, and Stefan Rose-John</i>	794
Vitamin E Inhibits Protein Oxidation in Skeletal Muscle of Resting and Exercised Rats	<i>Abraham Z. Reznick, Eric Witt, Michael Matsumoto, and Lester Packer</i>	801
Site-Directed Mutagenesis of Conserved Residues of <i>Clostridium thermocellum</i> Endoglucanase CelC	<i>Jesús Navas and Pierre Béguin</i>	807

Zinc Binding by Retroviral Integrase	
A. R. McEuen, B. Edwards, K. A. Koepke, A. E. Ball, B. A. Jennings, A. J. Wolstenholme, M. J. Danson, and D. W. Hough	813
Chromosomal Band Assignments of the Genes Encoding Human FKBP12 and FKBP13	
Anthony G. DiLella, Anita Hawkins, Robert J. Craig, Stuart L. Schreiber, and Constance A. Griffin	819
Potent Synergism between Vascular Endothelial Growth Factor and Basic Fibroblast Growth Factor in the Induction of Angiogenesis <i>in Vitro</i>	M. S. Pepper, N. Ferrara, L. Orci, and R. Montesano 824
Structure of Serum Transferrin in Carbohydrate-Deficient Glycoprotein Syndrome	
Yoshinao Wada, Atsushi Nishikawa, Nobuhiko Okamoto, Koji Inui, Hiroko Tsukamoto, Shintaro Okada, and Naoyuki Taniguchi	832
<i>In Vitro</i> Interactions of the Histone-like Protein IHF with the <i>algD</i> Promoter, a Critical Site for Control of Mucoidy in <i>Pseudomonas aeruginosa</i>	
C. D. Mohr and V. Deretic	837
A Novel Anti-HIV Synthetic Peptide, T-22 ([Tyr ^{5,12} , Lys ⁷]-Polyphemusin II)	
Masao Masuda, Hideki Nakashima, Toshihiro Ueda, Hiroyasu Naba, Rie Ikoma, Akira Otaka, Yoshihiro Terakawa, Hirokazu Tamamura, Toshiro Ibuka, Tsutomu Murakami, Yoshio Koyanagi, Michinori Waki, Akiyoshi Matsumoto, Naoki Yamamoto, Susumu Funakoshi, and Nobutaka Fujii	845
Mutations in the Pit-1 Gene in Children with Combined Pituitary Hormone Deficiency	
Kohji Ohta, Yoshitaka Nobukuni, Hiroshi Mitsubuchi, Shigehiro Fujimoto, Nobutake Matsuo, Hiroshi Inagaki, Fumio Endo, and Ichiro Matsuda	851
<i>Escherichia coli</i> tRNA ^{Asp} Recognition Mechanism Differing from That of the Yeast System	
Nobukazu Nameki, Koji Tamura, Hyouta Himeno, Haruichi Asahara, Tsunemi Hasegawa, and Mikio Shimizu	856
Expression of Transcripts of Complement Components and Their Receptors during Differentiation of Embryonal Carcinoma Cell Lines	Chie Kohchi, Haruyuki Oshima, Den-ichi Mizuno, and Gen-Ichiro Soma 863
Down Regulation of CD4 Expression in Cultured Microglia by Immunosuppressants and Lipopolysaccharide	Makoto Sawada, Akio Suzumura, and Tohru Marunouchi 869
Comparison of Gene Expression of Extracellular Matrix Molecules in Brain Microvascular Endothelial Cells and Astrocytes	G. Webersinke, H. Bauer, A. Amberger, O. Zach, and H. C. Bauer 877
The Chimeric Gene Linked to Glucocorticoid-Suppressible Hyperaldosteronism Encodes a Fused P450 Protein Possessing Aldosterone Synthase Activity	
Kaoru Miyahara, Takeshi Kawamoto, Yasuhiro Mitsuuchi, Katsumi Toda, Hiroo Imura, Richard D. Gordon, and Yutaka Shizuta	885
Clonal Dental Pulp Cells (RDP4-1, RPC-C2A) Synthesize and Secrete Osteopontin (SPP1, 2ar)	Mika Yokota, Toshihiko Nagata, Hiroshi Ishida, and Yoichi Wakano 892

Hepatic Microsomes from Beer-Fed Rats Contain a Cytochrome P450 Metabolic Intermediate Complex	<i>Daune L. Crankshaw and Nadia D. Hines</i>	899
The Carboxy Terminal 110 Amino Acid Portion of the Insulin Receptor Is Important for Insulin Signalling to Pyruvate Dehydrogenase	<i>W. Kirby Gottschalk, Reiner Lammers, and Axel Ullrich</i>	906
Discordant Estimates of Heterologous Promoter Activity as Determined by Reporter Gene mRNA Levels and Enzyme Activity	<i>Dora M. Kovacs and Barry B. Kaplan</i>	912
Apparent Noncompetitive Antagonism of Muscarinic Receptor-Mediated Ca^{2+} Mobilization by Some Muscarinic Antagonists	<i>Jyrki Kukkonen and Karl E. O. Åkerman</i>	919
Expression and Regulation of Cytosolic Phosphoenolpyruvate Carboxykinase in 3T3-L1 Adipocytes	<i>Elmus G. Beale and Edward J. Tishler</i>	925
Vanadate and Insulin Stimulate Gene 33 Expression	<i>Ruth S. Weinstock and Joseph L. Messina</i>	931
The Parathyroid Hormone-Related Protein (PTHrP) Gene Preferentially Utilizes a GC-Rich Promoter and the PTHrP 1-139 Coding Pathway in Normal Human Amnion	<i>David W. Brandt, M. Elizabeth Bruns, David E. Bruns, J. E. Ferguson II, D. W. Burton, and Leonard J. Deftos</i>	938
Recombinant Rabbit Muscle Casein Kinase I α Is Inhibited by Heparin and Activated by Polylysine	<i>Lanmin Zhai, Paul R. Graves, Kenton L. Longenecker, Anna A. DePaoli-Roach, and Peter J. Roach</i>	944
Nonphorbol Tumor Promoters Okadaic Acid and Calyculin-A Induce Membrane Translocation of Protein Kinase C	<i>Rayudu Gopalakrishna, Zhen H. Chen, and Usha Gundimeda</i>	950
Molecular Cloning of the Carboxy Terminus of a Canine Tracheobronchial Mucin	<i>V. Shankar, S. Tan, M. S. Gilmore, and G. P. Sachdev</i>	958
Marked Association of a RFLP for the Low Density Lipoprotein Receptor Gene with Obesity in Essential Hypertensives	<i>Robert Y. L. Zee, Lyn R. Griffiths, and Brian J. Morris</i>	965
Characterization of a Rat Insulin-like Growth Factor I Gene Promoter	<i>William L. Lowe, Jr. and Rebecca M. Teasdale</i>	972
Age-Associated Oxygen Damage and Mutations in Mitochondrial DNA in Human Hearts	<i>Mika Hayakawa, Kazuki Hattori, Satoru Sugiyama, and Takayuki Ozawa</i>	979
Irradiation Increases Levels of GM-CSF through RNA Stabilization Which Requires an AU-Rich Region in Cancer Cells	<i>Makoto Akashi, Misao Hachiya, H. Phillip Koeffler, and Gen Suzuki</i>	986
Chemotaxis of Human Blood Monocytes toward Endothelin-1 and the Influence of Calcium Channel Blockers	<i>Tri Hanggono Achmad and Govind S. Rao</i>	994
A Unique Aromatase (P450AROM) mRNA Formed by Alternative Use of Tissue-Specific Exons 1 in Human Skin Fibroblasts	<i>Nobuhiro Harada</i>	1001
Targeting Aequorin to the Endoplasmic Reticulum of Living Cells	<i>Jonathan M. Kendall, Robert L. Dormer, and Anthony K. Campbell</i>	1008
Tetanus Toxin Action: Inhibition of Neurotransmitter Release Linked to Synaptobrevin Proteolysis	<i>Egenhard Link, Lambert Edelmann, Judy H. Chou, Thomas Binz, Shinji Yamasaki, Uli Eisel, Marion Baumert, Thomas C. Südhof, Heiner Niemann, and Reinhard Jahn</i>	1017

Phosphatidylinositol-3-Kinase Is a Non-tyrosine Phosphorylated Member of the Insulin Receptor Signalling Complex	<i>Chin K. Sung and Ira D. Goldfine</i>	1024
Post-transcriptional Regulation of Insulin-like Growth Factor Binding Protein-2 mRNA in Diabetic Rat Liver	<i>Guck T. Ooi, Lucy Y-H. Tseng, and Matthew M. Rechler</i>	1031
Bilayers Containing Calcium Ionophore A23187 Form Channels	<i>S. V. Balasubramanian, S. K. Sikdar, and K. R. K. Easwaran</i>	1038
Induction of Leukotriene C ₄ Synthase Activity in Differentiating Human Erythroleukemia Cells	<i>Mats Söderström, Anders Bolling, and Sven Hammarström</i>	1043
The Proto-Oncogenes <i>c-fos</i> and <i>c-jun</i> Modulate Thyroid Hormone Inhibition of Human Thyrotropin β Subunit Gene Expression in Opposite Directions	<i>Donald L. Bodenner, John H. McClaskey, Myung K. Kim, A. James Mixson, and Bruce D. Weintraub</i>	1050
The Importance of Arginine 102 for the Substrate Specificity of <i>Escherichia coli</i> Malate Dehydrogenase	<i>David J. Nicholls, Julie Miller, Michael D. Scawen, Anthony R. Clarke, J. John Holbrook, Tony Atkinson, and Christopher R. Goward</i>	1057
A Mutation Generating a Stop Codon in the α -L-Fucosidase Gene of a Fucosidosis Patient	<i>Meiheng Yang, Howard Allen, and Richard A. DiCioccio</i>	1063
Lengths of Truncated Forms of Apolipoprotein B (APOB) Determine Their Intestinal Production	<i>Elaine S. Krul, Jingjing Tang, Tish S. Kettler, Ray E. Clouse, and Gustav Schonfeld</i>	1069
Identification of a Novel Tyrosine Kinase Receptor-like Molecule in Neuroblastomas	<i>M. Leia D. Maminta, Korwyn L. Williams, Akira Nakagawara, Kevin T. Enger, Chan Guo, Garrett M. Brodeur, and Thomas F. Deuel</i>	1077
Depression of Catalase Gene Expression in the Liver of Tumor-Bearing Nude Mice	<i>Yumi Yamaguchi, Kenzo Sato, and Hideya Endo</i>	1084
DNA Cleavage by Hydroxyl Radicals Generated in a Vanadyl Ion-Hydrogen Peroxide System	<i>Hiromu Sakurai, Masami Nakai, Takao Miki, Koichiro Tsuchiya, Jitsuya Takada, and Ryokuji Matsushita</i>	1090
The Amyloid β -Protein of Alzheimer's Disease Is Chemotactic for Mononuclear Phagocytes	<i>John B. Davis, Heather F. McMurray, and David Schubert</i>	1096
<i>argJ</i> Mutations Are Highly Inducible by Ethidium Bromide in <i>proB</i> Strains of <i>Streptomyces lividans</i> : Implication of Pathway Interactions	<i>Chun-Fen Chou and Carton W. Chen</i>	1101
Isolation and Amino Acid Sequence of the TRH-Potentiating Peptide from Bovine Hypothalamus	<i>Marc Bulant, Ali Ladram, Jean-Jacques Montagne, Antoine Delfour, and Pierre Nicolas</i>	1110
Combinatorial Crosstalk of Transacting Factors Binding to the L-Type Pyruvate Kinase Promoter Elements Analyzed <i>in Vitro</i>	<i>Nathalie Puzenat, Sophie Vaultont, Axel Kahn, and Michel Raymondjean</i>	1119
Inactivation and Oxidative Modification of Cu, Zn Superoxide Dismutase by Stimulated Neutrophils: The Appearance of New Catalytically Active Structures	<i>Boris P. Sharonov and Irina V. Churilova</i>	1129

Differentiation-Inducing Activity of Retinoic Acid Isomers and Their Oxidized Analogs on Human Promyelocytic Leukemia HL-60 Cells	
<i>Youko Matsushima, Emiko Kawachi, Hideo Tanaka, Hiroyuki Kagechika, Yuichi Hashimoto, and Koichi Shudo</i>	1136
Synthetic Peptide of the Sequence 632-642 on Myosin Subfragment 1 Inhibits Actomyosin ATPase Activity	<i>Pearl Cheung and Emil Reisler</i> 1143
Dissociation of Complexes between 70 kDa Stress Proteins and Presecretory Proteins Is Facilitated by a Cytosolic Factor	<i>William J. Chirico</i> 1150
Regulation of Human Calcitonin Gene Transcription by Cyclic AMP	<i>Andrée de Bustros, Douglas W. Ball, Randolph Peters, Debra Compton, and Barry D. Nelkin</i> 1157
Post-translational Processing of Gastrin in Neoplastic Human Colonic Tissues	<i>Michael Lee Kochman, John DelValle, Chris John Dickinson, and C. Richard Boland</i> 1165
Duck Hepatitis B Virus Polymerase Produced by <i>in Vitro</i> Transcription and Translation Possesses DNA Polymerase and Reverse Transcriptase Activities	<i>Anita Y. M. Howe, John F. Elliott, and David L. J. Tyrrell</i> 1170
Epidermal Growth Factor Enhances Insulin-like Growth Factor Binding Protein-1 Synthesis in Human Hepatoma Cells	<i>Maarit Angervo</i> 1177
Molecular Genetic Analysis of the Catalytic Site of <i>Streptococcus mutans</i> Glucosyltransferases	<i>C. Kato, Y. Nakano, M. Lis, and H. K. Kuramitsu</i> 1184
Anti-viral Activity of Human Recombinant Heparin-Binding Proteins HBNK and MK	<i>Michael Ostrander, Helen Fingar, Andrew Seddon, Peter Böhlen, and Joseph Backer</i> 1189
ET-1 Released Histamine from Guinea Pig Pulmonary but Not Peritoneal Mast Cells	<i>Yoshiyuki Uchida, Hiroki Ninomiya, Tohru Sakamoto, Joanna Y. Lee, Takeo Endo, Akihiro Nomura, Shizuo Hasegawa, and Fusao Hirata</i> 1196
A Comparison of Single Nucleotide Primer Extension with Mismatching PCR-RFLP in Detecting a Point Mutation	<i>Fu-Hai Lin and Ruth Lin</i> 1202
Contraction-Induced Translocation of the Glucose Transporter Glut4 in Isolated Ventricular Cardiomyocytes	<i>Thomas Kolter, Ingo Uphues, Antje Wichelhaus, Hans Reinauer, and Jürgen Eckel</i> 1207
Isolation of a cDNA Clone for β 1-4 Galactosyltransferase from Embryonic Chicken Brain and Comparison to Its Mammalian Homologs	<i>Sujoy Ghosh, Shib Sankar Basu, and Subhash Basu</i> 1215
Cloning and Characterization of a Human cDNA Encoding a Novel Putative Cytoplasmic Protein Tyrosine Phosphatase	<i>Mutsuhiro Takekawa, Fumio Itoh, Yuji Hinoda, Yoshiaki Arimura, Minoru Toyota, Masuo Sekiya, Masaaki Adachi, Kohzoh Imai, and Akira Yachi</i> 1223
The Effect of Active Vitamin D ₃ Analogs and Dexamethasone on the Expression of Osteocalcin Gene in Rat Tibiae <i>in Vivo</i>	<i>Toshihiko Ikeda, Hiroaki Kohno, Takao Yamamuro, Ryuichi Kasai, Shuichi Ohta, Hideo Okumura, Junji Konishi, Haruki Kikuchi, and Chohei Shigeno</i> 1231
Triflavin, an RGD-Containing Antiplatelet Peptide, Binds to GPIIb of ADP-Stimulated Platelets	<i>Joan-Rong Sheu, Che-Ming Teng, and Tur-Fu Huang</i> 1236

- Circular Dichroic Evidence for Regulation of Enzymatic Activity by Nonsubstrate Hydrophobic Ligand on Glutathione S-Transferase P
Jun Nishihira, Teruo Ishibashi, Masaharu Sakai, Shinzo Nishi, Takashi Kumazaki, and Yasumaru Hatanaka 1243

- The Expression of Milligram Amounts of Functional Human 1,25-Dihydroxyvitamin D₃ Receptor in a Bacterial Expression System
Rajiv Kumar, Janet Schaefer, and Eric Wieben 1417

Photoaffinity Labeling of Plasma Membrane Receptors for Aldosterone from Human Mononuclear Leukocytes	<i>Martin Wehling, Christoph Eisen, Janet Aktas, Michael Christ, and Karl Theisen</i>	1424
Fibronectin Receptors Are Functional on Mitotic Chinese Hamster Ovary Cells	<i>Pascal Pomies and Marc R. Block</i>	1429
Human 6-Pyruvoyltetrahydropterin Synthase: cDNA Cloning and Heterologous Expression of the Recombinant Enzyme	<i>Beat Thöny, Walter Leimbacher, Daniel Bürgisser, and Claus W. Heizmann</i>	1437
Cysteine Protects Na,K-ATPase and Isolated Human Lymphocytes from Silver Toxicity	<i>Saber Hussain, Rolf M. Anner, and Beatrice M. Anner</i>	1444
1 β ,25(OH) ₂ -Vitamin D ₃ Is an Antagonist of 1 α ,25(O)(H) ₂ -Vitamin D ₃ -Stimulated Transcaltachia (the Rapid Hormonal Stimulation of Intestinal Calcium Transport)	<i>Anthony W. Norman, Ilka Nemere, K. Raman Muralidharan, and William H. Okamura</i>	1450
Insulin Receptor Tyrosine Kinase Domain Autodephosphorylation	<i>Philip A. Gruppuso, Joan M. Boylan, Barry A. Levine, and Leland Ellis</i>	1457
Identification of Novel Inducible Nuclear Factors That Interact with the Acute Phase Responsive Promoter Element of Rabbit α_1 -Acid Glycoprotein Gene	<i>Bimal K. Ray and Alpna Ray</i>	1464
Differential Expression of Two Forms of Annexin 3 in Human Neutrophils and Monocytes and along Their Differentiation	<i>Véronique Le Cabec, Françoise Russo-Marie, and Isabelle Maridonneau-Parini</i>	1471
Valinomycin Modifies Phosphorescence Quenching in Cytochrome c Oxidase	<i>Peter Butko, Jia He, and Peter Nicholls</i>	1477
Alterations of Protein Degradation and 2-D Protein Pattern in Muscle Cells of MDX and DMD Origin	<i>A. Kämper and H. P. Rodemann</i>	1484
Heme O Biosynthesis in <i>Escherichia coli</i> : The <i>cyoE</i> Gene in the Cytochrome bo Operon Encodes a Protoheme IX Farnesyltransferase	<i>Keitarou Saiki, Tatsushi Mogi, and Yasuhiro Anraku</i>	1491
Acid pH Decreases OmpF and OmpC Channel Size <i>in Vivo</i>	<i>Jill C. Todt and Estelle J. McGroarty</i>	1498
Agonist-Induced Association of the p21 ^{ras} GTPase-Activating Protein with Phosphatidylinositol 3-Kinase	<i>Anita Sjölander and Eduardo G. Lapetina</i>	1503
Molecular Cloning of Crustacean Pigment Dispersing Hormone Precursor	<i>J. M. Klein, D. P. V. de Kleijn, R. Keller, and W. M. Weidemann</i>	1509
Calpain May Produce a Ca ²⁺ -Independent Form of Kinase C in Long-Term Potentiation	<i>Tatsuo Suzuki, Kuniko Okumura-Noji, Akihiko Ogura, Ryo Tanaka, Kyoko Nakamura, and Yoshihisa Kudo</i>	1515
Interleukin-4 Enhances <i>in Vitro</i> Mineralization in Human Osteoblast-like Cells	<i>Kohji Ueno, Teruaki Katayama, Tsumoru Miyamoto, and Yasuko Koshihara</i>	1521
Cloning and Sequence Analysis of a Snake, <i>Atractaspis engaddensi</i> , Gene Encoding Sarafotoxin S6C	<i>Chikahisa Takasaki, Yasuaki Itoh, Haruo Onda, and Masahiko Fujino</i>	1527
Renaturation of the Brain Myelin Proteins by Octyl Glucoside Detergent	<i>Ricardo S. Díaz, Pedro Carmona, Pilar Regueiro, and Jaime Monreal</i>	1534

Vitamin K-Dependent γ -Carboxylation of the 1,25-Dihydroxyvitamin D ₃ Receptor	<i>I. N. Sergeev and A. W. Norman</i>	1543
Physicochemical Modeling of the Role of Free Radicals in Photodynamic Therapy. I. Utilization of Quantum Yield Data of Singlet Oxygen Formation for the Study of the Interaction between Excited Photosensitizer and Stable Free Radicals	<i>Tamás Vidóczy, Saleh Elzemzam, and Dezső Gál</i>	1548
Identification of NGF-Response Element in the Rat Neuropeptide Y Gene and Induction of the Binding Proteins	<i>Hiroshi Higuchi, Koichi Nakano, and Naomasa Miki</i>	1553
A <i>Xenopus</i> Homologue of the Human β -Amyloid Precursor Protein: Developmental Regulation of Its Gene Expression	<i>Haruo Okado and Harumasa Okamoto</i>	1561
Characterization of the Human Islet Amyloid Polypeptide/Amylin Gene Transcripts: Identification of a New Polyadenylation Site	<i>J. W. M. Höppener, C. Oosterwijk, H. J. Visser-Vernooy, C. J. M. Lips, and H. S. Jansz</i>	1569
³¹ P NMR Studies of the ATP/ α -Crystallin Complex: Functional Implications	<i>M. C. Reddy, D. V. Palmisano, B. Groth-Vasselli, and P. N. Farnsworth</i>	1578
5' Sequence of Vesicular Stomatitis Virus N-Gene Confers Selective Translation of mRNA	<i>David T. Berg and Brian W. Grinnell</i>	1585
Rat Hepatocyte Hyaluronan/Glycosaminoglycan Binding Proteins: Evidence for Distinct Divalent Cation-Independent and Divalent Cation-Dependent Activities	<i>Stephen J. Frost, Grete M. Kindberg, Janet A. Oka, and Paul H. Weigel</i>	1591
Analysis of the ACP1 Gene Product: Classification as an FMN Phosphatase	<i>Kimberley R. Fuchs, Laurie L. Shekels, and David A. Bernlohr</i>	1598
Effects of Calyculin A on Amylase Release in Streptolysin O- Permeabilized Acinar Cells	<i>Andreas C. C. Wagner, Claus Schäfer, and John A. Williams</i>	1606
Effect of Eosinophil Peroxidase on β -Adrenergic Receptor Density on Guinea Pig Lung Membrane	<i>Shinji Motojima, Takeshi Fukuda, and Sohei Makino</i>	1613
Tyrosine Kinase Inhibitors Block Calcium Channel Currents in Vascular Smooth Muscle Cells	<i>S. Wijetunge, C. Aalkjaer, M. Schachter, and A. D. Hughes</i>	1620
TSH-Induced Galactose Incorporation at the NH ₂ -Terminus of Thyroglobulin Secreted by FRTL-5 Cells	<i>Bruno Di Jeso and Fabrizio Gentile</i>	1624
Proteolytic Activation of a Single-Chain Precursor of Hepatocyte Growth Factor by Extracellular Serine Protease	<i>Kensaku Mizuno, Toyohiro Takehara, and Toshikazu Nakamura</i>	1631
Regulation of the Expression of Lamins A and C Is Post-transcriptional in P19 Embryonal Carcinoma Cells	<i>Jacqueline Lanoix, Daniel Skup, Jean-François Collard, and Yves Raymond</i>	1639
Isolation and Characterization of cDNAs Encoding the Rat Pituitary Gonadotropin-Releasing Hormone Receptor	<i>Ursula B. Kaiser, Dayao Zhao, Guemalli R. Cardona, and William W. Chin</i>	1645
Lipoprotein Lipase-Mediated Lipolysis of Very Low Density Lipoproteins Increases Monocyte Adhesion to Aortic Endothelial Cells	<i>Uday Saxena, Nita M. Kulkarni, Erika Ferguson, and Roger S. Newton</i>	1653
Surface Activation of Procathepsin L	<i>Robert W. Mason and Steven D. Massey</i>	1659
N-Linked Glycosylation of β -Amyloid Precursor Protein	<i>Peter Pahlsson, Susan H. Shakin-Eshleman, and Steven L. Spitalnik</i>	1667

Transcriptional Inhibition of the Bacteriophage T ₇ Early Promoter Region by Oligonucleotide Triple Helix Formation	<i>Celia Ross, Manoj Samuel, and Steven L. Broitman</i>	1674
Biosynthesis of Sulfated Glycoprotein-N-Glycans Present in Recombinant Human Tissue Plasminogen Activator	<i>Günter Pfeiffer, Karl-Hermann Strube, and Rudolf Geyer</i>	1681
Multirecognition Capability of E-Selectin in a Dynamic Flow System, as Evidenced by Differential Effects of Sialidases and Anti-carbohydrate Antibodies on Selectin- Mediated Cell Adhesion at Low vs High Wall Shear Stress: A Preliminary Note	<i>Naoya Kojima, Kazuko Handa, Walter Newman, and Sen-itiroh Hakomori</i>	1686
Repression of the Viral Latent Promoter BC-R2 in Epstein-Barr Virus-Negative Cell Lines	<i>Bernard Klonjowski, Dermot Walls, Pascale Gilardi-Hebenstreit, and Michel Perricaudet</i>	1695
Phosphorylation-Associated Conformation Shift of Anti-oncogene Phosphoprotein p53 in Concanavalin A-Activated Human T Lymphocytes	<i>John E. McClure, Jonathan A. McClure, and William T. Shearer</i>	1701
α -Lipoic Acid Is a Potent Inhibitor of NF- κ B Activation in Human T Cells	<i>Yuichiro J. Suzuki, Bharat B. Aggarwal, and Lester Packer</i>	1709
Evidence of Tyrosine Hydroxylase mRNA in the Anterior and Neurointermediate Lobes of Female Rat Pituitary	<i>Nathalie Schussler, Marie-Charlotte Bayet, Odile Frain, Françoise Peillon, and Nicole Faucon Biguet</i>	1716
Structural Organization of the Mouse Lactoferrin Gene	<i>Grainne A. Cunningham, Denis R. Headon, and Orla M. Conneely</i>	1725
IFN- γ Induces a Phospholipase D-Dependent Triphasic Activation of Protein Kinase C in Endothelial Cells	<i>Pirkko Mattila and Risto Renkonen</i>	1732
Evidence for the Presence and Location of Annexins in Human Platelets	<i>Christine T. Murphy, Susan H. Peers, Robert A. Forder, Roderick J. Flower, Frank Carey, and John Westwick</i>	1739
A Novel Tyrosine Kinase, <i>hyk</i> , Expressed in Murine Embryonic Stem Cells	<i>Kazutsugu Horita, Takeshi Yagi, Naohiro Kohmura, Yasuhiro Tomooka, Yoji Ikawa, and Shinichi Aizawa</i>	1747
Role of Cysteine Residues in the Extracellular Domain and Exoplasmic Loops of the Transmembrane Domain of the TSH Receptor: Effect of Mutation to Serine on TSH Receptor Activity and Response to Thyroid-Stimulating Autoantibodies	<i>Shinji Kosugi, Toshiaki Ban, Takashi Akamizu, and Leonard D. Kohn</i>	1754

CUMULATIVE SUBJECT INDEX *
FOR VOLUMES 182-189

A

- A23187, *see* Calciomycin
- Abetalipoproteinemia
 normotriglyceridemic, dissociation from apolipoprotein B
 gene in Japanese family, **182**, 99
- Abscisic acid
 induced stomate closure and reversal by umbelliferone,
 regulation by lipid phase alterations in guard cell
 plasmalemma (*Vicia faba*), **186**, 652
- Acetaminophen
 metabolite, covalent binding to 56-kDa selenium-binding
 protein, **182**, 1348
- Acetate
 as reaction product of C-P bond cleavage activity in cell-
 free extracts of *Pseudomonas fluorescens* isolate,
 184, 1022
- Acetone
 effect on oxidase activity of hepatic and pulmonary micro-
 somal cytochrome P450 isozymes (rat), **187**, 1262
- N-Acetyl-N-(acetoxy)-4-chlorobenzenesulfonamide
 role as nitroxyl precursor with potent smooth muscle
 relaxant properties (rabbit), **187**, 1367
- Acetylation
 histones H3 and H4 in immature erythrocytes, relationship
 to methylation (chicken), **185**, 414
- N- and O-, aromatic and heterocyclic amine carcinogens
 by human monomorphic and polymorphic acetyl-
 transferase expressed in COS-1 cells, **185**, 839
- Acetylcholine
 aortic response to, effect of interleukin-1, role of endothe-
 lium (rabbit), **182**, 733
- effects on intracellular Ca²⁺ levels and K⁺ and Cl⁻ efflux
 responses in submandibular cells of neonatal and
 adult rat, **188**, 1161
- induction of vasoconstriction in microcirculation during
 cardiomyopathy, reversal by L-arginine (hamster),
 184, 1372
- inhibition of phosphatidylserine synthesis in glioma C6
 cells (rat), **186**, 1582
- Acetylcholine receptors, *see also* Muscarinic receptors
 nicotinic, cerebral, characterization by anti-S₃ polyclonal
 antibody versus anti-idiotypic monoclonal antibody
 42211 (rat), **182**, 1303
- Acetylcholinesterase
 inhibition by huperzine A, mechanism (human, *Torpedo*
 californica), **184**, 719
- Acetyl-CoA C-acetyltransferase
 peroxisomal, essential His residue in N-terminal prese-
 quence, replacement, resulting conversion of enzyme
 to mitochondrial signal peptide (rat), **186**, 811
- Acetyl-CoA:deacetylcephalosporin C O-acetyltransferase
 cDNA cloning, sequencing, and expression in yeast
 (*Acremonium chrysogenum*), **182**, 995
- cefG gene encoding, cloning and disruption (*Acremonium*
 chrysogenum), **186**, 40
- Acetyltransferase
 monomorphic and polymorphic, expressed in COS-1 cells,
 N- and O-acetylation of aromatic and heterocyclic
 amine carcinogens (human), **185**, 839
- Achromobacter cycloclastes*
 nitrite reductase, reduction of nitrite at type 2 copper cen-
 ters, **187**, 1529
- Achromobacter xylosoxidans*
 catechol 2,3-dioxygenase cloning and characterization,
 187, 609
- α₁Acid glycoprotein
 genomic DNA for, cloning and structural characterization
 (rabbit), **185**, 69
- Acidic seminal fluid protein
 mRNA, characterization by cDNA cloning (bovine),
 183, 232
- Acidification
 lysosomes in pancreatic adenocarcinoma cells, role of cys-
 tic fibrosis transmembrane conductance regulator
 (human), **184**, 300
- Acid lability
 α-glycosidic bonds of poly(ADP-ribose), analysis
 (bovine), **184**, 544
- Acid phosphatase
 18-kDa, classification as FMN phosphatase (CHO cells),
 189, 1598
- prostatic, encoding gene, structure (human), **184**, 1468
- Acinar cells
 parotid, proliferating, altered subcellular distribution of
 p21^{ras}-GTPase-activating protein (rat), **187**, 1172
- secretion, cholecystokinin-induced supramaximal inhibi-
 tion, mediation by protein kinase C (rat), **187**, 498
- streptolysin-O-permeabilized, amylase release, effect of
 calyculin A (rat), **189**, 1606
- Acinetobacter calcoaceticus*
 isocitrate lyase, phosphorylation *in vivo*, **182**, 367
- Acini
 pancreatic, intact and permeabilized, amylase secretion,
 inhibition by mepacrine (rat), **184**, 408
- Aconitase, *see* Aconitate hydratase
- Aconitate hydratase
 and NO production and glucose oxidation rates, in pancreatic
 islets, effects of interleukin-1β (mouse, rat), **182**, 333
- Acquired immune deficiency syndrome

* Boldface numbers indicate appropriate volume; lightface numbers indicate pagination.

Subject Index

- associated Kaposi's sarcoma cells, expression of vascular endothelial growth factor *in vitro* (human), **183**, 1167
- prevention and therapy, implications of similarities between vasoactive intestinal peptide and second conserved region of HIV-1 gp120, **189**, 705
- Acridine
- linked peptide with SPKK motive, selective binding of AT sequences in DNA, **184**, 930
- Acrosome
- spermatid, detection of calreticulin (rat testis), **186**, 668
- Acrosome reaction
- and histone degradation in sperm, egg jelly components responsible for
 - effects of pretreatment with (starfish), **187**, 268
 - identification (starfish), **187**, 274
 - inducing substance ARIS, identification of saccharide structure Xyl 1→3 Gal 1→(SO₃⁻)3,4 Fuc (starfish), **186**, 405
- Actin
- ATP-dependent interaction with myosin in smooth muscle, regulatory effect of myosin light chain kinase (bovine), **184**, 1204
 - chimeric, carrying N-terminal portion of *Tetrahymena* actin, interaction with DNase I, **184**, 1511
 - C-terminus, interaction with caldesmon and myosin subfragment 1 (rabbit), **184**, 239
 - encoding 5C gene, transcript nested within, analysis (*Drosophila melanogaster*), **184**, 400
 - F-
 - binding of myosin subfragment-1, analysis (rabbit), **188**, 94
 - conformational changes induced by calponin (rabbit skeletal muscle), **185**, 481
 - gelating activity of smooth muscle filamin, suppression by inositol phospholipid (chicken), **184**, 1261
 - F- and G-, interaction with myosin subfragment-1 in equilibrium (rabbit muscle), **183**, 970
 - stimulation of neurite outgrowth on telencephalic neurons *in vitro* (chicken embryo), **182**, 39
- Activin
- induction of
 - erythroid differentiation of erythroleukemia cells, enhancement by retinoic acid (mouse), **187**, 347
 - HL-60 cell differentiation, **187**, 79
 - and inhibitor, detection in normal and chronic renal failure sera (human), **183**, 273
 - and retinoic acid, synergistic effect on *c-jun* mRNA levels in P19 embryonal carcinoma cells (mouse), **184**, 1350
 - type EDF, serum levels: extragonadal production (mouse), **188**, 921
- Activin β_A
- mRNA levels, regulation by cAMP in HT1080 cells (human), **182**, 773
- Activin A
- effects on
 - cytosolic free calcium levels in pituitary somatotropes (rat), **185**, 974
 - follicle-stimulating hormone secretion and [Ca²⁺]_i in FSH-secreting pituitary adenoma cells (human), **182**, 1408
 - gene expression in bone marrow stromal cell line, induction by interleukin-1 and tumor necrosis factor (human), **188**, 310
 - induced inositol phosphate production in hepatocytes, blocking by pertussis toxin (rat), **186**, 205
 - and inhibitor, detection in normal and chronic renal failure sera (human), **183**, 273
 - plasma levels, competitive protein binding assay with folistatin (human), **185**, 1148
- Activin receptors
- molecular cloning and characterization (rat), **183**, 672
 - type II
 - gene structure (mouse), **185**, 404
 - molecular cloning and binding properties (human), **184**, 310
- Actomyosin, *see* Myosin ATPase
- Acyl-L-carnitines
- pool in intact erythrocytes, associated fatty acids, transfer to membrane phospholipids (human), **187**, 353
- Adamantanone
- oxidation by *Pseudomonas putida* carrying camphor catabolic plasmid, **186**, 1429
- Addressin
- peripheral lymph node, binding by L-selectin and E-selectin (human), **184**, 1048
- Adenine nucleotides
- content in mitochondrial F₁ ATPase, changes during ATP synthesis in dimethyl sulfoxide (bovine), **182**, 697
- Adenosine
- modulation of cell growth in epidermoid carcinoma cells (human), **187**, 1486
- Adenosine 5'-diphosphate
- stimulated platelets, GPIIIa glycoprotein, binding to snake venom peptide triflavin (human), **189**, 1236
- Adenosine receptors
- A1, human, cloning and functional characterization (CHO cells), **187**, 919
 - A2, molecular cloning (rat brain), **185**, 304
 - A2b, molecular cloning and expression (human brain), **187**, 86
- Adenosylcobalamin
- impaired synthesis in cultured astrocytes after short-term Cbl deprivation (human), **184**, 832
- Adenosylmethionine decarboxylase
- developmental expression (murine brain), **184**, 1114
 - molecular cloning and analysis of mechanisms regulating mRNA translation (mouse), **189**, 424
- Adenoviruses
- E3 region 14.7-kDa protein, inhibition of tumor necrosis factor-α-induced arachidonic acid release (C3HA fibroblasts), **188**, 177
 - major late promoter, transcriptionally active chromatin assembly on, effect of DNA supercoiling, **186**, 963
- Adenovirus type 12
- transformed cells, production of low-molecular-weight growth inhibitory factor (mouse), **187**, 1232
- Adenylate cyclase
- Gly-60, role in ATP binding and catalytic activity (*Escherichia coli*), **182**, 1218
 - inhibition by thrombin, role of tethered-ligand receptor (human platelet), **182**, 1296

- RAS-linked, suppression by α -mating factor receptor, role of RAS2 and G protein α -chain expression (yeast), **184**, 1378
related signal transduction pathway, angiotensin II AT_{1A} receptor coupling with, analysis (rat), **186**, 1094
Adenylylcyclase, *see* Adenylate cyclase
Adhesion
cellular, *see* Cell adhesion
Adipocytes
Ca²⁺-independent/phospholipid-dependent protein kinase C, stimulation by insulin (rat), **183**, 814
insulin-stimulated hexose uptake, role of protein kinase C (rat), **188**, 142
lipid synthesis, effect of insulin incubation (rat), **188**, 807
lipolysis, prostaglandin production, and lipoprotein lipase activity, effects of cytokines (mouse), **186**, 237
permeabilized, glucose transport in, stimulation by guanine nucleotide (rat), **189**, 572
pre-, *see* Preadipocytes
specific retinoic acid response domain, S14 gene transcription-controlling, localization (3T3-L1 fibroblasts), **188**, 470
3T3-L1
expression and regulation of cytosolic phosphoenolpyruvate carboxykinase (GTP) (mouse), **189**, 925
phosphorylation of particulate cGMP-inhibited low K_M cAMP phosphodiesterase, induction by insulin and isoproterenol, **183**, 1070
Adipokinetic hormone
-red pigment-concentrating hormone family, Trp-substituted neuropeptide belonging to, isolation from corpus cardiacum (*Carausius morosus*), **189**, 1303
Adipose tissue
brown, glucose utilization and glucose transporter expression, effect of cold exposure (rat), **185**, 1078
glucose transporter gene expression, differential regulation during hypermetabolic sepsis (rat), **183**, 417
ADP (adenosine 5'-diphosphate)
reactivity of aortic fibroblasts to *in vitro* (rat), **188**, 205
ADP-ribose
detection and turnover in intact erythrocytes (human), **188**, 402
ADP-ribosylation
nitric oxide-induced reaction, NADPH as stimulatory cofactor (human platelets), **182**, 1166
post-translationally modified rho protein, inhibition by amphiphilic agents (porcine brain), **186**, 448
red cell tubulin by avian NAD⁺ ADP-ribosyltransferase (chicken), **184**, 414
small GTP-binding proteins by C3-like exoenzyme of *Bacillus cereus* (human platelets), **183**, 931
Adrenalectomy
effect on pro-opiomelanocortin gene expression in medial basal hypothalamus and pituitary (rat), **186**, 418
Adrenal gland
concomitant expression of endothelin receptor subtype and isopeptide (human), **182**, 1115
Adrenalin, *see* Epinephrine
Adrenergic receptors
and Ca²⁺-channels, analysis in diabetic skeletal muscle (rat), **184**, 353
 α -Adrenergic receptors
 α_{1A} -, α_{1B} -, and α_{1C} subtypes, hepatic, species heterogeneity (guinea pig, rabbit, rat), **186**, 760
 α_2 -C2-, cloning and expression of murine homolog, (human), **186**, 1280
in colorectal cancer cell lines, characterization (human), **185**, 176
 β -Adrenergic receptors
density on lung membrane, effect of eosinophil peroxidase (guinea pig), **189**, 1613
Adrenodoxin
expression in *Escherichia coli* and site-directed mutagenesis of 2Fe-2S cluster ligands (bovine), **188**, 1131
Adriamycin, *see* Doxorubicin
Adsorbents
biospecific, for purification of retinoic acid receptors by affinity chromatography, synthesis (human), **187**, 711
Adult T cell leukemia-derived factor
-human thioredoxin, reactive oxygen-reducing and protein-refolding activities, analysis, **186**, 1220
Aequorin
calcium affinity, reduction by PCR-introduced amino acids (*Aequorea victoria*), **187**, 1091
targeting to endoplasmic reticulum of living COS-7 cells, **189**, 1008
Affinity chromatography
ligand-, utilization of phenethyl ester analog of cholecystokinin binding to solubilized pancreatic CCK receptor, **183**, 396
in retinoic acid receptor purification, biospecific adsorbent for, synthesis (human), **187**, 711
Aflatoxin B₁-8,9-epoxide
conjugation, related activities of two bacterially expressed alpha class glutathione S-transferase isozymes, comparison (mouse, rat), **188**, 597
Age
effect on prostaglandin contents in gastric mucosa (human), **186**, 1443
Agglutinin
Ricinus communis, in affinity purification of phosphoramidon-sensitive endothelin-converting enzyme in aortic endothelial cells (swine), **185**, 611; *erratum*, **187**, 1602
Aggregation
platelets, induction by thrombin receptor agonist peptide, minimal sequence requirement (human), **184**, 790
Aging
associated decrease in fidelity of DNA polymerases and DNA excision repair, effects of caloric restriction (mouse), **182**, 712
associated oxygen damage and mutations in mitochondrial DNA (human heart), **189**, 979
fibroblasts *in vitro*, phorbol ester-induced cytoskeleton reorganization during, analysis (human), **182**, 1423
Ah receptor
cytosolic and nuclear forms in 1c1c7 hepatoma cells, chemical crosslinkage, **182**, 55
hepatic, omeprazole as ligand, evaluation (human), **188**, 820
putative, cDNA cloning and structure (mouse), **184**, 246

Subject Index

- AIDS, *see* Acquired immunodeficiency syndrome
- Alamethicin
effect on phosphatidylcholine small unilamellar vesicle susceptibility to phospholipases A₂, C, and D, **182**, 682
- β -Alanine
modulation of glycine receptor phosphorylation by protein kinase C (rat), **188**, 813
- Albumin
precursor, proteolytic cleavage *in vitro* by truncated soluble form of furin (rat), **189**, 1353
- Alcaligenes* sp.
catechol 2,3-dioxygenase cloning and characterization, **187**, 609
- Alcohol dehydrogenase
ADH3 gene active site for catalytic properties, nucleotide sequence (human), **184**, 1001
class I, tissue-specific expression, role of enhancer-site downstream binding protein enrichment (rat), **188**, 684
secondary alcohol oxidation, effect of amino acid substitution at positions 93 and 94 (human), **183**, 93
- Alcohols
secondary, oxidation by alcohol dehydrogenase, role of amino acids at positions 93 and 94 (human), **183**, 93
- Alcohol sulfotransferase
cloning and sequencing (human liver), **187**, 448
- Aldehyde dehydrogenase-3
cytosolic, encoding gene, negative regulation by CYP1A1 and CYP1A2 proteins (mouse), **187**, 413
- Aldehyde oxidase
subcellular localization in liver (guinea pig), **185**, 54
- Aldehyde reductase
expression in human renal proximal tubule cells, effects of osmotic stress and hyperglycemia, **187**, 201
role of His⁴², His¹⁸⁸, and Lys²⁶³ residues in catalytic action, analysis with site-specific mutagenesis (human), **183**, 327
- Aldehydes
aliphatic, saturated and α , β -unsaturated C₈ to C₁₁, hepatic microsomal oxidation to carboxylic acid (mouse), **188**, 114
- Aldose reductase, *see* Aldehyde reductase
- Aldosterone
binding to plasma membrane receptors from mononuclear leukocytes, photoaffinity labeling study (human), **189**, 1424
congenitally defective biosynthesis, role of point mutations of P-450_{C18} gene in corticosterone methyl oxidase II-deficient patients, **182**, 974; *erratum*, **184**, 1529
secretion, angiotensin II- and K⁺-mediated, role of Ca²⁺-calmodulin system in sustained phase (bovine), **182**, 254
- Aldosterone synthase
related activity, expression by fused P450 protein encoded by chimeric gene linked to glucocorticoid-suppressible hyperaldosteronism (human), **189**, 885
- Alkaline phosphatase
denatured, reactivation with 70S ribosome (*Escherichia coli*), **183**, 774
induction during HL-60 promyelocytic cell differentiation (human), **182**, 487
- placental
localization in clathrin-coated vesicles (human), **183**, 803
role in IgG internalization by HEP2 cells (human), **182**, 624
- Alkaloids
sensitivity of HIV-1 and -2 reverse transcriptase to inhibition by, comparison, **185**, 370
vinca, P-glycoprotein binding site allosterically coupled to 1,4-dihydropyridine-selective site, **188**, 440
- Alkanal monooxygenase
fatty acid enhanced-binding of flavin mononucleotide, measurement by steady-state fluorescence (*Xenorhabdus luminescens*), **188**, 497
- Alkylacylglycerol
mass levels in HIV-infected CEM cells, **187**, 209
- O⁶-Alkylguanine-DNA-alkyltransferase, *see* Methylated-DNA-protein-cysteine S-methyltransferase
- 1-Alkyl-2-methylglycerol
effect on protein kinase C-mediated bone resorption (mouse, rat), **184**, 1317
- Alpha-factor
prepro region, cleavage by modified Kex2 enzyme in endoplasmic reticulum (yeast), **183**, 212
presecretory preproprotein, and 70-kDa stress proteins, dissociation of complexes between, facilitation by cytosolic factor (yeast), **189**, 1150
- Aluminum
induction of functional and morphological changes in cultured neurons of cerebral cortex after long-term application (rat), **189**, 1317
- Alveolar cells
pulmonary
ion transport, effects of insulin and tyrosine kinase inhibitor (fetal rat), **187**, 802
type II, surfactant-producing, synthesis and secretion of anti-inflammatory protein uteroglobin (rabbit), **189**, 662
- Alzheimer's disease
affected brain
amyloid deposits, immunolocalization of complement C4-binding protein, comparison with serum amyloid P distribution, **186**, 461
point mutations in codon 331 of mitochondrial NADH dehydrogenase subunit 2, **182**, 238
amyloid β /A4 protein precursor
cytotoxic fragments, generation by protease inhibitors in cDNA-transfected glioma cells (human), **187**, 1249
overexpression in murine P19 cells, association with neurotoxicity, **182**, 165
secretory processing increase after phosphorylation, **187**, 1285
amyloid β -peptide, synthetic, covalent modification in formic acid solutions, **184**, 686
amyloid β -protein, stimulation of chemotaxis of mononuclear phagocytes (mouse, rat), **189**, 1096
associated with point mutation in mitochondrial ND2 gene, analysis (human brain), **186**, 491
associated tau 2 epitope, Ser $\rightarrow$ Pro mutation effect on secondary structure and phosphorylation effect on antibody recognition (bovine), **188**, 162

Subject Index

- cerebral peptidase activity with specificity for generation of N-terminus of β -amyloid protein from precursor (human), **185**, 746
- fibroblasts from affected patients, proteoglycans in, characterization, **184**, 1293
- paired helical filaments in
phosphorylated immunodominant epitope on, characterization, **187**, 783
relationship to amyloid β protein precursor carboxy-terminus, **185**, 1034
- related point mutation in mitochondrial ND2 gene, detection by single nucleotide primer extension and mispairing PCR-RFLP, comparison (human), **189**, 1202
- relevance of membrane-altering effects of velnacrine and N-methylacridinium: comparison with tacrine (human), **185**, 596
- Amacrine cells
retinal, expression of neurocalcin (bovine), **186**, 1207
- Amelogenin
heterogeneity, contribution of alternative splicing of amelogenin primary RNA (mouse), **188**, 1253
- Amide bonds
cleavage, continuous monitoring by detection of dansylcadaverine leaving group, **186**, 334
- Amidoximes
aromatic, cytochrome P450-catalyzed oxidation, formation of NO, **185**, 452
- Amiloride
analogs, ethylisopropyl-amiloride and phenamil, effect on sodium transport in renal brush border membrane vesicles from hypertensive rats, **183**, 55
cation channel ion sensitivity to, modulation by cytosolic Ca^{2+} in pulmonary epithelium (fetal rat), **187**, 648
- Amine oxidase (copper-containing)
effect of phosphate ion (bovine plasma), **189**, 722
post-heparin plasma levels, increase in streptozotocin diabetes (rat), **186**, 398
purification (human placenta), **187**, 178
- Amines
aromatic and heterocyclic, carcinogenic, N- and O-acetylation by human monomorphic and polymorphic acetyltransferase expressed in COS-1 cells, **185**, 839
- Amino acid composition
amelogenins derived from alternative splicing (mouse), **188**, 1253
phenoloxidase inhibitors (housefly), **184**, 86
- Amino acids
angiotensin II receptor, residues involved in ligand binding, identification by site-directed mutagenesis (COS-7 cells), **187**, 1426
biosynthesis and excretion, effects of mutations in *flrA* regulatory locus (*Escherichia coli*), **183**, 343
- C-terminal
aminoglycoside 3'-phosphotransferase II, biological role, **185**, 925
GLUT1 protein, deletion, effect on transport activity, **184**, 865
deletions in central helix of calmodulin, effect on casein kinase II-catalyzed phosphorylation of calmodulin, **188**, 754
- exchange in exon I of lecithin:cholesterol acyltransferase gene, association with fish eye disease (human), **182**, 583; *erratum*, **184**, 549
- in hemoglobin, modification by nitric oxide (human), **183**, 598
- residues involved in 5-lipoxygenase activity and iron binding, mutagenesis studies (human), **182**, 1482; *erratum*, **184**, 1133
- side chains in P2' position, hydrophobicity, effect on steady-state kinetic constants for papain-catalyzed hydrolysis, **187**, 615
- transport systems, analysis in hepatoma cell line Hep G2 (human), **189**, 472
- Amino acid sequence
A1 adenosine receptor (human), **187**, 919
A¹ and A² transferases, comparison (human), **187**, 366
ABO blood group genes-encoded, in various primates, comparison, **189**, 154
acetyl CoA:deacetylcephalosporin C O-acetyltransferase (*Acremonium chrysogenum*), **182**, 995
acidic fibroblast growth factor genomic clone-encoded (bovine), **184**, 945
acidic phospholipase A₂ from venom (*Agkistrodon halys blomhoffii*), **184**, 137
acidic seminal fluid protein (bovine), **183**, 232
actin2 (bovine), **187**, 1022
activin receptor
rat, **183**, 672
type III (human), **184**, 310
adenosine A2b receptor (human brain), **187**, 86
adenosine A2 receptor (rat brain), **185**, 304
Ah receptor (mouse), **184**, 246
alcohol/hydroxysteroid sulfotransferase (human), **187**, 448
amelogenins derived from alternative splicing (mouse), **188**, 1253
amino-terminal
antifungal protein, 25-kDa (flax seeds), **187**, 480
islet amyloid polypeptide (human, rat), **186**, 1065
phenoloxidase inhibitors (housefly), **184**, 86
prostaglandin endoperoxide synthase (human platelets), **182**, 433
sialidase, 55-kDa (*Bacteroides fragilis*), **189**, 524
amyloid AA-protein N-terminal segment determinant of fibrillogenic property (human, mouse), **182**, 27
amyloid precursor protein
fragment coded by exon 15 (rabbit), **188**, 905
homologous to human β -APP (*Xenopus laevis*), **189**, 1561
angiotensin II receptors, type I
human, **183**, 8, 989
human liver, **183**, 910
mammalian, **186**, 1042
mouse, **185**, 253
subtype 1A (human), **186**, 277
subtype 1A and 1B (rat pituitary), **183**, 1090
subtype 1B (rat kidney), **185**, 204
antifreeze protein, type II (fish liver), **185**, 335
antifungal protein, 22-kDa (maize seeds), **182**, 1
botulin neurotoxin E from *Clostridium botulinum* and *C. butyricum* strains, **183**, 107

Subject Index

- bradykinin B2 receptor (human), **184**, 260; **187**, 1306
brevinin-1 and -2 antimicrobial peptides from skin, isolation and characterization (frog), **189**, 184
Ca²⁺-binding protein S-100P (human), **182**, 1246
 α -2-C2 adrenergic receptor: murine homolog, **186**, 1280
calbindin-D9K (human), **185**, 663
calcineurin B isoforms β 1 and β 2 (mouse), **187**, 537
calcitonin gene-related peptide (sheep), **187**, 1474
calmodulin-binding protein ACAMP-81: identity with MARCKS protein, **182**, 1395
calmodulin-dependent protein phosphatase testis-specific catalytic subunit (human), **188**, 265
calvasculin and calcyclin from platelets (human), **189**, 1310
CAP-50 protein (rabbit), **186**, 1227
CDEI-binding fusion protein (mouse), **189**, 1336
CD4 signal transducing region (murine egg), **182**, 527
CHIP28 water channel cDNA (rat kidney), **188**, 1267
cholecystokinin receptor (human brain and stomach)
cholesterol 7α -hydroxylase (human), **185**, 588
chymotrypsin inhibitors I and II (*Locusta migratoria*), **189**, 790
collagen type VII (human), **183**, 958
CP94 lens fiber cell beaded-filament structural protein (rat), **186**, 190
cross-reacting proteins against antibodies to RNA polymerase sigma subunit region 2.2 peptide (*Escherichia coli*), **184**, 634
C-terminal, pheromotropic neuropeptide structurally related to leucopyrokinin (armyworm larvae), **182**, 534
C-type natriuretic peptide (human THP-1 monocytes), **189**, 697
C-type natriuretic peptide analogs (rat smooth muscle), **183**, 964
Cu/Zn superoxide dismutase (rat), **186**, 936
cyanide hydratase (*Gloeocercospora sorghi*), **187**, 1048
cystathionine γ -lyase (human liver), **189**, 749
cytoplasmic protein-tyrosine phosphatase, PTPG1 (human), **189**, 1223
deltorphin I and dermenkephalin analogs (rat brain), **187**, 1203
developmentally regulated GTP-binding protein DRG (murine brain), **189**, 363
differentiation inhibiting factor for M1 cells (mouse), **182**, 987
dopamine β -hydroxylase (mouse), **189**, 590
Drosophila glutathione S-transferases, comparison with *Escherichia coli* stringent starvation protein, **182**, 355
ECL carcinoid tumor gastrin receptor (mouse), **187**, 1151
eclosion hormone (*Bombyx mori*), **182**, 514
erythropoietin receptor cytoplasmic domain essential for signal transduction (mouse), **186**, 1236
ethylene-forming enzyme (*Pseudomonas syringae* pv. *phaseolicola* PK2), **188**, 826
extracellular signal-regulated kinase 1 and ERK2 (human T cells), **182**, 1416
fau protein: ribosomal protein S30 fused to ubiquitin-like protein (human), **187**, 927
 α -fetoprotein variant (rat), **185**, 648
FK-506- and rapamycin-binding protein (human), **184**, 733; **185**, 298
follicle-stimulating hormone receptor: truncated isoform and extracellular domain (human), **188**, 1077
N-formyl peptide receptor (human granulocytes), **184**, 582
14-3-3 protein (*Xenopus laevis*), **184**, 1456
 α -1,3 fucosyltransferase (human), **187**, 152
 β -1,4-galactosyltransferase (embryonic chicken brain), **189**, 1215
glutamate receptor channel subunit δ 1 (mouse), **183**, 886
glutamate synthetase (*Calothrix* sp. PCC 7601), **189**, 1296
 γ -glutamylcysteine synthetase, deduced from cDNA sequence (human liver), **185**, 29
glutathione synthetase II (*Anaplasma centrale*), **182**, 1040
gonadotropin-releasing hormone I and II (African catfish brain), **187**, 127
gonadotropin-releasing hormone receptor
human pituitary, **189**, 289
rat pituitary, **189**, 1645
G protein β -subunit G β 4 (murine brain), **183**, 350
GTP cyclohydrolase I, hGCH-1, -2, and -3 (human), **187**, 359
heat-stable antigen (murine erythrocytes), **187**, 773
hemoglobin component, major, from *Paramecium caudatum*, **182**, 195
hemoglobin-derived opioid peptide LVV-hemorphin-7 (human), **184**, 1060
heparan sulfate proteoglycan (rat brain), **188**, 395
heparin-binding fibroblast growth factor receptor variants (rat), **183**, 423
hepatitis C virus
NS5 region-encoded sequence (human), **183**, 334
putative envelope protein, hypervariable regions, **189**, 119
high-mobility-group-like Pf16 protein (*Plasmodium falciparum*), **182**, 412
hippocalcin (rat brain), **189**, 511
homeobox *Chox-7* and *Chox-8* proteins (chicken embryo), **182**, 121
2-hydroxy acid dehydrogenases, comparison: NAD⁺-dependent D-lactate dehydrogenase, **184**, 60
3 α -hydroxysteroid dehydrogenase, comparison with chlordecone reductase (human liver), **187**, 760
5-hydroxytryptamine type 1B receptor (human), **184**, 752; **185**, 517
Ig-binding 30-kDa protein (*Pseudomonas maltophilia*), **182**, 1075
indoleamine 2,3-dioxygenase (human), **189**, 530
indolicidin (bovine), **187**, 467
inorganic pyrophosphatases (*Saccharomyces cerevisiae*, *S. pombe*), **186**, 122
inositol hexakisphosphate receptor (rat brain), **187**, 158
insulin-like growth factor binding protein acid-labile subunit (rat liver), **188**, 304
insulin receptor-related receptor (rat), **187**, 934
insulin receptor substrate-1-like gene (human), **183**, 280
intestinal mucin-like protein (human), **183**, 821
isoaspartyl protein carboxyl methyltransferase isozymes (human), **185**, 277
juvenile hormone-binding protein fragments: binding site mapping (*Manduca sexta* larvae), **182**, 466
KC cDNA-encoded, deduced from nucleotide sequence (rat lung), **184**, 922
KDR tyrosine kinase (human), **187**, 1579

- Kunitz-type protease inhibitor domain of protease nexin-2/amyloid β -protein precursor (human), **186**, 1138
- D-lactate dehydrogenase gene (*Lactobacillus bulgaricus*), **185**, 705
- laminin receptor (human), **184**, 1165
- leukocidin F-component from methicillin-resistant *Staphylococcus aureus*, **184**, 640
- leukocyte chemoattractant peptides secreted by periovulatory follicles (sheep), **184**, 848
- leukocyte common antigen-related phosphatase (rat), **188**, 34
- luxG-encoded sequence (*Photobacterium leiognathi*), **186**, 690
- lysosomal sialoglycoprotein hLGP85 from metastatic islet tumor cell line (human), **184**, 604
- N-methyl-D-aspartate receptor, truncated form (rat fore-brain), **185**, 826
- microsomal cytochrome b_5 (rabbit), **185**, 845
- neurocalcin cDNA (bovine brain), **185**, 147
- neurofibromatosis type 1 protein isoform (human), **187**, 984
- neurokinin-3 receptor, deduced from cDNA sequence (human), **184**, 966
- neuron-specific HPC-1 antigen (bovine brain), **187**, 1144
- neuropeptide <Glu-Trp-Leu-Lys-Gly-Arg-Phe-NH₂ (pol-RFamide II) (*Polyorchis penicillatus*), **183**, 375
- neuropeptide TE-6 (*Ascaris suum*), **187**, 1323
- NK-1 receptor (human lung), **180**, 1110; *erratum*, **182**, 1514
- nonreceptor protein-tyrosine-phosphatase from P19 embryonal carcinoma cells (mouse), **184**, 1241
- nontoxic-nonhemagglutinin component of *Clostridium botulinum* type C progenitor toxin, **183**, 1273
- nucleobindin (mouse), **187**, 375
- optomotor-blind and Brachyury proteins, shared homology domain, role in DNA binding (*Drosophila melanogaster*, mouse), **186**, 918
- osteopontin (rabbit), **186**, 911
- pancreatic triglyceride lipase (rabbit), **188**, 964
- pectin lyase (*Pseudomonas marginalis*), **182**, 14
- pheochromocytoma peptides acting on rat platelets (human), **185**, 134
- phospholipase A₂: comparison with other species (human spermatozoa), **182**, 208
- pigment dispersing hormone precursor (crab), **189**, 1509
- plasma membrane calcium pump (human, rat), **183**, 499
- plasminogen-related gene PRG B product (human), **186**, 1108
- platelet-activating factor receptor (human heart), **189**, 617
- platelet-derived endothelial cell growth factor, comparison with *E. coli* thymidine phosphorylase, comparison (human), **184**, 1311
- platelet-derived growth factor A chain isoforms (rabbit aorta), **184**, 811
- PMP-22 of peripheral myelin (human fetal spinal cord), **186**, 827
- POU domain gene *ZFPOU1*-encoded (zebrafish), **187**, 1446
- preproelafin, deduced from elafin gene sequence (human), **185**, 240
- preendothelin-3 (rat), **186**, 588
- prolactin receptor: deduction of double antenna structure (chicken), **188**, 490
- prospero* gene product (*Drosophila melanogaster*), **182**, 1326
- prostatic acid phosphatase (human), **184**, 1468
- protein NHP1 containing HMG-Box (*Babesia bovis*), **184**, 31
- protein-tyrosine phosphatase
LC-PTP (human), **186**, 1607
murine testis, **185**, 818
- PRS3* gene-encoded essential yeast proteasome subunit, comparison to human and rat proteasome C5 subunits, **182**, 452
- 6-pyruvoyltetrahydropterin synthase
human liver, **189**, 1437
salmon liver, **182**, 953
- recoverin, deduced from cDNA (human retina), **187**, 234
- recoverin-like Ca²⁺-binding protein fragment (rat brain), **183**, 245
- ribosomal proteins
L3 (rat), **187**, 58
L8 (rat), **185**, 539
L11 (rat), **185**, 356
S25 (rat), **186**, 1688
- RNase superfamily-related gene product, deduced from cDNA (chicken bone marrow cells), **185**, 231
- saposin (mouse), **184**, 1266
- sarafotoxin S6C (*Atractaspis engaddensis*), **189**, 1527
- schwannoma-derived growth factor (mouse), **185**, 103
- S-modulin: rod photoreceptor Ca²⁺-dependent cGMP phosphodiesterase regulator (frog), **186**, 411
- sodium channels
eel, rat, and squid, **186**, 1158
squid, **186**, 61
 α subunit from adult skeletal muscle (human), **182**, 794
- somatostatin receptor isolated from GH₄C₁ pituitary cells (rat), **184**, 131
- subtilisin J from *Bacillus stearothermophilus*
aprJ gene-encoded, **184**, 277
and other subtilisin-type Ser proteinases, comparison, **188**, 184
- thioltransferase (*Saccharomyces cerevisiae*), **187**, 949
- thrombospondin sequence motif CSVTCG, role in CD36 binding, **182**, 1208
- thromboxane A₂ receptor (mouse), **184**, 1197
- thymosin β_2 (*Xenopus laevis*), **184**, 93
- thyrotropin receptor derived from alternatively spliced form of transcript (human), **188**, 1214
- thyrotropin-releasing hormone-potentiating peptide (bovine hypothalamus), **189**, 1110
- thyrotropin-releasing hormone receptor (rat), **184**, 367
- tracheobronchial mucin clone pCTM-A-encoded (dog), **189**, 958
- transforming growth factor- β c-terminus, alignment: evolutionary grouping, **184**, 590
- transforming growth factor β receptor type III (human, pig), **189**, 356
- transketolase (human brain), **183**, 1159
- trypsin inhibitor (*Acacia confusa*), **184**, 1524
- tyrosine kinase *hyk* (mouse), **189**, 1747
- tyrosine kinase receptor-like molecule NbtK-1 (murine neuroblastoma), **189**, 1077
- urotensin II (*Rana ridibunda*), **188**, 578
- vascular cell adhesion molecule-1 (mouse, rat), **183**, 163

Subject Index

- vascular endothelial cell growth factor from AIDS-associated Kaposi's sarcoma cells (human), **183**, 1167
- visinin-like Ca^{2+} -binding protein of 21-kDa (rat brain), **184**, 1219
- von Willebrand factor, species comparison (human, pig), **182**, 561
- X-linked phosphoglycerate kinase-1 (tamar wallaby), **187**, 26
- 9-Aminoacridine
inhibition of poly(dA-dT) B-Z transition, **185**, 110
- γ -Aminobutyraldehyde dehydrogenase
purification and characterization (bovine brain), **189**, 450
- γ -Aminobutyric acid
binding protein, monoclonal antibody recognizing, preparation and characterization (bovine brain), **182**, 722
- γ -Aminobutyric acid receptors
GABA_B, candidate 80-kDA GABA-binding protein, monoclonal antibody recognizing, preparation and characterization (bovine brain), **182**, 722
- trans*-1-Amino-1,3-cyclopentanedicarboxylic acid receptors
presynaptic, expression in cerebellum (rat), **189**, 1287
- 2'-Amino-2'-deoxyguanosine
identification as cofactor for self-splicing in group I catalytic RNA, **183**, 842
- S-Aminoethylcysteine ketimine
and related sulfur-containing ketimines, reducing properties, **183**, 481
- Aminoglycoside 3'-phosphotransferase II, *see* Kanamycin kinase
- Amino groups
exocyclic, in conserved purines, role in hammerhead ribozyme cleavage, **183**, 605
- δ -Aminolevulinic acid
formation in cyanobacteria, enantioselective role of (*S*)- and (*R*)-diaminovaleric acids, **185**, 60
uptake by *Rhizobium* bacteroids, limitation by peribacteroid membrane in legume nodules, **184**, 1324
- 4-Amino-6-methylhept-2-enoic acid
leucine analog probe for localization of proteolytic control sites in hepatocytes, evaluation **186**, 1327
- 6-Amino-2-*n*-pentylthiobenzothiazole
treated *Saccharomyces cerevisiae*, ergosterol depletion and 4-methyl sterols accumulation in, **189**, 85
- 3-Amino-1,2,4-triazole
inhibition of NO synthase (murine macrophages), **183**, 150
- Ammonium chloride
enhancement of induction of low-density lipoprotein receptors in vascular smooth muscle cells by cAMP-elevating agents (human), **182**, 830
inhibition of intrinsic factor-mediated transcytosis of [^{57}Co]cobalamin across polarized renal epithelial cells (opossum), **182**, 439
- Amnion
parathyroid hormone-related protein gene expression: preferential utilization of GC-rich promoter and PTHrP 1-139 coding pathway (human), **189**, 938
- Amnion cells
intracellular Mg^{2+} , regulation by superoxide (human), **182**, 906
- Amoebae
growth, inhibition by halogenated bisphosphonates (*Dictyostelium discoideum*), **189**, 414
- Amphoterin
adhesive, binding of sulfoglycolipids in nervous system (rat), **182**, 689
- Amplification
c-met gene, analysis in colorectal, esophageal, and gastric carcinomas (human), **189**, 227
- Amylase
release in streptolysin-O-permeabilized acinar cells, effect of calyculin A (rat), **189**, 1606
secretion from intact and permeabilized pancreatic acini, inhibition by mepacrine (rat), **184**, 408
- α -Amylase
pancreatic, histidine residues at active site, functional roles (human), **183**, 286
- Amylin, *see* Islet amyloid polypeptide
- Amyloid, *see also* Serum amyloid
AA-protein, N-terminal segment determinant of fibrillogenesis property (human, mouse), **182**, 27
 β -peptide, synthetic, covalent modification in formic acid solutions, **184**, 686
 β protein
Alzheimer, N-terminus generation from precursor, detection of human brain peptidase with specificity for, **185**, 746
from Alzheimer plaques, role in chemotaxis of mononuclear phagocytes (mouse, rat), **189**, 1096
fragment 25-35, activation of cytoplasmic calcium in neurons (rat), **184**, 1441
toxicity in nerve cells, protective effect of vitamin E (rat), **186**, 944
 β protein precursor
Alzheimer
cytotoxic fragments, generation by protease inhibitors in cDNA-transfected glioma cells (human), **187**, 1249
secretory processing, increase after protein phosphorylation, **187**, 1285
carboxy-terminus, association with Alzheimer paired helical filaments, **185**, 1034
gene β /A4 region, sequence and methylation (rabbit), **188**, 905
Kunitz-type protease inhibitor domain, expression, purification, and characterization (human), **186**, 1138
local similarities to sequence-specific DNA-binding protein (mouse), **189**, 1336
N-linked glycosylation (human), **189**, 1667
overexpression in murine P19 cells, association with neurotoxicity, **182**, 165
proteolytic processing by thrombin (mouse), **185**, 1000
Xenopus homolog: developmental regulation of gene expression (human), **189**, 1561
deposits in Alzheimer brains, immunolocalization of complement C4-binding protein, comparison with serum amyloid P distribution, **186**, 461
fibrils, formation from mutant Asn₁₈₇ gelsolin peptides *in vitro*, **183**, 227

Subject Index

- Amyloidosis**
 familial cardiac, transthyretin point mutation, detection in affected patient, **187**, 460
- Amyloidotic polyneuropathy**
 familial, associated transthyretin mutation, detection in affected Japanese patient, **187**, 397
- Anacystis nidulans**
 and fragments, skew orientation in polymer matrix, **184**, 441
- Analbuminemia**
 affected Nagase rats, and control rats and humans, plasma levels of lipid hydroperoxides and antioxidants, **189**, 518
- Androgen receptors**
 encoding gene, number of CAG repeats in families with X-linked spinal and bulbar muscular atrophy, detection by primer extension method, **182**, 507
- Androst-5-ene-7,17-dione**
 characterization as suicide substrate of human placental aromatase, **186**, 32
- Androsterone-sulfating sulfotransferase**
 and phenol sulfotransferase, differential localization in liver (rat), **183**, 872
- Anemia**
 chronic renal failure-associated, role of erythroid differentiation factor/activin A, (human), **183**, 273
- Anesthesia**
 endothelin-1-induced bronchoconstriction during, effects of indomethacin and ICI 198615 (dog), **183**, 1197
- Angiogenesis**
 synergistic induction in microvascular endothelial cells by vascular endothelial growth factor and basic fibroblast growth factor (bovine), **189**, 824
 tumor, model: role of transforming growth factor- α in tube formation of microvascular endothelial cells induced by esophageal cancer cells (human), **186**, 1471
- Angiogenin**
 and ribonuclease, homologous N-terminal fragments: helix similarity, **182**, 1491
- Angiotensin I-converting enzyme**, *see* Peptidyl-dipeptidase A
- Angiotensin II**
 effects on
 phosphoinositide and calcium signalling responses in smooth muscle cells (human), **188**, 1295
 pituitary tumor cell proliferation *in vitro* (rat), **183**, 27
 growth factor properties, conferral by recombinant rat vascular AT₁ receptor (CHO cells), **187**, 1381
 induction of
 aortic contractions, inhibition by endothelin receptor antagonist BQ-123 (rabbit), **185**, 887
 inositol phosphate production in hepatocytes, effects of pertussis toxin (rat), **186**, 205
 RNA synthesis in aortic vascular smooth muscles cells, blockage by verapamil (rat), **183**, 767
 mediated aldosterone secretion, maintenance, role of Ca²⁺-calmodulin system (bovine), **182**, 254
 mediation of neointima formation after vascular injury (rat), **187**, 1510
 regulation of PDGF-A3 mRNA expression in smooth muscle cells *in vitro* (rabbit), **184**, 811
 stimulated vascular smooth muscle cells, diacylglycerol formation from phosphatidylcholine (rat), **187**, 1460
 stimulation of pp42 and pp44 protein kinases in aortic smooth muscle cells *in vitro* (rat), **188**, 257
- Angiotensin receptors**
 AT₁
 cDNA, PCR amplification: detection of AT_{1B} receptor subtype (rat kidney), **185**, 204
 genomic organization (rat), **183**, 1025
 isoforms, gene cloning, characterization, and expression (mouse), **185**, 253
 nonpeptide radioligand antagonist [¹²⁵I]EXP985, biochemical properties (rat), **188**, 1030
- Angiotensin II receptors
 angiotensin II binding, role in phosphatidylinositol hydrolysis: differential effects of receptor subtypes (rat skin), **186**, 285
- AT₁
 amino acid residues for ligand binding in transfected cells, identification by site-directed mutagenesis (rat), **187**, 1426
 recombinant vascular, conferral of growth factor properties to angiotensin II in CHO cells (rat), **187**, 1381
- AT_{1A}
 coupling with signal transduction pathways, analysis (rat), **186**, 1094
 gene cloning, expression, and characterization, **186**, 277
- AT_{1A} and AT_{1B}
 encoding genes
 differential expression and regulation (rat), **188**, 446
 distinct, isolation (rat), **184**, 1067
 mRNAs
 differential expression in brain (rat), **185**, 688
 differential regulation (rat), **188**, 298
- AT₂, role in inhibition of particulate guanylate cyclase and stimulation of protein-tyrosine-phosphatase activity (rat), **183**, 206
- dermal, changes during wound healing (rat), **187**, 1083
- identification and characterization in murine neuroblastoma Neuro-2A cells, **182**, 388
- mRNA expression regulation, assessment by competitive polymerase chain reaction (rat), **182**, 1094
- type 1
 cDNA cloning (human), **183**, 989, 910
 gene cloning and sequencing (human), **183**, 8
 gene down-regulation in glomerular mesangial cells, distinct pathways (rat), **185**, 142
 gene evolution in various mammals, **186**, 1042
 G-protein coupling domains, analysis by site-directed morphogenesis (rat), **189**, 677
 polyclonal anti-peptide antibody, characterization (rat), **183**, 781
 subtype cDNAs, differential tissue expression and hormonal regulation (rat pituitary), **183**, 1090
- Anilinothalene-8-sulfonic acid
 regulation of placental glutathione S-transferase, analysis by circular dichroism, **189**, 1243
- Anions**, *see* Polyanions
- Annexin**
 calyculin-associated, CAP-50, molecular cloning (rabbit), **186**, 1227

Subject Index

- detection and localization in platelets (human), **189**, 1739
differential recognition of secretory vesicles (bovine lung), **184**, 347
- Annexin I
partial nuclear localization in endothelial cells (bovine, human), **186**, 432
post-translational glycosylation (human squamous carcinoma cells), **188**, 554
- Annexin II
post-translational glycosylation (human squamous carcinoma cells), **188**, 554
- Annexin III
33- and 36-kDa forms, differential expression in neutrophils and monocytes, and along monocytic differentiation (human), **189**, 1471
- Annexin V
association with prolactin in anterior pituitary gland (rat), **186**, 894
- Ansamitocin P-3
and other antimitotic agents, binding selectivity of fungal tubulins, **187**, 722
- Antibodies, *see also* Immunoglobulins, Monoclonal antibodies
autogeneic thyroid-stimulating, TSH receptor response to, effect of mutation of receptor cysteines 494 or 569 (rat), **189**, 1754
to carbohydrate, and sialidases, differential effects on selectin-mediated cell adhesion at low and high wall shear stress, **189**, 1686
to CFTR-derived synthetic peptide, submandibular cell-incorporated, inhibition of β -adrenergic stimulation of mucin secretion (rat), **188**, 1146
to double-stranded antigen DNA cloned from plasma immune complexes of systemic lupus erythematosus patient, generation in mouse, **183**, 797
to epidermal growth factor, effects on compensatory renal hyperplasia and hypertrophy after unilateral nephrectomy (mouse), **187**, 1015
to hepatitis C E2/NS1 protein, detection in patients with type C hepatitis, **189**, 565
to mitochondrial H^+ -ATP synthase subunit d, preparation (rat), **182**, 1130
to MUC1 mucin cytoplasmic domain, in expression analysis: conservation throughout mammals, **185**, 167
to NS1/E2, detection in hepatitis C virus patients, **183**, 925
polyclonal
in analysis of NO synthase tissue distribution (bovine), **183**, 238
antipeptide, to angiotensin II type-1 receptor, characterization (rat), **183**, 781
anti- S_3 , and monoclonal antibody 422F11, cerebral nicotinic receptors isolated by, comparison (rat), **182**, 1303
to dopamine receptor epitope, comparison with monoclonal antibody to D2 receptor (rat), **184**, 661
to inducible nitric oxide synthase purified from liver of rats treated with *Propionibacterium acnes* and lipopolysaccharide, **187**, 1291
to proacrosin and proacrosin-binding protein, testicular protein band immunoreactive with, demonstration (pig), **184**, 760
to RNA polymerase sigma subunit region 2.2 peptide, cross-reacting *Escherichia coli* proteins, identification, **184**, 634
specificity-variant, generation by alteration of carbohydrate in light chain of monoclonal antibodies (human), **189**, 625
to synthetic peptides
in distinguishing catalytic subunits of protein phosphatases 1 and 2A (bovine, rabbit), **185**, 657
representing human thyrotropin receptor TSH binding regions, biological effects (rabbit), **182**, 1369
to transmembrane glycoprotein of ovine progressive pneumonia virus, detection with *env* gene-derived recombinant antigen, **183**, 1040
- Antibody responses
to ovine lentivirus, analysis with viral gene products expressed in bacteria (ovine sera), **188**, 20
- Antiestrogens
triphenylethylenic, antagonistic effect on calmodulin binding to estrogen receptor (rat), **184**, 1432
- Antigen receptors
B-cell, associated protein-tyrosine kinase, identification of phospholipases C- γ 1 and C- γ 2 as substrates (human), **183**, 411
- Antigens
astrocytoma-specific, detected by murine monoclonal antibodies, relationship to c-kit protooncogene product (human), **182**, 474
carcinoembryonic
peptide sequence binding to 80-kDa protein on Kupffer cells, identification (rat), **188**, 671
related genes, 5'-region conserved in, binding of ubiquitous nuclear factors (mouse), **185**, 893
CD4, expression in cultured microglia, down-regulation by immunosuppressants and lipopolysaccharide (mouse), **189**, 869
CD4 and CD8, in multi-receptor complex, mRNA, down-regulation, correlation with up-regulation of lymphokine mRNA: cyclosporin A effect on activated T cells (human), **186**, 603
CD11b, calcium-dependent expression in human neutrophils, **187**, 195
CD14, in priming of neutrophils, role of lipopolysaccharide-serum complex (human), **183**, 1280
CD18, antibodies, inhibition of neutrophil-glomerular endothelial cell adhesion and transcellular leukotriene biosynthesis, **186**, 1307
CD36, thrombospondin binding, role of TSP sequence motif CSVTCG, **182**, 1208
double-stranded DNA, cloned from plasma immune complexes of systemic lupus erythematosus patient, antibody generation in mouse, **183**, 797
Epstein-Barr virus, EBNA-2, phosphorylation, **186**, 1694
HBs
hepatitis B virus immune escape mutant, detection of Gly¹⁴⁵ to Arg substitution (human), **184**, 1152
soluble and secreted fragments, production in yeast, **184**, 50
heat-stable, purification and amino acid sequence (murine erythrocytes), **187**, 773
HPC-1, neuron-specific, homologous to epimorphin, cDNA

- cloning and sequencing (bovine brain), **187**, 1144
- ME491/CD63, genomic structure and promoter activity of 5'-flanking regulatory sequences (human), **185**, 436
- MHC class I
- heavy chain, complement component C1r-mediated cleavage (human), **187**, 832
 - H-2K^b, binding groove, antigenic peptide bound in, mapping of orientation with monoclonal antibody, **186**, 1449
- MHC class II
- binding sites for staphylococcal enterotoxin A, α -helicity, **182**, 1016
 - gene expression, inhibition by anti-sense RNA in transgenic mouse, **186**, 832
- nonspecific cross-reacting, expression of three species comprising 90- to 100-kDa band detectable with SDS-PAGE (human granulocytes), **182**, 501
- proliferating cell nuclear, carrot gene homologs, analysis with PCR, **184**, 576
- recombinant, with apolipoprotein B-100-like sequences, cloning and serological characterization (*Plasmodium vivax*), **184**, 668
- 17-1A, gene promoter, formation of specific complexes with Capan-2 cell nuclear proteins, **186**, 1353
- T, simian virus 40, transformed human diploid fibroblasts, immortalized clones, loss of collagenase gene expression, **189**, 148
- Tn, recognition by monoclonal antibody MLS 128, in analysis of cancer-associated glycoproteins in human tumor cells, **187**, 217
- Toxoplasma gondii*
- excretory/secretory, similarities and variations, **187**, 294
 - ME49 strain, soluble, excretory/secretory, and cystic forms, comparative effects on cell-mediated immune response (mouse), **189**, 640
- Antineoplasticity
- glycerophosphonocholine analog of ET-18-OCH₃-GPC, **187**, 603
- Anti-ovulatory activity
- gonadotropin-releasing hormone analogs with tetrahydroisoquinoline carboxylic acid: theoretical conformation studies (rat), **187**, 1035
- Antioxidants
- and lipid hydroperoxides, plasma levels in hyperlipidemic Nagase albuminemic and control rats and in humans, comparison, **189**, 518
 - metabolism in intact ocular lens, measurement by ¹³C NMR (rabbit), **186**, 931
- Antipain
- generation of cytotoxic fragments from Alzheimer amyloid protein precursor in cDNA-transfected glioma cells (human), **187**, 1249
- Antisera
- to calreticulin, inhibition of sperm motility (mouse), **186**, 984
 - specific for N-terminal region, in establishment of hyper-sensitive radioimmunoassay for islet amyloid polypeptide, **186**, 1065
- Antitumor activity
- camptothecin analog CPT-11 and active metabolite SN-38: cross-sensitivity in pancreatic tumor cell lines (human), **188**, 70
- Aorta
- contractions, angiotensin II-induced, inhibition by endothelin receptor antagonist BQ-123 (rabbit), **185**, 887
 - derived fibroblasts, reactivity to vasoactive agents *in vitro* (rat), **188**, 205
 - endothelium, synthesis and activity of endothelium-derived relaxing factor, effects of N^G-hydroxy-L-arginine and hydroxyguanidine, analysis (rabbit), **189**, 711
 - foam cells, overexpression of apolipoprotein E in absence of hypercholesterolemia (rabbit), **183**, 514
 - intimal hyperplasia, fucoidan as non-anticoagulant inhibitor (rat), **184**, 773
 - isolated, vascular contraction and relaxation, impairment by interleukin-1 (rabbit), **182**, 733
 - photorelaxation in, enhancement by BAY K 8644 or N-nitro-L-arginine (rabbit), **186**, 1522
- API factor
- binding site, and cAMP-responsive element, common anterior pituitary nuclear factors bound to, characterization (pig), **188**, 170
- Apolipoprotein A-I
- interaction with N-terminal fusogenic domains of HIV gp41 and SIV gp32, implications for viral entry, **186**, 95
- Apolipoprotein B
- B-100, related sequences, *Plasmodium vivax* recombinant antigen with, cloning and serological characterization, **184**, 668
 - encoding gene, lack of involvement in normotriglyceridemic abetalipoproteinemia in Japanese family, **182**, 99
 - expression in HepG2 cells, modulation by thyroid hormone (human), **186**, 617
 - genetic polymorphisms, analysis in hepatoma-derived cell lines (human), **183**, 1224
 - mRNA editing
 - in vitro*, modulation by fasting and refeeding with high carbohydrate diet (rat), **183**, 899
 - in liver, dietary and estrogen modulation (mouse), **188**, 135
 - mRNA levels and protein accumulation in hepatocyte culture media, effects of epidermal growth factor (monkey), **186**, 199
 - truncated forms, lengths of, in determination of intestinal ApoB production (human), **189**, 1069
- Apolipoprotein E
- apo E5(Glu₃→Lys) mutant produced by site-directed mutagenesis, low-density lipoprotein receptor binding activity, **187**, 1180
 - overexpression by aortic and splenic foam cells in absence of hypercholesterolemia (rabbit), **183**, 514
- Apomyoglobin
- reconstitution with extended biliverdins (equine heart), **183**, 1209
- Apoptosis
- HL-60 cells, endonuclease activation during, analysis: Ca²⁺ and pH (human), **186**, 782
 - neutrophils, suppression by nerve growth factor (mouse), **186**, 1050
 - thymocytes

Subject Index

- dexamethasone-induced, early gene expression during, analysis (rat), **188**, 1261
- inhibition by zinc (rat), **184**, 1256
- vascular endothelial cells, tumor necrosis factor-induced, role of phospholipase A₂ in associated DNA fragmentation (bovine), **188**, 1312
- Arachidonate 5-lipoxygenase
- gene cloning and nucleotide sequence of promoter (guinea pig), **185**, 489
- histidine-serine mutants, characterization (human), **186**, 1265
- iron binding and activity, amino acid residues involved in, mutagenesis studies (human), **182**, 1482; *erratum*, **184**, 1133
- Arachidonic acid
- derived neutrophil chemoattractant, characterization, **186**, 269
- induced increase in [Ca²⁺]_i in single pancreatic islet beta cells, **184**, 647
- inhibition of stearyl-CoA desaturase gene expression in lymphocytes (mouse), **186**, 531; *erratum*, **187**, 1201
- lipoxygenase metabolites, mediation of cell killing and Mn-superoxide dismutase induction by tumor necrosis factor- α (human, mouse), **188**, 538
- production in pancreatic acinar cells, associated triacylglycerol lipase, stimulation by carbachol (rat), **184**, 626
- tumor necrosis factor- α -induced release, inhibition by adenovirus E3 region 14.7-kDa protein, heat, and sodium arsenite (C3HA fibroblasts), **188**, 177
- Arachidonic acid epoxigenase
- systemic function: structural characterization and quantification of plasma epoxyeicosatrienoates (rat), **182**, 1320
- Arecoline
- series of bioisosteres, steric and electronic requirements for muscarinic receptor-stimulated phosphoinositide turnover in CNS (rat), **187**, 1389
- Arginine
- Arg 102, role in substrate specificity of malate dehydrogenase (*Escherichia coli*), **189**, 1057
- D-glyceraldehyde-3-phosphate dehydrogenase modified at, half-of-the-sites reactivity (rabbit muscle), **187**, 577
- substitution for glycine at
- position 145 of HBs antigen, detection in hepatitis B virus immune escape mutant (human), **184**, 1152
- position 545 of type X collagen, polymorphism responsible for, identification, **187**, 420
- L-Arginine
- formed nitric oxide, reversible inhibition of constitutive nitric oxide synthase (rat cerebellum), **189**, 242
- nitric oxide and citrulline biosynthesis from, role of constitutive NO synthase (rabbit corpus cavernosum), **186**, 308
- nitric-oxide synthase-catalyzed conversion into equimolar quantities of NO and citrulline (rat cerebellum), **185**, 960
- reversal of acetylcholine-induced vasoconstriction in microcirculation during cardiomyopathy (hamster), **184**, 1372
- Aromatase
- characterization of androst-5-ene-7,17-dione as suicide substrate (human placenta), **186**, 32
- cytochrome P450AROM, mRNA, formation by alternative use of tissue-specific exons 1 in skin fibroblasts (human), **189**, 1001
- Aromatic L-amino acid decarboxylase
- gene mapping to 11A band of murine genome, **186**, 926
- holoenzyme content in brain and liver tissues, evaluation (rat), **186**, 1242; *erratum*, **189**, 1252
- stereoselective action in tandem with dopamine β -monooxygenase, in activation of adrenergic pro-drug, **189**, 33
- Aromatic stacking
- and hydrogen bonding, role in molecular recognition: spectroscopic study of guanine base interaction with cytosine and tryptophan molecules, **183**, 577
- Arrhythmia
- related effects, induction in Purkinje fibers by oxidized low-density lipoproteins (rabbit), **182**, 548
- Arteries
- aortic and pulmonary
- endothelin binding and functional activity, role of endothelin secondary structure (rabbit, rat), **183**, 572
- endothelin receptor subtypes, discrimination with endothelin and structurally related analogs (rabbit, rat), **183**, 566
- isolated rings, NO synthesis, induction by N^G-monomethyl-L-arginine (rat), **188**, 590
- carotid
- neointimal antiproliferation effect of ramipril after endothelial denudation, mediation by kinins (rat), **182**, 283
- poststenotic dilatation, associated neointimas and media, phenotype of accumulating smooth muscle cells (rabbit), **185**, 459
- coronary
- endothelium-dependent pertussis toxin-sensitive relaxation in, induction by guanosine 5'-O-(3-thiotriphosphate) (pig), **189**, 324
- phospholipase C activation by agonist U46619, effect of cromakalim-induced hyperpolarization (pig), **187**, 1517
- iliac, response to noradrenergic nerve stimulation, effects of NO from endothelium and smooth muscle (rat), **186**, 150
- mesenteric, peripheral sympathetic nerve endings, norepinephrine overflow, inhibition by insulin (rat), **188**, 330
- middle cerebral, occlusion, subsequent p53 expression in brain (rat), **182**, 1201
- occlusion, subsequent collateral circulation development, enhancement by basic fibroblast growth factor (rat), **185**, 510
- pulmonary, photorelaxation in, enhancement by BAY K 8644 or N-nitro-L-arginine (rabbit), **186**, 1522
- vasodilation and vasoconstriction, mediation *in vivo* by endothelin ET_b receptor (rat), **186**, 867
- vasoreactivity, effects of bufalin and pregnanes (human), **186**, 1
- Arthritis
- collagen-induced, heterotopic bone formation in mouse with, induction by bone morphogenetic protein,

- 186, 1362**
- Arylamidoxime**
cytochrome P450-catalyzed oxidation, formation of NO, **185, 452**
- Aryl sulfotransferase**
and androsterone-sulfating sulfotransferase, differential localization in liver (rat), **183, 872**
- Ascaris suum**
TE-6, primary structure, **187, 1323**
- Asialoglycoprotein**
distribution on Hep G2 cells, effect of brefeldin A (human), **185, 719**
- Asialoglycoprotein receptors**
mediated formation of multilayer aggregates of primary cultured adult hepatocytes on lactose-substituted polystyrene (rat), **184, 225**
- L-Asparaginase**
chemical modification with comb-shaped copolymers of polyethylene glycol derivatives and maleic anhydride (*Escherichia coli*), **184, 144**
- Asparagine**
at position 467 of β -amyloid precursor protein, identification as N-linked glycosylation site (human), **189, 1667**
- Aspartate-tRNA ligase**
complexed with tRNA^{Asp}, footprinting analysis (yeast), **186, 956**
- Aspartic acid**
in deltorphin I and dermenkephalin, effect on targeting to δ -opioid receptor (rat brain), **187, 1203**
- Aspartyl-asparaginyl β -hydroxylase**
invertebrate, α -ketoglutarate-dependent, identification and characterization (fruit fly, moth), **189, 233**
- Aspartyl group**
related proteolytic activities in pituitary secretory vesicles, characterization (bovine), **183, 449**
- Aspartyl-tRNA synthetase**, *see* Aspartate-tRNA ligase
- Aspergillus niger**
purification of cyclophilin: resistance of cyclophilin/cyclosporin A complexes to proteolysis, **187, 791**
- Astrocytes**
cerebral, effects of endothelin-1: role of ET_B receptor expression (rat), **186, 355**
and cerebral microvascular endothelial cells, extracellular matrix molecule gene expression, comparison (mouse), **189, 877**
impaired cobalamin coenzyme synthesis in culture after short-term Cbl deprivation (human), **184, 832**
and neurons, stimulation of NO-dependent cGMP formation in culture, mediation by different receptors (rat), **182, 1362**
phosphoinositide hydrolysis *in vitro*, regulation by sphingosine and psychosine (rat), **186, 790**
- ATP (adenosine 5'-triphosphate)**
and analog FSBA, binding and hydrolysis by histone H1, **182, 309**
binding to adenyl cyclase, role of Gly-60 enzyme (*Escherichia coli*), **182, 1218**
 $-\alpha$ -crystallin complex, ³¹P NMR analysis: functional implications (bovine), **189, 1578**
extracellular, effects on Na⁺/K⁺ pump, intracellular pH, and uridine uptake in cell cultures (human, mouse), **182, 836**
and extra-ribosomal proteins, differential requirement for ribosome inactivation by RNA N-glycosidases, **182, 579**
-GTP binding site, absence in prolactin receptor (rat), **183, 610**
increased ³¹P NMR signal in human ovarian carcinoma and rat lymphoma cells after treatment with cisplatin, **183, 114**
induced Ca²⁺ influx, regulation by pertussis toxin-sensitive mechanism in PC12 cell clone (rat), **188, 1184**
and nonhydrolyzable analogs, effect on chloride channels in hepatic lysosomal membranes (rat), **187, 254**
reactivity of aortic fibroblasts to *in vitro* (rat), **188, 205**
regulated K⁺ channels from membranes of insulin-secreting HIT T15 β -cells, incorporation into planar lipid bilayers, **186, 1037**
synthesis in dimethyl sulfoxide, effect on adenine nucleotide content of mitochondrial F₁ ATPase (bovine heart), **182, 697**
- ATPase**
Ca²⁺-
fast-twitch skeletal muscle isoform SERCA1a, localization to sarcoplasmic reticulum and nuclear envelope of myotubes (chicken), **186, 219**
plasma membrane
detection of fourth isoform (rat kidney), **184, 387**
expression in placenta and small intestine (human), **183, 499**
F₁, mitochondrial, adenine nucleotide content, changes during ATP synthesis in dimethyl sulfoxide (bovine heart), **182, 697**
F₁F₀-, organotin-flavone complexes as fluorescent probes for, analysis (rat), **188, 365**
- H⁺-**
plasmalemma, and electron transport-coupled proton pumping, effect of D₂O (maize), **182, 870**
subunit C, vacuolar, encoding gene, overexpression in multidrug-resistant HL60 cells (human), **182, 675**
vacuolar, 16-kDa proteolipid subunit, associated genes, cloning and sequencing (human), **183, 856**
vacuolar membrane, catalytic subunit VMA1 processing by protein splicing, inhibition by junction site mutations (yeast), **188, 40**
- H⁺, K⁺-, β subunit, and *Torpedo californica* Na⁺, K⁺-ATPase α subunit, assembly as hybrid in microsomal membrane of *Xenopus* oocytes (rabbit), **182, 659****
- Mg-, actin-activated, inhibition by calponin, mechanism (rabbit), **187, 867****
- Na⁺, K⁺-**
activity and α and β subunit mRNA expression, regulation in myometrium during pregnancy (rat), **188, 1191**
inhibitor from bovine posterior pituitary, purification, structure, and cardiovascular effect in rat, **189, 691**
in renal epithelial and mesangial cells, stimulation by hepatocyte growth factor (rat), **182, 960**
silver toxicity, protective effect of cysteine (sheep), **189, 1444**
stimulation in cell cultures by extracellular ATP (human,

Subject Index

- mouse), **182**, 836
 α subunit, and rabbit H^+,K^+ -ATPase β subunit, assembly as hybrid in microsomal membrane of *Xenopus* oocytes (*Torpedo californica*), **182**, 659
 ATP-citrate lyase, *see* ATP citrate (*pro-S*)-lyase
 ATP citrate (*pro-S*)-lyase
 regulation at transcriptional and post-transcriptional levels (rat liver), **189**, 264
 ATP synthase
 H^+ , subunit d, structural analysis by cDNA cloning and preparation of specific antibodies (rat mitochondria), **182**, 1130
 A transferase, *see* Fucosylgalactose α -N-acetylgalactosaminyltransferase
 Atrial natriuretic factor
 clearance by vascular endothelial cells, inhibition by cGMP (bovine), **182**, 420
 effect on
 bending fluctuations of erythrocyte membrane (human), **188**, 1003
 water permeability of endothelial cells (bovine), **185**, 386
 inactivation by metallo-endopeptidase from neuroblastoma NB-OK-1 cells: selective cleavage at Ser¹²³-Phe¹²⁵ bond, **182**, 158
 nonpeptide antagonist HS-142-1, effects on hypervolemia-induced diuresis and natriuresis in anesthetized rat, **182**, 824
 ring-reversed analog, retention of receptor binding and guanylate cyclase stimulation, **185**, 734
 stimulated cGMP production, inhibition by endothelin, role of protein kinase C activation (rat), **182**, 395
 in urine from candoxatril-treated rats, characterization, **182**, 1270
 Atrial natriuretic peptide receptors
 binding by ring-reversed analog of ANP, **185**, 734
 Atriopeptin
 prohormone, processing by nonmyocytic atrial cells (rat), **188**, 644
 Atropine
 noncompetitive antagonism of muscarinic receptor-mediated Ca^{2+} mobilization (human), **189**, 919
 Aurintricarboxylic acid
 monomers, monomer analogs, and polymer fractions, inhibition of HIV-1 integration protein, **185**, 85
 Autophosphorylation
 β -connectin *in vitro* in absence of added Mg^{2+} (chicken breast muscle), **183**, 31
 human insulin receptor tyrosines 1158, 1162, and 1163, order of, analysis in transfected CHO cells, **186**, 244
 Avian sarcoma virus
 LZ10, replication-defective, infection of feather buds, associated production of localized region of β -galactosidase activity (chicken), **186**, 1020
 4-Aza-steroid
 effect on metabolism of 19-norandrogens by Leydig cells (pig), **183**, 1254
 8-Azidoadenosine
 effect on ribonucleotide reductase (murine adenocarcinoma cells), **187**, 432
 3'-Azido-3'-deoxythymidine, *see* Zidovudine
 Azo dyes
 sulfonated, Quinobene, synthesis and identification as potent anti-HIV agent (CEM cells), **187**, 1409
 Azumolene
 inhibition of [³H]PN200-110 binding to skeletal muscle dihydropyridine receptors (pig), **187**, 894
- ## B
- Bacillus licheniformis* endo- β 1,3-1,4-D-glucanase, *see* Lichenase
Bacillus schlegelii
 thermophilic hydrogen-oxidizing, ribulose-1,5-bisphosphate carboxylase, isolation and characterization, **182**, 425
Bacillus subtilis
 expression of subtilisin J gene cloned from *Bacillus stearothermophilus*, **184**, 277
Bacillus thuringiensis
 δ -endotoxin fragment, genomic amplification and expression, **187**, 641
 var. *san diego*, native δ -endotoxin crystals, pH-mediated solubility, **184**, 692
 Bacterial luciferase, *see* Alkanal monooxygenase
 Bacteriochlorophyll
 -lipochlorophyll complexes, photothermal spectroscopic analysis (*Chromatium minutissimum*), **186**, 327
 Bacterio-opsin, *see* Bacteriorhodopsin
 Bacteriophage
 R4, *Streptomyces* temperate, cohesive ends site, delimitation, **186**, 1663
 T7
 early promoter region, transcriptional inhibition by oligonucleotide triple helix formation, **189**, 1674
 promoters, in inducible expression of toxic poliovirus membrane protein 3AB in *Escherichia coli*, comparative studies, **188**, 972
 Bacteriorhodopsin
 in vitro synthesis and integration into microsomal membranes (*Halobacterium salinarum*), **187**, 1480
Bacteroides fragilis
 SBT3182, sialidase from, purification and characterization, **189**, 524
 Baculovirus
 -*Spodoptera frugiperda* cell system
 conversion of human preproendothelin-1 to endothelin-1, **186**, 753
 expression of
 cytochrome P450(SCC) (bovine), **184**, 471
 prostaglandin endoperoxide synthase-1 (sheep), **183**, 975
 rab6p: characterization of processed and unprocessed forms, **182**, 1499
 recombinant myeloperoxidase (human), **187**, 1572
 soluble intercellular adhesion molecule 1 (human), **185**, 1022
 S-ribonucleases (*Petunia inflata*), **187**, 299
 Bafilomycin A1
 effects on osteoclastic bone resorption kinetics and cytoplasmic spreading (rat), **188**, 1097

- Barbiturates**
 suppression of glucose utilization in neuroblastoma cells, role of hexokinase inhibition, **184**, 673
- Barium currents**
 inward, oscillations in *ras*-transformed fibroblasts with bradykinin-evoked cytoplasmic Ca^{2+} oscillations, ion selectivity, **185**, 162
 oscillations in *ras*-transformed fibroblasts, modulation by cyclic AMP and phorbol esters (mouse), **182**, 1240
- Basophils**
 IgE-mediated histamine release, inhibition by myosin light chain kinase inhibitors (human, rat), **183**, 48
- BAY K 8644**
 enhancement of photorelaxation in aorta, pulmonary artery, and corpus cavernosum (rabbit), **186**, 1522
- B cells**
 antigen receptors, associated protein-tyrosine kinase, identification of phospholipases C- γ 1 and C- γ 2 as substrates (human), **183**, 411
 associated tyrosine kinase gene *lyn*, expression in primary neuroblastomas and modulation during neuroblastoma cell line differentiation (human), **186**, 1403
 Epstein-Barr virus-transformed, mitochondria from, isolation and characterization (human), **186**, 16
 fibronectin adhesion, role of Hep II and CS-1 sites of Fn, evaluation with monoclonal antibodies (human), **186**, 135
 pancreatic, cholecystokinin-8-induced $[\text{Ca}^{2+}]_i$ increase, inhibition by galanin (rat), **182**, 858
 proliferating, prothymosin α expression during G1, analysis (mouse), **185**, 953
 resting, tyrosine phosphorylation and proliferation, induction by C3d-derived 16-amino acid synthetic peptide (human), **188**, 833
 transcription factors AP-1 and NF- κ B and tumor necrosis factor α induction by okadaic acid (human), **187**, 51
- B cell stimulatory factor II**, *see* Interleukin-6
- Beer**
 fed rats, derived hepatic microsomes, detection of cytochrome P450 metabolic intermediate complex, **189**, 899
- Benzamide riboside**
 IMP dehydrogenase inhibitor, cytotoxicity to myelogenous leukemia K562 cells (human), **186**, 1600
- Benzoyloxycarbonyl-leucyl-leucyl-leucinal**
 induced neurite outgrowth in PC12H cells, proteins responsible for, isolation and characterization (rat), **187**, 419
- Berenil**
 effect on bleomycin-catalyzed site-specific DNA cleavage, **183**, 292
- Beta cells**
 HIT T15, membrane-associated ATP-regulated K^+ channels, incorporation into planar lipid bilayers, **186**, 1037
 islet amyloid polypeptide: determination of parallelism and dissociation between pancreatic IAPP and insulin content (rat), **182**, 886
 membrane potential oscillations, triggering by high external Ca^{2+} levels during blockade of K(ATP) channels (mouse), **187**, 872
- single, $[\text{Ca}^{2+}]_i$, arachidonic acid-induced increase, **184**, 647
- bFGF**, *see* Fibroblast growth factor, basic
- Bile acid**
 conjugated, uptake by *Xenopus* oocytes induced by microinjection of ileal Poly A⁺ mRNA (guinea pig, rabbit), **186**, 1455
- Bile salts**
 concentrations, in studies of lipolysis in water-oil emulsions, quantitative analysis, **186**, 746
- Biliverdins**
 conformation, relationship to basicity and enzymatic reduction, **188**, 48
 extended, in reconstitution of apomyoglobin (equine heart), **183**, 1209
- Binding assay**
 competitive protein, with follistatin, for activin A/EDF in plasma (human), **185**, 1148
 [³H]mepyrmine, with quinine, for separate assay of histamine H₁ receptor and mepyrmine binding protein (bovine brain), **189**, 378
- Biphenyls**
 degrading bacteria, catechol 2,3-dioxygenase cloning and characterization, **187**, 609
 9-(*c*-4,*t*-5-Bishydroxymethylcyclopent-2-en-*r*-1-yl)-9*H*-adenine
 resolution and selective inhibition of human immunodeficiency virus type 1 by (–) enantiomer (human MT-4 cells), **184**, 154
- Bisphosphonates**
 halogenated, metabolism by *Dictyostelium discoideum*, **189**, 414
- Bis-pyridinium oximes**
 bridges, binding to DNA, role in mitochondrial dysfunction in yeast, **186**, 1567
- Blastocyst**
 oocyte development into, associated expression and function of glucose transporter GLUT1 (mouse), **188**, 8
- Bleomycin**
 catalyzed site-specific DNA cleavage, enhancement and alteration by distamycin A and minor groove binders, **183**, 292
 treated rats, derived alveolar macrophages, nitric oxide hemoglobin formation in erythrocytes cocultured with, **182**, 151
- Blood**, *see also* Plasma, Serum
 coagulation, role of transglutaminase: detection of N ϵ -(γ -glutamyl) lysine crosslinks (horseshoe crab), **188**, 655
 peripheral, Graves disease, thyrotropin receptor-related peptide-like immunoreactivity in, characterization (human), **186**, 1074
 glucose level, effects of synthetic polysaccharides (mouse), **188**, 16
- Blood groups**
 ABO, encoding genes, identification in various mammals, **189**, 154
- Blood pressure**
 in normal and spontaneously hypertensive rats, effects of SA gene, **188**, 64
 in response to big endothelin-1, effects of cathepsin E inhibitors (conscious rat), **182**, 224

Subject Index

- Bloom's syndrome cells
DNA-damaging agent-treated, alterations in DNA repair gene XRCC1 expression and structure (human), **186**, 900
- BMS-181162
inhibition of phospholipase A₂ and phorbol ester-induced inflammation (human, mouse), **189**, 272
- Bodies
residual, *see* Residual bodies
- Bone, *see also* Calvarial cells
ancient, recovery and identification of DNA fragments (human), **183**, 367
formation, inhibiting cytokines, differential regulation of phospholipase A₂ *in vitro* (rat calvarial cells), **188**, 1047
heterotopic formation, induction by bone morphogenetic protein in mouse with collagen-induced arthritis, **186**, 1362
osteoporotic, femoral head, collagen in, post-translational modification (human), **185**, 801
tibia, *in vivo* expression of osteocalcin gene, effect of active vitamin D₃ analogs and dexamethasone (rat), **189**, 1231
turnover in growing rats, mathematical model for analysis, **185**, 47
- Bone marrow cells
RNase superfamily-related gene highly expressed in, cDNA isolation (chicken), **185**, 231
stomal, activin A expression, induction by interleukin-1 and tumor necrosis factor (human), **188**, 310
- Bone resorption
absence in osteosclerotic mouse, role of defective osteoclast progenitors, **184**, 67
osteoclastic
role of Na⁺/H⁺ antiporter (rat), **188**, 1097
stimulation by hydrogen peroxide (rat), **183**, 1153
role of protein kinase C: effect of 1-alkyl-2-methylglycerol (mouse, rat), **184**, 1317
stimulation by parathyroid hormone, relationship to cAMP-dependent protein kinase activation (mouse), **182**, 1356
- Borrelia burgdorferi*
5S and 23S rRNA genes, detection of tandem repeat, **183**, 952
- BQ-123
in localization of endothelin receptor subtypes in pulmonary tissues (pig), **182**, 144
noncompetitive antagonism of endothelin-1 in SK-N-MC neuroblastoma cells (human), **184**, 504
- Bradykinin
evoked cytoplasmic Ca²⁺ oscillations, *ras*-transformed fibroblasts with, ion selectivity of Ba²⁺ inward current oscillations, **185**, 162
γ-turn peptide mimetics, design, synthesis, and conformational analysis, **187**, 999
reactivity of aortic fibroblasts *in vitro* (rat), **188**, 205
- Bradykinin-B₂ receptors
cDNA, functional expression in pulmonary fibroblasts (hamster), **188**, 786
cloning and pharmacological characterization (human lung fibroblasts), **184**, 260
gene cloning, functional expression, and pharmacological characterization (human), **187**, 1306
- Brain, *see also specific regions*
adenosine receptor
A2b, cDNA cloning and expression (human), **187**, 86
RA2, molecular cloning (rat), **185**, 304
Alzheimer's
amyloid deposits containing serum amyloid P, localization of complement inhibitor C4-binding protein, **186**, 461
analysis for ND2 gene point mutation, **186**, 491
associated paired helical filaments, phosphorylated immunodominant epitope on, characterization, **187**, 783
γ-aminobutyraldehyde dehydrogenase from, purification and characterization (bovine), **189**, 450
angiotensin II receptor subtypes AT_{1A}, and AT_{1B}, differential mRNA expression (rat), **185**, 688
aromatic L-amino acid decarboxylase holoenzyme content, evaluation (rat), **186**, 1242; *erratum*, **189**, 1252
cell nuclei, accumulation of Bp-1 protein prior to postnatal BC-1 RNA increase (mouse), **189**, 53
cerebral cortex
focal ischemia, effects on cortical inositol 1,4,5-trisphosphate 3-kinase and 5-phosphatase (rat), **184**, 871
neurons, aluminum-induced functional and morphological changes after long-term application in culture (rat), **189**, 1317
platelet-activating factor-induced polyphosphoinositide hydrolysis, role of phospholipase C (rat), **183**, 300
cerebrovascular bleeding, cerebrospinal fluid from patients with, isolation of hemoglobin-derived opioid peptide, **184**, 1060
cholecystokinin receptor, molecular cloning: structure, functional expression, and chromosomal localization (human), **189**, 296
cytosolic phospholipase A₂, developmental changes (rat), **185**, 350
developmental expression of S-adenosylmethionine decarboxylases and ornithine decarboxylase (mouse), **184**, 1114
developmentally regulated GTP-binding protein *DRG*, characterization (mouse), **189**, 363
dihydropyridine and ω-conotoxin binding sites in adult, biochemical characterization (chicken), **182**, 947
energy metabolism intermediates, effects of congenital hyperammonemia (sparse-fur mouse), **184**, 746
expression of
murine and human GLUT3 glucose transporter proteins (rat), **182**, 703
secretin precursor gene (rat), **183**, 390
focal ischemia, subsequent induction of *Krox-20* expression (rat), **188**, 1104
genes with developmentally down-regulated expression, identification (mouse), **185**, 1155
histidine decarboxylase, effects of histamine receptor H₃ ligands thioperamide and (*R*)-α-methylhistamine (mouse), **185**, 121
hypoxic-ischemic injury, subsequent CNS neuron rescue, role of insulin-like growth factor 1 (rat), **182**, 593

Subject Index

- identification of two distinct membrane-bound phosphatidylinositol-4-phosphate phosphatases (bovine), **186**, 562
- isolation of two somatostatin-related peptides (frog), **188**, 477
- membranes, purification of GTPase-activating protein for human rap2b (bovine), **189**, 717
- microtubules, crosslinking with synapsin I, cyclic inhibition-potential by protein kinase FA (swine), **184**, 973
- microvascular endothelial cells, cGMP formation, increase by C-type natriuretic peptide (rat), **183**, 640
- mitochondria, associated inositol phospholipid, evidence (rat), **187**, 1077
- neurosecretory cells, expression of eclosion hormone gene (*Bombyx mori*), **182**, 514
- peptidase activity with specificity for generation of N-terminus of Alzheimer β -amyloid protein from precursor (human), **185**, 746
- p53 expression after middle cerebral artery occlusion (rat), **182**, 1201
- purification of two gonadotropin-releasing hormones (African catfish), **187**, 127
- [^{14}C]sialic acid-GM3 and [^3H]-GM1 sphingosine distribution after intravenous injection (rat), **189**, 1410
- Brain-derived neurotrophic factor
- isolation of genomic clone and characterization of 5'-flanking region (human), **182**, 325
- Brain natriuretic peptide
- concentrations and molecular forms in plasma (human), **185**, 760
- Brefeldin A
- differential effects on endocytic receptor cellular distribution, (human), **185**, 719
- effect on chondroitin 4-sulfate synthesis by mastocytoma cells *in vitro* (mouse), **183**, 357
- Brevinin
- forms 1 and 2, from skin, isolation and characterization (frog), **189**, 184
- BRL 38227
- inhibition of ^{125}I - endothelin-1 binding to cardiac membranes (rat), **185**, 630
- Bromoconduritol
- inhibition of glycoprotein processing at early stage of myogenesis (rat), **184**, 125
- Bronchoconstriction
- endothelin-1-induced, in early and late phases, effects of indomethacin and ICI 198615 (dog), **183**, 1197
- Brydiodin
- isolation and toxicity in mouse (*Bryonia dioica*), **183**, 1011
- B transferase
- encoding histo-blood group ABO genes, identification in various mammals, **189**, 154
- Budesonide
- regulation of pulmonary endothelin-1 content (rat), **188**, 1116
- Bufalin
- effect on vasoreactivity of resistance arteries (human), **186**, 1
- Butylated hydroxyanisole
- toxicity, glutathione conjugates of *tert*-butyl hydroquinone as underlying agents, **189**, 309
- Butylated hydroxytoluene
- prevention of cumene hydroperoxide-induced Ca^{2+} release from hepatic mitochondria by inhibition of pyridine nucleotide hydrolysis (rat), **185**, 698
- tert*-Butyl hydroquinone
- glutathione conjugates, as redox cycling and reactive agents in butylated hydroxyanisole toxicity, **189**, 309
- N*-Butyloxycarbonyl-*N*-(benzoyloxy)-4-chlorobenzenesulfonamide
- role as nitroxyl precursor with potent smooth muscle relaxant properties (rabbit), **187**, 1367
- Butyrate
- induced transcription state, memory, mediation by Moloney murine sarcoma virus enhancer-promoter element, **189**, 141
- Butyrylcholine esterase, *see* Cholinesterase
- C**
- Cadmium
- sensitivity of osteoclast Ca^{2+} receptor to activation by, analysis (rat), **187**, 913
- Cadystins
- synthesis, induction by wounds in cell wall and incubation with chitosan (*Schizosaccharomyces pombe*), **188**, 388
- Calbindin-D9K
- cloning and chromosomal assignment (human), **185**, 663
- Calcimycin
- inhibition of phosphatidylserine synthesis in glioma C6 cells (rat), **186**, 1582
- stimulated leukocytes, pretreatment with triacsin C, enhancement of platelet-activating factor production (rat), **188**, 1280
- Calcineurin A, *see* Phosphoprotein phosphatase
- Calcineurin B
- testis-specific subunit isoforms
- $\beta 1$
- identification by monoclonal antibody and detection of specific amino acid sequence (rat), **182**, 34
- post-meiotic expression (rat), **187**, 828
- $\beta 1$ and $\beta 2$, expression and nucleotide sequencing (mouse), **187**, 537
- Calcitonin
- carboxy terminal peptide CCP II, expression in normal thyroid tissue (human), **185**, 330
- gene transcription, regulation by cyclic AMP (human), **189**, 1157
- N-terminal truncation, effect on calcitonin antagonist activity, **187**, 8
- secreting cell line, poly(A) $^{+}$ mRNA, *Xenopus* oocytes injected with, expression of Ca^{2+} receptors (rat), **184**, 1235
- secretion from medullary thyroid carcinoma cells, stimulation by gastrin-releasing peptide (human), **185**, 833
- Calcitonin gene-related peptide
- identification in hypothalamic extract (sheep), **187**, 1474
- inducing cAMP increase in rat platelets, organ distribution and characterization (porcine), **187**, 1587
- secretion by F9 teratocarcinoma cells and role in growth: autocrine stimulation (mouse), **187**, 381

Subject Index

stimulation of intracellular cAMP via protein kinase C-controlled mechanism in ocular ciliary epithelial cells (human), **188**, 662

Calcitriol

stimulated transcaltachia, identification of $1\beta,25$ -dihydroxyvitamin D₃ as antagonist (chicken), **189**, 1450

Calcium

activated potassium channels, detection in chondrocytes (pig), **182**, 1429

aequorin affinity for, reduction by PCR-introduced amino acids, **187**, 1091

ATP-induced influx, regulation by pertussis toxin-sensitive mechanism in PC12 cell clone (rat), **188**, 1184

binding protein, histidine-rich, in skeletal muscle sarcoplasmic reticulum, analysis of low-affinity Ca²⁺ and Zn²⁺ binding sites (rabbit), **186**, 659

binding site in subtilisin J, effect on heat stability, site-directed mutagenesis study (*Bacillus subtilis*), **188**, 184

Ca²⁺/calmodulin antagonists, in regulation of β -galactoside α 2,3 sialyltransferase: O-glycan sialylation in cultured C6 glioma cells (rat), **186**, 1575

-calmodulin complex

role in maintenance of angiotensin II- and potassium-mediated aldosterone secretion (bovine), **182**, 254

sensitive cyclic-nucleotide phosphodiesterase isoform from myometrium, selective activation by 1.15-kDa peptide (human), **184**, 700

cumene hydroperoxide-induced release from hepatic mitochondria, prevention by butylated hydroxytoluene, mechanism (rat), **185**, 698

cytoplasmic

activation by amyloid β -protein fragment 25–35 in neurons (rat), **184**, 1441

bradykinin-evoked oscillations in *ras*-transformed fibroblasts, ion selectivity of Ba²⁺ inward current oscillations, **185**, 162

levels in medullary thyroid carcinoma cells, effect of gastrin-releasing peptide (human), **185**, 833

cytoplasmic free

in isolated hepatocytes, effect of genistein, ψ -tectorigenin, and orobol (rat), **182**, 894

in isolated islet cells, effect of cholecystokinin C-terminal octapeptide (rat), **184**, 878

cytosolic

levels in neutrophils, Fc γ - and complement receptor-mediated elevation (human), **185**, 246

modulation of cation channel ion selectivity and amiloride sensitivity in pulmonary epithelium, β adrenergic effects (fetal rat), **187**, 648

role in endonuclease activation during apoptosis in HL-60 cells (human), **186**, 782

in single pancreatic islet beta cells, arachidonic acid-induced increase, **184**, 647

cytosolic free

effects of gastrin in individual acid-secreting parietal cells (rat), **183**, 1097

in pituitary somatotropes, effect of activin A (rat), **185**, 974

dependent expression of CCR3 α chain epitope CD11b (human neutrophils), **187**, 195

dependent and -independent mechanisms, role in modulation of cationic currents in neutrophils (human), **185**, 531

depolarization-induced release from sarcoplasmic reticulum *in vitro*, characterization with membrane potential probe (rabbit), **184**, 538

and diacylglycerol, role in GnRH inhibition of FSH-induced steroidogenesis in ovarian granulosa cells (rat), **188**, 198

exogenous, erythrocyte membrane fusion in presence of, role of calpain (human, rabbit, rat), **182**, 939

extracellular

high levels, triggering of membrane potential oscillations in β -cells during K(ATP) channel blockade (mouse), **187**, 872

induced elevation of cytosolic free Ca²⁺ levels, effect of osteoclast membrane depolarization and hyperpolarization (rat), **183**, 619

and G proteins, role in platelet-activating factor biosynthesis in cultured mast cells (mouse), **184**, 1425

and histamine, as intracellular mediators of lymphocyte mitogenesis, independent regulation (murine spleen), **182**, 786

induced Ca²⁺ release in rabbit skinned muscle fibers, enhancement by calpain, **185**, 713

influx through dihydropyridine-sensitive channels linked to protein kinase C activation in vascular smooth muscle cells, increase by glucocorticoids (rat), **188**, 934

intestinal transport, $1\alpha,25$ -dihydroxyvitamin D₃-stimulated, identification of $1\beta,25$ -dihydroxyvitamin D₃ as antagonist (chicken), **189**, 1450

intracellular

in aortic smooth muscle cells, relationship to *c-fos* and *c-myc* mRNA induction by platelet-derived growth factor (rat), **188**, 1198

cholecystokinin-8-induced increase in pancreatic B-cells, inhibition by galanin (rat), **182**, 858

in follicle-stimulating hormone-secreting pituitary adenoma cells, effects of activin A and somatostatin (human), **182**, 1408

inhibition of receptor-stimulated guanylyl cyclase (*Dicystostelium discoideum*), **186**, 263

in submandibular cells, effect of acetylcholine in neonatal and adult rats, **188**, 1161

in vascular smooth muscle cells, effect of lysolecithin (rat), **183**, 156

L8, ribosomal, amino acid sequence (rat), **185**, 539

mobilization

muscarinic receptor-mediated, noncompetitive antagonism by muscarinic antagonists (human), **189**, 919

in vascular smooth muscle cells
effect of interaction of S-nitrosothiols and endothelin-1 (rat), **183**, 849

stimulation by endothelin-1 and -3, mechanisms (rat aorta), **183**, 694

permeability, effects of glutamine-to-histidine point mutation in glutamate receptor GluR1 subunit (*Xenopus laevis* oocytes), **182**, 1089

and phosphoinositide, signalling responses in smooth muscle cells, effects of lipoproteins, angiotensin II, and

- platelet-derived growth factor (human), **188**, 1295
pulses, propagation between osteoblastic cells (rat), **186**, 1212
rapid transport in perfused intestine, induction by parathyroid-related peptide (chicken), **186**, 69
release from platelet membranes, inhibition by cAMP-dependent phosphorylation of inositol-1,4,5-trisphosphate receptor (human), **184**, 893
role in
 membrane binding and catalytic activity of macrophage arachidonate-mobilizing phospholipase A² (mouse), **184**, 118; *erratum*, **185**, 1162
 migration of electroporated neutrophils (rabbit), **182**, 864
 mitogenic activation of lymphocytes by periodic acid (human, rat), **183**, 144
 oocyte meiotic maturation (clam), **189**, 79
steady-state rise in eosinophils, leukotriene B₄-induced, relationship to superoxide generation (guinea pig), **187**, 670
thrombin-induced oscillation in human platelets and MEG-01 cells, analysis, **183**, 864
transient low-threshold current in GH₃ pituitary cells, augmentation by GTP-binding protein signal transduction system (rat), **187**, 529
- Calcium channels
 activation by shear-stress in cultured renal distal tubule cells (*Xenopus laevis*), **184**, 198
 and adrenoceptors, analysis in diabetic skeletal muscle (rat), **184**, 353
 associated currents in vascular smooth muscle cells, blockade by tyrosine kinase inhibitors (rabbit), **189**, 1620
 formation in lipid bilayers containing calcium ionophore A23187, **189**, 1038
 gastric mucosal, activation by platelet-derived growth factor (rat), **186**, 1496
L-type
 phosphorylation by cAMP-dependent protein kinase, inhibition by endogenous membrane-bound protein, **186**, 1588
 voltage-dependent, cardiac, expressed in oocytes, cAMP-dependent modulation (*Xenopus laevis*), **182**, 1059
 permeant nonspecific, in hepatic endothelial cells, stimulation by serotonin (rat), **186**, 1560
 related signal transduction pathway, angiotensin II AT_{1A} receptor coupling with, analysis (rat), **186**, 1094
- Calcium pump, *see* ATPase, Ca²⁺-
- Calcium receptors
 expression in oocytes injected with poly(A)⁺ mRNA from rat calcitonin-secreting cell line (*Xenopus laevis*), **184**, 1235
 osteoclast, activation and inactivation
 by Cd²⁺ and Ni²⁺ (rat), **187**, 913
 by La³⁺ (rat), **187**, 907
 parathyroid cell, dissociation from Ga³⁺ inhibition of parathyroid hormone release, **186**, 556
- Calcyclin
 associated annexin protein CAP-50, molecular cloning (rabbit), **186**, 1227
 identification in platelets (human), **189**, 1310
- Caldesmon
 functional effects of 65-kDa caldesmon-binding protein (chicken), **184**, 1212
 and myosin subfragment 1, interaction with C-terminus of actin (rabbit), **184**, 239
 role in sustained contraction of arterial smooth muscle (pig), **187**, 847
- Calmodulin
 binding to estrogen receptors, antagonistic effect of triphenylethylenic antiestrogens (rat), **184**, 1432
 binding by protein hsp90-binding immunophilin FKB59-HBI (rabbit), **187**, 1330
 binding proteins
 Ca²⁺-independent, localization in synaptosomal membrane and properties (rat brain), **183**, 725
 phosphorylating calmodulin-dependent protein kinase, characterization (bovine heart), **186**, 819
 -Ca²⁺ antagonists, regulation of β -galactoside α 2,3 sialyltransferase: O-glycan sialylation in cultured C6 glioma cells (rat), **186**, 1575
 -calcium complex, sensitive cyclic-nucleotide phosphodiesterase isoform from myometrium, selective activation by 1.15-kDa peptide (human), **184**, 700
 -Ca²⁺ system, role in maintenance of angiotensin II- and K⁺-mediated aldosterone secretion (bovine), **182**, 254
 casein kinase II-catalyzed phosphorylation, alteration by amino acid deletions in central helix of calmodulin (porcine brain), **188**, 754
 early induction by glucorticoids in pituitary corticotrope tumor cells and suppression by corticotropin-releasing factor (mouse), **189**, 1382
 regulation of DNA polymerase α activity during proliferative activation of NRK cells (rat), **184**, 1517
 role in catecholamine secretion from digitonin-permeabilized adrenal medullary chromaffin cells (bovine), **186**, 1006
 specific to proteins of dystrophin-glycoprotein complex (rabbit), **185**, 753
- Calpactin, *see* Annexin
- Calpain
 activation, role in erythrocyte membrane fusion in presence of exogenous Ca²⁺ (human, rabbit, rat), **182**, 939
 enhancement of Ca²⁺-induced Ca²⁺ release in rabbit skinned muscle fibers, **185**, 713
 production of Ca²⁺-independent form of kinase C in long-term potentiation (rat hippocampus), **189**, 1515
- Calpain I
 cytoplasmic proenzyme, translocation onto plasma and granule membranes and activation during platelet stimulation with thrombin (human), **185**, 1122
- Calpain activator
 purification and characterization (human platelets), **182**, 461
- Calpastatin
 skeletal muscle, inhibitory efficiency, modulation by phosphorylation (rat), **187**, 751
- Calphostin C
 inhibition of succinate-dependent mitochondrial reduction of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyltetrazolium bromide in 32D cells, mechanism (mouse), **185**, 806
- Calponin

Subject Index

- induction of conformational changes in actin, **185**, 481
- inhibition of actin-activated myosin MgATPase, mechanism (rabbit), **187**, 867
- role in sustained contraction of arterial smooth muscle (pig), **187**, 847
- Calreticulin
 - antisera, inhibition of sperm motility (mouse), **186**, 984
 - detection in acrosome of spermatids (rat testis), **186**, 668
- Calvarial cells
 - bone formation and mineralization, cytokines inhibiting, differential regulation of phospholipase A₂ (rat), **188**, 1047
 - differentiation, role of 5'-methylthioadenosine (rat), **182**, 817
- Calvasculin
 - identification in platelets (human), **189**, 1310
- Calyculin A
 - effects on
 - amylase release in streptolysin-O-permeabilized acinar cells (rat), **189**, 1606
 - α 2,3-sialyltransferase activity and sialoglycoprotein composition in cultured C6 glioma cells (rat), **186**, 1575
 - induction of membrane translocation of protein kinase C in tumor and nontumor cells (human, mouse, rat), **189**, 950
 - and okadaic acid, comparative effects on HL60, HL60/ADR, and K562 cells (human), **187**, 488
- Camphor
 - catabolic plasmid, in microbial oxidation of adamantanone (*Pseudomonas putida*), **186**, 1429
 - and linalool monooxygenase, electron donors, reconstitution of cytochrome P450_{2B4} (rabbit), **187**, 310
- Camptothecin
 - derivative CPT-11, acquired- and native-resistant tumor cells, DNA topoisomerase I gene expression (human), **184**, 618
- Cancer procoagulant
 - Lewis lung cell, purification and properties (mouse), **184**, 819
- Candoxatril
 - treated rats, urine atrial natriuretic peptide from, characterization, **182**, 1270
- Capsaicin receptors
 - antagonist capazepine, inhibition of low pH-evoked activation of airway sensory nerves (guinea pig), **189**, 537
- Capazepine
 - inhibition of low pH-evoked activation of airway sensory nerves (guinea pig), **189**, 537
- Captopril
 - inhibition of angiotensin I-converting enzyme in spontaneously hypertensive hamster, **183**, 1117
- Carbachol
 - effect on forskolin-induced neurite outgrowth in neuroblastoma NB-OK1 cells (human), **182**, 45
 - stimulation of triacylglycerol lipase in pancreatic acinar cells (rat), **184**, 626
- Carbohydrate-deficient glycoprotein syndrome
 - serum transferrin in, structural analysis (human), **189**, 832
- Carbohydrates
 - alteration in light chain of monoclonal antibodies, in generation of specificity-variant antibodies (human), **189**, 625
- antibodies, and sialidases, differential effects on selectin-mediated cell adhesion at low and high wall shear stress, **189**, 1686
- moieties in snake venom glycoproteins, characterization, **182**, 294
- refeeding diet high in, and fasting, modulation of apolipoprotein B mRNA editing activity *in vitro* (rat), **183**, 899
- Carbon
 - phosphorus bond, cleavage activity, detection in cell-free extracts of *Pseudomonas fluorescens* isolate, **184**, 1022
- Carbon monoxide
 - cytochrome P450 LM2(Fe²⁺) complex, high-pressure-induced inactivation (rabbit), **188**, 216
 - hemoglobin, in ESR study of nitric oxide production in lipopolysaccharide-treated rats, **184**, 1119
- Carbon tetrachloride
 - induced increases in hepatic COL1A(I) and glyceraldehyde-3-phosphate dehydrogenase mRNA levels, suppression by prostacyclin (rat), **185**, 981
- Carbonyl-reducing enzyme
 - membrane-associated, localization in hepatic smooth endoplasmic reticulum (mouse), **189**, 736
- Carboplatin
 - intracellular activation in hemoglobin-synthesizing and undifferentiated erythroleukemic cells, comparison (mouse), **182**, 760
- γ -Carboxylation
 - vitamin K-dependent, 1,25-dihydroxyvitamin D₃ receptor (chicken), **189**, 1543
- Carboxylesterase
 - topogenesis: secretion from COS cells of hepatic isoenzyme with -HTEHT-COOH end structure, **183**, 836
- Carboxylic acids
 - hepatic microsomal oxidation of C₈ to C₁₁ aliphatic aldehydes to, analysis (mouse), **188**, 114
- Carboxypeptidase
 - cerebral microsomal, role in removal of COOH-terminal methionine in murine N-ras (rat), **187**, 1336
- Carcinogens
 - aromatic and heterocyclic amines, N₇- and O-acetylation by human monomorphic and polymorphic acetyltransferase expressed in COS-1 cells, **185**, 839
- Cardiomyocytes
 - protein kinase C activity, effect of docosahexaenoic acid supplementation (rat), **183**, 893
 - ventricular, isolated, contraction-induced translocation of glucose transporter Glut4 (rat), **189**, 1207
- Cardiomyopathy
 - fatal, associated mitochondrial tRNA^{Leu} mutation (human), **186**, 47
 - hypertrophic, missense mutation in cardiac β myosin heavy chain gene in affected Japanese patient, **188**, 379
 - microcirculation during, acetylcholine-induced vasoconstriction in, reversal by L-arginine (hamster), **184**, 1372
- Cardiovascular system
 - effects of sodium pump inhibitor purified from bovine posterior pituitary (rat), **189**, 691

Subject Index

- Carnitine
 - effects on respiratory chain enzymes in skeletal muscle of endurance athletes, **188**, 102
- β -Carotene hydroxylase
 - from *E. coli* transformed with different *crt* genes, *in vitro* assays for, **185**, 9
- Carotenogenesis
 - associated membrane-bound enzymes from *Escherichia coli* transformed with different *crt* genes, *in vitro* assays, **185**, 9
- Cartilage
 - growth plate, elemental analysis by synchrotron-radiation-induced X-ray emission (bovine), **188**, 1010
- Casein
 - oxidation of iron, **182**, 1047
- β -Casein
 - N-terminal, 9-amino acid residue deletion near, role of exon skipping, **183**, 750
- Casein kinase I
 - specificity determinants, comparative efficiencies of Ser(P)-, Thr(P)-, and Tyr(P)-residues, **182**, 1460
- Casein kinase I α
 - skeletal muscle, recombinant, inhibition by heparin and activation by polylysine (rabbit), **189**, 944
- Casein kinase II
 - catalyzed phosphorylation of calmodulin, alteration by amino acid deletions in central helix of calmodulin (rabbit reticulocytes), **188**, 754
 - β subunit mutants, properties, **188**, 228
- Casein kinase II α
 - cDNA, genomic loci related to, identification and characterization of pseudogene within genome (mouse), **186**, 723
- Catalase
 - gene expression, depression in liver of tumor-bearing nude mice, **189**, 1084
- Catechol 2,3-dioxygenase
 - from biphenyl/polychlorinated biphenyl-degrading bacteria, cloning and characterization, **187**, 609
 - cloning and characterization (*Achromobacter xylosoxidans*, *Pseudomonas putida*, *Pseudomonas* sp.), **183**, 77
- Catecholamines
 - activation of cardiac myosin heavy chain genes (human), **188**, 547
 - Ca²⁺-dependent release from adrenal chromaffin cells, inhibition by wortmannin (bovine), **185**, 1016
 - muscarinic M₂ receptor-mediated secretion in adrenal medulla, role of dopamine D₁ receptors (cat), **183**, 1019
 - secretion from digitonin-permeabilized adrenal medullary chromaffin cells, role of calmodulin (bovine), **186**, 1006
 - production in epidermis (human), **189**, 72
- Cathepsin D
 - precursor, association with 60-kDa glycopeptide, **182**, 276
- Cathepsin E
 - gene expression, tissue- and cell-specific control (guinea pig), **187**, 1401
 - inhibitors, effects on big endothelin pressor response in conscious rats, **182**, 224
- Cathepsin G
 - and HOCl, additive enhancement of neutrophil collagenase (human), **184**, 560
- Cathepsin L
 - precursor, surface activation, analysis, **189**, 1659
- Cation channels
 - nonspecific 26 pS, Ca²⁺ permeant, stimulation by serotonin in hepatic endothelial cells (rat), **186**, 1560
 - pulmonary epithelium, ion selectivity and amiloride sensitivity and β agonist action, effects of [Ca²⁺]_i (fetal rat), **187**, 648
- Cationic currents
 - whole-cell, modulation in neutrophils, role of Ca²⁺-dependent and -independent mechanisms (human), **185**, 531
- Catroxase
 - with α - and β -fibrinogenase activity, isolation: 24-kDa proteinase (snake venom), **187**, 389
- Cecropin
 - encoding gene, induction in blood cell line mbn-2, analysis as immune response (*Drosophila melanogaster*), **188**, 1169
- Cell adhesion
 - Ca²⁺-independent homotypic and heterotypic activities of biliary glycoprotein expressed on CHO cell surface, analysis (human), **186**, 881
 - lymphocyte-platelet, mediation by P-selectin (human), **186**, 173
 - lymphocytes to fibronectin, role of Hep II and CS-1 sites of Fn, evaluation with monoclonal antibodies (human), **186**, 135
 - modulation by extracellular Arg-Gly-Asp-binding proteins (mouse), **183**, 544
 - platelet, mediating functional domains, primary structure: species comparison (human, pig), **182**, 561
 - promotion of transcellular leukotriene biosynthesis during neutrophil-glomerular endothelial cell interactions, **186**, 1307
 - selectin-mediated, at low and high wall shear stress, differential effects of anti-carbohydrate antibodies and sialidases (HL60 cells), **189**, 1686
- Cell adhesion molecules, *see also specific types*
 - contact site A, sialic acids in, detection (*Dictyostelium discoideum*), **188**, 794
 - ELAM-1, mRNA, expression in endothelial cells, effect of NADPH oxidase inhibition (human umbilical vein), **184**, 1339
 - E-selectin
 - and ICAM-1 and VCAM-1, soluble forms, detection in supernatants of cytokine-activated endothelial cells (human), **187**, 584
 - recombinant, mediation of tumor cell adhesion via sialyl-Lea and sialyl-Lex (human), **182**, 1376
 - ICAM-1, soluble, functional expression by baculovirus-infected *Spodoptera frugiperda* cells (human), **185**, 1022
 - modulation by immunomodulatory protein Ling Zhi-8, facilitation of cellular interaction (human), **186**, 385
 - vascular, VCAM1, cloning (mouse, rat), **183**, 163
- Cell attachment
 - fibronectin- and integrin $\alpha 5/\beta 1$ -mediated, in hepatic

Subject Index

- epithelial cells, effect of Rous sarcoma virus transformation (rat), **189**, 350
- Cell cycle
- associated regulatory domain of thymidine kinase promoter, methylation-sensitive protein-DNA interaction (human), **189**, 480
 - embryonic, regulation by cyclin and maturation-promoting factor: mathematical models for cellular concentrations, **184**, 782
 - endothelial cells, related changes in transglutaminase mRNA levels, analysis (bovine carotid artery), **187**, 14
 - epithelial cells, S phase, role of cyclin A (rat liver), **182**, 1144
 - fibroblasts, protein phosphatase PP1 and PP2A gene expression and activities during, analysis (mouse), **187**, 507
 - G1, in B or T lymphocytes, prothymosin α expression during, analysis (mouse), **185**, 953
 - G2, staurosporine-induced arrest, role of p34^{cdc2} kinase inhibition by staurosporine (mouse), **184**, 81
 - myeloid leukemia cells, phosphorylation of retinoblastoma gene product during, analysis (human), **184**, 212
 - progression, association with distinct patterns of Op18 phosphorylation (human lymphocytes), **185**, 197
 - regulator p50^{weel}, identification as tyrosine kinase (human), **186**, 1333
 - related gene expression
 - in rat thyroid cells, induction by thyrotropic hormone, **183**, 265
 - TSH-induced, uncoupling from TGF β inhibition of rat thyroid cell proliferation, **187**, 225
- Cell death, *see also* Apoptosis
- retinal ganglion cells, association with DNA fragmentation in retina (chicken embryo), **183**, 1056
- Cell density
- and extracellular matrix, effects on *c-myc* expression in normal hepatocytes and hepatoma cells (rat), **184**, 825
- Cell differentiation, *see* Differentiation
- Cell lines, *see also specific cell types*
- BHK-21 (baby hamster kidney)
 - mitogenesis, induction by vascular endothelial growth factor, role of glycosylation, **182**, 1340
 - temperature-sensitive X-linked mutants, complementation by ubiquitin-activating enzyme E1 cDNA, **184**, 1015
 - CHEF-18, thymidine kinase mRNA transcription initiation and temporal expression (Chinese hamster), **184**, 908
 - CHO (Chinese hamster ovary), *see* CHO cells
 - COS (African green monkey kidney)
 - carboxylesterase topogenesis: secretion of hepatic isoenzyme with -HTEHT-COOH end structure, **183**, 836
 - expression of human neurokinin-3 receptor cDNA, **184**, 966
 - COS-1 (African green monkey kidney), human monomorphic and polymorphic acetyltransferases expressed in, *N*- and *O*-acetylation of aromatic and heterocyclic amine carcinogens, **185**, 839
 - Epstein-Barr virus-negative, repression of viral latent promoter BC-R2, **189**, 1695
 - FRTL-5 (rat thyroid), thyroglobulin secreted by, NH₂ terminus, incorporation of TSH-induced galactose, **189**, 1624
- GC, heat stress, triiodothyronine-induced growth hormone production, enhancement by action within 5'-flanking region of growth hormone gene, **188**, 638
- LLC-PK₁ (porcine kidney), V₂ vasopressin receptor internalization: receptor-mediated endocytosis, **186**, 1376
- lymphoid, Namalwa, cytotoxicity of immunoconjugates containing blocked ricin, analysis (human), **183**, 758
- mbn-2, larval hemocyte-derived, induction of cecropin gene as immune response (*Drosophila melanogaster*), **188**, 1169
- MC3T3-E1, osteoblast-related, effects of lysine-rich 18kDa protein from bovine tibia, **186**, 1288
- NRK (normal rat kidney), proliferative activation, DNA polymerase α activity during, regulation by calmodulin, **184**, 1517
- Rat-1, transfected with human acidic fibroblast growth factor, transformed characteristics: role of aFGF as progression factor, **189**, 398
- 37RC (African green monkey kidney), Sendai virus-infected, viral replication and expression of viral proteins, inhibition by glutathione, **188**, 1090
- rMTC 44-2, calcitonin-secreting, poly(A)⁺ mRNA, injected *Xenopus* oocytes, Ca²⁺ receptor expression (rat), **184**, 1235
- Sf (*Spodoptera frugiperda*), baculovirus-infected, functional expression of human soluble intercellular adhesion molecule 1, **185**, 1022
- Sf9 (*Spodoptera frugiperda*), baculovirus-mediated expression of
 - bovine cytochrome P450(SCC), and P450(SCC) transport into mitochondria **184**, 471
 - ovine prostaglandin endoperoxide synthase-1, **183**, 975
 - Petunia inflata* S-ribonucleases, **187**, 299
 - rab6p: characterization of processed and unprocessed forms, **182**, 1499
 - recombinant myeloperoxidase, **187**, 1572
- Sf21 (*Spodoptera frugiperda*), baculovirus-infected, conversion of human preproendothelin-1 to endothelin-1, **186**, 753
- WEHI 231, src-related tyrosine kinase activation by crosslinking of surface immunoglobulins, **187**, 1536
- Cell proliferation
- chondrocytes, effect of phospholipase A₂ (rat), **186**, 1025
 - compensatory, methylation pattern of hepatic DNA during, effect of *N*-methyl-*N*-nitrosourea (rat), **184**, 107
 - epidermoid carcinoma cells, modulation by adenosine (human), **187**, 1486
 - FRTL5 thyroid cells, modulation by endothelin-1 (rat), **184**, 231
 - hematopoietic cells, role of heat shock protein 70 (human), **183**, 733
 - lymphocytes
 - phytohemagglutinin-activated, effect of anchored anti-*HLA* class I monoclonal antibodies (human), **188**, 278
 - transformed CR2-positive, and normal resting B cells, induction by C3d-derived 16-amino acid synthetic peptide (human), **188**, 833
 - MCF-7 cells, growth factor-stimulated, correlation with *c-fos*, *c-jun* and *c-myc* expression (human), **188**, 1067

- N1E-115 neuroblastoma, inhibition by *c-myc* or *N-myc* antisense oligodeoxynucleotides, effects on differentiation and neurite formation (mouse), **185**, 915
- NRK cells, activation, DNA polymerase α activity during, regulation by calmodulin (rat), **184**, 1517
- osteoblastic cells, modulation by vitamin K₂ (human, mouse), **187**, 814
- osteoblast-like cells *in vitro*, stimulation by estrogen and progesterone (human), **186**, 54
- parotid acinar cells, effect on subcellular distribution of p21^{ras}-GTPase-activating protein (rat), **187**, 1172
- serum-free, Balb/3T3 and HeLa cells, stimulation by coenzyme Q, **189**, 8
- T cells
- autocrine regulation, role of thymocyte-secreted luteinizing hormone (human), **187**, 1187
 - cyclosporin-induced inhibition, effects of changes in membrane potential (human), **185**, 363
 - thymocytes, concanavalin A-induced, early gene expression during, analysis (rat), **188**, 1261
 - vascular smooth muscle cells, inhibition by interferon- γ through NO generation (rat), **188**, 409
- Cell wall
- wounding, induction of cadystin synthesis (*Schizosaccharomyces pombe*), **188**, 388
- Central nervous system
- muscarinic receptor-stimulated phosphoinositide turnover, activation by series of arecoline bioisosteres, steric and electronic requirements (rat), **187**, 1389
 - neuron rescue after hypoxic-ischemic injury to brain, role of insulin-like growth factor I (rat), **182**, 593
 - protein kinase C activity during limb regeneration (newt), **184**, 433; *erratum*, **185**, 1163
- Ceramide
- mass levels in HIV-infected CEM cells, **187**, 209
- Cerebellum
- expression of presynaptic *trans*-1-amino-1,3-cyclopentanedicarboxylic acid receptor (rat), **189**, 1287
- Cerebrospinal fluid
- detection of soluble prion protein, implications for prion-related encephalopathy (human), **184**, 1398
 - from patients with cerebrovascular bleeding, isolation of hemoglobin-derived opioid peptide, **184**, 1060
- Ceruloplasmin
- stimulation of NADH oxidation by hepatic plasma membrane (pig), **186**, 951
- CFTR, *see* Cystic fibrosis transmembrane conductance regulator
- Chaperonin
- gene *hsp60* expression in colon adenocarcinoma and multipotent leukemic cells, effect of differentiation (human), **186**, 371
 - HSP 60, human, related processed protein, identification in bovine kidney, **185**, 683
- Cheek pouch
- angiotensin I-converting enzyme activity in spontaneously hypertensive hamster, **183**, 1117
- Chemical shift index analysis
- in peptide/protein analysis: α -CH values revealing dynamic helices and α_L sites, **184**, 1008
- Chemiluminescence
- in direct measurement of nitric oxide in headspace gas produced by macrophages in closed culture system (chicken), **184**, 36
- Chemoattractants
- neutrophil, arachidonic acid-derived, characterization, **186**, 269
 - peptide, for leukocytes, secreted by periovarian follicles, sequence analysis (sheep), **184**, 848
- Chemotaxis
- electroporated neutrophils, effect of calcium and calcium-antagonists (rabbit), **182**, 864
 - leukocyte, related activity of FK506-binding protein, inhibition by FK506 (human), **186**, 1178
 - monocytes to endothelin-1, and effects of calcium channel blockers (human), **189**, 994
 - mononuclear phagocytes, stimulation by amyloid β -protein of Alzheimer's disease plaques (mouse, rat), **189**, 1096
- Chiroinositol
- phospholipids with, identification and characterization (bovine liver), **184**, 1042
- Chitosan
- induction of cadystin synthesis in *Schizosaccharomyces pombe* incubated in, **188**, 388
- Chlordecone reductase
- and 3 α -hydroxysteroid dehydrogenase, comparison (human liver), **187**, 760
- Chloride
- effect on angiotensin I-converting enzyme activity in kidney of spontaneously hypertensive hamster, **183**, 1117
 - efflux in submandibular cells, effect of acetylcholine in neonatal and adult rats, **188**, 1161
 - ionophore-induced transport in erythrocyte suspensions, ¹⁹F, ³¹P, and ³⁵Cl NMR study (human), **184**, 915
- Chloride channels
- blockage by cromolyn and RU 31156 (human, rat), **188**, 957
 - in electric organ, immunological identification (Japanese electric ray), **188**, 1228
 - nucleotide-activated, in hepatic lysosomal membranes, analysis (rat), **187**, 254
- Chloride currents
- regulation by cAMP in CHO cells, **186**, 251
- 2-Chloroacetyl-2-demethylthiocolchicine
- specific covalent interaction with tubulin with preferential labeling of β -subunit, **187**, 1350
- 3-Chloroacetyl-3-demethylthiocolchicine
- specific covalent interaction with tubulin with preferential labeling of β -subunit, **187**, 1350
- Chlorophyll
- protein complexes CP29 and CP47, in photosystem II, direct interaction between, **184**, 1094
- Chloroquine
- enhancement of induction of low-density lipoprotein receptors in vascular smooth muscle cells by cAMP-elevating agents (human), **182**, 830
- Chlorpromazine
- effect on *smg* GDS-stimulated binding of GTP γ S to *smg* p21B, **182**, 1446

Subject Index

CHO cells

- angiotensin II growth factor properties in, conferral by recombinant rat vascular AT₁ receptor, **187**, 1381
 - apolipoprotein E5(Glu₃→Lys) mutant produced by site-directed mutagenesis, low-density lipoprotein binding activity, **187**, 1180
 - chloride currents, regulation by cAMP, **186**, 251
 - CHO-K1, 3-hydroxy-3-methylglutaryl CoA reductase activity, lowering by synergistic action of two oxysterols, **186**, 569
 - digoxin transport, mediation by MDR 1 gene product P-glycoprotein, **189**, 551
 - expression of
 - Drosophila* heat shock protein *hsp27*, conferral of thermal resistance, **185**, 116
 - GLUT1 protein with deleted C-terminal 12 amino acids, transport activity, **184**, 865
 - human A1 adenosine receptor cDNA, **187**, 919
 - human bradykinin B2 receptor gene, **187**, 1306
 - human insulin receptor cDNA-transfected, order of autophosphorylation of insulin receptor tyrosines 1158, 1162, and 1163, **186**, 244
 - 11 β -hydroxysteroid dehydrogenase catalytic function in, role of Tyr-179 and Lys-183, **188**, 222
 - mitosis, fibronectin receptor function during, assessment, **189**, 1429
 - oxysterol regulatory potencies in 3-hydroxy-3-methylglutaryl CoA reductase degradation and 3-hydroxy-3-methylglutaryl CoA synthase repression, and receptor affinity, correlation, **186**, 182
 - polyamine uptake, feedback repression, role of active protein synthesis, **186**, 81
 - production of soluble murine erythropoietin receptor, **188**, 888
 - stable expression of natriuretic peptide receptors: effects of non-peptide ANP antagonist HS-142-1, **189**, 336
 - surface, human biliary glycoprotein expressed on, homo- and heterotypic Ca²⁺-independent cell adhesion activities, **186**, 881
- Cholecystokinin
- induced supramaximal inhibition of pancreatic secretion, mediation by protein kinase C (rat), **187**, 498
 - phenethyl ester analog, binding to solubilized pancreatic CCK receptor, application in ligand-affinity chromatography, **183**, 396
- Cholecystokinin-8
- C-terminal octapeptide, effect on [Ca²⁺]_i in isolated islet cells (rat), **184**, 878
 - induced [Ca²⁺]_i increase in pancreatic B-cells, inhibition by galanin (rat), **182**, 858
- Cholecystokinin receptors
- binding by CCK phenethyl ester analog, application in ligand-affinity chromatography, **183**, 396
 - cerebral and gastric, molecular cloning: structure, functional expression, and chromosomal localization (human), **189**, 296
- Cholesterogenesis
- hepatic, biphasic effect of oleic acid (rat), **183**, 21
- Cholesterol
- ozonation products, evaluation as biomarkers of ozone exposure (rat), **188**, 618
 - role in apolipoprotein E overexpression by aortic and splenic foam cells (rabbit), **183**, 514
- Cholesterol 7 α -hydroxylase
- cDNA, detection of polymorphisms (human), **185**, 588
- Cholesterylene
- detection in cornea (bovine, dog, human), **186**, 1647
- Cholinesterase
- glycosylated, computer model of 3-D structure (human serum), **189**, 1280
 - inhibition by huperzine A, mechanism (horse, human), **184**, 719
- Chondrocytes
- calcium-dependent nitric oxide synthase induction in, effects of glucocorticoids (rabbit), **188**, 209
 - detection of calcium-activated potassium channels (pig), **182**, 1429
 - epidermal growth factor receptors, detection and expression regulation by growth and differentiation factors (rabbit), **183**, 14
 - proliferative effect of phospholipase A₂-I via specific binding sites (rat), **186**, 1025
- Chondroitin 4-sulfate
- synthesis by mastocytoma cells *in vitro*, effect of brefeldin A (mouse), **183**, 357
- Chromaffin cells
- adrenal medullary
 - adrenaline secretion, stimulation by pituitary adenylate cyclase-activating polypeptide (rat), **182**, 403
 - Ca²⁺-dependent catecholamine release, inhibition by wortmannin (bovine), **185**, 1016
 - digitonin-permeabilized, catecholamine secretion, role of calmodulin (bovine), **186**, 1006
 - muscarinic M₂ receptor-mediated catecholamine secretion, role of dopamine D₁ receptors (cat), **183**, 1019
- Chromaffin granules
- adrenal medullary
 - differential recognition by annexins (bovine), **184**, 347
 - Kex2-like proteolytic activity (bovine), **185**, 398
 - associated membrane lipids, interaction with dopamine- β -monooxygenase (bovine), **188**, 678
- Chromatin
- differential staining *in situ* by species-specific satellite DNA probes via hybridization (human, mouse), **182**, 1313
 - high-affinity binding of histamine after partial hepatectomy (rat), **184**, 840
 - transcriptionally active, assembly on adenovirus major late promoter, effect of DNA supercoiling, **186**, 963
- Chromatium minutissimum*
- bacteriochlorophyll-lipochlorophyll complexes, photothermal spectroscopic analysis, **186**, 327
- Chromatography, *see specific techniques*
- Chromosomes
- 1, p13-21 region, macrophage colony-stimulating factor gene reassignment (human), **182**, 1139
 - 2, localization of *PRS3* gene encoding essential proteasome subunit homologous to mammalian proteasome subunit C5 (yeast), **182**, 452
 - 7, 1.2-cM deletion, activation of oxidative stress response in liver (neonatal mouse), **182**, 1160

- 8, mapping of calmodulin-dependent protein phosphatase testis-specific catalytic subunit gene (human), **188**, 265
- 11
 localization of CCK_B cholecystokinin receptor gene (human), **189**, 296
 localization of DOPA decarboxylase gene (mouse), **186**, 926
 p15.5 region, localization of intestinal mucin-like protein gene (human), **183**, 821
 q13.1-q13.3 region, localization of FKBP2 gene encoding immunophilin FKBP13 (human), **189**, 819
- 17
 assignment of granulin gene (human), **188**, 57
 q region, gene encoding sodium channel α subunit from adult skeletal muscle, sequence and genomic structure (human), **182**, 794
- 20, p13 region, localization of FKBP1 gene encoding immunophilin FKBP12 (human), **189**, 819
- chloroplast, binding to thylakoid membrane inverted repeat region (spinach), **184**, 993
- mapping of protein-tyrosine phosphatase LC-PTP gene (human), **186**, 1607
- oriC* region, association with outer membrane, effects of culture conditions (*Escherichia coli*), **187**, 970
- X
 p region, assignment of calbindin-D9K gene (human), **185**, 663
 p22.1 region, localization of spermidine/spermine *N*¹-acetyltransferase gene (human), **187**, 1493
- Y, DNA probes, isolation and characterization (human), **189**, 581
- Chymosin
 Cys250-Cys283 disulfide bond in, functional role (bovine), **187**, 692
 X-ray crystallographic analysis: adoption of self-inhibited form, **184**, 1074
- Chymotrypsin inhibitors
 two forms in hemolymph, isolation (locust), **189**, 790
- Cigarette smoke
 effect on membrane order and water organization of Jurkat T-lymphoma cells (rat), **185**, 624; *erratum*, **186**, 601
- Circadian rhythms
 associated *Drosophila per* gene, homologs, expression in mammalian suprachiasmatic nucleus and heart and molluscan eye, **184**, 1082
 covalent modifications in liver DNA (mouse), **189**, 545
- Circular dichroism
 in analysis of
 pH-dependent conformational changes of T- and R-states of insulin in solution in pH range 6-10, **186**, 1115
 regulation of placental glutathione *S*-transferase by non-substrate hydrophobic ligand, **189**, 1243
- Circulation
 collateral, development after acute arterial occlusion, enhancement by basic fibroblast growth factor (rat), **185**, 510
- Cirrhosis
 affected liver, and hepatic tumors, deleted mtDNA, quantitative comparison (human), **182**, 913
- Cisplatin
 damaged DNA, binding of high mobility group protein, characterization (bovine), **188**, 1286
 -DNA monoadducts, *in vitro* evolution into diadducts, effect of superhelical density, **189**, 111
 effects on formation of DNA interstrand cross-links in hemoglobin-synthesizing and undifferentiated erythroleukemic cells (mouse), **182**, 760
 induced alterations in DNA oriented fibers, analysis by atomic force microscopy, **182**, 201
 induced imbalances in pattern of chimeric marker gene expression, analysis in HeLa cells, **184**, 1
 treated human ovarian carcinoma and rat lymphoma cells, ATP ³¹P NMR signal increase, **183**, 114
- Citrate synthase
 in skeletal muscle of endurance athletes, effects of L-carnitine, **188**, 102
- Citrate transporter
 method of partial purification (yeast), **183**, 70
- Citrulline
 biosynthesis from L-arginine by constitutive nitric oxide synthase in corpus cavernosum (rabbit), **186**, 308
 formation by *N*^ω-hydroxy-L-arginine oxidation by heme-proteins **184**, 1158
 and NO
N^ω-hydroxy-L-arginine oxidation to, by NADPH and O₂, catalysis by cytochrome P450 (rat liver), **187**, 880
 nitric-oxide synthase-catalyzed formation in equimolar quantities from L-arginine (rat cerebellum), **185**, 960
- L-Citrulline
 effect on constitutive nitric oxide synthase (rat cerebellum), **189**, 242
- Clofibrate
 inducible cytochrome P450, synthesis of 12(*R*)hydroxy-eicosa-tetraenoic acid in ciliary epithelium (pig), **187**, 455
 repression of transthyretin gene expression in liver (rat), **188**, 799
- Cloning
 A1 adenosine receptor cDNA (human), **187**, 919
 acetyl CoA:deacetylcephalosporin C *O*-acetyltransferase cDNA from *Acremonium chrysogenum*, **182**, 995
 α_1 acid glycoprotein genomic DNA (rabbit), **185**, 69
 acidic fibroblast growth factor
 5' untranslated exons by single-strand ligation to single-stranded cDNA (bovine), **188**, 843
 14.2-kb genomic clone (bovine), **184**, 945
 acidic seminal fluid protein cDNA (bovine), **183**, 232
 actin2 cDNA (bovine), **187**, 1022
 activin receptor (rat), **183**, 672
 activin receptor type II gene (mouse), **185**, 404
 adenosine receptor
 A2b cDNA from brain (human), **187**, 86
 RA2 cDNA (rat brain), **185**, 304
 adenosylmethionine decarboxylase cDNA (mouse), **189**, 424
 Ah receptor cDNA (mouse), **184**, 246
 alcohol/hydroxysteroid sulfotransferase (human liver), **187**, 448

Subject Index

- angiotensin receptor AT-1 isoform genes (mouse), **185**, 253
 angiotensin II type 1 receptor cDNA (human liver), **183**, 910, 989
 angiotensin II type 1 receptor gene (human), **183**, 8
 angiotensin II type 1A receptor gene (human), **186**, 277
 BK-2 bradykinin receptor cDNA (human lung fibroblast), **184**, 260
 bradykinin B2 receptor gene (human), **187**, 1306
 brain-derived neurotrophic factor: characterization of 5'-flanking region (human), **182**, 325
 calbindin-D9K cDNA (human), **185**, 663
 calyculin-associated annexin protein CAP-50 (rabbit), **186**, 1227
 calmodulin-dependent protein phosphatase testis-specific catalytic subunit gene (human), **188**, 265
 catechol 2,3-dioxygenase (*Alcaligenes* sp., *Pseudomonas putida*, *Achromobacter xylosoxidans*), **187**, 609
 cDNA encoding protein NHP1 containing HMG-Box (*Babesia bovis*), **184**, 31; *erratum*, **185**, 800
 cefG gene encoding acetyl-CoA:deacetylcephalosporin C O-acetyltransferase, cloning and disruption (*Acromonium chrysogenum*), **186**, 40
 cell-associated glucosyltransferase gene (*Streptococcus mutans*), **187**, 1432
 cerebral and gastric cholecystokinin receptors: structure, functional expression, and chromosomal localization (human), **189**, 296
 cholesterol 7 α -hydroxylase cDNA (human), **185**, 588
 collagen type VII cDNA (human), **183**, 958
 CP94 lens fiber cell beaded-filament structural protein cDNA (rat), **186**, 190
 C-type natriuretic peptide receptors, membrane-bound GC-A and GC-B, characterization (rat brain), **183**, 743
 cyanide hydratase gene (*Gloeocercospora sorghi*), **187**, 1048
 cystathionine γ -lyase cDNA (human liver), **189**, 749
 cytochrome b_5 cDNA: detection of separate genes encoding soluble and microsomal forms (rabbit), **185**, 845
 cytoplasmic protein-tyrosine phosphatase cDNA (human), **189**, 1223
 dopamine β -hydroxylase cDNA (mouse), **189**, 590
 elafin gene: deduction of preproelafin structure (human), **185**, 240
 endothelial tyrosine kinase cDNA (rat), **186**, 706
 ethylene-forming enzyme of *Pseudomonas syringae* pv. *phaseolicola* PK2 in *Escherichia coli*, **188**, 826
 α -fetoprotein variant cDNA (rat), **185**, 648
 14-3-3 protein cDNA for evolutionary analysis (*Xenopus laevis*), **184**, 1456
 α -1,3-fucosyltransferase capable of forming E-selectin ligand (human), **187**, 152
 β -1,4-galactosyltransferase cDNA, comparison to mammalian homologs (embryonic chicken brain), **189**, 1215
 gastrin receptor cDNA cloned from ECL carcinoid tumor (mouse), **187**, 1151
glnA gene encoding glutamine synthetase (*Calothrix* sp. PCC 7601), **189**, 1296
 glutamate receptor channel subunit $\delta 1$ cDNA (mouse), **183**, 886
 γ -glutamylcysteine synthetase full-length cDNA (human liver), **185**, 29
 gonadotropin-releasing hormone receptor cDNA (human pituitary), **189**, 289
 GTP cyclohydrolase 1 cDNA: multiple mRNA forms (human), **187**, 359
 guanylin cDNA (rat), **185**, 812
 H⁺-ATP synthase subunit d cDNA (rat mitochondria), **182**, 1130
 HB-GAM/PTN: comparison with midkine genomic structure (murine fibroblasts), **183**, 701
 heparan sulfate proteoglycan from brain: identification as rat glypican, **188**, 395
 hepatic DNA, restoration of hepatic function in transfected dedifferentiated rat hepatoma cells (human), **188**, 531
 HG12 mRNA: human homolog of yeast ribosomal protein YL41, **187**, 901
 high-mobility-group-like Pf16 protein gene (*Plasmodium falciparum*), **182**, 412
 hippocalcin cDNA (rat brain), **189**, 511
 5-hydroxytryptamine type 1B receptor gene (human), **184**, 752; **185**, 517
 indolicidin cDNA (bovine), **187**, 467
 insulin-like growth factor binding protein acid-labile subunit cDNA (rat liver), **188**, 304
 insulin-like growth factor binding protein-1 gene: analysis of 5' promoter region (rat liver), **185**, 993
 insulin receptor substrate-1 cDNA (human), **183**, 280
 interleukin-10 cDNA (rat), **189**, 1
 isoaspartyl protein carboxyl methyltransferase cDNAs with alternative mRNA splicing patterns (human), **185**, 277
 KC cytokine cDNA (rat), **184**, 922
 laminin receptor cDNA (human), **184**, 1165
 leukocidin F-component gene from methicillin-resistant *Staphylococcus aureus*, **184**, 640
 leukocyte common antigen-related phosphatase cDNA (rat), **188**, 34
 5-lipoxygenase gene and promoter (guinea pig), **185**, 489
 lysosomal sialoglycoprotein hLGP85 cDNA from metastatic islet tumor cell line (human), **184**, 604
 major hemoglobin component cDNA (*Paramecium caudatum*), **182**, 195
mau gene cluster (*Paracoccus denitrificans*), **184**, 1181
 murine homolog of human $\alpha 2$ -C2 adrenergic receptor, **186**, 1280
 NAD⁺-dependent D-lactate dehydrogenase gene (*Lactobacillus bulgaricus*), **185**, 705
 neurocalcine cDNA (bovine brain), **185**, 147
 neurofibromatosis type 1 protein isoform cDNA (human), **187**, 984
 neurokinin-3 receptor cDNA (human), **184**, 966
 neuron-specific HPC-1 antigen homolog (bovine brain), **187**, 1144
 non-receptor protein-tyrosine-phosphatase cDNA from P19 embryonal carcinoma cells (mouse), **184**, 1241
 nucleobindin cDNA (mouse), **187**, 375
 pancreatic triglyceride lipase, **188**, 964
 PCR-based, protein phosphatase inhibitor-2 cDNA (rabbit skeletal muscle), **186**, 1168
 pectin lyase gene (*Pseudomonas marginalis*), **182**, 14
 pheromone biosynthesis activating neuropeptide cDNA

- (silkworm), **189**, 221
- pigment dispersing hormone precursor cDNA (crab), **189**, 1509
- Plasmodium vivax* recombinant antigen with apolipoprotein B-100-like sequences, **184**, 668
- platelet-activating factor receptor gene expressed in heart (human), **189**, 617
- potassium channel
- rat heart, **184**, 1484
- transient-type, and analysis of functional modulation (rat heart), **189**, 430
- preproendothelin-3 cDNA (rat), **186**, 588
- prospero* gene (*Drosophila melanogaster*), **182**, 1326
- prostaglandin endoperoxide synthase cDNA (human platelets), **182**, 433
- prostatic acid phosphatase cDNA (human), **184**, 1468
- protein-tyrosine phosphatase cDNA (murine testis), **185**, 818
- protein-tyrosine phosphatase LC-PTP (human), **186**, 1607
- 6-pyruvoyltetrahydropterin synthase cDNA (human liver), **189**, 1437
- rearranged immunoglobulin heavy chain genes from B cell lines with anchored polymerase chain reaction (human), **182**, 1260
- recoverin cDNA (human retina), **187**, 234
- RNase superfamily-related gene cDNA (chicken bone marrow cells), **185**, 231
- sarafotoxin S6C gene (*Atractaspis engaddensis*), **189**, 1527
- sodium channel cDNA (squid), **186**, 61
- soluble intercellular adhesion molecule 1 cDNA (human), **185**, 1022
- subtilisin J gene (*Bacillus stearothermophilus*), **184**, 277
- thioltransferase gene (*Saccharomyces cerevisiae*), **187**, 949
- thromboxane A₂ receptor cDNA (mouse), **184**, 1197
- thyroid hormone receptor β 1 gene promoter (human), **185**, 78
- thyrotropin receptor 1.3-kb variant mRNA lacking transmembrane domain (human), **187**, 1135
- thyrotropin receptor transcript, alternatively spliced form (human), **188**, 1214
- tracheobronchial mucin carboxy terminus (dog), **189**, 958
- transforming growth factor β type III receptor cDNA (human, pig), **189**, 356
- transketolase cDNA (human brain), **183**, 1159
- truncated isoform of follicle-stimulating hormone receptor (human), **188**, 1077
- 25-kDa FK506- and rapamycin-binding protein cDNA (human hippocampus), **184**, 733
- type II activin receptor cDNA (human), **184**, 310
- type II antifreeze protein cDNA (fish liver), **185**, 335
- tyrosinase-related protein gene-containing genomic DNA segments (human), **184**, 568
- urinary stone protein cDNA (human), **184**, 859
- vacuolar H⁺-ATPase 16-kDa proteolipid subunit genes (human liver), **183**, 856
- vascular cell adhesion molecule VCAM1 cDNA (mouse, rat), **183**, 163
- visinin-like Ca²⁺-binding protein cDNA (rat brain), **184**, 1219
- Clostridium botulinum*
- type C progenitor toxin, nontoxic-nonhemagglutinin component, nucleotide sequence of encoding gene, **183**, 1273
- Clostridium pasteurianum*
- 2[4Fe-4S] ferredoxin, synthetic gene encoding, design and expression in *Escherichia coli*, **185**, 341
- Clostridium thermocellum*
- endoglucanase CelC, conserved residues, site-directed mutagenesis, **189**, 807
- Cobalamin
- ⁵⁷Co-labeled, intrinsic factor-mediated transcytosis by polarized renal epithelial cells, inhibition by leupeptin and ammonium chloride (opossum), **182**, 439
- role in nervous system, glial cells as model: impaired Cbl coenzyme synthesis *in vitro* after short-term Cbl deprivation (human), **184**, 832
- Cobalt
- Co(III)-desferal complex, cleavage of plasmid DNA, **182**, 588
- Coenzyme Q
- stimulation of serum-free cell proliferation (HeLa, Balb/3T3 cells), **189**, 8
- Coenzyme Q₁₀
- as therapy in congestive heart failure in transplant-eligible and ineligible patients, evaluation, **182**, 247
- Colforsin
- induction of
- low-density lipoprotein receptors in vascular smooth muscle cells, enhancement by lysosome inhibitors (human), **182**, 830
- neurite outgrowth in neuroblastoma NB-OK1 cells, suppression by carbachol (human), **182**, 45
- Colipase
- binding to equine pancreatic lipase, role of lipase residues 403-449 in C-terminal extremity (pig), **184**, 206
- concentrations, as parameter in studies of lipolysis in water-oil emulsions, quantitative analysis, **186**, 746
- Collagen
- gene expression in systemic sclerosis fibroblasts, effect of transforming growth factor β 1 (human), **187**, 45
- induced arthritis, heterotopic bone formation in mouse with, induction by bone morphogenetic protein, **186**, 1362
- in osteoporotic femoral head, post-translational modification (human), **185**, 801
- precursor, encoding gene pro α 1(I), post-transcriptional regulation in chemically transformed pro α 1(I)-deficient fibroblasts (hamster embryo), **188**, 780
- role in terminal differentiation of preadipocytes (mouse), **187**, 1314
- synthesis in UMR-106 cells, regulation by parathyroid hormone and PTH-related peptide, role of cAMP-dependent protein kinase (rat), **184**, 525
- type I
- COL1A subunit, hepatic mRNA levels, carbon tetrachloride-induced increase, suppression by prostacyclin (rat), **185**, 981
- denatured, integrin $\alpha_v\beta_3$ binding via RGD sites: affinity of integrins for damaged extracellular matrix (human), **182**, 1025
- interaction with decorin core protein fragments, **189**, 165

Subject Index

- synthesis in transfected MC3T3-E1 osteoblast cells, inhibition by constitutive expression of *c-fos* gene (mouse), **182**, 1389
- type IV, gene expression in mesangial cells, effect of high glucose concentrations (rat), **185**, 1048
- type VII, cDNA, cloning and characterization (human), **183**, 958
- type IX, intact form, extraction and characterization (bovine vitreous), **185**, 392
- type X, encoding gene, coding sequence PCR amplification and identification of polymorphism changing Gly to Arg at position 545, **187**, 420
- Collagenase**
- gene expression, loss after immortalization in SV40T antigen-transformed human diploid fibroblasts, **189**, 148
- inhibiting tetracyclines, selective inhibition of endothelial cell growth (bovine, pig), **188**, 740
- type IV, immunological identity with glioma-secreted metalloproteinase: evidence for type IV collagenase activation by u-PA (rat), **186**, 348
- Colon**
- neoplastic tissues, gastrin post-translational processing (human), **189**, 1165
- Colony-stimulating factor**
- granulocyte-macrophage, *see* Granulocyte-macrophage colony-stimulating factor
- macrophage, gene reassignment to chromosome 1p13-21 (human), **182**, 1139
- Combined pituitary hormone deficiency**
- Pit-1 gene mutations in children with, identification and localization, **189**, 851
- Complement**
- C1r, mediated cleavage of cleavage of MHC class I antigen heavy chain (human), **187**, 832
- C2, C3, C4, and C5, and receptors CR1 and CR2, mRNA expression during differentiation of embryonal carcinoma cell lines, **189**, 863
- C3d, derived synthetic 16-amino acid peptide, induction of specific tyrosine phosphorylation and proliferation of resting B lymphocytes and transformed CR2-positive lymphocytes (human), **188**, 833
- pro-C3, proteolytic cleavage *in vitro* by truncated soluble form of furin (rat), **189**, 1353
- Complement receptors**
- CR1 and CR2, and complement components, mRNA expression during differentiation of embryonal carcinoma cell lines, **189**, 863
- CR2, positive lymphocytes, tyrosine phosphorylation and proliferation, induction by C3d-derived 16-amino acid synthetic peptide (human), **188**, 833
- and Fcγ receptors, mediated elevation of cytosolic Ca²⁺ levels in neutrophils (human), **185**, 246
- Compound 48/80**
- interaction with rho proteins, role of post-translational isoprenylation (porcine brain), **186**, 448
- Computer applications**
- in analysis of interferon-α sequence homology with other proteins (human), **186**, 211
- in 3-D modeling of two inorganic pyrophosphatases (*Saccharomyces cerevisiae*, *S. pombe*), **186**, 122
- Concanavalin A**
- activated T lymphocytes, anti-oncogene phosphoprotein p53 in, phosphorylation-associated conformational shift (human), **189**, 1701
- induced thymocyte proliferation, early gene expression during, analysis (rat), **188**, 1261
- Conformation**
- actin, calponin-induced changes (rabbit skeletal muscle), **185**, 481
- anti-oncogene phosphoprotein p53, phosphorylation-associated shift in concanavalin-A activated T lymphocytes (human), **189**, 1701
- biliverdins, relationship to basicity and enzymatic reduction, **188**, 48
- B- to Z-DNA transition, analysis: UV photoelectron and theoretical characterization of 2'-deoxyguanosine-5'-phosphate valence electrons, **184**, 16
- cyclo(1,5)-Ac-Pen-Arg-Gly-Asp-Cys-NH₂ in water, analysis by NMR and molecular dynamics, **187**, 1042
- gonadotropin-releasing hormone analogs with tetrahydroisoquinoline carboxylic acid, theoretical studies (rat), **187**, 1035
- hsp85, changes with heat shock temperature range (murine fibrosarcoma cells), **184**, 394
- insulin T- and R-states in solution, pH-dependent changes: circular dichroic studies in pH range 6–10, **186**, 1115
- neuroactive domoic acid: X-ray structural comparison with isodomoic acid A and α-kainic acid, **187**, 325
- phosphorylated immunodominant epitope on paired helical filaments in Alzheimer brain, **187**, 783
- Conglutinin**
- isolation and characterization as influenza A virus inhibitor (bovine blood), **187**, 1270
- Conjugation**
- plasmid and transposon DNA from *Escherichia coli* into *Porphyromonas gingivalis*, **186**, 1012
- β-Connectin**
- autophosphorylation *in vitro* in absence of added Mg²⁺ (chicken breast muscle), **183**, 31
- ω-Conotoxin**
- binding sites in adult brain, biochemical characterization (chicken), **182**, 947
- Contraction**
- bronchial smooth muscle *in vivo*, histamine-mediated, enhancement by low-concentration endothelin-1 (guinea pig), **187**, 717
- duodenal muscle, motilin-induced, associated peptide sequence (rabbit), **183**, 36
- induced translocation of glucose transporter Glut4 in isolated ventricular cardiomyocytes (rat), **189**, 1207
- sustained, arterial smooth muscle, role of calponin and caldesmon (pig), **187**, 847
- Copper**
- accumulation in liver
- relationship to metallothionein induction in LEC rat, **184**, 1393
- role in copper-metallothionein induction (rat), **185**, 548
- Cu(II)-desferal complex, cleavage of plasmid DNA, **182**, 588

- 1,10-phenanthroline complex, role as footprinting reagent for single-stranded regions of *Escherichia coli* lac-derived RNA and HIV RNA, **187**, 1503
- type 2 centers, as site of nitrite reduction by nitrite reductase (*Achromobacter cycloclastes*), **187**, 1529
- Cornea
- detection of tissue lipid cholesterylene (bovine, dog, human), **186**, 1647
- Corpus cardiacum
- Trp-substituted neuropeptide from adipokinetic hormone-red pigment-concentrating hormone family, isolation (*Carausius morosus*), **189**, 1303
- Corpus cavernosum
- constitutive nitric oxide synthase, in biosynthesis of NO and citrulline from L-arginine (rabbit), **186**, 308
 - photorelaxation in, enhancement by BAY K 8644 or N-nitro-L-arginine (rabbit), **186**, 1522
- Corticosterone methyl oxidase
- type II, patients deficient in, role of point mutations of P450_{C18} gene: congenitally defective aldosterone biosynthesis, **182**, 974; *erratum*, **184**, 1529
- Corticotropin-releasing factor
- suppression of early glucocorticoid induction of calmodulin in pituitary corticotrope tumor cells (mouse), **189**, 1382
- CPT-11, *see* 7-Ethyl-10-(4-(1-piperidino)-1-piperidino) carbonyloxy camptothecin
- Crithidia fasciculata*
- and other trypanosomatids, putrescine uptake, differential regulation, **188**, 120
- Critical micelle concentration
- and hemolytic activity, of halistanol trisulfate, correlation, **182**, 115
- Cromakalim
- induced hyperpolarization in coronary artery, inhibition of phospholipase C activation by agonist U46619 (pig), **187**, 1517
- Cromolyn
- blocking of chloride channels (human, rat), **188**, 957
- Crossbridges
- thick myofilaments, motions, suppression by thiourea in ATP-free medium (king crab), **186**, 321
- Crosslinking
- chemical, Ah receptor cytosolic and nuclear forms in 1c1c7 hepatoma cells, **182**, 55
 - modification of Taka-amylase A at subsite Lys residue, augmentation of maltosidase activity (*Aspergillus oryzae*), **183**, 321
 - photo-induced, histones H1 and H3 to DNA in deoxyribonucleoprotein (bovine), **187**, 261
 - surface immunoglobulin in WEHI 231 cells, activation of src-related tyrosine kinases, **187**, 1536
 - synapsin I with brain microtubules, cyclic inhibition-potential by protein kinase FA (swine), **184**, 973
- Cryoprotection
- by cold-regulated *cor15* gene-encoded polypeptide COR15, assay (*Arabidopsis thaliana*), **183**, 1103
- Crystallin
- ATP complex, ³¹P NMR analysis: functional implications (bovine), **189**, 1578
 - αA-Crystallin
 - lens-specific enhancer, motif 1, interaction with nuclear factor αCEFI: identification of contact sites (chicken), **184**, 24
 - αB-Crystallin
 - translocation and induction in glioma cells by heat shock (rat), **182**, 844
 - γII-Crystallin
 - stability: lyophilization-induced changes (bovine), **187**, 39
 - ε-Crystallin
 - with L-lactate dehydrogenase activity, kinetic constants and substrate specificity (duck lens), **186**, 874
- Crystallization
- recombinant transforming growth factor α (human), **187**, 146
- Crystallography
- hemoglobin, preliminary data (reindeer), **187**, 1063; *erratum*, **189**, 1253
 - X-ray, *see* X-ray crystallography
- Crystals
- native δ-endotoxin, pH-mediated solubility (*Bacillus thuringiensis* var. *san diego*), **184**, 692
- C-type natriuretic peptide
- effects on cell lines stably expressing natriuretic peptide receptors, **189**, 336
 - identification as potent activator of guanylate cyclase in endothelial cells from cerebral microvessels (rat), **183**, 640
 - in monocytic cell line THP-1, isolation and identification (human), **189**, 697
 - stimulation of cGMP production in vascular smooth muscle cells *in vitro*, structural requirements (rat), **183**, 964
- Culture media
- ATP-free, crossbridge motions of isolated thick myofilaments in, suppression by thiourea (king crab), **186**, 321
 - effect on association of *oriC* region of *Escherichia coli* chromosome with outer membrane, **187**, 970
 - hyperosmotic, exposed renal inner medullary slices, cell volume regulation in, modulation by Na-dependent K⁺ efflux (rat), **185**, 36
- Cumene hydroperoxide
- induced Ca²⁺ release from hepatic mitochondria, prevention by butylated hydroxytoluene, mechanism (rat), **185**, 698
- Cumulus cells
- from *in vitro* fertilization patients, expression of bFGF mRNA, analysis by reverse transcription with nested PCR (human), **187**, 1227
- Cyanide hydratase
- encoding gene, cloning and sequencing (*Gloeocercospora sorghi*), **187**, 1048
- Cyclic AMP
- agonists, and parathyroid hormone, regulation of 1,25-dihydroxyvitamin D₃ receptor in UMR 106 cells (rat), **185**, 881
 - dependent modulation of cardiac calcium channels expressed in oocytes, characterization (*Xenopus laevis*), **182**, 1059
 - dependent phosphorylation of inositol-1,4,5-trisphosphate receptor, inhibition of Ca²⁺ release from platelet

Subject Index

- membranes (human), **184**, 893
- differential regulation by endogenous and transfected formylpeptide chemoattractant receptors, implications for G_i-coupled receptor signaling (human), **183**, 1033
- differential regulation of imipramine-sensitive serotonin transporter in Jar choriocarcinoma, PC12 pheochromocytoma, and C33-14-B1 fibroblast cells, comparison **183**, 487
- formation in osteoblast-like cells, stimulation by parathyroid hormone-related protein, inhibition by tumor necrosis factor- α via protein kinase C (human, rat), **182**, 341
- increased levels in rat platelets, inducing peptides, organ distribution and characterization (pig), **187**, 1587
- induction of up-regulation of ET_A receptor mRNA and effect on aortic smooth muscle cell responsiveness to endothelin-1 (rat), **188**, 719
- intracellular, stimulation by calcitonin gene-related peptide via protein kinase C-controlled mechanism in ocular ciliary epithelial cells (human), **188**, 662
- levels in glucagon-secreting cell line In-R1-G9, suppression by glucagon-like peptide-1(7-36)amide, **186**, 503
- modulation of Ba²⁺ current oscillations in *ras*-transformed fibroblasts (mouse), **182**, 1240
- platelet, human pheochromocytoma peptides responsible for elevation of, isolation and characterization (rat), **185**, 134
- regulation of
- activin mRNA β_A levels in HT1080 cells (human), **182**, 773
 - calcitonin gene transcription (human), **189**, 1157
 - chloride currents in CHO cells, **186**, 251
 - related pathway, interaction with phosphoinositide turnover system in secretion of pancreastatin and somatostatin by QGP-1N cells (human), **185**, 1041
- Cyclic AMP phosphodiesterase
- cGMP-inhibited, insulin-induced phosphorylation and activation (human platelets), **186**, 517
 - particulate cGMP-inhibited, low K_M , phosphorylation in 3T3-L1 adipocytes, induction by insulin and isoproterenol, **183**, 1070
- Cyclic AMP-responsive element
- and AP1 factor binding site, common nuclear factors bound to, characterization (porcine anterior pituitary), **188**, 170
- Cyclic GMP
- atrial natriuretic factor-stimulated production, inhibition by endothelin, role of protein kinase C activation (rat), **182**, 395
 - formation in
 - endothelial cells from cerebral microvessels, increase by C-type natriuretic peptide (rat), **183**, 640
 - vascular smooth muscle cells *in vitro*, stimulation by C-type natriuretic peptide, structural requirements (rat), **183**, 964 - inhibition of vascular endothelial cell clearance of atrial natriuretic peptide (bovine), **182**, 420
 - nitric oxide-dependent, stimulation of formation in cultured neurons and astrocytes, mediation by different receptors (rat), **182**, 1362
- Cyclic GMP phosphodiesterase
- retinal, β subunit levels in carriers of *rd* gene (mouse), **184**, 461
 - rod photoreceptor, Ca²⁺-dependent regulator S-modulin, purification and characterization (frog), **186**, 411
 - pulmonary type V, interaction with protein kinase A catalytic subunit: modulation of noncatalytic binding sites (guinea pig), **189**, 1389
- Cyclic nucleotide phosphodiesterase
- calcium-calmodulin-sensitive isoform, selective activation by 1.15-kDa peptide (human myometrium), **184**, 700
- Cyclin
- concentrations in embryonic cells, mathematical models, **184**, 782
- Cyclin A
- role in S phase in epithelial cells (rat liver), **182**, 1144
- β -Cyclodextrin hydrate
- crystalline, reversible dehydration to β -cyclodextrin $\cdot$ 10.5 H₂O under ambient conditions, **188**, 1060
- Cyclooxygenase
- human platelet and ram seminal vesicle, regiospecific and enantioselective metabolism of 8,9-epoxyeicosatrienoic acid, **183**, 138
- Cyclopentenosine
- isolation from acid hydrolysate of elastin and structural characterization (bovine aorta), **186**, 1533
- Cyclophilins
- purification from *Aspergillus niger* and *Fusarium sambucinum*: resistance of cyclophilin/cyclosporin A complexes to proteolysis, **187**, 791
- Cyclosporin A
- cyclophilin complexes, resistance to proteolysis (*Aspergillus niger* and *Fusarium sambucinum*), **187**, 791
 - down-regulation of CD4 expression in cultured microglia (mouse), **189**, 869
 - effect on activated T cells: correlation of up-regulation of lymphokine mRNA and down-regulation of TcR, CD4, CD8, and Ick mRNA (human), **186**, 603
 - induced inhibition of T cell proliferation, effects of changes in membrane potential (human), **185**, 363
- Cystathionine γ -lyase
- cDNA, cloning and nucleotide sequence (human liver), **189**, 749
- Cystatin C
- secretion by glomerular mesangial cells: autocrine loop for growth promotion *in vitro* (rat), **182**, 1082
- Cysteamine
- selective enhancement of neuropeptide Y₂ receptor binding activity (bovine hippocampus), **184**, 380
- Cysteine
- in extracellular domain and exoplasmic loops of transmembrane domain of TSH receptor, role in receptor activity and response to thyroid-stimulating autoantibodies (rat), **189**, 1754
 - glutathione S-transferase P residues, characterization, **188**, 424
 - and methionine, differentiation in lipoxygenase active site using platinum complex (soybean), **182**, 779
 - multiple substitutions in interleukin-2, in analysis of functional structure (human), **188**, 949

- at positions 102 and 139 in O⁶-alkylguanine-DNA-alkyltransferase, functional role, analysis by site-directed mutagenesis (*Escherichia coli*), **187**, 425
- protection of Na,K-ATPase and isolated human lymphocytes from silver toxicity, **189**, 1444
- tropoelastin carboxy terminal domain residues, formation of intrachain disulfide bond stabilizing loop structure and positively charged pocket, **186**, 549
- Cysteine proteinases
- catalyzed hydrolysis, steady-state kinetic constants for, effects of P2' substituents, **187**, 615
- Cystic fibrosis
- gene therapy, construction of amphotropic retroviruses with hybrid LTR for, **187**, 187
- Cystic fibrosis transmembrane conductance regulator
- defective gene encoding, role in lysosome acidification in pancreatic adenocarcinoma cells (human), **184**, 300
- derived synthetic peptide, submandibular cell-incorporated antibody to, inhibition of β -adrenergic-stimulated mucin secretion (rat), **188**, 1146
- Cytochrome *b*₅
- soluble and microsomal forms, encoding genes, molecular cloning studies (rabbit), **185**, 845
- Cytochrome *b*₅₅₈
- in phagocyte NADPH oxidase, identification as flavoprotein (pig), **186**, 1368
- Cytochrome *BO*
- operon, *cyoE* gene encoding protoheme IX farnesyltransferase in, role in heme O biosynthesis (*Escherichia coli*), **189**, 1491
- Cytochrome *c*
- and alpha tocopherol, electron transport between, **188**, 190
- synthesis *in vitro* (equine heart), **183**, 258
- Cytochrome *c*₃
- reactivity with [Fe] and [Ni-Fe-Se] hydrogenases (*Desulfovibrio desulfuricans*, *D. vulgaris*), **189**, 633
- Cytochrome-*c*₃ hydrogenase
- NiFe type, partial purification and characterization (*Thermodesulfobacterium mobile*), **184**, 1256
- Cytochrome-*c* oxidase
- Cu_A-deficient, acceleration of oxygen reaction in, flow-flash measurement (*Nitrosomonas europaea*), **182**, 1264
- near-infrared absorption spectra: evidence for band III analog, **184**, 1035
- phosphorescence quenching in, modification by valinomycin (bovine heart), **189**, 1477
- in skeletal muscle of endurance athletes, effects of L-carnitine, **188**, 102
- Cytochrome P450
- IA1
- coexpression with oxidoreductase in *Saccharomyces cerevisiae*, associated increase in 7-ethoxyresorufin-O-deethylase activity (human), **185**, 641
- targeting and anchoring into yeast endoplasmic reticulum membrane, sequences controlling, analysis (mouse), **184**, 1490
- IA1, IA2, and IIIA3, mRNA expression in hepatoma cells, down-regulation by interleukin-6 (human), **184**, 960
- IA2, induction by musk xylene (rat), **184**, 149
- 2B4, hydroxylation of ethylbenzene, **189**, 488
- 11B2, encoding gene, point mutations in corticosterone methyl oxidase II-deficient patients: congenitally defective aldosterone biosynthesis **182**, 974; *erratum*, **184**, 1529
- c21, expression in cultured mammalian cells, amplification, **186**, 426
- IID, regulation by acute phase mediators in C3H/HeJ mouse, **182**, 617
- catalysis of N^o-hydroxy-L-arginine oxidation by NADPH and O₂ to NO and citrulline (rat liver), **187**, 880
- catalyzed oxidation of aromatic amidoximes, formation of NO (rat liver), **185**, 452
- clofibrate- and 3-methylcholanthrene-inducible, synthesis of 12(R)hydroxyeicosatetraenoic acid in ciliary epithelium (pig), **187**, 455
- Cyp1a-1 gene, induction in skin, phorbol ester-mediated suppression, role of protein kinase C (mouse), **186**, 970
- E1, alcohol-inducible, mRNA levels, elevation after pyridine administration (rat kidney), **186**, 846
- 7-ethoxyresorufin O-deethylase activity, differential expression in proliferating and quiescent C-10 lung epithelial cells (mouse), **183**, 193
- fused protein with aldosterone synthase activity, encoding by chimeric gene linked to glucocorticoid-suppressible hyperaldosteronism (human), **189**, 885
- LM2(Fe²⁺), -CO complex, high-pressure-induced inactivation (rabbit liver), **188**, 216
- metabolic intermediate complex, identification in hepatic microsomes from beer-fed rats, **189**, 899
- microsomal isozymes, differential oxidase activity after treatment with P450 inducers (rat liver, lung), **187**, 1262
- microsomal systems, ω -hydroxylation of (Z)-9-octadecenoic, (Z)-9,10-epoxystearic, and 9,10-dihydroxy-stearic acids (*Vicia sativa*), **184**, 183
- suppression by interleukin-1 (rat lung), **185**, 1083
- Cytochrome P450_{2B4}
- reconstitution with camphor and linalool monooxygenase electron donors (rabbit), **187**, 310
- Cytochrome P450_{SCC}
- expression and transport into Sf9 mitochondria by baculovirus expression system (bovine), **184**, 471
- Cytokeratins
- homology with lens fiber cell beaded-filament structural protein CP94 (rat), **186**, 190
- Cytokines, *see also specific cytokines*
- activated endothelial cells, supernatants, detection of soluble forms of E-selectin, ICAM-1, and VCAM-1 (human), **187**, 584
- activated monocytes, chemoattraction to platelet-derived growth factor AA homodimers, demonstration (human), **186**, 1510
- effects on interleukin-6 expression and release by normal and transformed bronchial epithelial cells (human), **187**, 596
- gene expression, differential modulation by suboptimal and optimal activation signals (human), **182**, 1172
- induced phosphorylation of pp100, localization at tyrosine residues (murine myeloid cells), **188**, 1040
- inhibiting bone formation and mineralization, differential

Subject Index

- regulation of phospholipase A₂ (rat calvarial cells), **188**, 1047
- KC, cDNA cloning and mRNA expression in pulmonary macrophages and fibroblasts (rat), **184**, 922
- and lipopolysaccharide, induction of macrophage-type nitric oxide synthase in retinal pigmented epithelial cells (bovine), **186**, 854
- regulation of endothelin-1 synthesis in cultured airway epithelial cells (guinea pig), **186**, 1594
- Cytomegalovirus
- infectivity, inhibition by human recombinant heparin-binding proteins HBNK and MK, **189**, 1189
- Cytoplasmic spreading
- osteoclastic, role of Na⁺/H⁺ antiporter (rat), **188**, 1097
- Cytosine
- and tryptophan, interaction with guanine base, spectroscopic study: molecular recognition by hydrogen bond pairing and aromatic stacking, **183**, 577
- Cytoskeleton
- fibroblast, phorbol ester-induced reorganization during aging *in vitro* (human), **182**, 1423
- Cytosolic factors
- facilitation of dissociation of complexes between 70-kDa stress proteins and presecretory proteins (yeast), **189**, 1150
- stimulation of GTPase activity of rap2A protein (bovine brain), **189**, 455
- Cytotoxicity
- immunoconjugates containing blocked ricin, analysis (human lymphoid and lung carcinoma cells), **183**, 758
- IMP dehydrogenase inhibitor benzamide riboside to myelogenous leukemia K562 cells (human), **186**, 1600
- tiazofurin and difluorodeoxycytidine in human and rat tumor cells, synergism, **184**, 551
- tumor necrosis factor- α
- in endothelial cells, mediation by nitric oxide (bovine), **186**, 475
- mediation by lipoxygenase metabolites of arachidonic acid (human, mouse), **188**, 538
- D**
- Daidzein
- blockade of calcium channel currents in vascular smooth muscle cells (rabbit), **189**, 1620
- 4-DAMP
- noncompetitive antagonism of muscarinic receptor-mediated Ca²⁺ mobilization (human), **189**, 919
- Dansylcadaverine
- leaving group, detection, in continuous monitoring of amide bond cleavage, **186**, 334
- Dantrolene
- inhibition of [³H]PN200-110 binding to skeletal muscle dihydropyridine receptors (pig), **187**, 894
- Daunomycin, *see* Daunorubicin
- Daunorubicin
- sensitivity of HIV-1 and -2 reverse transcriptase to inhibition by, comparison, **185**, 370
- DDT
- effects on nuclear poly(ADP-ribose) polymerase transcript levels and enzymatic activity in carcinogen-initiated hepatocytes (neonatal rat), **182**, 1066
- Decorin
- core protein fragments, interaction with type I collagen, **189**, 165
- Defense responses
- phenylpropanoid, elicitation, increase in parsley suspension cells after methyl jasmonate conditioning suspension cells, **189**, 304
- Dehalogenation
- reductive, tetrachloro-*p*-hydroquinone by *Flavobacterium* extracts, identification of glutathione as reducing agent, **182**, 361
- Dehydration
- reversible, β -cyclodextrin $\cdot$ 12 H₂O to β -cyclodextrin $\cdot$ 10.5 H₂O under ambient conditions, **188**, 1060
- Dehydrogenation
- NADH, quinone-dependent, in mitochondria-related particles (*Setaria digitata*), **186**, 698
- Delta cells
- islet amyloid polypeptide in, determination of parallelism and dissociation between pancreatic IAPP and insulin content (rat), **182**, 886
- Deltorphin I
- and dermenkephalin, aspartic acid in, effect on targeting to δ -opioid receptor (rat brain), **187**, 1203
- Dental pulp cells
- clonal, RDP4-1 and RPC-C2A, synthesis and secretion of osteopontin (rat), **189**, 892
- Deoxycycline
- selective inhibition of endothelial growth (bovine, pig), **188**, 740
- Deoxycytidine kinase
- selective assays in cell and tissue extracts (human), **188**, 712
- 2-Deoxyglucose
- sensitivity of adriamycin-resistant small cell pulmonary carcinoma cell line (human), **182**, 877
- transport in skeletal muscle, basal and insulin-stimulated, effect of sphingoid bases (rat), **188**, 358
- uptake in neuroblastoma cells, inhibition by pentobarbital, role of hexokinase suppression, **184**, 673
- 2'-Deoxyguanosine-5'-phosphate
- valence electronic properties, UV photoelectron and theoretical characterization, **184**, 16
- Deoxyribonuclease I
- interaction with chimeric actin carrying N-terminal portion of *Tetrahymena* actin, **184**, 1511
- serum, functional characterization in MRL-^{lpr}/lpr mouse, **186**, 739
- transcription-dependent hypersensitive site in far upstream segment of α -globin gene domain, coincidence with matrix attachment region (chicken), **184**, 1226
- Deoxyribonucleoprotein
- histones H1 and H3 and DNA in, photo-induced cross-linking (bovine), **187**, 261
- Deoxyribose
- C-1' hydrogen abstraction in DNA strand scission by dynemicin A, **188**, 584
- Dephosphorylation
- auto-, insulin receptor tyrosine kinase domain, **189**, 1457

Depolarization

- induced calcium release from sarcoplasmic reticulum *in vitro*, characterization with membrane potential probe (rabbit), **184**, 538

Depudecin

- induced production of flat phenotype in *ras*-transformed murine fibroblasts, **182**, 379

Dermenkephalin

- and deltorphin I, aspartic acid in, effect on targeting to δ -opioid receptor (rat brain), **187**, 1203

Desaturation

- in sphingolipid biosynthesis in cultured cells, analysis, **189**, 14

Desferal

- complexes with Cu(II), Ni(II), and Co(III), cleavage of plasmid DNA, **182**, 588

Detergents

- octyl glucoside, renaturation of cerebral myelin proteins (human), **189**, 1534

Deuterium

- hydrogen isotope, effect in oscillating peroxidase-oxidase reaction, **186**, 612

Deuterium oxide

- effect on plasmalemma ATPase and electron transport-coupled proton pumping (maize), **182**, 870

Development

- associated changes in cytosolic phospholipase A_2 in rat brain, **185**, 350
- associated expression of
 - S*-adenosylmethionine decarboxylases and ornithine decarboxylase in brain (mouse), **184**, 1114
 - DRG* gene (mouse), **189**, 371
 - mRNAs from C-erbA genomic locus (rat), **184**, 739
 - vascular smooth muscle PDGF-A chain gene transcript regulation (rabbit), **184**, 811
- early embryonic, role of calcitonin gene-related peptide: studies with F9 teratocarcinoma cells, **187**, 381
- GTP-binding protein *DRG* regulated during, characterization (murine brain), **189**, 363
- preimplantation, associated expression of glucose transporter GLUT1 in oocytes and embryos (mouse), **188**, 8

Dexamethasone

- effect on expression of osteocalcin gene in tibia *in vivo* (rat), **189**, 1231
- induced thymocyte apoptosis, early gene expression during, analysis (rat), **188**, 1261

Dextranucrase

- catalytic site, molecular genetic analysis (*Streptococcus mutans*), **189**, 1184
- cell-associated, gene cloning and expression in *E. coli* (*Streptococcus mutans*), **187**, 1432

Diabetes

- affected liver, post-transcriptional regulation of insulin-like growth factor binding protein-2 (rat), **189**, 1031
- related status of Ca^{2+} channels and adrenoceptors in skeletal muscle, analysis (rat), **184**, 353
- streptozocin-induced
 - associated plasma post-heparin diamine oxidase and plant sterol levels (rat), **186**, 398
 - myocardium in affected rats, altered protein kinase C

activity, **187**, 703

Diacylglycerol

- and Ca^{2+} , role in GnRH inhibition of FSH-induced steroidogenesis in ovarian granulosa cells (rat), **188**, 198
- effects on farnesol inhibition of leukemia cell growth (human), **186**, 543
- formation from phosphatidylcholine in angiotensin II-stimulated vascular smooth muscle cells (rat), **187**, 1460
- increased metabolism in oncogene-transformed cells, correlation with resistance to ionizing radiation (murine fibroblasts), **183**, 652
- mass levels in HIV-infected CEM cells, **187**, 209
- production in pancreatic acinar cells, associated triacylglycerol lipase, stimulation by carbachol (rat), **184**, 626
- role in germ cell-mediated stimulation of Sertoli cells (rat), **184**, 217

sn(1,2)Diacylglycerol

- masses in freshly isolated hepatocytes, effects of epidermal growth factor and vasopressin (rat), **187**, 1055

4',6-Diamidino-2-phenylindole

- effect on
 - bleomycine-catalyzed site-specific DNA cleavage, **183**, 292
 - higher-order structure of DNA, fluorescence microscopic analysis, **188**, 1274

Diamine *N*-acetyltransferase

- gene structure (human), **187**, 1493

Diamine oxidase, *see* Amine oxidase

Diaminovaleric acids

- (*S*)- and (*R*)-, enantioselective role in formation of δ -aminolevulinic acid in cyanobacteria, **185**, 60

Diazoxide

- inhibition of regulatory effects of somatostatin and growth hormone-releasing factor on GH secretion (rat), **187**, 1007

Dibutyl cyclic AMP

- effect on epidermal growth factor receptor expression in chondrocytes (rabbit), **183**, 14

2,2-Dichloro-1,1,1-trifluoroethane

- transient protein adduct formation in heart after single dose exposure (rat), **184**, 1344

Dictyostelium discoideum

- cell adhesion molecule contact site A, sialic acid in, detection, **188**, 794
- extracts, absence of serine/threonine protein phosphatase type 1, **184**, 1142
- metabolism of halogenated bisphosphonates, **189**, 414
- receptor-stimulated guanylyl cyclase, inhibition by intracellular Ca^{2+} , **186**, 263

Diet, *see also* Fasting

- caloric-restricted, effects on age-related decreases in fidelity of DNA polymerases and DNA excision repair (mouse), **182**, 712
- essential fatty acid-deficient, effect on phospholipid composition in anterior pituitary membranes (rat), **183**, 1047
- high-carbohydrate, for refeeding after fasting, modulation of apolipoprotein B mRNA editing *in vitro* (rat), **183**, 899
- high-fat, modulation of apolipoprotein B mRNA editing in liver (mouse), **188**, 135
- selenium-deficient, association with differential regulation

Subject Index

- of hepatic selenoprotein mRNAs (rat), **185**, 260
- Diethylstilbestrol
induced renal tumors, membrane phosphoproteins, enhanced tyrosine phosphorylation (hamster), **186**, 228
- Differentiation
adipocyte precursors in primary culture, inhibition by prostaglandin $F_{2\alpha}$ (rat), **183**, 438
astrocytes, endothelin-1 effects: role of ET_B receptor expression (rat), **186**, 355
BC3H-1 muscle cells, induction and peak gene expression of insulin-like growth factor II and myogenin during, analysis (mouse), **183**, 1084
breast tumor cells, induction by okadaic acid and related protein phosphatase 1 and 2A inhibitors (human), **189**, 1261
caivalar cells, role of 5'-methylthioadenosine (rat), **182**, 817
cellular, regulation of GLUT3 facilitative glucose transporter in L6 muscle cells (rat), **186**, 1129
embryonal carcinoma cell lines
associated expression of complement component and receptor mRNAs, **189**, 863
P19, differential expression of non-receptor protein-tyrosine-phosphatase (mouse), **184**, 1241
enterocytic, correlation with expression of soluble and cell-bound $\alpha_2,6$ sialyltransferase in colonic carcinoma CaCo-2 cells (human), **184**, 1405
epidermal cells, associated changes in fucosyltransferase (newborn rat), **189**, 27
erythroid, induction by interleukin-2 in ELM-I-1 cells transfected with human IL-2 receptor β chain cDNA, **188**, 352
erythroleukemia cells
to erythroid cells, induction by activins and enhancement by retinoic acid (mouse), **187**, 347
HEL, leukotriene- C_4 synthase induction during, analysis (human), **189**, 1043
hematopoietic cells, role of heat shock protein 70 (human), **183**, 733
HL-60 cells
associated alkaline phosphatase activity (human), **182**, 487
induction by
activin/erythroid differentiation factor, **187**, 79
retinoic acid isomers and oxidized analogs (human), **189**, 1136
synergistic induction by tiazofurin and difluorodeoxycytidine, **184**, 551
monocytic, differential expression of 33- and 36-kDa forms of annexin 3 during, analysis (human), **189**, 1471
multipotent leukemic and colon adenocarcinoma cells, effects on *hsp60*/chaperonin gene expression (human), **186**, 371
neuroblastoma cell lines
modulation of B-cell-associated tyrosine kinase gene *lyn* during, analysis (human), **186**, 1403
N1E-115, effect of cell growth inhibition by *c-myc* or *N-myc* antisense oligodeoxynucleotides (mouse), **185**, 915
osteoblast-like cells *in vitro*, stimulation by estrogen and progesterone (human), **186**, 54
relationship to protein kinase C mRNA levels and activity in reconstituted normal epidermis (human), **184**, 283
terminal, preadipocytes, role of collagens (mouse), **187**, 1314
Differentiation inhibiting factor
for M1 cells, amino acid sequence identity with Nm23/-nucleoside diphosphate kinase (mouse), **182**, 987
Diffusion
facilitated, pyruvate across plasma membrane of *Trypanosoma brucei* bloodstream form, role of carrier, **184**, 1028
Difluorodeoxycytidine
and tiazofurin, synergistic effects on differentiation and cytotoxicity in tumor cells (human, rat), **184**, 551
 α -Difluoromethylornithine, *see* Eflornithine
Digitalis
related immunoreactive substances, identification and preliminary characterization (human), **188**, 1024
Digitonin
permeabilized adrenal medullary chromaffin cells, catecholamine secretion, role of calmodulin (bovine), **186**, 1006
Digoxin
cardiac glycoside, transport, mediation by P-glycoprotein (CHO cells), **189**, 551
digitalis-like immunoreactive substances structurally related to, identification and preliminary characterization (human), **188**, 1024
Dihydroceramide
desaturation during sphingolipid biosynthesis in cultured cells, **189**, 14
Dihydropyridine
binding sites in adult brain, biochemical characterization (chicken), **182**, 947
sensitive channels linked to protein kinase C activation in vascular smooth muscle cells, Ca^{2+} influx through, enhancement by glucocorticoids (rat), **188**, 934
1,4-Dihydropyridine
selective acceptor site in P-glycoprotein allosterically coupled to vinca alkaloid-binding site (human), **188**, 440
Dihydropyridine receptors
skeletal muscle, binding of [3H]PN200-110, inhibition by dantrolene and azumolene (pig), **187**, 894
Dihydropyrimidine dehydrogenase (NADP $^+$)
NADPH oxidation, stereochemistry (porcine liver), **182**, 609
Dihydrothiophene sulfoxide mercapturic acid
formation from thiophene: identification of thiophene-S-oxide as primary reactive metabolite *in vivo*, **186**, 1624
1,25-Dihydroxycholecalciferol
attenuation of thyrotropin-stimulated iodide accumulation in FRTL-5 cells by reduction of iodide porter number, **182**, 1435
effects on phosphoinositide turnover in antipodal plasma membranes of colonic epithelial cells (human, rat), **187**, 1128
3,5-Dihydroxy-B-norcholestane-6-carboxaldehyde
evaluation as biomarker for ozone exposure (rat), **188**, 618
3,4-Dihydroxyphenylserine
activation to noradrenalone via sequential stereoselective action of tandem target enzymes, **189**, 33

- 9,10-Dihydroxystearic acid
 ω -hydroxylation by microsomal cytochrome P450 system (*Vicia sativa* seedlings), **184**, 183
- 1,25-Dihydroxyvitamin D₃
 effects in kidney: induction of calmodulin-binding proteins (rat), **185**, 636
- 1 α ,25-Dihydroxyvitamin D₃
 effect on leukotriene-C₄ synthase induction in differentiating erythroleukemia cells (human), **189**, 1043
 effect on expression of osteocalcin gene in tibia *in vivo* (rat), **189**, 1231
- 1 β ,25-Dihydroxyvitamin D₃
 identification as antagonist of 1 α ,25-dihydroxyvitamin D₃-stimulated transcaltachia (chicken), **189**, 1450
- 1,25-Dihydroxyvitamin D₃ receptors
 functional, expression of milligram amounts in bacterial expression system (human), **189**, 1417
 gene expression, regulation by parathyroid hormone and cAMP-agonists in UMR 106 cells (rat), **185**, 881
 vitamin K-dependent γ -carboxylation, evaluation (chicken), **189**, 1543
- 4,4'-Diisothiocyanatostilbene-2,2'-disulfonic acid
 stimulation of tumor necrosis factor- α production in lymphocytes (human), **189**, 1268
- Dilatation
 poststenotic, carotid artery, associated neointimas and media, phenotype of accumulating smooth muscle cells (rabbit), **185**, 459
- Diltiazem
 effect on endothelin-1 monocyte chemotaxis (human), **189**, 994
- Dimethylamiloride
 effects on osteoclastic bone resorption kinetics and cytoplasmic spreading (rat), **188**, 1097
- Dimethylnitrosamine, *see* N-Nitrosodimethylamine
- Dimethyl sulfoxide
 ATP synthesis in, effect on adenine nucleotide content of mitochondrial F₁ ATPase (bovine heart), **182**, 697
 effect on leukotriene-C₄ synthase induction in differentiating erythroleukemia cells (human), **189**, 1043
- 3-(4,5-Dimethylthiazol-2-yl)-2,5-diphenyltetrazolium bromide
 succinate-dependent mitochondrial reduction in 32D cells, inhibition by calphostin C, mechanism (mouse), **185**, 806
- 4,4-Dimethylzymosterol
 accumulation in *Saccharomyces cerevisiae* treated with 6-amino-2-n-pentylthiobenzothiazole, **189**, 85
- 1,2-Dioctanoylglycerol
 induction of p34^{cdc2} histone H1 kinase stimulation in Swiss 3T3 fibroblasts (mouse), **188**, 1084
- 2,3(S);22(S),23-Dioxidosqualene
 and 2,3(S)-oxidosqualene, specificity of lanosterol synthase for, comparison, **188**, 898
- Dioxygenation
 catalyzed by lipoxygenase isolated from hairy root cultures, identification of 11-hydroperoxyeicosatetraenoic acid as major product (*Solanum tuberosum*), **189**, 1349
- Dipeptides
 ubiquitin-mediated protein turnover inhibitors, prevention of growth factor-induced neurite outgrowth in PC12 cells (rat), **189**, 280
- Dipeptidyl-peptidase IV
 with mutations at active site sequence, cell-surface expression in transfected COS-1 cells (rat), **185**, 776
- Disialotransferrin
 serum, in carbohydrate-deficient glycoprotein syndrome, structural analysis (human), **189**, 832
- Distamycin A
 enhancement and alteration of bleomycine-catalyzed site-specific DNA cleavage, **183**, 292
- Disulfide bonds
 Cys250-Cys283, functional role in chymosin (bovine), **187**, 692
 intrachain, formed by cystein residue in tropoelastin carboxyterminal domain, stabilization of loop structure and positively charged pocket, **186**, 549
- Disulfide bridges
 connecting α -subunits of extracellular domain of insulin receptor, identification (human), **189**, 650
- Disulfonates
 inhibition of HIV-1 proteinases, **188**, 624
- 5,5'-Dithiobis-(2-nitrobenzoic acid)
 Ca²⁺-sensitive reduction by mitochondria (rat liver), **184**, 1088
- Dithiothreitol
 inactivation of purified phenylalanine hydroxylase *in vitro* (rat liver), **182**, 92
 oxidation during nitric oxide reductase turnover: nitroxyl generation (*Paracoccus denitrificans*), **183**, 983
- Dityrosine
 formation, effect of tyrosine phosphorylation, **188**, 252
- Diuresis
 hypervolemia-induced, effects of HS-142-1 in anesthetized rat, **182**, 824
- DNA
 α A-crystallin lens-specific, motif 1 enhancer, interaction with nuclear factor α CEF1: identification of contact sites (chicken), **184**, 24
 AT sequences, selective binding by acridine-linked peptide with SPKK motif, **184**, 930
 avian species-specific tandem repeats with nuclear protein binding sites, identification and analysis, **182**, 447
 bent, highly repetitive, affinity for nuclear scaffold proteins (rat liver), **184**, 853
 binding affinity of optomotor-blind and protein domain conserved between *Drosophila melanogaster* and mouse, **186**, 918
 binding by
 bis-pyridinium oximes, role in mitochondrial dysfunction in yeast, **186**, 1567
 Ku protein, mechanisms (HeLa cells), **186**, 574
 poly ADP-ribose polymerase, inhibition by protein kinase C-catalyzed phosphorylation, **187**, 730
 binding factors interacting with Sp1 site of δ 1-crystallin promoter, developmental regulation (embryonic chicken lens), **183**, 659
 binding and integration, role of HIV-1 integrase N-terminal region, **185**, 874

Subject Index

- binding proteins
 interaction with potential c-abl intron regulatory element, inhibition by methylation (mouse), **186**, 1515
 sequence-specific, local similarities to amyloid precursor protein (mouse), **189**, 1336
- binding region of *Sry*, amino acid change, role in C57BL/6J-Y^{DOM} sex-reversal (mouse), **185**, 310
- bleomycin-catalyzed site-specific cleavage, enhancement and alteration by distamycin A and minor groove binders, **183**, 292
- B to Z conformational transition, analysis: UV photoelectron and theoretical characterization of 2'-deoxyguanosine-5'-phosphate valence electrons, **184**, 16
- CAG repeats, number in androgen receptor gene in families with X-linked spinal and bulbar muscular atrophy, detection by primer extension method, **182**, 507
- CD44 transcriptional unit, internal exons, alternative splicing: generation of epithelial CD44 isoform (human), **182**, 569
- cellular, photosensitized formation of 8-hydroxydeoxyguanosine by riboflavin (murine lymphoma cells), **187**, 809
- chloroplast, membrane attachment: chromosome binding to thylakoid membrane in inverted repeat region, **184**, 993
- cisplatin-damaged, binding of high mobility group protein, characterization (bovine), **188**, 1286
- cisplatin monoadducts, *in vitro* evolution into diadducts, effect of superhelical density, **189**, 111
- cleavage by hydroxyl radicals generated in vanadyl ion-hydrogen peroxide system (rat), **189**, 1090
- clone expressing *Plasmodium vivax* recombinant antigen with apolipoprotein B-100-like sequences, **184**, 668
- complementary
 A1 adenosine receptor, cloning and functional characterization (human), **187**, 919
Acacia confusa trypsin inhibitor, nucleotide sequence and implications for post-translation processing, **184**, 1524
 acetyl CoA:deacetylcephalosporin C *O*-acetyltransferase, cloning, nucleotide sequence and expression in yeast (*Acremonium chrysogenum*), **182**, 995
 acidic seminal fluid protein, cloning and characterization (bovine), **183**, 232
- activin receptor
 molecular cloning and characterization (rat), **183**, 672
 type II, molecular cloning (human), **184**, 310
- adenosine receptor
 A2b, cloning and expression (human brain), **187**, 86
 RA2, cloning (rat brain), **185**, 304
- adenosylmethionine decarboxylase, cloning (mouse), **189**, 424
- Ah receptor, cloning and structure (mouse), **184**, 246
- alcohol/hydroxysteroid sulfotransferase, cloning and sequencing (human liver), **187**, 448
- Alzheimer amyloid protein precursor, transfected glioma cells, APP processing, effects of protease inhibitors (human), **187**, 1249
- angiotensin II receptor type 1
 AT_{1B} subtype, characterization (rat kidney), **185**, 204
 cloning and characterization (human), **183**, 989
 cloning, expression, and sequence analysis (human liver), **183**, 910
 differential tissue expression and hormonal regulation (rat pituitary), **183**, 1090
- antifreeze protein, type II, structural and functional comparison to Ca-dependent lectins (fish liver), **185**, 335
- aromatase, tissue-specific exons 1, alternative use in fibroblasts (human), **189**, 1001
- BK-2 bradykinin receptor, cloning and sequencing (human lung fibroblasts), **184**, 260
- bradykinin-B₂ receptor, functional expression in pulmonary fibroblasts (hamster), **188**, 786
- calbindin-D9K, cloning and chromosomal assignment (human), **185**, 663
- calcineurin B isoforms β 1 and β 2, cloning and sequencing (mouse), **187**, 537
- calcyclin-associated annexin protein CAP-50, molecular cloning (rabbit), **186**, 1227
- cascin kinase II α , genomic loci related to, identification and characterization of pseudogene within genome (mouse), **186**, 723
- CHIP28 water channel, isolation, sequencing, and expression in renal cortex and inner medulla (rat), **188**, 1267
- cholecystokinin receptor, cloning: structure, functional expression, and chromosomal localization (human), **189**, 296
- cholesterol 7 α -hydroxylase, cloning and sequencing (human), **185**, 588
- collagen, type VII, cloning and characterization (human), **183**, 958
- COUP transcription factors, isolation (bovine ovary), **189**, 496
- cystathionine γ -lyase, cloning and nucleotide sequence (human liver), **189**, 749
- cytochrome *b*₅, molecular cloning: detection of separate genes encoding soluble and microsomal forms (rabbit), **185**, 845
- cytoplasmic protein-tyrosine phosphatase, PTPG1, cloning and characterization (human), **189**, 1223
- dopamine β -hydroxylase, cloning and application in deduction of gene structure (mouse), **189**, 590
- DRG-encoded developmentally regulated GTP-binding protein, characterization (murine brain), **189**, 363
- eclosion hormone, nucleotide sequence and expression in brain (*Bombyx mori*), **182**, 514
- endothelial tyrosine kinase and platelet-derived growth factor receptor, homology (rat), **000**, 706
- extracellular signal-regulated kinase 1 and ERK2 from T cells, characterization (human), **182**, 1416
- α -fetoprotein, variant, characterization (rat), **185**, 648
- FK506- and rapamycin-binding protein
 isolation (human), **185**, 298
 25-kDa, from human hippocampus, **184**, 733
- fml-2 cell large mitochondrial rRNA (goldfish), **189**, 445
- 14-3-3 protein, cloning and sequencing: evolutionary analysis (*Xenopus laevis*), **184**, 1456
- α -1,3 fucosyltransferase capable of forming E-selectin ligand, cloning and expression (human), **187**, 152
- β -1,4-galactosyltransferase clone, isolation from embry-

- onic chicken brain and comparison to mammalian homologs, **189**, 1215
- gastrin receptor from ECL carcinoid tumor, cloning and sequencing (mouse), **187**, 1151
- glutamate receptor channel subunit $\delta 1$, molecular cloning and deduced amino acid sequence (mouse), **183**, 886
- γ -glutamylcysteine synthetase, full-length, cloning and nucleotide sequence (human liver), **185**, 29
- gonadotropin-releasing hormone receptor
from human pituitary, isolation and expression, **189**, 289
from rat pituitary, isolation and characterization, **189**, 1645
- G protein β -subunit G $\beta 4$ (mouse), **183**, 350
- granulocyte N-formyl peptide receptor, isolation (human), **184**, 582
- GTP cyclohydrolase I, multiple forms, cloning and sequencing (human), **187**, 359
- guanylin, cloning and characterization (rat), **185**, 812
- H⁺-ATP synthase subunit d, cloning and sequencing (rat mitochondria), **182**, 1130
- heparan sulfate proteoglycan, cloning and sequencing (rat brain), **188**, 395
- hippocalcin, isolation, **189**, 511
- interleukin-2 receptor β chain, transfected ELM-I-1 cells, IL-2-induced erythroid differentiation and Tyr phosphorylation (human), **188**, 352
- indolicidin, cloning and sequencing (bovine), **187**, 467
- insulin-like growth factor binding protein complex acid-labile subunit, cloning (rat liver), **188**, 304
- insulin receptor-related receptor, isolation from brain and preferential expression in kidney (rat), **187**, 934
- insulin receptor substrate-1-like, cloning (human), **183**, 280
- interleukin-10 clones from RNA of cultured OX27⁺ OX22⁺ thoracic duct T cells, synthesis and characterization (rat), **189**, 1
- intracellular protein-tyrosine phosphatase, cloning, nucleotide sequence, and expression (murine testis), **185**, 818
- isoaspartyl protein carboxyl methyltransferase: alternative mRNA splicing (human), **185**, 277
- KC, cloning and mRNA expression in pulmonary macrophages and fibroblasts (rat), **184**, 922
- laminin receptor, cloning and genomic analysis: phylogeny and expression profiles (human), **184**, 1165
- leukocyte common antigen-related phosphatase, cloning and sequencing (rat), **188**, 34
- lens fiber cell beaded-filament structural protein CP94, sequence homology with cytokeratins (rat), **186**, 190
- lung-type prostaglandin-F synthase expressed in bovine liver, sequence and expression in *Escherichia coli*, **183**, 1238
- lysosomal sialoglycoprotein hLGP85 from metastatic islet tumor cell line, isolation and sequencing (human), **184**, 604
- major hemoglobin component from *Paramecium caudatum*, molecular cloning, **182**, 195
- mitochondrial NADH dehydrogenase subunit 2-related, from Alzheimer's brains, detection of point mutations in codon 331, **182**, 238
- MUC1 gene, full-length, expression product in transfected murine epithelial cells, lack of cytoplasmic tail (human), **185**, 1
- murine schwannoma-derived growth factor homolog, cloning and sequencing, **185**, 103
- neurocalcin, isolation and characterization (bovine brain), **185**, 147
- neurofibromatosis type 1 protein isoform lacking domain related to ras GTPase-activating protein, cloning (human), **187**, 984
- neurokinin-3 receptor, deduced amino acid sequence and heterologous expression (human), **184**, 966
- neuron-specific HPC-1 antigen, cloning and sequencing (bovine brain), **187**, 1144
- NHP1 protein containing HMG-Box, characterization (*Babesia bovis*), **184**, 31; *erratum*, **185**, 800
- NK-1 receptors, isolation from lung and characterization (human), **180**, 1110; *erratum*, **182**, 1514
- non-receptor protein-tyrosinephosphatase from P19 embryonal carcinoma cells, cloning and differential expression (mouse), **184**, 1241
- pancreatic triglyceride lipase, molecular cloning and characterization (rabbit), **188**, 964
- pBUS19 and pBUS30, retrovirus-related, overexpression in advanced prostatic tumors (rat), **182**, 318
- PDGF-A chain isoforms, isolation and characterization (rabbit aorta), **184**, 811
- pheromone biosynthesis activating neuropeptide, cloning and nucleotide sequence (silkworm), **189**, 221
- pigment dispersing hormone precursor, molecular cloning and sequencing (crab), **189**, 1509
- plasminogen-related gene PRG B, sequencing (human), **186**, 1108
- platelet-activating factor receptor gene expressed in heart, molecular cloning and characterization (human), **189**, 617
- PMP-22 protein from fetal spinal cord, isolation and sequence determination (human), **186**, 827
- potassium channel from heart, cloning (rat), **184**, 1484
- preendothelin-3, cloning and expression (rat), **186**, 588
- prolactin receptor, sequencing: deduction of double antenna structure (chicken), **188**, 490
- prostaglandin endoperoxide synthase, cloning (human platelets), **182**, 433
- prostatic acid phosphatase, clone isolation and sequencing (human), **184**, 1468
- protein phosphatase inhibitor-2, PCR cloning (rabbit skeletal muscle), **186**, 1168
- 6-pyruvoyltetrahydropterin synthase, cloning (human liver), **189**, 1437
- recoverin, isolation (human retina), **187**, 234
- ribosomal protein L11, deduced amino acid sequence (rat), **185**, 356
- ribosomal protein S25, primary structure (rat), **186**, 1688
- RNase superfamily-related gene highly expressed in chicken bone marrow cells, isolation, **185**, 231
- saposin (mouse), **184**, 1266
- single-strand ligation to, in cloning of acidic fibroblast

Subject Index

- growth factor 5' untranslated exons (bovine), **188**, 843
sodium channel, deduced amino acid sequence (squid), **186**, 61
soluble intercellular adhesion molecule 1, cloning and sequencing (human), **185**, 1022
stem cell factor, deletion mutagenesis: C-terminal sequences essential for biological activity *in vitro* (mouse), **188**, 292
thromboxane A₂ receptor, cloning and sequencing (mouse), **184**, 1197
thymosin β_4 , sequence (*Xenopus laevis*), **184**, 93
thyrotropin receptor, transfected rat thyroid cells, malignant transformation (human), **183**, 220
tracheobronchial mucin carboxy terminus, cloning (dog), **189**, 958
transforming growth factor β type III receptors, isolation (human, pig), **189**, 356
transketolase, cloning and partial sequencing (human brain), **183**, 1159
tyrosine kinase *hyk* expressed in embryonic stem cells, sequencing (mouse), **189**, 1747
ubiquitin-activating enzyme E1, complementation of temperature-sensitive X-linked BHK21 cell mutants (human, mouse), **184**, 1015
urinary stone protein, cloning and sequencing: identity with osteopontin (human), **184**, 859
visinin-like Ca²⁺-binding protein, cloning and sequencing (rat brain), **184**, 1219
vascular cell adhesion molecule VCAM1, cloning (mouse, rat), **183**, 163
ventricular, isolation and characterization: specific expression in cardiac and skeletal muscles (rat), **183**, 176
X-linked phosphoglycerate kinase-1, PCR-derived clones, sequencing (tamar wallaby), **187**, 26
degradation in isolated nuclei, quantification by propidium iodide staining (murine thymocytes), **183**, 532
double-stranded antigenic, cloned from plasma immune complexes of systemic lupus erythematosus patient, antibody generation in mouse, **183**, 797
enhancer-promoter elements, Moloney murine sarcoma virus, mediated memory of butyrate-induced transcription state, **189**, 141
excision repair, age-related decrease, effect of caloric restriction (mouse), **182**, 712
fragmentation in retina, association with retinal ganglion cell death (chicken embryo), **183**, 1056
fragments from ancient bone, recovery and identification (human), **183**, 367
gene promoters, *see* Promoters
genomic
 clone GSAA4, isolation: identification of serum amyloid A locus SAA4 as pseudogene (human), **183**, 362
 type X collagen gene coding sequence, PCR amplification and identification of polymorphism changing Gly to Arg at position 545, **187**, 420
H-, tandem, identification in *c-myc* nuclease-sensitive promoter element, **185**, 264
hepatic
 covalent modifications in, detection of circadian rhythm (mouse), **189**, 545
 methylation pattern during compensatory cell proliferation, effect of *N*-methyl-*N*-nitrosourea (rat), **184**, 107
 restoration of hepatic function in transfected dedifferentiated rat hepatoma cells (human), **188**, 531
hepatitis B virus, integration in hepatocellular carcinoma: association with expression of erb-B-like gene (human), **188**, 344
higher-order structure, effects of intercalator and minor groove-binding drugs, **188**, 1274
and histones H1 and H3, photo-induced crosslinking in deoxyribonucleoprotein (bovine), **187**, 261
HIV-1 proviral, synthesis, role of viral proteinase, **179**, 17; *erratum*, **187**, 1200
homologous pairing activities in mammary carcinoma cells, identification (mouse), **185**, 987
human Antioxidant Response Element, complex with murine proteins, identification of jun-B as member of complex, **188**, 992
5-hydroxytryptamine type 1B receptor, cloning: 5-HT_{1D}-like pharmacological specificity (human), **184**, 752
interaction with cationic liposomes: transfection of lentil protoplasts, **186**, 1417
interstrand cross-links, formation in hemoglobin-synthesizing and undifferentiated erythroleukemic cells after cisplatin and carboplatin exposure (mouse), **182**, 760
large restriction fragments, physical ordering in *Staphylococcus aureus* genome with nonspecific primer and PCR generated hybridization probes, **185**, 1055; *erratum*, **187**, 1200
linear, stretched into fibers, hydration, effect of mechanical tension (bovine thymus), **188**, 78
mammalian and viral sequences, interference with maintenance of centromeric vector in yeast, **187**, 737
mammary tumor, 5-fluoro-2'-deoxyuridine incorporation, inhibition by thymidine (mouse), **184**, 467
ME491/CD63 antigen gene 5'-flanking regulatory sequence, promoter activity (human), **185**, 436
mitochondrial
 age-associated oxygen damage and mutations (human heart), **189**, 979
 copy number in tissues, determination with exponential polymerase chain reaction (rat), **183**, 553
 deleted from cirrhotic and tumor portions of liver, quantitative comparison (human), **182**, 913
 detection and copy number determination in spermatozoa (sea urchin), **182**, 1454
 ND-6 l gene mutation associated with Leber hereditary optic neuropathy, analysis (human), **187**, 1551
non-B conformation, supercoil-dependent, adoption by transferrin receptor gene promoter (human), **183**, 62
nuclear, fragmentation by serum DNase I, analysis (MRL-^{lpr/lpr} mouse), **186**, 739
nucleosomal, pyrimidine dimer-containing, XPD cell DNA endonuclease complex defective in incising, isolation (human)
oriented fibers, cisplatin-induced alterations studied by atomic force microscopy, **182**, 201
plamid, *see* Plasmids
poly(dA-dT), B-Z transition, inhibition by 9-amino-

- acridine, **185**, 110
- poly(dA-dT.ip⁵dU) analog with various amounts of 5-isopropyl-2'-deoxyuridine, structure, **185**, 96
- P1 protein affinity for, enhancement by phosphate groups in P1 (HeLa cells, rat liver), **185**, 1091
- protein interaction, methylation-sensitive, at cell cycle regulatory domain of thymidine kinase promoter (human), **189**, 480
- repair gene XRCC1, alterations in expression and structure (human), **186**, 900
- replicated in UV-irradiated *Escherichia coli*, daughter strand gaps in leading and lagging strands, size measurement, **184**, 1496
- response elements, binding of Ear3/COUP-TF, **183**, 492
- single-stranded, in *roIC* gene 5'-upstream region, interaction with nuclear proteins of cultured carrot cells, **188**, 727
- single template, three ribozymes transcribed from, cleavage of hepatitis B virus RNA, **189**, 743
- strand scission
- by dynemicin A, associated abstraction of C-1' hydrogen of deoxyribose (*Escherichia coli*), **188**, 584
 - by elsamycin A, product analyses (*Escherichia coli*), **186**, 580
 - at 8-hydroxyguanine residue by hot piperidine treatment, **188**, 1
- Streptomyces* temperate bacteriophage R4, cohesive end site, delimitation, **186**, 1663
- supercoiling, effect on assembly of transcriptionally active chromatin on adenovirus major late promoter, **186**, 963
- thymidine incorporation, effect of lysolecithin (rat vascular smooth muscle cells), **183**, 156
- transposons and plasmids, conjugal transfer from *Escherichia coli* into *Porphyromonas gingivalis*, **186**, 1012
- tumor cell, binding activities of interleukin-1, IL-1 receptors, and IL-1/IL-1 receptor complexes (human, mouse), **187**, 1166
- tumor necrosis factor-induced apoptotic fragmentation in vascular endothelial cells, role of phospholipase A₂ (bovine), **188**, 1312
- DNA-directed DNA polymerase
- α isoform, regulation by calmodulin during proliferative activation of NRK cells (rat), **184**, 1517
 - α and β isoforms, fidelity, age-related decrease, effect of caloric restriction (mouse), **182**, 712
 - α , β , and γ isoforms, inhibition by tripeptide derivative protease inhibitors (rat liver), **185**, 1133
 - related activity of duck hepatitis B virus polymerase produced by *in vitro* transcription and translation, **189**, 1170
- DNA-directed RNA polymerase
- sigma subunit, region 2.2 peptide antibodies, cross-reacting *Escherichia coli* proteins, **184**, 634
- DNA endonuclease
- complex defective in incising pyrimidine dimer-containing nucleosomal DNA in XPD cells, isolation (human), **189**, 782
- DNA polymerase, *see* DNA-directed DNA polymerase
- DNA polymorphisms
- angiotensin I-converting enzyme gene, association with essential hypertension (human), **184**, 9
- apolipoprotein B, XbaI-, EcoRI-, and VNTR region 3'-associated, analysis in hepatoma-derived cell lines (human), **183**, 1224
- detection in cholesterol 7 α -hydroxylase cDNA (human), **185**, 588
- DNA probes
- species-specific satellite, in differential staining of chromatin *in situ* via hybridization (human, mouse), **182**, 1313
- Y chromosome, isolation and characterization (human), **189**, 581
- DNase-I, *see* Deoxyribonuclease I
- DNA synthesis
- in hepatocytes in primary culture, mitogenic activity of human hepatocyte growth factor, effects of protein kinase inhibitors (rat), **185**, 22
 - in hepatoma cells, enhancement by tumor necrosis factor α -mediated hepatocyte-Kupffer cell-conditioned media (rat), **183**, 1147
 - in MCF-7 cells, inhibition by transforming growth factor- β_1 , association with inhibition of p53 protein phosphorylation and cytoplasmic translocation, **183**, 1175
 - in renal epithelial and mesangial cells, stimulation by hepatocyte growth factor (rat), **182**, 960
 - in vascular smooth muscle cells
 - effect of platelet-derived growth factor AA homodimer in normal and spontaneously hypertensive rats, **188**, 524
 - inhibition *in vitro*, correlation with C-type natriuretic peptide stimulation of cGMP production (rat), **183**, 964
- DNA topoisomerase
- gene expression in camptothecin-11 acquired- and native-resistant tumor cells (human), **184**, 618
- DNA topoisomerase I
- nuclear, heat stress, protective effect of thermotolerance induction in T cells, **186**, 166
- Docosahexaenoic acid
- supplementation of cardiomyocytes, effect on protein kinase C (rat), **183**, 893
- n*-Dodecylphosphorylcholine
- mode of interaction with bovine pancreatic phospholipase A₂, X-ray crystallographic analysis, **187**, 821
- Domoic acid
- neuroactive, conformational features: X-ray structural comparison with isodomoic acid A and α -kainic acid, **187**, 325
- DOPA decarboxylase, *see* Aromatic-L-amino-acid decarboxylase
- Dopamine β -hydroxylase, *see* Dopamine β -monooxygenase
- Dopamine β -monooxygenase
- interaction with chromaffin granule membrane lipids (bovine), **188**, 678
 - primary structure deduced from cDNA and gene exon/intron organization (mouse), **189**, 590
 - stereoselective action in tandem with L-aromatic amino acid decarboxylase, in activation of adrenergic pro-drug, **189**, 33
- Dopamine receptors
- D₁, role in muscarinic M₂ receptor-mediated catecholamine secretion in adrenal medulla (cat), **183**, 1019
 - D₂, monoclonal antibody, production and characterization

Subject Index

- (rat), **184**, 661
- Dormancy
- cell survival during, genes involved in, protective effect against oxidative stress (*Escherichia coli*), **188**, 1054
- Doxorubicin
- resistance development, role of P-glycoprotein expressed in multidrug-resistant HOB1 lymphoma cells (human), **189**, 92
 - resistant cells
 - HL60, overexpression of gene encoding vacuolar H⁺-ATPase subunit C (human), **182**, 675
 - small cell pulmonary carcinoma, sensitivity to mitochondrial inhibitors (human), **182**, 877
- Doxycycline
- sensitivity of adriamycin-resistant small cell pulmonary carcinoma cell line (human), **182**, 877
- Drug delivery
- to inflamed areas *in vivo* by electroloaded neutrophils, evaluation (rat), **186**, 860
- Duck hepatitis B virus
- polymerase, produced by *in vitro* transcription and translation, DNA polymerase and reverse transcriptase activities (duck), **189**, 1170
- Dynemicin A
- DNA strand scission by, associated abstraction of C-1' hydrogen of deoxyribose, **188**, 584
- Dystrophin
- encoding gene, partial deletion, induction of exon skipping and loss of intra-exon hairpin structure from mRNA precursor, **182**, 495
 - glycoprotein complex, proteins, specific binding by calmodulin (rabbit), **185**, 753
- E**
- E-64
- generation of cytotoxic fragments from Alzheimer amyloid protein precursor in cDNA-transfected glioma cells (human), **187**, 1249
- Ecdysis hormone
- cDNA sequence and expression in brain (*Bombyx mori*), **182**, 514
- Eflornithine
- induced ornithine decarboxylase inactivation, reversibility (rat hepatoma cells), **187**, 443
- Eggs, *see also* Oocytes
- expression of signal transducing regions of CD4-like and *lck* genes (mouse), **182**, 527
 - fertilized, detection of TAPA-1 mRNA (mouse), **186**, 1201
 - jelly components
 - ARIS and M8, pretreatment effects on sperm acrosome reaction and histone degradation (starfish), **187**, 268
 - responsible for histone degradation and acrosome reaction in sperm, identification (starfish), **187**, 274
- Egg yolk
- low-density lipoprotein with vitellogenin-degrading proteinase function, isolation (sand crayfish), **186**, 498
- Elafin
- pre-pro-protein, primary structure deduced from elafin gene sequence and repetitive sequences in prosegment (human), **185**, 240
 - synthesis and structure-activity relationships (human skin), **185**, 967
- Elastase
- inhibition by elafin and related peptides, structure-activity relationships (human skin), **185**, 967
- Elastin
- acid hydrolysate, isolation of cross-linking amino acid cyclopentenosine and structural characterization (bovine aorta), **186**, 1533
- Electric current
- pulses, induction of rapid structural changes in nerve fibers (garfish), **188**, 559
- Electric organ
- Cl⁻ channel protein, immunological identification (Japanese electric ray), **188**, 1228
- Electromagnetic fields
- 60 Hz, HL-60 leukemia cells exposed to, [³H]-uridine uptake in, analysis (human), **189**, 437
- Electron donors
- camphor and linalool monooxygenase, reconstitution of cytochrome P450_{2B4} (rabbit), **187**, 310
- Electron paramagnetic resonance
- imaging of nitroxide free radical by radio frequency spectrometer (rat), **183**, 829
 - stopped-flow, in analysis of reaction of tyrosyl radical of protein R2 from ribonucleotide reductase with hydroxyurea, **188**, 879
- Electrons
- valence, in 2'-deoxyguanosine-5'-phosphate, UV photoelectron and theoretical characterization, **184**, 16
- Electron spin resonance
- in analysis of phospholipid transverse mobility modifications in activated platelet plasma membranes (human), **189**, 465
 - with CO-hemoglobin, in detection of nitric oxide production in lipopolysaccharide-treated rats, **184**, 1119
- Electron transfer
- through iron centers, modification by NO synthase inhibitors L-NAME and L-NMMA, **187**, 797
- Electron transport
- coupled proton pumping, and plasmalemma ATPase, effect of D₂O (maize), **182**, 870
 - between cytochrome *c* and α -tocopherol, **188**, 190
- Electrophoresis
- mitochondrial plasmids, analysis: replication by rolling circle mechanism (*Neurospora crassa*), **186**, 1669
- Elsamycin A
- Fe(II)-, DNA strand scission products, analysis (*Escherichia coli*), **186**, 580
- Embryo
- cellular cyclin and maturation-promoting factor levels, mathematical models, **184**, 782
 - cellular neurotrophic factor-related activity (*Drosophila melanogaster*), **184**, 73
 - early, differential transcription of bone morphogenetic protein genes (*Xenopus laevis*), **186**, 1487
 - preimplantation, expression of TAPA-1 (mouse), **186**, 1201
- Embryogenesis
- associated expression of thymosin β_4 gene, analysis

- (*Xenopus laevis*), **184**, 93
- Emulsification**
as parameter in studies of lipolysis in water-oil emulsions, quantitative analysis, **186**, 746
- Enantioselectivity**
(*S*)- and (*R*)-diaminovaleric acids in formation of δ -aminolevulinic acid in cyanobacteria, **185**, 60
- Encephalopathy**
prion-related, implications of soluble prion protein detection in human cerebrospinal fluid, **184**, 1398
- Endocytosis**
associated receptors, distribution on Hep G2 cells, effect of brefeldin A (human), **185**, 719
receptor-mediated, demonstration: V_2 vasopressin receptor internalization in LLC-PK₁ cells (pig), **186**, 1376
regulation by protein kinase A in T84 epithelial cells, **184**, 1173
superoxide dismutase by liver (rat), **184**, 727
- Endoglucanase CelC**
conserved residues Arg-46, His-90, Asn-139, and Glu-40, site-directed mutagenesis (*Clostridium thermocellum*), **189**, 807
- Endonuclease**, *see also* DNA endonuclease
activation during apoptosis in HL-60 cells: role of cytosolic Ca^{2+} and pH (human), **186**, 782
- Endopeptidase**
 Ca^{2+} -dependent paired-basic processing, in insulinoma granules, fluorometric assay (rat), **183**, 1
dibasic processing, distinct, with Lys-Arg and Arg-Arg specificities, identification in neurohypophysial secretory granules (bovine, rat), **183**, 128
- Endoplasmic reticulum**
Kex2 enzyme cleavage of α -factor leader proregion (yeast), **183**, 212
living COS-7 cells, targeting of aequorin, **189**, 1008
membrane, anchoring of murine cytochrome P450 1A1, sequences controlling, analysis (yeast), **184**, 1490
smooth, localization of membrane-associated carbonyl-reducing enzyme (murine liver), **189**, 736
targeting of sarcoplasmic reticulum Ca^{2+} -ATPase isoenzyme SERCA1a (chicken), **186**, 219
- Endoprotease**
Kex2, modified, cleavage of proregion of α -factor leader in endoplasmic reticulum (yeast), **183**, 212
- Endothelial cell growth factor**
vascular, expression in AIDS-associated Kaposi's sarcoma cells *in vitro* (human), **183**, 1167
- Endothelial cells**
aortic
basic fibroblast growth factor gene expression, specific blockade by antisense oligonucleotide (bovine), **188**, 1205
detection of peptide amidating enzymes *in vitro* (bovine), **184**, 323
monocyte binding, effect of lipoprotein lipase-mediated lipolysis of very-low-density lipoproteins (pig), **189**, 1653
monolayers, penetrability of 5-(*N*-hexadecanoyl)amino-fluorescein, dependence on solution properties (bovine), **184**, 160
phosphoramidon-sensitive endothelin-converting enzyme, partial purification (pig), **185**, 611; *erratum*, **187**, 1602
protein kinase C in, immunocytochemical expression and localization (bovine), **189**, 40
cerebral, accumulation of nitrites *in vitro*, inhibition by low-density lipoprotein (mouse), **186**, 315
cerebral microvascular
and astrocytes, gene expression of extracellular matrix molecules, comparison (mouse), **189**, 877
capillary Na^+/H^+ exchange, inhibition by benzoylguanidine derivative (pig), **184**, 112
cGMP formation, enhancement by C-type natriuretic peptide (rat), **183**, 640
coronary arterial, dependent pertussis toxin-sensitive arterial relaxation, induction by guanosine 5'-*O*-(3-thiotriphosphate) (pig), **189**, 324
germinal angiotensin I-converting enzyme promoter in, analysis (rabbit), **189**, 134
glomerular, interaction with human neutrophils, transcellular leukotriene biosynthesis during, promotion by cell adhesion (bovine), **186**, 1307
hepatic, Ca^{2+} permeant nonspecific cation channel in, stimulation by serotonin (rat), **186**, 1560
microvascular
angiogenesis, synergistic induction by vascular endothelial growth factor and basic fibroblast growth factor (bovine), **189**, 824
keratinocyte-induced tubular morphogenesis: role of transforming growth factor α (human), **189**, 601
tube formation induced by esophageal cancer cells, role of transforming growth factor- α : model for tumor angiogenesis (human), **186**, 1471
phospholipase D-dependent triphasic activation of protein kinase C, induction by interferon- γ (rat), **189**, 1732
selectin-dependent tumor cell adhesion to, inhibition by blocking tumor cell *O*-glycosylation (human), **182**, 1288
selective growth inhibition by collagenase-inhibiting tetracyclines (bovine, pig), **188**, 740
tissue transglutaminase mRNA levels, cell cycle-dependent changes (bovine carotid artery), **187**, 14
umbilical cord, histamine-induced formation of endothelium-derived relaxing factor, inhibition by SK&F 96365 (human), **186**, 1539
umbilical vein
binding of plasminogen fragments (human), **188**, 703
expression of endothelial leukocyte adhesion molecule-1 mRNA, effect of NADPH oxidase inhibition (human), **184**, 1339
interleukin-1 β -induced endothelin production, associated intracellular signal transduction (human), **188**, 565
transfected with E-selectin, binding to colon carcinomas cells (human), **189**, 315
urokinase-type plasminogen activator expression *in vitro*, interleukin-1 α -stimulated, effect of interferon- γ (human), **188**, 463
vascular
annexin 1, partial nuclear localization (bovine, human), **186**, 432

Subject Index

- atrial natriuretic peptide clearance, inhibition by cGMP (bovine), **182**, 420
- binding protein for tissue-type plasminogen activator, analysis (human), **187**, 956
- cytokine-activated, detection of soluble forms of E-selectin, ICAM-1, and VCAM-1 in supernatant (human), **187**, 584
- endothelin-1 synthesis, stimulation by ET-1, role of ET_B receptor (human), **188**, 286
- interaction with tumor cells, facilitation by immunomodulatory protein Ling Zhi-8 via modulation of adhesion molecules (human), **186**, 385
- Mn-superoxide dismutase expression in response to tumor necrosis factor and interleukin-1 (rat), **188**, 453
- platelet-derived growth factor mRNA levels, *in vitro* effects of high glucose and hyperosmolarity (human), **187**, 664
- tumor necrosis factor- α cytotoxicity, mediation by nitric oxide (bovine), **186**, 475
- tumor necrosis factor-induced apoptotic DNA fragmentation, role of phospholipase A₂ (bovine), **188**, 1312
- water permeability, effect of atrial natriuretic factor (bovine), **185**, 386
- Endothelin**
- down-regulation of ET_B receptor mRNA via reduction of mRNA intracellular stability (rat osteosarcoma cells), **186**, 342
- effects in anterior pituitary, mediation by ET-A receptor (rat), **187**, 590
- immunoreactive, in urine, characterization (human), **182**, 1506
- inhibition of atrial natriuretic factor-stimulated cGMP production: protein kinase C activation in aortic smooth muscle cells (rat), **182**, 395
- interleukin-1 β -induced production in umbilical vein endothelial cells, associated intracellular signal transduction (human), **188**, 565
- isopeptide and receptor subtype, concomitant expression by adrenal gland (human), **182**, 1115
- pyrogenic action in conscious rabbit, **186**, 1322
- related peptides, detection, interference by free hemoglobin (human, pig, rat), **189**, 777
- secondary structure, role in binding and functional activity (rabbit, rat), **183**, 572
- and structurally related analogs, in discrimination of endothelin receptor subtypes (rabbit, rat), **183**, 566
- Endothelin-1**
- action in SK-N-MC neuroblastoma cells, noncompetitive antagonistic effect of BQ-123 (human), **184**, 504
- [Ala^{1,3,11,15}]ET-1 analog, in localization of endothelin receptor subtypes in pulmonary tissues (pig), **182**, 144
- big, pressor response in conscious rats, effect of cathepsin E inhibitors, **182**, 224
- binding to cardiac membranes, inhibition by K⁺ channel opener BRL 38227 (rat), **185**, 630
- binding by human ET_A receptor expressed in COS-7 cells, effect of truncation of receptor N-terminal extracellular or C-terminal intracellular domains, **187**, 1241
- chemical shift index analysis: α -CH values revealing dynamic helices and α_L sites, **184**, 1008
- effects on
- astrocyte differentiation, role of ET_B receptor expression (rat), **186**, 355
- chemotaxis of blood monocytes (human), **189**, 994
- contraction of coronary arterial strips with intact endothelium (pig), **184**, 518
- histamine release from pulmonary and peritoneal mast cells (guinea pig), **189**, 1196
- and ET-3, stimulation of Ca²⁺ mobilization in vascular smooth muscle, mechanisms (rat aorta), **183**, 694
- induced bronchoconstriction in early and late phases during anesthesia, effects of indomethacin and ICI 198615 (dog), **183**, 1197
- interaction with S-nitrosothiols, effect on Ca²⁺ mobilization in vascular smooth muscle cells (rat), **183**, 849
- IRL 1620 analogs
- [¹²⁵I]Tyr¹³-Suc-[Glu⁹,Ala¹⁵]-ET-1(8-21), preparation as reversible radioligand for ET_B receptor, **185**, 867
- synthesis and identification as ET_B receptor agonist, **184**, 953
- low concentration, enhancement of histamine-mediated bronchial contractions *in vivo* (guinea pig), **187**, 717
- modulation of cardiac potassium channel (rat), **184**, 1484
- mRNA, in isolated renal tubules, detection by reverse transcription and polymerase chain reaction (rat), **188**, 108
- precursor preproendothelin-1, conversion to active form by baculovirus-infected insect cells (human), **186**, 753
- pulmonary content, regulation by budesonide (rat), **188**, 1116
- reactivity of
- aortic fibroblasts *in vitro* (rat), **188**, 205
- aortic smooth muscle cells, enhancement by cAMP (rat), **188**, 719
- stimulation of
- cardiac α - and β -myosin heavy chain gene expression (neonatal rat), **183**, 1260
- c-fos mRNA expression and modulation of proliferation of FRTL5 thyroid cells (rat), **184**, 231
- synthesis
- in airway epithelial cells *in vitro*, regulation by cytokines (guinea pig), **186**, 1594
- in vascular endothelial cells, stimulation by ET-1, role of ET_B receptor (human), **188**, 286
- transcriptional activation of urokinase receptor gene (human), **186**, 1631
- Endothelin-3**
- cDNA cloning and expression (rat), **186**, 588
- and ET-1, stimulation of Ca²⁺ mobilization in vascular smooth muscle, mechanisms (rat aorta), **183**, 694
- reactivity of aortic fibroblasts *in vitro* (rat), **188**, 205
- Endothelin-converting enzyme**
- in endothelial cell lines, biochemical properties (LLC-PK₁, MDCK cells), **182**, 1383
- inhibition by phosphoramidon *in vivo*, role of rhamnose moiety (rat), **186**, 1146
- phosphoramidon-sensitive, in aortic endothelial cells, partial purification: high affinity for *Ricinus communis* agglutinin (pig), **185**, 611; *erratum*, **187**, 1602
- Endothelin receptors**
- antagonist BQ-123, inhibition of angiotensin II-induced

- aortic contractions (rabbit), **185**, 887
- ET_A
 mediation of endothelin effects in anterior pituitary (rat), **187**, 590
 truncation of N-terminal extracellular or C-terminal intracellular domains, effect on binding to endothelin-1 in COS-7 cells (human), **187**, 1241
- ET_B
 agonist ET analog IRL 1620, synthesis, **184**, 953
 mediation of
 endothelin-1 effects on astrocyte differentiation (rat), **186**, 355
 role in endothelin-1-stimulated ET-1 synthesis in vascular endothelial cells (human), **188**, 286
 vasodilation and vasoconstriction *in vivo* (rat mesenteric artery), **186**, 867
- mRNA
 cAMP-induced up-regulation in aortic smooth muscle cells (rat), **188**, 719
 down-regulation by ET, role of decreased mRNA intracellular stability (rat osteosarcoma cells), **186**, 342
 reversible radioligand specific for, preparation, **185**, 867
- ET_B-related, detection in venous smooth muscle (dog, monkey, rabbit), **184**, 100
- localization in parathyroid tissue and modulation of parathyroid hormone secretion (human), **184**, 1448
- regulation of potassium channel *IsK* in oocytes (*Xenopus laevis*), **184**, 1135
- subtypes
 discrimination with endothelin and structurally related analogs (rabbit, rat), **183**, 566
 distribution revealed by radioligand binding assay (porcine lung), **182**, 144
 and ET isopeptide, comcomitant expression by adrenal gland (human), **182**, 1115
 type 1, intracellular distribution in liver (rat), **184**, 498
- Endothelium
 aortic, synthesis and activity of endothelium-derived relaxing factor, effects of N^G-hydroxy-L-arginine and hydroxyguanine (rabbit), **189**, 711
 dependent relaxation in isolated coronary arteries, mediation by kinins (dog), **185**, 693
 intact, in coronary arterial strips, contraction, effect of endothelin-1 (pig), **184**, 518
 pulmonary vascular, free radical-induced injury, protection by ginsenosides (rabbit), **189**, 670
 role in interleukin-1 impairment of vascular contraction and relaxation in isolated aorta (rabbit), **182**, 733
- Endothelium-derived relaxing factor, *see also* Nitric oxide
- aortic, synthesis and vasorelaxant activity, effects of N^G-hydroxy-L-arginine and hydroxyguanine (rabbit), **189**, 711
- histamine-induced formation in endothelial cells, inhibition by SK&F 96365 (human umbilical cord), **186**, 1539
- identification of guanidino succinate as putative endogenous source (rat aorta), **183**, 584
- Endotoxemia
 chronic, hepatocytes from affected rats, NO formation, direct stimulation by endotoxin and tumor necrosis factor α , **185**, 430
- Endotoxic shock
 implications of modulation by endothelial and non-endothelial NO of vascular responses to sympathetic nerve stimulation (rat), **186**, 150
- Endotoxin
 and tumor necrosis factor α , direct stimulation of NO formation in hepatocytes from chronically endotoxemic rats, **185**, 430
- δ -Endotoxin
 gene fragment, genomic amplification and expression (*Bacillus thuringiensis*), **187**, 641
 native crystals, pH-mediated solubility (*Bacillus thuringiensis* var. *san diego*), **184**, 692
- Energy metabolism
 cerebral and hepatic, intermediates, effects of congenital hyperammonemia (sparse-fur mouse), **184**, 746
- Enflurane
 effect on [³H]ryanodine binding to cardiac and skeletal ryanodine receptors (pig), **186**, 595
- Enkephalins
 Leu- and Met-, conversion to melanins by tyrosinase, **184**, 1190
- 5-Enolpyruvylshikimate-3-phosphate synthase, *see* 3-Phosphoshikimate 1-carboxyvinyltransferase
- Enoyl-CoA hydratase
 -3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme, peroxisomal, regulation by T₃ (rat), **185**, 211
- Enterocytes
 differentiation, correlation with expression of soluble and cell-bound α 2,6 sialyltransferase in colonic carcinoma CaCo-2 cells (human), **184**, 1405
- Enterotoxin A
 staphylococcal, class II MHC binding sites for, α -helicity, **182**, 1016
- Enterotoxin receptors
 heat-stable, *Escherichia coli*, expression gradient along villus-to-crypt axis of small intestine (rat), **186**, 483
- Eosinophil peroxidase
 effect on β -adrenergic receptor density on lung membrane (guinea pig), **189**, 1613
- Eosinophils
 steady-state Ca rise, leukotriene B₄-induced, relationship to superoxide generation (guinea pig), **187**, 670
- Epidermal cells
 fucosyltransferase in, differentiation-associated changes (newborn rat), **189**, 27
- Epidermal growth factor
 effects on
 apolipoprotein B accumulation and mRNA levels in hepatocyte culture media (monkey), **186**, 199
 glycolysis in A431 cells (human), **183**, 1216
 inositol 1,4,5-trisphosphate and sn(1,2)-diacylglycerol masses in freshly isolated hepatocytes: comparison with vasopressin (rat), **187**, 1055
 insulin-like growth factor binding protein-1 synthesis in hepatoma cells (human), **189**, 1177
 promotion of inositol uptake in BC3H1 cells, **182**, 1008
 related domains of thrombomodulin, structure-function studies (human), **185**, 567
 stimulated proliferation of MCF-7 cells, correlation with

Subject Index

- c-fos*, *c-jun* and *c-myc* expression (human), **188**, 1067
stimulated tyrosine kinase and PLC- γ_1 phosphorylation, modulation by ethanol in A431 cells (human), **185**, 1062
- Epidermal growth factor receptors
demonstration on chondrocytes and expression regulation by growth and differentiation factors (rabbit), **183**, 14
EGR-1, binding of S1 nuclease-sensitive homopurine/homopyrimidine domain in platelet-derived growth factor A-chain promoter, **188**, 433
expression in gastric carcinomas, correlation with transcription factor Sp1 levels (human), **189**, 1342
ligand-induced functions, requirement of positively charged region asymmetrically distributed across plasma membrane, **184**, 1301
related modules, potential modification by invertebrate aspartyl-asparaginyl β -hydroxylase (fruit fly, moth), **189**, 233
transforming activity, role of highly conserved tyrosine residue at codon 845 of kinase domain (human), **186**, 768
- Epidermis
catecholamine production in, analysis (human), **189**, 72
normal reconstituted, protein kinase C mRNA levels and activity, relationship to cell differentiation (human), **184**, 283
- Epididymis
differential expression and regulation of protein D (rat), **183**, 1109
- Epimastigotes
metacyclogenesis, inhibition by mannose (*Trypanosoma cruzi*), **187**, 108
- Epimorphin
homologous neuron-specific HPC-1 antigen in bovine brain, cloning and sequencing (bovine), **187**, 1144
- Epinephrine
induced association of pp60^{src} with G α in human platelets, **186**, 440
and iron, in generation of hydroxyl radical from linoleic acid hydroperoxide, **183**, 945
production in epidermis (human), **189**, 72
secretion in cultured chromaffin cells, stimulation by pituitary adenylate cyclase-activating polypeptide (rat), **182**, 403
stimulation of GLUT-4 translocation and reduction of glucose transport in skeletal muscle (rat), **187**, 685
- Epithelial cells
airway, endothelin-1 synthesis *in vitro*, regulation by cytokines (guinea pig), **186**, 1594
bronchial, normal and transformed, expression and release of interleukin-6 (human), **187**, 596
chloride secreting, T84, endocytosis, regulation by protein kinase A, **184**, 1173
colonic, antipodal plasma membrane phosphoinositide turnover, effects of 1,25-dihydroxycholecalciferol (human, rat), **187**, 1128
conducting airway, thioredoxin gene transcription, up-regulation by retinol (monkey), **183**, 170
glomerular, proteolytic machinery against IgG, **186**, 639
hepatic
Rous sarcoma virus transformation, effect on cell attachment (rat), **189**, 350
S phase, role of cyclin A (rat), **182**, 1144
Hep3B and UAC, IL-6 receptor β chain (gp130) expression, enhancement by IL-6, IL-1, and TNF (human), **185**, 902
infection with amphotropic retroviruses with hybrid LTR: vector for gene therapy of cystic fibrosis (human), **187**, 187
intestinal, kinetics of Na⁺-dependent glutamine transporter (human), **188**, 746
ocular ciliary, intracellular cAMP production, stimulation by calcitonin gene-related peptide via protein kinase C-controlled mechanism (human), **188**, 662
pulmonary, C-10, proliferating and quiescent, differential expression of cytochrome P450 (mouse), **183**, 193
renal
hepatocyte growth factor as paracrine factor for, identification: stimulation of DNA synthesis and Na,K-ATPase (rat), **182**, 960
polarized, intrinsic factor-mediated transcytosis of [⁵⁷Co]cobalamin, inhibition by leupeptin and ammonium chloride (opossum), **182**, 439
- retinal pigment
expression of platelet-derived growth factor gene *in vitro* (human), **189**, 66
interleukin-1 β -stimulated, expression of tumor necrosis factor- α gene (human), **187**, 1029
macrophage-type nitric oxide synthase induction by lipopolysaccharide and cytokines (bovine), **186**, 854
transfected with full-length human MUC1 cDNA, secretion of mucin lacking cytoplasmic tail (mouse), **185**, 1
- Epithelium
brush border, in renal vesicles isolated during salt-to-fresh water migration, proton transport and Na⁺/H⁺ exchange (salmon), **186**, 24
ciliary, 12(R)-hydroxyeicosatetraenoic acid synthesis by 3-methylcholanthrene- and clofibrate-inducible cytochrome P450 (pig), **187**, 455
pulmonary
cation channel ion selectivity and amiloride sensitivity and β agonist action, effects of [Ca²⁺]_i (fetal rat), **187**, 648
ion transport, effects of insulin and tyrosine kinase inhibitor (fetal rat), **187**, 802
- Epitopes
common to glycophorin gp3 and sialoglycoprotein gp60, characterization (rat), **187**, 1158
complement receptor 3 α chain CD11b, calcium-dependent expression in human neutrophils, **187**, 195
immunodominant, on paired helical filaments in Alzheimer brain, characterization, **187**, 783
linear, in thyrotropin receptor, recognition by Graves' IgG, **188**, 28
sialyl-Lea and sialyl-Lex, role in tumor cell adhesion to recombinant E-selectin (human), **182**, 1376
tau 2, Alzheimer-associated, Ser $\rightarrow$ Pro mutation effect on secondary structure and phosphorylation effect on antibody recognition (bovine), **188**, 162
Trypanosoma cruzi gp 183, trypomastigote stage-specific,

- required for attachment to myoblasts, recognition by monoclonal antibody, **182**, 6
- Epoxidation**
2,3-oxidosqualene to 2,3;22,23-squalene dioxide by squalene epoxidase (porcine liver), **185**, 323
- Epoxide hydrolase**
for fatty acid epoxides, catalyzed hydrolysis of linoleic acid monoepoxides, enantioselectivity (soybean), **187**, 171
- Epoxyeicosatrienoates**
structural characterization and quantification in plasma (rat), **182**, 1320
- 8,9-Epoxyeicosatrienoic acid**
as substrate for human platelet and ram seminal vesicle cyclooxygenase: regiospecific and enantioselective metabolism, **183**, 138
- 9,10-Epoxy-12(Z)-octadecenoic acid**
hydrolysis catalyzed by soybean fatty acid epoxide hydrolase, enantioselectivity, **187**, 171
- 12,13-Epoxy-9(Z)-octadecenoic acid**
hydrolysis catalyzed by soybean fatty acid epoxide hydrolase, enantioselectivity, **187**, 171
- (Z)-9,10-Epoxy stearic acid**
 ω -hydroxylation by microsomal cytochrome P450 system (*Vicia sativa*), **184**, 183
- EPR**, *see* Electron paramagnetic resonance
- Epstein-Barr virus**
negative cell lines, repression of viral latent promoter BC-R2, **189**, 1695
nuclear antigen 2, phosphorylation, **186**, 1694
- Ergosterol**
depletion in *Saccharomyces cerevisiae* treated with 6-amino-2-*n*-pentylthiobenzothiazole, **189**, 85
- Erythrocytes**
ADP-ribose detection and turnover (human), **188**, 402
cocultured with alveolar macrophages derived from bleomycin-treated rats, nitric oxide hemoglobin formation, **182**, 151
endothelin peptide detection, interference by free hemoglobin (human, pig, rat), **189**, 777
heat-stable antigen purification (mouse), **187**, 773
immature, histones H3 and H4 acetylation and methylation, relationship (chicken), **185**, 414
lysis by halistanol trisulfate, correlation with critical micelle concentration, **182**, 115
membranes
binding fluctuations, effects of atrial natriuretic peptide (human), **188**, 1003
fusion in presence of exogenous Ca^{2+} , role of calpain activation (human, rabbit, rat), **182**, 939
phospholipids, fatty acid transfer from acyl-L-carnitine pool, analysis (human), **187**, 353
peripheral, immunocytochemical localization of 6-pyruvoyl tetrahydropterin synthase (human), **182**, 810
protein-tyrosine kinase in, inhibition by polyphosphoinositides (human), **187**, 853
suspensions, ionophore-induced Cl^- transport, ^{19}F , ^{31}P , and ^{35}Cl NMR study (human), **184**, 915
water channels, 30-kDa functional size, determination *in situ* by radiation inactivation (rabbit), **184**, 1331
- Erythroid differentiation factor**, *see* Activin
- Erythropoietin**
gene transcription system, reconstitution *in vitro* with 5' flanking sequence and nuclear extract from anemic kidney (human), **182**, 137
- Erythropoietin receptors**
extracellular domains, tryptophan residue of Trp-Ser-X-Trp-Ser motif, role in signal transduction (mouse), **184**, 485
functionally essential cytoplasmic domain, identification (mouse), **186**, 1236
soluble form, production in CHO cells and ligand-binding characteristics (mouse), **188**, 888
- Escherichia coli**
BL 21 (DE3) cells, expression of milligram amounts of functional 1,25-dihydroxyvitamin D_3 receptor (human), **189**, 1417
cell survival during dormancy, genes involved in, protective effect against oxidative stress, **188**, 1054
chromosome region *oriC*, association with outer membrane, effects of culture conditions, **187**, 970
expressed biologically active human osteoblast-specific factor 1, purification, **185**, 224; *erratum*, **187**, 561
expressed ovine lentivirus gene products, in analysis of antibody response to virus in sheep, **188**, 20
expression of
bovine adenodoxin, and site-directed mutagenesis of 2Fe-2S cluster ligands, **188**, 1131
bovine lung-type prostaglandin F synthase expressed in liver, and sequence analysis, **183**, 1238
cell-associated glucosyltransferase gene from *Streptococcus mutans*, **187**, 1432
cloned gene for ethylene-forming enzyme of *Pseudomonas syringae* pv. *phaseolicola* PK2, **188**, 826
maltose-binding protein-hepatitis C virus NS1/E2 fusion protein, **183**, 925
Xenopus Cu,Zn superoxide dismutase variants, temperature effects, **186**, 1339
functional expression of synthetic gene encoding *Clostridium pasteurianum* 2[4Fe-4S] ferredoxin, **185**, 341
 γ -glutamyltranspeptidase mutants deficient in processing to subunits, **189**, 173
heat-stable enterotoxin receptor, expression gradient along villus-to-crypt axis of small intestine (rat), **186**, 483
heme O biosynthesis, role of *cyoE* gene in cytochrome *BO* operon encoding protoheme IX farnesyltransferase, **189**, 1491
inducible expression of toxic poliovirus membrane protein 3AB, **188**, 972
K-12, ts leucyl-transfer RNA synthetase mutant, *ihvGMEDA* operon repression control, maintenance at restrictive temperature, **187**, 1106
malate dehydrogenase substrate specificity, role of arginine 102, **189**, 1057
MutM mutant strain, 8-hydroxyguanine DNA endonuclease deficiency and 8-hydroxyguanine accumulation, **188**, 372
overexpression of cloned recombinant *Lactobacillus bulgaricus* D-lactate dehydrogenase gene, **185**, 705
oxygenated flavohemoglobin, formation and dissociation,

Subject Index

- 187, 94
- plasmid and transposon DNA, conjugal transfer into *Porphyromonas gingivalis*, **186**, 1012
- proteins cross-reacting with antibodies against region 2.2 peptide of RNA polymerase sigma subunit, identification, **184**, 634
- synthesis and purification of biologically active rat brain-derived neurotrophic factor, **186**, 1553
- tag gene encoding 3-methyladenine glycosylase I, expression in NIH-3T3 fibroblasts (mouse), **185**, 41
- temperature-sensitive *RNPA* mutant, alteration of RNA I metabolism in, **186**, 1463
- transformed with different *crt* genes, carotenogenic membrane-bound enzymes from, *in vitro* assays, **185**, 9
- tRNA
- tRNA^{Asp}, recognition mechanism, comparison with yeast, **189**, 856
- tRNA^{Thr}, identity determinants, **184**, 478
- UV irradiation, subsequent production of similar-size daughter strand gaps in leading and lagging strands of DNA, analysis, **184**, 1496
- Estradiol
- synovial levels in osteoarthritic knee, relationship to estradiol receptor levels (human), **183**, 1287
- Estradiol-17 β
- effect on generation time of aging yeast cells, **183**, 1191
- modulation of apolipoprotein B mRNA editing in liver (mouse), **188**, 135
- stimulation of proliferation and differentiation of osteoblast-like cells (human), **186**, 54
- Estradiol receptors
- levels in osteoarthritic knee, relationship to synovial estradiol levels (human), **183**, 1287
- Estrogen
- regulation of angiotensin II receptor type 1 mRNA levels in tissues (rat), **183**, 1090
- related response element of vitellogenin A2 gene, bending, induction by estrogen receptor (*Xenopus laevis*), **185**, 944
- tissue-specific response of estrogen receptor gene expression (chick oviduct), **187**, 1374
- Estrogen receptors
- binding of calmodulin, antagonistic effect of triphenylethylenic antiestrogens (rat), **184**, 1432
- complexes, binding with α_{2u} -globulin gene promoter region *in vitro* (rat), **182**, 174
- encoding gene
- expression, tissue-specific response to estrogen (chick oviduct), **187**, 1374
- upstream sequence analysis (human), **183**, 996
- induced bending of vitellogenin A2 gene hormone response element, analysis (*Xenopus laevis*), **185**, 944
- and prolactin receptors, expression in breast cancer cells, coordinate regulation by sodium butyrate (human), **182**, 740
- purified, enhancement of *in vitro* transcription (bovine uterus), **186**, 803
- Ethanol
- effect on hepatocyte metabolism of leukotriene B₄: chemotactic metabolism (human), **185**, 604
- modulation of epidermal growth factor-stimulated tyrosine kinase and PLC- γ phosphorylation in A431 cells (human), **185**, 1062
- nonoxidative metabolism: expression of fatty acid ethyl ester synthase III in cultured neural cells (human, mouse, rat), **185**, 938
- Ether lipids
- ET-18-OCH₃-GPC, phosphonate analog, synthesis and antineoplastic properties, **187**, 603
- Ethidium bromide
- effect on higher-order structure of DNA, fluorescence microscopic analysis, **188**, 1274
- induction of *argJ* mutations in *proB* strains of *Streptomyces lividans*, **189**, 1101
- 7-Ethoxyresorufin-O-deethylase
- as P450IA1, differential expression in proliferating and quiescent pulmonary epithelial cells (mouse), **183**, 193
- increased activity in *Saccharomyces cerevisiae* related to coexpression of human oxidoreductase and cytochrome P450 1A1, **185**, 641
- Ethylbenzene
- hydroxylation by cytochrome P450cam, **189**, 488
- Ethylene
- and succinate, arginine-dependent simultaneous formation from 2-oxoglutarate, simultaneous catalysis by *Pseudomonas syringae*-associated enzyme, **188**, 483
- Ethylene-forming enzyme
- encoding gene, cloning, sequencing, and expression in *Escherichia coli* (*Pseudomonas syringae* pv. *phaseolicola* PK2), **188**, 826
- 7-Ethyl-10-(4-(1-piperidino)-1-piperidino) carbonyloxy camptothecin
- resistance in QGP-1N pancreatic tumor cell line sensitive to parent camptothecin compound CPT-11 (human), **188**, 70
- Ethylisopropyl-amiloride
- effect on sodium uptake in renal brush border membrane vesicles from hypertensive rats, **183**, 55
- N-Ethylmaleimide
- induction of hyperphosphorylation on tyrosine residues in Jurkat T-cell line, **187**, 73
- inhibition of light-induced H⁺ release from uncoupled thylakoid membranes (spinach), **182**, 1277
- 7-Ethyl-10-(4-(1-piperidino)-1-piperidino) carbonyloxy camptothecin
- resistant lung cancer cells, detection of topoisomerase I gene point mutation (human), **188**, 571
- sensitive pancreatic tumor cell lines, resistance to active metabolite SN-38 (human), **188**, 70
- Evolution
- angiotensin II type 1 receptor gene, analysis in various mammals, **186**, 1042
- 14-3-3 protein: sequence conservation (*Xenopus laevis*), **184**, 1456
- mucin MUC1: conservation throughout mammals revealed by antibodies to MUC1 cytoplasmic domain, **185**, 167
- transforming growth factor- β superfamily, classification based on amino acid homology in C-terminus, **184**, 590
- Exocyclic-keto reductase
- activities for progesterone and S-warfarin in hepatic microsomes from adult male (rat), **184**, 338

- Exocytosis**
 Ca²⁺-dependent, catecholamine from adrenal chromaffin cells, inhibition by wortmannin (bovine), **185**, 1016
 catecholamine from digitonin-permeabilized adrenal medullary chromaffin cells, role of calmodulin (bovine), **186**, 1006
- Exoenzyme C3**
 for ADP-ribosylation of small GTP-binding proteins in human platelets (*Bacillus cereus*), **183**, 931
- Exoenzyme S**
 from *Pseudomonas aeruginosa*, glycolipid receptor binding specificity, **175**, 1076; *erratum*, **186**, 601
- Exon skipping**
 exon 19 in dystrophin mRNA precursor, induction by partial deletion of dystrophin gene, **182**, 495
- Exo- α -sialidase**
 and anti-carbohydrate antibodies, differential effects on selectin-mediated cell adhesion at low and high wall shear stress, **189**, 1686
 from *Bacteroides fragilis* SBT3182, purification and characterization, **189**, 524
- EXP-985**
¹²⁵I-labeled, as nonpeptide radioligand antagonist for AT₁ angiotensin receptor, biochemical properties (rat), **188**, 1030
- Extracellular matrix**
 associated molecules, gene expression in cerebral microvascular endothelial cells and astrocytes, comparison (mouse), **189**, 877
 and cell density, effects on c-myc expression in normal hepatocytes and hepatoma cells (rat), **184**, 825
 damaged, affinity of integrins: $\alpha_v\beta_3$ binding to denatured collagen type I via RGD sites (human), **182**, 1025
- Eye**, *see also specific regions*
 molluscan, expression of *Drosophila per* gene homologs, **184**, 1082
- F**
- Factor H**
 and plasma precursor of major macrophage-chemotactic factor, in delayed hypersensitivity reaction sites, relationship (guinea pig), **185**, 505
- Familial adenomatous polyposis**
 associated frameshift mutation of adenomatous polyposis coli gene, identification in Italian family, **184**, 1357
- Farnesol**
 inhibition of CEM-C1 leukemia cell growth: effects of phosphatidylcholine and diacylglycerol (human), **186**, 543
- Farnesylation**
 rhodopsin kinase *in vivo* (rat), **183**, 468
- Farnesyl diphosphate**
 and *trans,trans,trans*-geranylgeranyl diphosphate, biosynthesis by cytosolic fraction from rat tissues, **186**, 157
- Fasting**
 and refeeding with high carbohydrate diet, modulation of apolipoprotein B mRNA editing activity *in vitro* (rat), **183**, 899
- Fat-storing cells**
 hepatic, distinguishing from arterial smooth muscle cells and dermal fibroblasts by alternative splicing products of tenascin gene (rat), **185**, 768
- Fatty acid ethyl ester synthase III**
 expression in neuroblastoma and glioma cell lines *in vitro*, role in nonoxidative ethanol metabolism (human, mouse, rat), **185**, 938
 histidine residues, site-specific mutagenesis (human), **184**, 706
- Fatty acids**
 binding site on glutathione S-transferase P, identification (rat), **189**, 197
 conjugated tetraene, formation mechanism: 6,9,12-octadecatrienoic acid metabolism in red alga (*Lithothamnion corallioides*), **188**, 1220
 enhanced flavin mononucleotide binding to bacterial luciferase, measurement by steady-state fluorescence, **188**, 497
 essential, deficient diet, effect on phospholipid composition in anterior pituitary membranes (rat), **183**, 1047
 long-chain, β -oxidation by fibroblasts: evidence for long-chain acyl-CoA dehydrogenase (human), **182**, 1002
 mitochondrial β -oxidation, disorder of, identification as trifunctional protein deficiency (human), **188**, 1139
 transfer from acyl-L-carnitine pool to membrane phospholipids in intact erythrocytes, analysis (human), **187**, 353
- Fatty-acid synthase**
 encoding gene, transcription *in vitro*, tissue specificity, **182**, 631
- Fc receptors**
 Fc γ , and complement receptor, mediated elevation of cytosolic Ca²⁺ levels in neutrophils (human), **185**, 246
- Feather buds**
 infection by replication-defective LZ10 virus, associated production of localized region of β -galactosidase activity (chicken), **186**, 1020
- Ferredoxin**
 2[4Fe-4S], *Clostridium pasteurianum*, synthetic gene encoding, design and expression in *Escherichia coli*, **185**, 341
- α -Fetoprotein**
 gene expression in PLC/PRF/5 human hepatoma cells, down-regulation by hepatocyte growth factor, **189**, 385
 variant, characterization (rat), **185**, 648
- Fibers**
 oriented, DNA, cisplatin-induced alterations revealed by atomic force microscopy, **182**, 201
- Fibrils**
 amyloid, formation
 determination by AA-protein N-terminal segment (human, mouse), **182**, 27
 from mutant Asn₁₈₇ gelsolin peptides *in vitro*, **183**, 227
- Fibrinogenase**, *see* Thrombin
- Fibroblast growth factor**
 acidic
 5' untranslated exons, cloning by single-strand ligation to single-stranded cDNA (bovine), **188**, 843
 role as progression factor rather than as transforming factor (Rat-1 cells), **189**, 398

Subject Index

- 3' untranslated region, heterogeneity (bovine), **184**, 945
- basic
- enhancement of collateral circulation development after acute arterial occlusion (rat), **185**, 510
 - gene expression
 - in endothelial cells, specific blockade by antisense oligonucleotide (bovine), **188**, 1205
 - and immunohistochemical localization, in renal cell carcinoma (human), **183**, 937
 - mRNA, in granulosa and cumulus cells from *in vitro* fertilization patients, analysis by reverse transcription with nested PCR, **187**, 1227
 - promotion of inositol uptake in BC3H1 cells, **182**, 1008
 - structure-function relationship: site-directed mutagenesis of putative heparin-binding and receptor-binding region (human), **185**, 1098
 - and vascular endothelial growth factor, synergistic induction of angiogenesis in microvascular endothelial cells (bovine), **189**, 824
 - type 1, endogenous and exogenous nuclear translocation, analysis in NIH 3T3 cells (mouse), **188**, 982
- Fibroblast growth factor receptors
- basic, binding region of basic fibroblast growth factor, site-directed mutagenesis: structure-function relationship (human), **185**, 1098
 - heparin-binding, expression and transforming activity of variant produced by splicing of alpha exon at alternate 3'-acceptor site (rat), **183**, 423
 - type 1, encoding gene, promoter region characterization (mouse), **183**, 688
- Fibroblasts
- adenovirus type 12-transformed, production of low-molecular-weight growth inhibitory factor (mouse), **187**, 1232
 - β -oxidation of long-chain fatty acids: evidence for long-chain acyl-CoA dehydrogenase (human), **182**, 1002
 - from Alzheimer's patients, proteoglycans in, characterization, **184**, 1293
 - aortic reactivity to vasoactive agents *in vitro* (rat), **188**, 205
 - Balb/c 3T3, transcription of *c-jun* proto-oncogene, stimulation by insulin-like growth factor I (mouse), **183**, 524
 - Balb/3T3, serum-free proliferation, stimulation by coenzyme Q (mouse), **189**, 8
 - binding of low-density and very-low-density lipoproteins, enhancement by lipoprotein lipase, role of heparan sulfate proteoglycans (human), **185**, 582
 - C33-14-B1, imipramine-sensitive serotonin transporter, differential regulation by cAMP (mouse), **183**, 487
 - CCL39, functional expression of bradykinin-B₂ receptor cDNA (hamster lung), **188**, 786
 - C3HA, tumor necrosis factor α -induced arachidonic acid release, inhibition by adenovirus E3 region 14.7-kDa protein, heat, and sodium arsenite, **188**, 177
 - chemoattraction to human recombinant platelet-derived growth factor AA homodimers, demonstration (bovine), **186**, 1510
 - dermal
 - aromatase mRNA formed by alternative use of tissue-specific exons 1 (human), **189**, 1001
 - distinguishing from hepatic fat-storing cells and arterial smooth muscle cells by alternative splicing products of tenascin gene (rat), **185**, 768
 - hepatocyte growth factor gene expression, up-regulation by interleukin-1 (human), **188**, 235
 - immunocytochemical localization of 6-pyruvoyl tetrahydropterin synthase (human), **182**, 810
 - interleukin-1 receptor type I mRNA and expressed protein levels in patients with systemic sclerosis, **184**, 1504
 - diploid
 - SV40 T antigen-transformed, immortalized clones, loss of collagenase gene expression (human), **189**, 148
 - TIG-1, *c-myc* gene-unexpressed, effect of extracellular phosphatidylinositol (human), **182**, 644
 - irradiation with uv light, enhancement of HPS72 protein expression (human), **186**, 1257
 - L929, 202 gene expression, regulation by interferons (mouse), **187**, 628
 - LAT, butyrate-induced transcription state in, memory by Moloney murine sarcoma virus enhancer-promoter element, **189**, 141
 - MRC-5, cytoskeleton, phorbol ester-induced reorganization during aging *in vitro* (human), **182**, 1423
 - NIH 3T3
 - activation of transforming G protein-coupled receptors transfected in, induction of tyrosine phosphorylation of cellular proteins (mouse), **188**, 155
 - cell killing and Mn-superoxide dismutase induction by tumor necrosis factor- α , mediation by lipoxygenase metabolites of arachidonic acid (mouse), **188**, 538
 - endogenous and exogenous nuclear translocation of fibroblast growth factor-1, analysis (mouse), **188**, 982
 - expression of *Escherichia coli* tag gene encoding 3-methyladenine glycosylase I (mouse), **185**, 41
 - heparin-binding growth-associated factor receptor, characterization (mouse), **182**, 188
 - insulin signaling to pyruvate dehydrogenase, role of insulin receptor carboxy terminal 110 amino acid portion (mouse), **189**, 906
 - oncogene-induced radioresistance in, association with mitogenic signal transduction interference (mouse), **183**, 652
 - protein phosphatases types 1 and 2A, cell cycle-dependent gene expression and activities (mouse), **187**, 507
 - ras*-transformed
 - with bradykinin-evoked cytoplasmic Ca²⁺ oscillations, ion selectivity of Ba²⁺ inward current oscillations, **185**, 162
 - depudecin-induced production of flat phenotype (mouse), **182**, 379
 - type DT, Ba²⁺ current oscillations in, modulation by cyclic AMP and phorbol esters (mouse), **182**, 1240
 - phosphorylation of interleukin-6 at serine position 54: early event in secretory pathway (human), **185**, 524
 - pro α 1(I) collagen-deficient, chemically transformed, post-transcriptional regulation of pro α 1(I) gene in, analysis (hamster embryo), **188**, 780
 - proliferation, promotion by heparin-binding fibronectin fragments with cell-binding domains (human embryo), **183**, 383
 - pulmonary, KC mRNA expression (rat), **184**, 922

- rheumatoid synovial, cytosolic phospholipase A₂ in, stimulation by interleukin-1 β (human), **184**, 712
- scleroderma-derived, collagen gene expression, effect of transforming growth factor β 1 (human), **187**, 45
- senescent, overexpressed smooth muscle protein gene, sequence and expression (human), **187**, 1
- thymidine incorporation, stimulation by N-terminal hexapeptide fragment of insulin-like growth factor II (human, mouse), **187**, 279
- Swiss 3T3, p34^{cdc2} histone H1 kinase stimulation, induction by protein kinase C activators (mouse), **188**, 1084
- 3T3-L1, S14 gene-transfected, in localization of adipocyte-specific retinoic acid response domain controlling transcription, **188**, 470
- 3T3 and 3T6, Na⁺/K⁺ pump activity, intracellular pH, and uridine uptake in cell cultures, effects of extracellular ATP (mouse), **182**, 836
- WS-1, synthesis and secretion of nerve growth factor in culture (human), **184**, 373
- 3Y1, expression of glutathione transferase P, suppression by glucocorticoid (rat), **187**, 976
- Fibronectin**
- heparin-binding fragments with cell-binding domains, promotion of embryo fibroblast proliferation (human), **183**, 383
- and integrin α 5/ β 1, mediated attachment in hepatic epithelial cells, effect of Rous sarcoma virus transformation (rat), **189**, 350
- lymphocyte adhesion, role of Hep II and CS-1 sites of Fn, evaluation with monoclonal antibodies (human), **186**, 135
- Fibronectin receptors**
- function during mitosis of CHO cells, assessment, **189**, 1429
- Filaments**
- native thick, associated myosin and paramyosin, assembly-dependent phosphorylation (*Caenorhabditis elegans*), **186**, 1528
- paired helical, Alzheimer associated phosphorylated immunodominant epitope on, characterization, **187**, 783
- relationship to amyloid β protein precursor carboxy-terminus, **185**, 1034
- Filamin**
- smooth muscle, F-actin gelation, suppression by inositol phospholipid (chicken), **184**, 1261
- Fish eye disease**
- association with amino acid exchange in exon I of lecithin:cholesterol acyltransferase gene (human), **182**, 583; *erratum*, **184**, 549
- FK-506**
- binding-protein
- complex with bound substrate, resistance to proteolysis (*Tolypocladium inflatum*), **182**, 1282
- 25-kDa, cDNA cloning (human hippocampus), **184**, 733
- down-regulation of CD4 expression in cultured microglia (mouse), **189**, 869
- inhibition of leukocyte chemotactic activity of FK506-binding protein (human), **186**, 1178
- and rapamycin, binding protein, cDNA isolation (human), **185**, 298
- Flagella**
- spermatozoal, motility, regulation by temperature-dependent phosphorylation of 43-kDa axonemal protein (chicken), **185**, 740
- Flavin mononucleotide**
- fatty acid-enhanced binding to bacterial luciferase, measurement by steady-state fluorescence, **188**, 497
- Flavobacterium* sp.
- extracts, reductive dehalogenation of tetrachloro-*p*-hydroquinone, identification of glutathione as reducing agent, **182**, 361
- Flavohemoglobin**
- oxygenated, formation and dissociation (*Escherichia coli*), **187**, 94
- Flavones**
- inhibition of HIV-1 proteinases, **188**, 631
- organotin complexes, 5-coordinate, fluorescence properties: potential mitochondrial ATPase probes, **188**, 365
- Flavonoids**
- sensitivity of HIV-1 and -2 reverse transcriptase to inhibition by, comparison, **185**, 370
- Flavoproteins**
- identification of cytochrome *b*₅₅₈ component of phagocyte NADPH oxidase as, **186**, 1368
- Flow cytometry**
- in analysis of HeLa cells with experimentally induced respiratory deficiency, **187**, 991
- Fluorescence microscopy**
- in analysis of HeLa cells with experimentally induced respiratory deficiency, **187**, 991
- in visualization of effects of intercalator and minor groove-binding drugs on higher order structure of DNA, **188**, 1274
- Fluorescence spectroscopy**
- steady-state, in measurement of fatty acid-enhanced binding of flavin mononucleotide to bacterial luciferase, **188**, 497
- 5-Fluoro-2'-deoxyuridine**
- incorporation into DNA of mammary tumor, inhibition by thymidine (mouse), **184**, 467
- Fluorometry**
- based assay of Ca²⁺-dependent paired-basic processing endopeptidase in insulinoma granules (rat), **183**, 1
- 5-Fluorouracil**
- effect on expression of interleukin-2 (rat splenocytes), **187**, 305
- metabolic activation, stimulation by interferon- α (HT-29 cells), **182**, 1232
- FMN phosphatase**
- relationship to ACP1 gene product (CHO cells), **189**, 1598
- Foam cells**
- aortic and splenic, overexpression of apolipoprotein E in absence of hypercholesterolemia (rabbit), **183**, 514
- Follicle-stimulating hormone**
- binding to receptor, inhibition by serine analogs of FSH- β -(33-53) and FSH- β -(91-95) (human), **184**, 1273
- induced steroidogenesis in ovarian granulosa cells, inhibition by GnRH, role of diacylglycerol and Ca²⁺ (rat), **188**, 198
- pituitary adenoma cells secreting, FSH secretion and

Subject Index

- [Ca²⁺]_i, effects of activin A and somatostatin (human), **182**, 1408
- Follicle-stimulating hormone receptors
binding of FSH, inhibition by serine analogs of FSH- β (33-53) and FSH- β (91-95) (human), **184**, 1273
truncated isoform, molecular cloning (human), **188**, 1077
- Follicles
ovarian, *see* Ovarian follicles
- Follistatin
in competitive protein binding assay for activin A/EDF in plasma (human), **185**, 1148
- Footprinting
single-stranded regions of *Escherichia coli* lac-derived RNA and HIV RNA, role of 1,10-phenanthroline-copper complex as reagent, **187**, 1503
tRNA^{Asp} complexed with aspartyl-tRNA synthetase, analysis (yeast), **186**, 956
- Formic acid
solutions, covalent modification of synthetic Alzheimer's amyloid β -peptide in, **184**, 686
- O-Formylation
synthetic Alzheimer's amyloid β -peptide in solution, effect on aggregational properties, **184**, 686
- N-Formyl-methionyl-leucyl-phenylalanine
and IgG, neutrophils stimulated with, superoxide production, role of tyrosine phosphorylation (human), **183**, 789
induced superoxide generation in electroporated neutrophils, suppression by spermine (human), **182**, 20
stimulated leukocytes, pretreatment with triacsin C, enhancement of platelet-activating factor production (rat), **188**, 1280
stimulated neutrophils, staurosporine enhancement of platelet-activating factor formation, mediation by intracellular PAF binding sites (human), **189**, 771
- Formylpeptide receptors
chemoattractant, endogenous and transfected, differential regulation of cAMP, implications for G_i-coupled receptor signaling (human), **183**, 1033
- N-Formylpeptide receptors
granulocyte chemoattractant, encoding cDNA, isolation (human), **184**, 582
- Forskolin, *see* Colforsin
- Fourier transform infrared spectroscopy
in estimation of *Bacillus licheniformis* endo- β 1,3-1,4-D-glucanase secondary structure, **184**, 612
- Free radicals
induced injury in pulmonary vascular endothelium, protection by ginsenosides (rabbit), **189**, 670
role in photodynamic therapy, physico-chemical modeling with quantum yield data of singlet oxygen formation, **189**, 1548
- Friend retrovirus
env mRNA, translation, inhibition by oligonucleotides encapsulated in pH-sensitive liposomes, **183**, 879
- Fructose 1,6-bisphosphatase
oxidative activation, inducing heat-stable substances in hepatic cytosol, detection (chicken), **182**, 600
- Fructose-2,6-bisphosphate
role in stimulation of glycolysis by epidermal growth factor (A431 cells), **183**, 1216
- FSH, *see* Follicle-stimulating hormone
- FTIS, *see* Fourier transform infrared spectroscopy
- Fucoidan
identification as non-anticoagulant inhibitor of intimal hyperplasia (*Fucus vesiculosus*), **184**, 773
- α -L-Fucosidase
gene mutation generating stop codon, identification in fucosidosis patient, **189**, 1063
- Fucosidosis
mutation generating stop codon in α -L-fucosidase gene (human), **189**, 1063
- Fucosylation
intestinal, enzymes in, effects of endogenous soluble β -galactoside-binding lectins and protein inhibitor of fucosylation (rat), **185**, 617
- Fucosylgalactose α -N-acetylgalactosaminyltransferase
encoding histo-blood group ABO genes, identification in various primates, **189**, 154
A² subtype, weakened transferase activity and restricted substrate usage, associated A² gene mutation (human), **187**, 366
- Fucosyltransferase
in newborn rat epidermal cells, differentiation-associated changes, **189**, 27
protein inhibitor, and soluble β -galactoside-binding lectins, effects on enzymes in intestinal fucosylation (rat), **185**, 617
- α -1,3 Fucosyltransferase
capable of forming E-selectin ligand, cloning and expression (human), **187**, 152
- Fumarate reductase, *see* Succinate dehydrogenase
- Fumarylacetoacetase
gene deletion, role in hepatorenal tyrosinemia: murine model, **187**, 340
- Fumaryl acetoacetate hydrolase, *see* Fumarylacetoacetase
- Furin
truncated soluble form, proteolytic cleavage of proalbumin and complement Pro-C3 *in vitro* (rat), **189**, 1353
- Fusarium sambucinum*
purification of cyclophilin: resistance of cyclophilin/cyclophorin A complexes to proteolysis, **187**, 791

G

- D-Galactosamine
induced cell damage, enhancement of specific binding of prostaglandin E₁ to hepatocytes (rat), **184**, 654
- Galactose
TSH-induced incorporation at NH₂ terminus of thyroglobulin secreted by FRTL-5 cells (rat), **189**, 1624
- β -Galactosidase
mRNA levels, and enzyme activity, in analysis of heterologous promoter activity, comparison (human), **189**, 912
production in localized region of feather buds after replication-defective virus infection (chicken), **186**, 1020
- Galactoside
binding proteins, soluble and membrane-bound, dichotomy in laminin-binding properties (human), **186**, 1674
- β -Galactoside α -2,3-sialyltransferase
regulation by Ca²⁺/calmodulin antagonists and phos-

Subject Index

- phatase inhibitors: *O*-glycan sialylation in cultured C6 glioma cells (rat), **186**, 1575
- β -Galactoside α -2,6-sialyltransferase
soluble and cell-bound, expression in colonic carcinoma CaCo-2 cells, correlation with degree of enterocytic differentiation (human), **184**, 1405
- Galactosyl-hydroxylysine
in urine, in mathematical model for study of bone turnover in growing rats, **185**, 47
- β -1,4-Galactosyltransferase
cDNA clone, isolation from embryonic chicken brain and comparison to mammalian homologs, **189**, 1215
- Galanin
inhibition of cholecystokinin-8-induced $[Ca^{2+}]_i$ increase in pancreatic B cells (rat), **182**, 858
- Gallium
 Ga^{3+} , inhibition of parathyroid hormone release without interaction with Ca^{2+} receptor of parathyroid cell (bovine), **186**, 556
- Gamma irradiation
effect on L-arginine-dependent nitric oxide formation (mouse), **186**, 1423
- Ganglion cells
retinal, expression of neurocalcin (bovine), **186**, 1207
- Ganglion mother cells
expression of *prospero* gene (*Drosophila melanogaster*), **182**, 1326
- Gangliosides
 GD_3 , acetylated forms, binding by CDw 60 antibodies (bovine), **187**, 1343
 GM_3 , effect on $\alpha 5\beta 1$ -liposomes: regulatory role in integrin function (mouse), **186**, 1397
 $[^{14}C]$ sialic acid- GM_3 and $[^3H]$ sphingosine- GM_1 , kinetics and organ distribution after intravenous injection (rat), **189**, 1410
- Gastrin receptors
cDNA, cloning from enterochromaffin-like carcinoid tumor and characterization (mouse), **187**, 1151
- Gastrin-releasing peptide
effects on cytoplasmic Ca^{2+} levels and calcitonin secretion in medullary thyroid carcinoma cells (human), **185**, 833
- Gastrins
effects on cytosolic free Ca^{2+} in individual acid-secreting parietal cells (rat), **183**, 1097
post-translational processing in neoplastic colonic tissues (human), **189**, 1165
- Gastrointestinal tract, *see also specific regions*
cholecystokinin receptor, molecular cloning: structure, functional expression, and chromosomal localization (human), **189**, 296
- G_i -coupled receptors
signaling, implications of differential regulation of cAMP by endogenous and transfected formylpeptide chemoattractant receptors (human), **183**, 1033
- Gelation
F-actin by smooth muscle filamin, suppression by inositol phospholipid (chicken), **184**, 1261
- Genes
33, expression in H4IIE cells, stimulation by vanadate and insulin (rat), **189**, 931
- 202, expression in L929 cells, regulation by interferons (mouse), **187**, 628
- A^2 , histo-blood group-associated, mutation, role in restricted substrate usage and weakened transferase activity (human), **187**, 366
- 17-1A antigen, promoter, formation of specific complexes with nuclear proteins from Capan-2 cells, **186**, 1353
- ABO blood group, identification in various mammals, **189**, 154
- α_1 -acid glycoprotein
acute phase promoter element, nuclear factors interacting with, identification (rabbit), **189**, 1464
cloning and structural characterization (rabbit), **185**, 69
- ACPI, acid phosphatase encoded by, classification as FMN phosphatase (CHO cells), **189**, 1598
- α A-crystallin, lens-specific enhancer motif 1, interaction with nuclear factor α CEFI: identification of contact sites (chicken), **184**, 24
- actin 5C, transcript nested within, analysis (*Drosophila melanogaster*), **184**, 400
- activin A, expression in bone marrow stromal cell line, induction by interleukin-1 and tumor necrosis factor (human), **188**, 310
- activin receptor type II, structure (mouse), **185**, 404
- adenine phosphoribosyltransferase, butyrate-induced transcription state, memory by Moloney murine sarcoma virus enhancer-promoter element, **189**, 141
- adenomatous polyposis coli, frameshift mutation associated with familial adenomatous polyposis, identification in Italian family, **184**, 1357
- ADH3, active site for catalytic properties, nucleotide sequence (human), **184**, 1001
- adhesion molecule β subunit, mutations, identification in Japanese patients with severe leukocyte adhesion deficiency, **184**, 1460
- aldose reductase, expression in human renal proximal tubule cells, effects of osmotic stress and hyperglycemia, **187**, 201
- α_1 -inhibitor III, liver-specific, differential expression regulation in transfected hepatocytes and hepatoma cells (human, mouse, rat), **183**, 184
- amyloid precursor protein
 $\beta/A4$ region, sequence and methylation (rabbit), **188**, 905
homolog of human β -APP, developmental regulation (*Xenopus laevis*), **189**, 1561
- androgen receptor, number of CAG repeats in families with X-linked spinal and bulbar muscular atrophy, detection by primer extension method, **182**, 507
- angiotensin I-converting enzyme, polymorphism, association with essential hypertension (human), **184**, 9
- angiotensin II type 1 receptor
AT_{1A}, cloning, expression, and characterization (human), **186**, 277
AT_{1A} and AT_{1B}, isolation (rat), **184**, 1067
cloning and nucleotide sequence, **183**, 8
down-regulation in glomerular mesangial cells, distinct pathways (rat), **185**, 142
evolution in various mammals, **186**, 1042
isoforms, cloning, characterization, and expression

Subject Index

- (mouse), **185**, 253
- apolipoprotein B
 expression in HepG2 cells, modulation by thyroid hormone (human), **186**, 617
 noninvolvement in normotriglyceridemic abetalipoproteinemia in Japanese family, **182**, 99
 polymorphisms, analysis in hepatoma-derived cell lines (human), **183**, 1224
- argJ*, mutations in, induction in *proB* strain of *Streptomyces lividans* by ethidium bromide, **189**, 1101
- ATP-citrate lyase, transcription regulation (rat liver), **189**, 264
- basic fibroblast growth factor
 expression in endothelial cells, specific blockade by antisense oligonucleotide (bovine), **188**, 1205
 expression and immunohistochemical localization in renal cell carcinoma (human), **183**, 937
- bone morphogenetic proteins, differential transcription in early amphibian embryo (*Xenopus laevis*), **186**, 1487
- bradykinin B2 receptor, cloning, functional expression, and pharmacological characterization (human), **187**, 1306
- brain-derived neurotrophic factor, characterization of 5'-flanking region (human), **182**, 325
- c-abl, intron regulatory element, interaction with DNA binding proteins, inhibition by methylation (mouse), **186**, 1515
- calbindin-D9K, assignment to chromosome Xp (human), **185**, 663
- calcitonin, transcription, regulation by cyclic AMP (human), **189**, 1157
- calmodulin-dependent protein phosphatase testis-specific catalytic subunit, cloning and characterization (human), **188**, 265
- carcinoembryonic antigen-related, 5' region conserved in, binding of ubiquitous nuclear factors (mouse), **185**, 893
- β -casein, exon skipping, contribution to N-terminal 9-amino acid residue deletion, **183**, 750
- catalase, expression, depression in liver of tumor-bearing nude mice, **189**, 1084
- cathepsin E, expression, tissue- and cell-specific control (guinea pig), **187**, 1401
- CD4-like, signal transducing region, expression in egg (mouse), **182**, 527
- cecropin, induction in blood cell line mbn-2, analysis as immune response (*Drosophila melanogaster*), **188**, 1169
- cefG, encoding acetyl-CoA:deacetylcephalosporin C O-acetyltransferase, cloning and disruption (*Acremonium chrysogenum*), **186**, 40
- cell-associated glucosyltransferase, molecular characterization and expression (*Streptococcus mutans*), **187**, 1432
- cell cycle-related, TSH-induced, expression, uncoupling from TGF β inhibition of rat thyroid cell proliferation, **187**, 225
- C-erbA, encoded mRNAs, developmental expression (rat), **184**, 739
- c-fos, constitutive expression in transfected MC3T3-E1 osteoblasts, inhibition of type I collagen synthesis (mouse), **182**, 1389
- c-fos and c-jun, modulation of thyroid hormone inhibition of thyrotropin β subunit gene expression (human), **189**, 1050
- c-fos, c-jun, and c-myc
 early expression in thymocytes during dexamethasone-induced apoptosis or concanavalin A-induced proliferation (rat), **188**, 1261
 expression, effect on growth rate of breast cancer MCF-7 cells (human), **188**, 1067
- chimeric
 linked to glucocorticoid-suppressible hyperaldosteronism, encoding of fused P450 protein with aldosterone synthase activity (human), **189**, 885
 marker, pattern of expression in HeLa cells, cisplatin-induced imbalances, **184**, 1
- c-jun, transcription in BALB/c 3T3 fibroblasts, stimulation by insulin-like growth factor I (mouse), **183**, 524
- c-Ki-ras, point mutation in TE1 and TE2 esophageal carcinoma cells (human), **187**, 515
- class I alcohol dehydrogenase, tissue-specific expression, role of enhancer-site downstream binding protein (rat), **188**, 684
- Clostridium botulinum* type C progenitor toxin nontoxic-nonhemagglutinin component, nucleotide sequence, **183**, 1273
- c-met
 frequent amplification in scirrhous type stomach cancer (human), **189**, 227
 hepatocyte growth factor receptor, expression in kidney after unilateral nephrectomy and renal injury (rat), **187**, 1454
- c-myc
 expression in normal hepatocytes and hepatoma cells, effects of extracellular matrix and cell density (rat), **184**, 825
 nuclease-sensitive promoter element, structure, identification of tandem H-DNA, **185**, 264
 renal cancer cell lines expressing, effect of extracellular phosphatidylinositol (human), **182**, 644
 transactivation by c-Myb (human), **186**, 715
 transcription *in vitro*, inhibition by mithramycin, **185**, 553
 collagenase, loss of expression after immortalization in SV40T antigen-transformed human diploid fibroblasts, **189**, 148
- collagen, expression in systemic sclerosis fibroblasts, effect of transforming growth factor β 1 (human), **187**, 45
- collagen type X, coding sequence amplification by PCR and identification of polymorphism changing Gly to Arg at position 545, **187**, 420
- complement C4B and steroid 21-hydroxylase, and C4A/CYP21P, intergenic sequences, comparison and identification of regulatory elements (human), **186**, 256
- cor15*, cold-regulated, polypeptide encoded by, cryoprotective activity *Arabidopsis thaliana*, **183**, 1103
- crt, transformed *Escherichia coli*, carotenogenic membrane-bound enzymes from, *in vitro* assays, **185**, 9
- δ 1-crystallin, Sp1 site of promoter, DNA-binding factors

- interacting with, developmental regulation (embryonic chicken lens), **183**, 659
- Cu/Zn superoxide dismutase, isolation, characterization, and species comparison (rat), **186**, 936
- cyanide hydratase, cloning and sequencing (*Gloeocercospora sorghi*), **187**, 1048
- cyoE*, in cytochrome *BO* operon, protoheme IX farnesyltransferase-encoding, role in heme O biosynthesis (*Escherichia coli*), **189**, 1491
- Cyp1a-1*, cytochrome P450, induction in skin, phorbol ester-mediated suppression, role of protein kinase C (mouse), **186**, 970
- cystic fibrosis transmembrane conductor, defective, role in lysosome acidification in pancreatic adenocarcinoma cells (human), **184**, 300
- cytochrome *b₅* soluble and microsomal forms, molecular cloning studies (rabbit), **185**, 845
- cytochrome P450_{C18}, point mutations in corticosterone methyl oxidase II-deficient patients: congenitally defective aldosterone biosynthesis in humans, **182**, 974; *erratum*, **184**, 1529
- cytokine and HIV-1, expression, differential modulation by suboptimal and optimal activation signals (human), **182**, 1172
- cytosolic aldehyde dehydrogenase-3, negative regulation by CYP1A1 and CYP1A2 proteins (mouse), **187**, 413
- with developmentally down-regulated expression in brain, identification (mouse), **185**, 1155
- 1,25-dihydroxyvitamin D₃ receptor, expression, regulation by parathyroid hormone and cAMP-agonists in UMR 106 cells (rat), **185**, 881
- DNA repair, XRCC1, alterations in expression and structure (human), **186**, 900
- DNA topoisomerase I, expression in camptothecin-11 acquired- and native-resistant tumor cells (human), **184**, 618
- DOPA decarboxylase, mapping to 11A band of murine genome, **186**, 926
- dopamine β -hydroxylase, primary structure (mouse), **189**, 590
- DRG*
- encoded developmentally regulated GTP-binding protein, characterization (murine brain), **189**, 363
- expression during embryonic development (mouse), **189**, 371
- dystrophin, partial deletion, induction of exon skipping and loss of intra-exon hairpin structure from mRNA precursor, **182**, 495
- eclosion hormone, expression in brain (*Bombyx mori*), **182**, 514
- δ -endotoxin, fragment, amplification and expression, **187**, 641
- env*
- derived recombinant antigen, in detection of antibodies to transmembrane glycoprotein of ovine progressive pneumonia virus, **183**, 1040
- Friend retrovirus, mRNA translation, inhibition by oligonucleotides encapsulated in pH-sensitive liposomes, **183**, 879
- erb B-like, expression in hepatocellular carcinoma, association with hepatitis B virus DNA integration (human), **188**, 344
- erythropoietin, transcription system, reconstitution *in vitro* with 5' flanking sequence and nuclear extract from anemic kidney (human), **182**, 137
- estrogen receptor
- expression, tissue-specific response to estrogen (chick oviduct), **187**, 1374
- upstream sequence analysis (human), **183**, 996
- ethylene-forming enzyme, cloning, sequencing, and expression in *Escherichia coli* (*Pseudomonas syringae* pv. *phaseolicola* PK2), **188**, 826
- expression with U3-based retroviral vector, evaluation, **184**, 330
- extracellular matrix molecules, expression in cerebral microvascular endothelial cells and astrocytes, comparison (mouse), **189**, 877
- fatty acid synthase and S14, transcription *in vitro*, tissue specificity, **182**, 631
- fau, encoding ribosomal protein S30 fused to ubiquitin-like protein, structure and expression (human), **187**, 927
- α -fetoprotein, expression in PLC/PRF/5 human hepatoma cells, down-regulation by hepatocyte growth factor, **189**, 385
- fibroblast growth factor receptor 1, promoter region characterization (mouse), **183**, 688
- FKBP1 and FKBP2, encoding FKBP12 and FKBP13, chromosomal band assignments (human), **189**, 819
- flrA* regulatory locus, effects on biosynthesis and excretion of amino acids (*Escherichia coli*), **183**, 343
- α -L-fucosidase, mutation generating stop codon in fucosidosis patient, analysis, **189**, 1063
- fumaryl acetoacetate hydrolase, deletion, role in hepatorenal tyrosinemia: murine model, **187**, 340
- glnA*, encoding glutamine synthetase, molecular characterization (*Calothrix* sp. PCC 7601), **189**, 1296
- α -globin domain
- silencer element at 3'-side, interacting nuclear factor, characterization (chicken), **188**, 416
- transcription-dependent DNase I hypersensitive site in far upstream segment, coincidence with matrix attachment region (chicken), **184**, 1226
- α -globin, matrix attachment sites (mouse), **182**, 78
- α_{2u} -globulin, promotor regions, *in vitro* binding to estrogen receptor complexes (rat), **182**, 174
- glucocerebrosidase, molecular and functional characterization (mouse), **184**, 1477
- glutathione synthetase II, and genome flanking regions, nucleotide sequence (*Anaplasma centrale*), **182**, 1040
- glutathione S-transferase, expression in smooth muscle tumor cells, regulation by glucocorticoid, androgen, and retinoic acid (hamster), **184**, 1108
- GP91-phox, proximal promoter, sequence-specific binding of HMG-I(Y) proteins, **187**, 563
- granulin, chromosomal localization and sequencing (human), **188**, 57
- growth hormone, 5'-flanking region, role in heat stress-enhanced triiodothyronine-induced growth hormone production in cultured GC cells (rat), **188**, 638
- G α , mutations, detection in families with pseudohy-

Subject Index

- poparathyroidism, **189**, 343
- heat shock, expression, and thermotolerance development in HT-29 cells, quercetin-induced suppression, effect of pH (human), **186**, 1121
- hemopexin, characterization of proximal promoter region and identification of IL-6 responsive element (rat), **185**, 420
- heparin-binding fibroblast growth factor receptor, variant produced by splicing of alpha exon at alternate 3'-acceptor site, expression and transforming activity (rat), **183**, 23
- heparin-binding growth factor receptor, expression in megakaryocytic leukemia cells (human), **183**, 83
- hepatocyte growth factor, expression in dermal fibroblasts, up-regulation by interleukin-1 (human), **188**, 235
- hepatic fat-storing cells, and downregulation during cell growth by transforming growth factor- β (rat), **183**, 739
- histone H1⁰, basal level transcription, requirement of multiple cis-acting elements of the proximal promoter region (mouse), **188**, 1153
- histone H3 and H2B, structural changes in different tissues (chicken), **184**, 317
- homeobox
- Chox-7* and *Chox-8*, melanotropin-related, differential expression in limb development (chicken embryo), **182**, 121
 - expressed in hematopoietic blast cells, identification (human), **185**, 785
 - HOX 1, lineage- and stage-specific expression in hematopoietic cell lines (human), **183**, 1124
- hsp60*/chaperonin, expression in colon adenocarcinoma and multipotent leukemic cells, effect of differentiation (human), **186**, 371
- human $\alpha 2$ -C2 adrenergic receptor, murine homolog, cloning and expression, **186**, 1280
- 5-hydroxytryptamine receptor, cloning and expression (human), **185**, 517
- iduronate sulfatase, C¹³²⁷ to T substitution, association with mucopolysaccharidosis II (human fibroblasts), **183**, 809
- immediate-early and early delayed, expression, induction by thyrotropic hormone in rat thyroid cells, **183**, 265
- immunoglobulin heavy chain, rearranged, from B cell lines, cloning with anchored polymerase chain reaction (human), **182**, 1260
- indoleamine 2,3-dioxygenase, determination of exon-intron organization and 5'-flanking region sequence (human), **189**, 530
- inhibin α , and promoter, characterization (mouse), **186**, 293
- insulin-like growth factor II, induction and peak expression during BC3H-1 muscle cell differentiation (mouse), **183**, 1084
- insulin-like growth factor-binding proteins
- IGFBP-1, cloning and analysis of 5' promoter region (rat liver), **185**, 993
 - IGFBP-5, expression in retinoic acid-sensitive and resistant MCF-7 cells, differential regulation at post-transcriptional level (human), **188**, 1122
- insulin-like growth factor I promoter
- cell type-specifically regulated, two forms (human), **187**, 1219
 - characterization (rat), **189**, 972
- insulin receptor substrate-1-like, cloning and increased expression in hepatocellular carcinoma (human), **183**, 280
- interleukin-2, expression in splenocytes, effect of 5-fluorouracil (rat), **187**, 305
- intestinal mucin-like protein, localization on chromosome 11 p 15.5 (human), **183**, 821
- involved in cell survival during dormancy, protective effect against oxidative stress (*Escherichia coli*), **188**, 1054
- islet amyloid polypeptide, characterization and identification of polyadenylation site (human), **189**, 1569
- KC, cDNA cloning and mRNA expression in pulmonary macrophages and fibroblasts (rat), **184**, 922
- D-lactate dehydrogenase, NAD⁺-dependent, cloning and overexpression in *E. coli*, **185**, 705
- lactoferrin, structural organization (mouse), **189**, 1725
- laminin receptor, 67-kDa, increased expression in small cell lung cancer (human), **182**, 746
- lck*, signal transducing region, expression in egg (mouse), **182**, 527
- lecithin:cholesterol acyltransferase, exon I, amino acid exchange in, association with fish eye disease (human), **182**, 583; *erratum*, **184**, 549
- lentiviral, products expressed in bacteria, in analysis of antibody response to virus in sheep, **188**, 20
- leucyl-transfer RNA synthetase, temperature-sensitive mutant, *ilvGMEDA* operon repression control, maintenance at restrictive temperature (*Escherichia coli* K-12), **187**, 1106
- leukocidin F-component, from methicillin-resistant *Staphylococcus aureus*, cloning and nucleotide sequence, **184**, 640
- lipoprotein lipase
- G $\rightarrow$ C change at donor splice site of intron 1, role in LPL deficiency in southern-Italian family, **187**, 620
 - heterozygous mutation contributing to lipid interface recognition defect in type I hyperlipidemia, **182**, 70
- 5-lipoxygenase, cloning (guinea pig), **185**, 489
- low-density lipoprotein receptor, RFLP for, association with obesity in essential hypertensives, **189**, 965
- L1 ribosomal protein, splicing of regulatory intron, efficiency *in vitro*, effect of suboptimal consensus sequences (*Xenopus laevis*), **183**, 680
- lux*, linkage with genes corresponding in sequence to riboflavin synthesis genes in *Bacillus subtilis* (*Photobacterium leiognathi*), **186**, 690
- lyn*, encoding B-cell-associated tyrosine kinase, expression in primary neuroblastomas and modulation during neuroblastoma cell line differentiation (human), **186**, 1403
- α -2 macroglobulin, and promoter, structure (human), **184**, 596
- macrophage colony-stimulating factor, reassignment to chromosome 1p13-21 (human), **182**, 1139
- major histocompatibility complex II, expression, inhibition by anti-sense RNA in transgenic mouse, **186**, 832

Subject Index

- matrix metalloproteinase PUMP, synthesis by PCR method and expression in *Escherichia coli* (human), **186**, 143
- mau* cluster, genetic organization (*Paracoccus denitrificans*), **184**, 1181
- MDR1, encoded P-glycoprotein, mediation of digoxin transport (CHO cells), **189**, 551
- ME491/CD63, genomic structure and promoter activity of 5'-flanking regulatory sequences (human), **185**, 436
- medRNA and rRNA, tandem arrangement and phylogenetic analysis (*Bodo caudatus*), **182**, 1053
- metalloproteinase and inhibitor, expression in mesangial cells, effect of high glucose concentrations (rat), **185**, 1048
- metF* and *metJ*, and N⁵-methyltetrahydrofolic acid, role in vitamin B₁₂ regulation of methionine gene expression (*Escherichia coli*), **182**, 651
- O⁶-methylguanine-DNA methyltransferase, differences in enzyme-proficient and -deficient cell lines, **183**, 1184
- microtubule-associated protein MAP1B, embryonic α -tubulin, and late neural β -tubulin, expression in aged hippocampus (rat), **184**, 292
- MUC1, expression product secreted by murine epithelial cells transfected with full-length cDNA, lack of cytoplasmic tail (human), **185**, 1
- multidrug resistance-1, promoter
- activation in response to heat shock stress (human), **187**, 677
 - detection of element responding to serum starvation (human), **183**, 917
- MyoD1, expression in myogenic cells of limb buds in early developmental stages, regulation by retinoic acid (chicken), **187**, 245
- myogenin, induction and peak expression during BC3H-1 muscle cell differentiation (mouse), **183**, 1084
- myosin heavy chain, activation by catecholamine (human heart), **188**, 547
- α - and β -myosin heavy chain, expression in neonatal myocardial cells, stimulation by endothelin-1 (rat), **183**, 1260
- β -myosin heavy chain
- cardiac, missense mutation in Japanese patient with hypertrophic cardiomyopathy, **188**, 379
 - repression region with partial position dependency (human), **189**, 504
- ND2
- mitochondrial point mutation in, association with Alzheimer's disease, **186**, 491
 - point mutation relevant to Alzheimer's disease, detection by single nucleotide primer extension and mispairing PCR-RFLP, comparison (human), **189**, 1202
- ND6, mitochondrial, mutation associated with Leber hereditary optic neuropathy, analysis (human), **187**, 1551
- neu* oncogene, differential expression in hepatic and pancreatic cell lines (mouse), **186**, 363
- neurofibromatosis type 1, mRNAs
- expressed in peripheral nerve and neurofibromas, GAP domain, detection of additional exon (human), **188**, 851
 - two types expressed in gastric cancers, GTPase-activating protein activities (human), **187**, 332
- neuropeptide Y, nerve growth factor-response element in, identification and induction of binding proteins (rat), **189**, 1553
- Nm23, encoded nucleoside diphosphate kinase, amino acid sequence identity with differentiation inhibiting factor for murine M1 cells (human), **182**, 987
- nrdB*, bacteriophage T4, self-splicing in pre-mRNA group I intron, identification of 2'-amino-2'-deoxyguanosine as cofactor, **183**, 842
- nucleobinding, molecular cloning (mouse), **187**, 375
- oncogenic, induced radioresistance in transformed cells, correlation with changes in biochemical pathways of mitogenic signal transduction (murine fibroblasts), **183**, 652
- ornithine decarboxylase, overexpression, enhancement of papilloma formation in response to murine skin tumor promotion (human), **187**, 493
- osteocalcin, expression in tibia *in vivo*, effect of active vitamin D₃ analogs and dexamethasone (rat), **189**, 1231
- oxytocin, expression regulation in luteinizing granulosa cells, role of COUP transcription factor (bovine), **189**, 496
- p53
- highly conserved domain (I) region, peptide Pro-17-Gly derived from, binding of hsp70, **184**, 167
 - missense mutations and deletion in human gastric carcinoma, **182**, 215
 - mutations, analysis in primary lung cancer patients in Japan, **183**, 1139
- parathyroid hormone-related protein, preferential utilization of GC-rich promoter and PTHrP 1-139 coding pathway in amnion (human), **189**, 938
- pBUS51, vimentin homolog, differential expression in prostatic tumors (rat), **182**, 1254
- pectin lyase, cloning and nucleotide sequence (*Pseudomonas marginalis*), **182**, 14
- per*, *Drosophila*, homologs, expression in mammalian suprachiasmatic nucleus and heart and molluscan eye, **184**, 1082
- Pf16 high-mobility-group-like protein, cloning and characterization (*Plasmodium falciparum*), **182**, 412
- phospholamban, 5' flank, identification of highly conserved region (rat), **188**, 927
- phospholipase C- δ 1, mutation in spontaneously hypertensive rat, associated hypotensive effect, **187**, 1359
- Pit-1, mutations, identification in children with combined pituitary hormone deficiency, **189**, 851
- plasminogen-related, PRG B, expression in cancer cells (human), **186**, 1108
- platelet-activating factor receptor expressed in heart, cDNA cloning and characterization (human), **189**, 617
- platelet-derived growth factor
- chain A, expression in smooth muscle cells, induction by oxidized low-density lipoproteins (human), **186**, 1410
 - in vitro* expression in retinal pigment epithelial cells (human), **189**, 66
- pleiotropin
- expression, regulation by platelet-derived growth factor, **184**, 427
 - genomic organization (human), **187**, 1113

Subject Index

- POU domain-containing, *ZFPOU1*, expression in developing neural tissues (zebrafish), **187**, 1446
- pro α 1(I) collagen, post-transcriptional regulation in chemically transformed pro α 1(I)-deficient fibroblasts (hamster embryo), **188**, 780
- proliferating cell nuclear antigen homologs, analysis with PCR (carrot), **184**, 576
- pro-opiomelanocortin, expression in medial basal hypothalamus and pituitary, effect of adrenalectomy (rat), **186**, 418
- prospero*, cloning and expression in ganglion mother cells (*Drosophila melanogaster*), **182**, 1326
- prostatic acid phosphatase, structure (human), **184**, 1468
- protein phosphatases PP1 and PP2A
- cell cycle-dependent expression in NIH3T3 fibroblasts (mouse), **187**, 507
 - expression in liver regeneration after partial hepatectomy (rat), **185**, 291
- protein-tyrosine phosphatase LC-PTP, chromosomal mapping and molecular cloning (human), **186**, 1607
- PR53*, encoding essential proteasome subunit homologous to mammalian proteasome subunit C5, localization to chromosome 2 (yeast), **182**, 452
- pseudo-, *see* Pseudogenes
- pyruvate kinase L
- promoter elements, binding of transacting factors *in vitro*, **189**, 1119
 - structural analysis and identification of promoter activity in erythroid cells (human), **188**, 516
- ram*, encoded GTP-binding protein *ram* p25, Gly19→Val mutant, characterization, **189**, 330
- ras*, transformed NIH/3T3 fibroblasts
- with bradykinin-evoked cytoplasmic Ca²⁺ oscillations, ion selectivity of Ba²⁺ inward current oscillations, **185**, 162
 - induction by depudecin to production of flat phenotype (mouse), **182**, 379
 - type DT, Ba²⁺ current oscillations in, modulation by cyclic AMP and phorbol esters (mouse), **182**, 1240
- rd*, carriers of, levels of β subunit of retinal 3',5'-cyclic-GMP phosphodiesterase in, analysis (mouse), **184**, 461
- recoverin, isolation (human retina), **187**, 234
- reporter
- lacZ*, heterologous activity, discordant estimates as determined by reporter gene mRNA and enzyme activity, **189**, 912
 - SV40 large T antigen, direct *in vivo* introduction into kidney (rat), **186**, 129
- retinoblastoma
- encoded full-length biochemically active p110Rb, purification, **187**, 697; *erratum*, **188**, 956
 - product in myeloid leukemia cells, phosphorylation during cell cycle (human), **184**, 212
- retinoic acid receptor β , organization (human), **188**, 695
- rolC*, 5'-upstream region, associated single-stranded DNA, interaction with nuclear proteins of cultured carrot cells, **188**, 727
- rRNA, 23S and 5S, detection of tandem repeat in Lyme disease etiological agent *Borrelia burgdorferi*, **183**, 952
- S14, transcription-controlling adipocyte-specific retinoic acid response domain, localization (3T3-L1 fibroblasts), **188**, 470
- SA, effect on blood pressure in normal and spontaneously hypertensive rats, **188**, 64
- sarafotoxin S6C, cloning and sequencing (*Atractaspis engaddensis*), **189**, 1527
- secretin precursor, tissue-specific expression (rat), **183**, 390
- smooth muscle protein overexpressed in senescent fibroblasts, sequence and expression (human), **187**, 1
- sodium channel α subunit on 17q from adult skeletal muscle, sequence and genomic structure (human skeletal muscle), **182**, 794
- somatostatin family, detection in tetrapods: isolation of somatostatin-related peptides in brain (frog), **188**, 477
- spermidine/spermine N¹-acetyltransferase, SSAT, structural analysis (human), **187**, 1493
- Sry, DNA-binding region amino acid change, role in C57BL/6J-Y^{DOM} sex-reversal (mouse), **185**, 310
- stearoyl-CoA desaturase, expression in lymphocytes and thymocytes (mouse), **186**, 531; *erratum*, **187**, 1201
- steroid 21-hydroxylase and complement C4B, and C4A/CYP21P, intergenic sequences, comparison and identification of regulatory elements (human), **186**, 256
- subtilisin J, molecular cloning and expression in *Bacillus subtilis* (*Bacillus stearothermophilus*), **184**, 277
- synthetic, encoding *Clostridium pasteurianum* 2[4Fe-4S] ferredoxin, design and expression in *Escherichia coli*, **185**, 341
- tag, *Escherichia coli*, encoding 3-methyladenine glycosylase I, expression in NIH-3T3 murine fibroblasts, **185**, 41
- tenascin, alternative splicing products, role in distinguishing hepatic fat-storing cells from arterial smooth muscle cells and dermal fibroblasts (rat), **185**, 768
- thioltransferase, cloning and sequencing (*Saccharomyces cerevisiae*), **187**, 949
- thioredoxin, vitamin A-enhanced transcription in conducting airway epithelial cells (monkey), **183**, 170
- thymidine kinase, temporal expression in Chinese hamster cells, **184**, 908
- thymidylate synthase, cellular differentiation-dependent nuclear factors binding to, identification (human), **185**, 127
- thymosin β 4, expression during embryogenesis (*Xenopus laevis*), **184**, 93
- thyroid hormone receptor β 1, promoter region, cloning and characterization (human), **185**, 78
- thyrotropin β subunit, inhibition by thyroid hormone: modulation by *c-fos* and *c-jun* (human), **189**, 1050
- topoisomerase I, point mutation in CPT-11-resistant lung cancer cells, detection (human), **188**, 571
- transferrin receptor, promoter, adoption of supercoil-dependent non-B DNA conformation (human), **183**, 62
- transthyretin
- expression in liver, repression by peroxisome proliferator clofibrate (rat), **188**, 799
 - mutation associated with familial amyloidotic polyneuropathy (human), **182**, 520
 - point mutation, detection in familial cardiac amyloidosis-affected patient, **187**, 460

Subject Index

- tRNA^{Leu}, mitochondrial mutation associated with fatal cardiomyopathy (human), **186**, 47
- tumor necrosis factor α , expression in stimulated retinal pigment epithelial cells *in vitro* (human), **187**, 1029
- tyrosinase-related protein, downstream region, enhancement of promoter activity (human), **184**, 568
- tyrosine aminotransferase, insulin-responsive transcription, role of multiple promoter regions (rat hepatoma cells), **187**, 778
- tyrosine hydroxylase, isolation and characterization: comparison with human gene (mouse), **182**, 348
- urokinase receptor, transcriptional activation by endothelin-1 (human), **186**, 1631
- vacuolar H⁺-ATPase
- 16-kDa proteolipid subunit, cloning and sequencing (human liver), **183**, 856
 - subunit C, overexpression in multidrug-resistant HL60 cells (human), **182**, 675
- vesicular stomatitis virus nucleocapsid, 5' sequence, role in selective mRNA translation in infected cells (human), **189**, 1585
- vitellogenin A2, hormone response element, estrogen receptor-induced bending (*Xenopus laevis*), **185**, 944
- Gene therapy
- cystic fibrosis, amphotropic retroviruses with hybrid LTR as tool for, construction, **187**, 187
- Genetic variation
- amino acid change in Sry DNA-binding region, role in C57BL/6J-Y^{DOM} sex-reversal (mouse), **185**, 310
- Gene transfer
- direct, into kidney *in vivo*, utilization of Sendai virus and liposomes (rat), **186**, 129
- Genistein
- blockade of calcium channel currents in vascular smooth muscle cells (rabbit), **189**, 1620
 - effect on cytoplasmic free calcium in isolated hepatocytes (rat), **182**, 894
 - inhibition of human hepatocyte growth factor effect on DNA synthesis in primary cultured hepatocytes (rat), **185**, 22
- Genotyping
- hepatitis C virus isolates from Thailand (human), **183**, 334
- trans,trans*-Geranylgeranyl diphosphate
- biosynthesis by cytosolic fraction from rat tissues, **186**, 157
- Germ cells, *see also specific types*
- haploid, G₀ α , detection of splice variant (male rat), **183**, 41
 - mediated stimulation of Sertoli cells, second messenger pathway (rat), **184**, 217
- Ginsenosides
- protection of pulmonary vascular endothelium against free radical-induced injury (rabbit), **189**, 670
- Glial cells, *see also specific types*
- as model for cobalamin role in nervous system: impaired Cbl coenzyme synthesis *in vitro* after short-term Cbl deprivation (human), **184**, 832
- α -Globin
- gene domain
 - silencer element at 3'-side, interacting nuclear factor, characterization (chicken), **188**, 416
 - transcription-dependent DNase I hypersensitive site in far upstream segment, coincidence with matrix attachment region (chicken), **184**, 1226 - gene matrix attachment sites (mouse), **182**, 78
- α_{2u} -Globulin
- gene promoter region, *in vitro* binding with estrogen receptor complexes (rat), **182**, 174
- Gloeocercospora sorghi*
- cyanide hydratase gene, cloning and sequencing, **187**, 1048
- Glomerulosa cells
- adrenal, aldosterone secretion, angiotensin II- and K⁺-mediated, role of Ca²⁺-calmodulin system in maintenance (bovine), **182**, 254
- Glucagon
- ¹²⁵I-labeled, binding to hepatocytes, effect of D-galactosamine (rat), **184**, 654
 - secretion in In-R1-G9 cells, suppression by glucagon-like peptide-1(7-36)amide, **186**, 503
- Glucocerebrosidase, *see* Glucosylceramidase
- Glucocorticoid receptors
- ursodeoxycholic acid-dependent activation (human), **188**, 942
- Glucocorticoids
- early induction of calmodulin in pituitary corticotrope tumor cells and suppression by corticotropin-releasing factor (mouse), **189**, 1382
 - effects on
 - Ca²⁺ influx through dihydropyridine-sensitive channels linked to protein kinase C activation in vascular smooth muscle cells (rat), **188**, 934
 - induction of calcium-dependent nitric oxide synthase in chondrocytes (rabbit), **188**, 209
 - suppression of glutathione transferase P expression in fibroblast cell line (rat), **187**, 976
- (1 $\rightarrow$ 6)- α -D-Glucopyranan
- hypoglycemic function, analysis (mouse), **188**, 16
- Glucose
- blood level, effects of synthetic polysaccharides (mouse), **188**, 16
 - effect on vascular smooth muscle cell growth (pig), **187**, 552
 - high concentrations, effects on
 - gene expression of metalloproteinase and inhibitor in mesangial cells (rat), **185**, 1048
 - platelet-derived growth factor mRNA levels in cultured vascular endothelial cells (human), **187**, 664 - insulin-mediated hepatic uptake *in vivo*, role of Kupffer cells (rat), **186**, 455
 - oxidation rates in pancreatic islets, and aconitase activity and NO production, effects of interleukin-1 β (mouse, rat), **182**, 333
 - regulation of G_i protein expression in BC3H-1 myocytes, **182**, 1193
 - transport in
 - permeabilized adipocytes, stimulation by guanine nucleotides (rat), **189**, 572
 - skeletal muscle, and GLUT4 translocation, effects of epinephrine (rat), **187**, 685
 - utilization in brown adipose tissue, effect of cold exposure (rat), **185**, 1078
- Glucose-6-phosphatase
- microsomal, effects of proteases and protease inhibitors

Subject Index

- (rat liver), **183**, 590
- Glucose-6-phosphate dehydrogenase
denatured fungal, reactivation with *Escherichia coli* 70S ribosome, **183**, 774
- Glucose transporters
GLUT1
deletion of C-terminal 12 amino acids, effect on transport activity, **184**, 865
expression and function during oocyte to blastocyst development (mouse), **188**, 8
GLUT1 and GLUT4, gene expression, differential regulation in adipose tissue during hypermetabolic sepsis (rat), **183**, 417
GLUT3
distribution in human tissues, **188**, 149
expression in rat brain and neurons (human, mouse), **182**, 703
facilitative, detection in L6 muscle cells: regulation by cellular differentiation, insulin, and insulin-like growth factor-I (rat), **186**, 1129
GLUT4
contraction-induced translocation in isolated ventricular cardiomyocytes (rat), **189**, 1207
expression in brown adipose tissue, effect of cold exposure (rat), **185**, 1078
translocation, stimulation by epinephrine with reduction in skeletal muscle glucose transport (rat), **187**, 685
mRNA levels in intestine, developmental changes (rat), **183**, 626
- Glucosylceramidase
encoding gene, molecular and functional characterization (mouse), **184**, 1477
- Glucosylceramide
specific binding by rat lung surfactant protein SP-D (human), **187**, 963
- Glucuronide conjugates
20-hydroxyeicosatetraenoic acid excretion in human urine as, **185**, 728
- Glutamate
inhibition of phosphatidylserine synthesis in glioma C6 cells (rat), **186**, 1582
stimulation of NO-dependent cGMP formation in cultured neurons and astrocytes, mediation by different receptors (rat), **182**, 1362
- Glutamate- α -ammonia ligase
encoding gene, molecular characterization (*Calothrix* sp. PCC 7601), **189**, 1296
- Glutamate-cysteine ligase
full-length cDNA, cloning and nucleotide sequence (human liver), **185**, 29
- Glutamate receptor channels
 $\delta 1$ subunit cDNA cloning and deduced amino acid sequence (mouse), **183**, 886
- Glutamate receptors
GluR1 subunit, glutamine-to-histidine point mutation, effects on inward rectification and calcium permeability (*Xenopus laevis* oocytes), **182**, 1089
metabotropic, coexpression with transient-type K channels from heart, in analysis of K channel functional modulation (rat), **189**, 430
- Glutamine- α -ammonia ligase
in dibutyryl cAMP-treated astrocytes, effects of endothelin-1: role of ET_B receptor expression (rat), **186**, 355
- Glutamine synthetase, *see* Glutamate- α -ammonia ligase
- Glutamine transporters
sodium-dependent, kinetics in intestinal cell confluent monolayers (human), **188**, 746
- γ -Glutamylamine cyclotransferase
catalyzed dansylcadaverine release from γ -amide, continuous monitoring, **186**, 334
- γ -Glutamylcysteine synthetase, *see* Glutamate-cysteine ligase
- γ -Glutamyl dansylcadaverine
amide bond cleavage in, continuous monitoring by detection of dansylcadaverine leaving group, **186**, 334
- N^F(γ -Glutamyl)lysine
crosslinks in clotted blood, detection: role of transglutaminase in coagulation (horseshoe crab), **188**, 655
- γ -Glutamyltranspeptidase
mutants, deficiency in processing to subunits (*Escherichia coli*), **189**, 173
- Glutathione
-class Pi glutathione S-transferase complex, pK_a of thiol group in, effect of tyrosine-7 in enzyme (human), **184**, 194
identification as reducing agent in reductive dehalogenation of tetrachloro-*p*-hydroquinone by *Flavobacterium* extracts, **182**, 361
inhibition of viral replication and expression of viral proteins in cultured cells infected with Sendai virus (monkey kidney), **188**, 1090
synthesis in intact ocular lens, measurement by ¹³C NMR (rabbit), **186**, 931
- Glutathione conjugates
tert-butyl hydroquinone, as redox cycling and reactive agents in butylated hydroxyanisole toxicity, **189**, 309
- Glutathione synthase II
encoding gene, and genome flanking regions, nucleotide sequence (*Anaplasma centrale*), **182**, 1040
- Glutathione transferase
class alpha isozymes, bacterially expressed, aflatoxin B₁-8,9-epoxide conjugating activities, comparison (mouse, rat), **188**, 597
class pi
catalytic activity, role of tyrosine-7 residue (human), **182**, 1122
tyrosine-7 in, effect on pK_a of thiol group of glutathione in enzyme-glutathione complex (human), **184**, 194
Drosophila, sequence homology to stringent starvation protein of *Escherichia coli*, **182**, 355
gene expression in smooth muscle tumor cells, regulation by glucocorticoid, androgen, and retinoic acid (hamster), **184**, 1108
placental
active site, role of tryptophan-38, **185**, 1069
cysteine residues, characterization, **188**, 424
expression in fibroblast cell line, suppression by glucocorticoid (rat), **187**, 976
fatty acid binding site, identification (rat), **189**, 197
regulation by nonsubstrate hydrophobic ligand, circular

- dichroic evidence for, **189**, 1243
- Glutathione *S*-transferase, *see* Glutathione transferase
- Glutenin
- high-molecular-weight subunit, small-angle X-ray scattering study by synchrotron orbital radiation: structural anisotropy, (wheat), **186**, 1057
- O-Glycans
- sialylation in cultured C6 glioma cells: regulation of β -galactoside α 2,3 sialyltransferase by Ca^{2+} /calmodulin antagonists and phosphatase inhibitors (rat), **186**, 1575
- Glycation
- lens protein MIP26, effect on reconstituted liposome permeability (bovine), **186**, 632
 - membrane proteins MP22 and MP26 in lens membranes (bovine), **185**, 496
- Glyceraldehyde-3-phosphate dehydrogenase
- hepatic mRNA levels, carbon tetrachloride-induced increase, suppression by prostacyclin (rat), **185**, 981
 - modified at Arg residues, half-of-the-sites reactivity (rabbit muscle), **187**, 577
- Glycine
- modulation of glycine receptor phosphorylation by protein kinase C (rat), **188**, 813
 - substitution by arginine
 - at position 145 of HBs antigen, in hepatitis B virus immune escape mutant (human), **184**, 1152
 - at position 545 of type X collagen, polymorphism responsible for, identification, **187**, 420
 - substitution for tyrosine-14 in Δ^5 -ketosteroid isomerase, specific activation of resulting mutant by phenols (*Pseudomonas testosteroni*), **184**, 1386
- Glycine receptors
- phosphorylation by protein kinase C, modulation by glycinergic ligands (rat), **188**, 813
- Glycogen
- metabolism in liver *in vivo*, ^{13}C NMR study (baboon), **182**, 900
 - synthesis in hepatocytes, inhibition by transforming growth factor α (guinea pig, rat), **183**, 560
- Glycogen phosphorylase
- deficiency in forearm muscle, associated metabolic anomalies, ^{31}P NMR study (human), **185**, 16
- Glycogen synthase
- insulin-induced activation in hepatocytes, inhibition by transforming growth factor α (guinea pig, rat), **183**, 560
- Glycolipid receptors
- binding of exoenzyme S from *Pseudomonas aeruginosa*, specificity, **175**, 1076, *erratum*, **186**, 601
- Glycolipids
- binding specificities of lung surfactant protein SP-D for, **187**, 963
 - effects on phase behavior and dynamic properties of phospholipid liposomes, **186**, 1294
- Glycolysis
- in A431 cells, effects of epidermal growth factor (human), **183**, 1216
- Glycopeptides
- 60-kDa, association with cathepsin D precursor, **182**, 276
- Glycophorin
- gp3, and sialoglycoprotein gp60, common epitopes (rat), **187**, 1158
 - as viral receptor, reconstituted phosphatidylcholine liposomes, membrane fusion with influenza virus, **186**, 378
- Glycoproteinase
- effect on binding of myeloid cells to E- and P-selectins (*Pasteurella haemolytica*), **188**, 760
- Glycoprotein-N-glycans
- sulfated, in recombinant human tissue plasminogen activator, biosynthesis, **189**, 1681
- Glycoproteins
- α_1 -acid, acute phase promoter element of encoding gene, nuclear factors interacting with, identification (rabbit), **189**, 1464
 - associated with dystrophin-glycoprotein complex, specific binding by calmodulin (rabbit), **185**, 753
 - biliary, expressed on CHO cell surface, homotypic and heterotypic Ca^{2+} -independent adhesion activities (human), **186**, 881
 - cancer-associated, analysis in human tumor cells by monoclonal antibody MLS 128 recognizing Tn antigen, **187**, 217
 - CD44, epithelial isoform, generation by alternative splicing of internal exons of transcriptional unit (human), **182**, 569
 - comprised in 90- to 100-kDa band of granulocyte nonspecific cross-reacting antigens detectable with SDS-PAGE, identification (human), **182**, 501
 - envelope, hepatic C virus, characterization of hypervariable regions, **189**, 119
 - GMP-140, inhibition of neutrophil activation by lipopolysaccharide, ^1H NMR study (human), **183**, 1062
 - GP2, in exocrine pancreas, secretory behavior (rat), **184**, 888
 - GPIIIa, of ADP-stimulated human platelets, binding to snake venom peptide triflavin (human), **189**, 1236
 - gp40, N'-terminal region, identification as serological marker for ovine progressive pneumonia infection, **188**, 20
 - gp120, HIV-1, second conserved region, spectral and sequence similarities to vasoactive intestinal peptide (human), **189**, 705
 - gp183, trypanomastigote stage-specific epitope required for attachment to myoblasts, recognition by monoclonal antibody (*Trypanosoma cruzi*), **182**, 6
 - P-, *see* P-glycoprotein
 - processing, inhibitors, action at early stage of myogenesis, analysis (rat), **184**, 125
 - snake venom, carbohydrate moieties, characterization, **182**, 294
 - transmembrane, ovine progressive pneumonia virus, antibodies to, detection with *env* gene-derived recombinant antigen, **183**, 1040
- Glycosaminoglycan
- binding proteins in hepatocytes, analysis: differentiation of divalent cation-independent and divalent cation-dependent activities (rat), **189**, 1591
- α -Glycosidic bonds
- in poly(ADP-ribose), acid lability (bovine), **184**, 544
- Glycosulfatase
- activity toward gastric mucin, detection in extracellular

Subject Index

- material (*Helicobacter pylori*), **183**, 506
- Glycosylation
- chemical, gp120 peptide T at natural and artificial glycosylation sites, stabilization or rearrangement of dominant reverse turn structure, **184**, 1125
 - defective BHK cell lines, selection, **186**, 102
 - post-translational, annexin I and II (human squamous carcinoma cells), **188**, 554
 - vascular endothelial growth factor, role in mitogenic activity (BHK-21 cells), **182**, 1340
- N-Glycosylation
- β -amyloid precursor protein, analysis (human), **189**, 1667
- O-Glycosylation
- insulin-like growth factor binding protein-6 (human), **186**, 301
 - tumor cells, blocking, inhibition of selectin-dependent tumor cell adhesion to endothelial cells and platelets (human), **182**, 1288
- Glypican
- identification of cloned rat cerebral heparan sulfate proteoglycan as, **188**, 395
- GnRH. *see* Gonadotropin-releasing hormone
- Golgi apparatus
- associated modified Kex2 enzyme, cleavage of α -factor leader proregion in endoplasmic reticulum (yeast), **183**, 212
- Gonadotropin-releasing hormone
- analogs with tetrahydroisoquinoline carboxylic acid, synthesis and theoretical conformation studies (rat), **187**, 1035
 - inhibition of FSH-induced steroidogenesis in ovarian granulosa cells, role of diacylglycerol and Ca^{2+} (rat), **188**, 198
 - two forms, purification from brain extracts (African catfish), **187**, 127
- Gonadotropin-releasing hormone receptors
- cDNA
 - isolation and characterization (rat pituitary), **189**, 1645
 - isolation and expression (human pituitary), **189**, 289
- G-proteins
- and Ca^{2+} , role in platelet-activating factor biosynthesis in cultured mast cells (mouse), **184**, 1425
 - α -chain, and RAS2, expression, role in RAS-linked adenylyl cyclase suppression by α -mating factor receptor (yeast), **184**, 1378
 - coupled receptors, transforming, activation, induction of rapid tyrosine phosphorylation of cellular proteins (murine fibroblasts), **188**, 155
 - coupling domains in
 - angiotensin II receptor type I, analysis by site-directed mutagenesis (rat), **189**, 677
 - HM1 muscarinic receptor, associated third cytoplasmic loop domains, mutational analysis (human kidney cells), **188**, 1111
- DRG
- encoding gene, characterization: developmentally regulated GTP-binding protein (murine brain), **189**, 363
 - expression during embryonic development (mouse), **189**, 371
 - G_i , expression in BC3H-1 myocytes, regulation by glucose, **182**, 1193
- $\text{G}_{i\alpha}$, association with pp60^{src} in human platelets, induction by epinephrine, **186**, 440
- $\text{G}_o\alpha$, splice variant in haploid germ cells (male rat), **183**, 41
- G_s , α -subunit, recombinant spliced variants, phosphorylation by protein kinase A catalytic subunit (*Escherichia coli*), **186**, 1081
- heterotrimeric, β -subunits: detection of $\text{G}\beta 4$ in variety of tissues (mouse), **183**, 350
- pertussis toxin-sensitive
- coupling with 1-methyladenine receptor in oocyte membrane (starfish), **186**, 114
 - role in regulation of ATP-induced Ca^{2+} influx in PC12 cell clone (rat), **188**, 1184
- ram p25, Gly19 $\rightarrow$ Val mutant, characterization, **189**, 330
- rho*
- GDI, activation on multiple small GTP-binding proteins in cytosol fraction of differentiated HL-60 cells (human), **182**, 921
 - post-translational isoprenylation, effect on interaction with amphiphilic agents (porcine brain), **186**, 448
- rho* p21, activation in smooth muscle, regulation, cooperative function of *rho* GDS and *rho* GDI (bovine aorta), **185**, 473
- role in
- generation of inositolglycan mediators from hepatic plasma membranes (rat), **186**, 1151
 - Mg^{2+} -modulated activation of NADPH oxidase (human neutrophils), **186**, 391
- small
- ADP-ribosylation by C3-like exoenzyme of *Bacillus cereus* (human platelets), **183**, 931
 - multiple, activity of *smg* GDS and *rho* GDI on, analysis in cytosol fraction of differentiated HL-60 cells (human), **182**, 921
- smg* p25A/*rab* 3A p25, localization at active zone of neuromuscular junction (rat), **186**, 1345
- stimulated endothelial, role in vascular smooth muscle relaxation (pig), **189**, 324
- α_{16} subunit, mutationally activated, stimulation of phospholipase C in COS-1 cells, **188**, 1018
- $\beta\gamma$ -I and $\beta\gamma$ -II subunits, separation (bovine brain), **184**, 175
- translocation to membrane, role of lipopolysaccharide-serum complex (human), **183**, 1280
- Gramicidin S
- effect on phosphatidylcholine small unilamellar vesicle susceptibility to phospholipases A_2 , C, and D, **182**, 682
- Granules
- chromaffin, *see* Chromaffin granules
 - mast cell, membranes reconstituted into lipid bilayer, Ca-dependent cation channel (rat), **185**, 793
 - platelet, membranes, cytoplasmic procalcitonin I translocation onto and activation during stimulation with thrombin, analysis (human), **185**, 1122
 - secretory, *see* Secretory granules
 - zymogen, *see* Zymogen granules
- Granulin
- gene structure and chromosomal localization (human), **188**, 57

- Granulocyte-macrophage-colony stimulating factor and interleukin-3, induction of inositol trisphosphate receptor expression in K562 cells (human), **187**, 438
- mRNA, increase in irradiated cancer levels: stabilization through AU-rich region (human), **189**, 986
- soluble binding protein, identification in choriocarcinoma cell line supernatant (human), **183**, 252
- Granulocytes
- immunocytochemical localization of 6-pyruvoyl tetrahydropterin synthase (human), **182**, 810
 - from insulin-resistant patients, phosphofructokinase 1 kinetics, **185**, 559
 - nonspecific cross-reacting antigens comprising 90- to 100-kDa band detectable with SDS-PAGE, identification (human), **182**, 501
 - related cells, HL60 cells induced to, expression of *src*-related protein-tyrosine kinase *lyn* (human), **185**, 91
- Granulosa cells
- FSH-induced steroidogenesis, inhibition by GnRH, role of diacylglycerol and Ca^{2+} (rat), **188**, 198
 - from *in vitro* fertilization patients, expression of bFGF mRNA, analysis by reverse transcription with nested PCR (human), **187**, 1227
 - luteinizing, oxytocin gene expression regulation in, role of COUP transcription factor (bovine), **189**, 496
- Graves' disease
- immunoglobulins
 - heterogeneous responses of recombinant human thyrotropin receptors, **186**, 1391
 - IgG, recognition of linear epitopes in thyrotropin receptor (human), **188**, 28
 - peripheral blood from affected patient, human thyrotropin receptor-related peptide-like immunoreactivity in, characterization, **186**, 1074
- Growth factors
- effects on interleukin-6 expression and release by normal and transformed bronchial epithelial cells (human), **187**, 596
 - FF-GF, synthesized by hepatoma cell line FF101, purification and characterization (rat), **189**, 654
 - induced neurite outgrowth in PC12 cells, prevention by dipeptide ubiquitin-mediated protein turnover inhibitors (rat), **189**, 280
 - multiple, mRNA expression in adipocyte precursor cells (chicken), **187**, 1298
 - schwannoma-derived, androgen-responsive expression and mitogenic activity in murine mammary carcinoma SC2G cells (mouse), **185**, 103
 - vascular endothelial, glycosylation, role in mitogenic activity (BHK-21 cells), **182**, 1340
- Growth hormone, *see* Somatotropin
- Growth hormone receptors
- expression in placenta (human), **182**, 481
- Growth hormone-releasing factor, *see* Somatoliberin
- Growth inhibitor
- mammary-derived, related polypeptide expressed during pregnancy, purification (bovine), **189**, 406
- Growth inhibitory factor
- low-molecular-weight, production by adenovirus type 12-transformed cells (mouse), **187**, 1232
- GTP (guanosine 5'-triphosphate)
- ATP binding site, absence in prolactin receptor (rat), **183**, 610
 - effect on chloride channels in hepatic lysosomal membranes (rat), **187**, 254
 - hydrolysis by post-translationally modified rho protein, augmentation by amphiphilic agents (porcine brain), **186**, 448
- GTPase
- ras-related Rap2 protein, regulation (bovine brain), **189**, 455
- GTPase-activating proteins
- p21^{ras}
 - agonist-induced association with phosphatidylinositol 3-kinase (rat), **189**, 1503
 - subcellular distribution, alteration in proliferating parotid acinar cells (rat), **187**, 1172
 - related activity of two neurofibromatosis type I mRNA types expressed in gastric cancers (human), **187**, 332
 - related domain in neurofibromatosis 1 gene transcripts expressed in peripheral nerve and neurofibromas, detection of additional exon (human), **188**, 851
 - stimulating human rap2b, purification from bovine cerebral membranes, **189**, 717
- GTP cyclohydrolase I
- encoding mRNA, identification of multiple forms (human), **187**, 359
- GTP γ S (5'-O-3-thiotriphosphate)
- effect on Ca^{2+} currents in pituitary hormone-secreting cells (rat), **187**, 529
 - induction of endothelium-dependent pertussis toxin-sensitive relaxation in coronary artery (pig), **189**, 324
 - smg* GDS-stimulated binding to *smg* p21B, effect of chlorpromazine, **182**, 1446
- Guanidino succinate
- identification as putative endogenous source of endothelium-derived relaxing factor (rat aorta), **183**, 584
- Guanine
- interaction with cytosine and tryptophan molecules, spectroscopic study: molecular recognition by hydrogen bond pairing and aromatic stacking, **183**, 577
- Guanine nucleotides
- binding activity in mutated *ram* p25, analysis, **189**, 330
 - stimulation of glucose transport in permeabilized adipocytes (rat), **189**, 572
- Guanylate cyclase
- coupled natriuretic peptide receptors GC-A and -B, mRNAs, colocalization in tissues (rat), **189**, 610
 - cytosolic, highly purified, degree of activation by nitric oxide (bovine lung, human placenta), **183**, 312
 - in endothelial cells from cerebral microvessels, identification of C-type natriuretic peptide as activator (rat), **183**, 640
 - GC-A and GC-B, stable expression, effects of C-type natriuretic peptide, **189**, 336
 - intestinal, endogenous activator, characterization: cloning of guanylin cDNA (rat), **185**, 812
 - nitroprusside-sensitive and -insensitive, in retinal rod outer segments, analysis (bovine), **185**, 909
 - particulate, inhibition by angiotensin AT₂ receptor in plasma membrane particulate (rat), **183**, 206

Subject Index

- receptor-stimulated, inhibition by intracellular Ca^{2+} (*Dic-
tyostelium discoideum*), **186**, 263
- soluble, inhibitory effects of oxidized low-density lipopro-
tein and lysolecithin, antagonism by high-density
lipoprotein, **182**, 302
- stimulation and retention in ring-reversed atrial natriuretic
peptide analog, **185**, 734
- type A, mRNA expression in retina, detection by PCR
(rat), **182**, 851
- vascular smooth muscle cells, effect of interferon- γ (rat),
188, 409
- Guanylin
 cDNA cloning and characterization (rat), **185**, 812
- Guanylyl cyclase, *see* Guanylate cyclase
- Guard cells
 plasmalemma, lipid phase alterations, regulation of ab-
 scisic acid-induced stoma closure and reversal by
 umbelliferone (*Vicia faba*), **186**, 652
- H**
- H7
 potentiation of human hepatocyte growth factor effect on
 DNA synthesis in primary cultured hepatocytes (rat),
 185, 22
- structure and biological activities, variation with commer-
 cial source, **187**, 657
- Halenquinone
 effect on protein-tyrosine kinase activity of pp60_{v-src}
 (marine sponge), **184**, 765
- Halistanol trisulfate
 critical micelle concentration and hemolytic activity, cor-
 relation, **182**, 115
- Halobacterium salinarum*
 bacterio-opsin, *in vitro* synthesis and integration into
 microsomal membranes, **187**, 1480
- Halothane
 effect on [^3H]ryanodine binding to cardiac and skeletal
 ryanodine receptors (pig), **186**, 595
- transient protein adduct formation in heart after single
 dose exposure (rat), **184**, 1344
- Hamycin
 antileishmanial activity *in vitro*, **182**, 86
- Heart, *see also* Myocardium
 angiotensin I-converting enzyme activity in spontaneously
 hypertensive hamster, **183**, 1117
- atrial activity, direct stimulation by relaxin *in vitro* (rat),
 186, 999
- embryonic cells, intracellular Na^+ levels, regulation *in*
 vitro (chicken), **186**, 674
- expressed platelet-activating factor receptor gene, molecu-
 lar cloning and characterization (human), **189**, 617
- expression of
 Drosophila per gene homologs (hamster), **184**, 1082
- secretin precursor gene (rat), **183**, 390
- failure, coenzyme Q_{10} therapy in transplant-eligible and
 inegible patients, evaluation, **182**, 247
- ischemia-reperfusion injury, protective effect of tumor
 necrosis factor- α pretreatment (rat), **184**, 1056
- left atria
 endothelin binding and functional activity, role of
 endothelin secondary structure (rat), **183**, 572
- endothelin receptor subtypes, discrimination with endo-
 thelin and structurally related analogs (rat), **183**,
 566
- mitochondrial DNA, age-associated oxygen damage and
 mutations (human), **189**, 979
- nonmyocytic atrial cells, processing of atriopeptin prohormone
 (rat), **188**, 644
- transient trifluoroacetylated protein adduct formation after
 halothane and 2,2-dichloro-1,1,1-trifluoroethane
 exposure (rat), **184**, 1344
- Heat shock
 effects on DNA topoisomerase I, protection by thermotol-
 erance induction in T cells, **186**, 166
- induced activation of multidrug resistance-1 gene promoter
 (human), **187**, 677
- temperature range, hsp85 conformational change within,
 analysis (murine fibrosarcoma cells), **184**, 394
- induced translocation and induction of αB -crystallin in
 glioma cells (rat), **182**, 844
- Heat shock proteins
 binding immunophilin FKBP59-HBI, calmodulin binding
 activity (rabbit), **187**, 1330
- hsp27, *Drosophila*, expression in CHO cells, conferral of
 thermal resistance, **185**, 116
- hsp28, cell cycle-dependent phosphorylation by trans-
 forming growth factor β_1 and H_2O_2 in osteoblasts and
 ras transformants, analysis (mouse), **187**, 1418
- hsp60, human, related processed protein, identification in
 bovine kidney, **185**, 683
- hsp70
 specific binding to peptide Pro-17-Gly derived from
 highly conserved domain (I) region of p53 genes,
 184, 167
- suppressed expression, association with hematopoietic
 cell proliferation and differentiation (human), **183**, 733
- hsp72, augmented expression in normal fibroblasts irradi-
 ated with uv light (human), **186**, 1257
- hsp85, conformational change within heat shock tempera-
 ture range (murine fibrosarcoma cells), **184**, 394
- Heat stress
 GC cells *in vitro*, enhancement of triiodothyronine-
 induced growth hormone production by action within
 5'-flanking region of growth hormone gene, **188**, 638
- Hematopoietic cells
 lineage- and stage-specific expression of HOX 1 genes
 (human), **183**, 1124
- progenitors identification of expressed homeobox-contain-
 ing genes (human), **185**, 785
- proliferation and differentiation, role of heat shock protein
 70 (human), **183**, 733
- Heme
 de novo biosynthesis pathway: chemotherapeutic target
 (*Plasmodium falciparum*), **187**, 744
- transport in erythroleukemia cells, role of transferrin
 (mouse), **189**, 765
- type O, biosynthesis: role of *cyoE* gene in cytochrome *BO*
 operon encoding protoheme IX farnesyltransferase
 (*Escherichia coli*), **189**, 1491

- Heme oxygenase
catalytic activity, role of histidine residue 25 (rat), **182**, 981
- Hemeproteins
S-nitrosocaptopril transfer of nitroso moiety to, **189**, 206
oxidation of N⁶-hydroxy-L-arginine, in formation of nitro-
gen oxides and citrulline, **184**, 1158
- Hemoglobin
amino acid residues, modification by nitric oxide (hu-
man), **183**, 598
cDNA encoding major component from *Paramecium cau-
datum*, cloning, **182**, 195
-CO, in ESR study of nitric oxide production in lipo-
polysaccharide-treated rats, **184**, 1119
derived opioid peptide, isolation from cerebrospinal fluid
of patients with cerebrovascular bleeding, **184**, 1060
erythroleukemic cells synthesizing, formation of DNA
interstrand cross-links, effects of cisplatin and carbo-
platin (mouse), **182**, 760
free, effect on detection of endothelin peptides (human,
pig, rat), **189**, 777
from hemipteran *Buenoa margaritacea*, spectroscopic
analysis, **187**, 570
-nitric oxide, *see* Nitric oxide hemoglobin
nitrosylated, formation in erythrocytes cocultured with
alveolar macrophages from bleomycin-treated rats,
182, 151
peptic hydrolysate, opioid peptides from, isolation and
characterization (bovine), **189**, 101
structural study and preliminary crystallographic data
(reindeer), **187**, 1063; *erratum*, **189**, 1253
- Hemolymph
proteinase inhibitors, isolation (locust), **189**, 790
- Hemolysis
by halistanol trisulfate, correlation with critical micelle
concentration, **182**, 115
- Hemopexin
encoding gene, characterization of proximal promoter
region and identification of IL-6 responsive element
(rat), **185**, 420
- Hemorrhage
cerebrovascular, cerebrospinal fluid from patients with,
isolation of hemoglobin-derived opioid peptide,
184, 1060
- Heparin
binding fibronectin fragments with cell-binding domains,
promotion of embryo fibroblast proliferation (hu-
man), **183**, 383
binding region of basic fibroblast growth factor, site-
directed mutagenesis: structure-function relationship
(human), **185**, 1098
inhibition of recombinant rabbit skeletal muscle casein
kinase I α , **189**, 944
- Heparin-binding factors
growth-associated, on murine fibroblasts, characterization,
182, 188
HB-GAM/PTN and midkine, genomic structures, compar-
ison (murine fibroblasts), **183**, 701
- Heparin-binding growth factor receptors
gene expression in megakaryocytic leukemia cells (hu-
man), **183**, 83
- Heparin-binding growth factors
identification as mitogen for rat hepatocytes in bovine
spleen, **186**, 1192
- Hepatectomy
partial
differential effects on tyrosine aminotransferase and
serine dehydratase expression in liver (rat), **182**, 753
effect on expression of hepatocyte growth factor mRNA
in lung (rat), **182**, 802
regeneration after, associated protein phosphatase PP1
and PP2A gene expression and activity (rat), **185**, 291
subsequent histamine binding studies and content in
hepatic nuclear fractions (rat), **184**, 840
- Hepatitis
CCl₄-induced, effect on expression of hepatocyte growth
factor mRNA in lung (rat), **182**, 802
type C, patients with, detection of antibody to hepatitis C
E2/NS1 protein, **189**, 565
- Hepatitis B virus
DNA integration associated with expression of erb B-like
gene in hepatocellular carcinoma (human), **188**, 344
duck, *see* Duck hepatitis B virus
enhancer activity, effect of interferon- α interaction with
interleukin-1 β or tumor necrosis factor- α (human
hepatoma cells), **183**, 904
immune escape mutant, detection of Gly¹⁴⁵ to Arg substi-
tution in HBs antigen (human), **184**, 1152
surface antigen, soluble and secreted fragments, produc-
tion in yeast, **184**, 50
RNA, cleavage by three ribozymes transcribed from sin-
gle DNA template, **189**, 743
- Hepatitis C virus
distinct isolates from Thailand (human), **183**, 334
E2/NS1 protein
detection in patients with type C hepatitis, **189**, 565
expression in maltose-binding protein fusion in *Esch-
erichia coli* and detection of anti-E2/NS1 antibody in
affected patients, **183**, 925
putative envelope protein, hypervariable regions, charac-
terization, **189**, 119
- Hepatocyte growth factor
 α chain, O-glycosylation site and structure of linked
oligosaccharide (human), **189**, 1329
down-regulation of α -fetoprotein gene expression in
PLC/PRF/5 human hepatoma cells, **189**, 385
effect on growth of fetal hepatocytes: modulation of c-myc
and c-fos expression (rat), **189**, 684
gene expression
in dermal fibroblasts, up-regulation by interleukin-1
(human), **188**, 235
in hepatic fat-storing cells and downregulation during
cell growth by transforming growth factor- β (rat),
183, 739
human, mitogenic activity on rat hepatocytes *in vitro*,
effects of protein kinase inhibitors, **185**, 22
identification as paracrine factor for renal epithelial cells:
stimulation of DNA synthesis and Na,K-ATPase
(rat), **182**, 960
induction of tyrosine phosphorylation of 41- and 43-kDa
proteins in keratinocytes (mouse), **185**, 860

Subject Index

- mRNA
 expression in lung after distal organ injuries (rat), **182**, 802
 induction in intact kidney and spleen in response to distant organ injury (rat), **186**, 991
 single-chain precursor, proteolytic activation by extracellular serine-protease (human), **189**, 1631
- Hepatocyte growth factor receptors
 gene *c-met*, expression in kidney after unilateral nephrectomy and renal injury (rat), **187**, 1454
 mRNA expression in renal epithelial and mesangial cells (rat), **182**, 960
- Hepatocytes, *see also* Liver
 activin A- and angiotensin II-induced inositol phosphate production, effects of pertussis toxin (rat), **186**, 205
 adult, primary culture on lactose-substituted polystyrene, receptor-mediated formation of multilayer aggregates (rat), **184**, 225
 binding to [³H]prostaglandin E₁, [¹²⁵I]-glucagon, and [³H]norepinephrine, effects of D-galactosamine (rat), **184**, 654
 from chronically endotoxemic rats, NO formation, direct stimulation by endotoxin and tumor necrosis factor α , **185**, 430
 culture media, apolipoprotein B accumulation and mRNA levels, effects of epidermal growth factor (monkey), **186**, 199
 fetal, growth stimulation in response to hepatocyte growth factor: modulation of *c-myc* and *c-fos* expression (rat), **189**, 684
 freshly isolated, inositol 1,4,5-trisphosphate and sn(1,2)-diacylglycerol masses in, effects of epidermal growth factor and vasopressin (rat), **187**, 1055
 glycogen synthesis and stimulatory effects of insulin, inhibition by transforming growth factor α (guinea pig, rat), **183**, 560
 and hepatoma cells
c-myc expression, effects of extracellular matrix and cell density (rat), **184**, 825
 differential expression of transfected liver-specific α_1 -inhibitor III gene (human, mouse, rat), **183**, 184
 isolated, cytoplasmic free calcium, effect of genistein, ψ -tectorigenin, and orobol (rat), **182**, 894
 -Kupffer cell-conditioned media, tumor necrosis factor- α -mediated, enhancement of DNA synthesis in hepatoma cells (rat), **183**, 1147
 mitogen for, in bovine spleen, identification as heparin-binding growth factor (rat), **186**, 1192
 mitogenic activity of human hepatocyte growth factor *in vitro*, effects of protein kinase inhibitors (rat), **185**, 22
 phosphatidylethanolamine biosynthesis, inhibition by okadaic acid (rat), **182**, 1226
 primary, carcinogen-initiated, nuclear poly(ADP-ribose) polymerase transcript levels and enzymatic activity in, effects of tumor promoters (neonatal rat), **182**, 1066
 production of chemotactic leukotriene B₄ metabolites in presence of ethanol (human), **185**, 604
 proteolytic control sites, localization, 4-amino-6-methylhept-2-enoic acid as leucine analog probe for, evaluation, (rat), **186**, 1327
- Heptanal
 identification in bronchoalveolar lavage after low-level ozone exposure (rat), **188**, 129
- Heptapeptides
 farnesylated COOH-terminal, of murine N-ras, cleavage by cerebral microsomal membranes (rat), **187**, 1336
- Herpes simplex virus
 types 1 and 2, infectivity, inhibition by human recombinant heparin-binding proteins HBNK and MK, **189**, 1189
- Hevein
 chemical shift index analysis: α -CH values revealing dynamic helices and α_c sites, **184**, 1008
- 5-(N-Hexadecanoyl)aminofluorescein
 solution properties, role in penetration of aortic endothelial cell monolayers (bovine), **184**, 160
- Hexokinase
 suppression in neuroblastoma cells, role in pentobarbital inhibition of glucose utilization, **184**, 673
- Hexose
 insulin-stimulated uptake by adipocytes, role of protein kinase C (rat), **188**, 142
- Hippocalcin
 recoverin-related Ca-binding, molecular cloning (rat brain), **189**, 511
- Hippocampus
 aged, gene expression of microtubule-associated protein MAP1B, embryonic α -tubulin, and late neural β -tubulin (rat), **184**, 292
 exclusive expression of recoverin-related Ca-binding protein hippocalin (rat), **189**, 511
 homogenates, oxidation-induced persistent activation of protein kinase C (rat), **187**, 1439
- Histamine
 and calcium, as intracellular mediators of lymphocyte mitogenesis, independent regulation (murine spleen), **182**, 786
 IgE-mediated release in leukocytes, inhibition by myosin light chain kinase inhibitors (human, rat), **183**, 48
 induced formation of endothelium-derived relaxing factor in endothelial cells, inhibition by SK&F 96365 (human umbilical cord), **186**, 1539
 intracellular, role in liver regeneration: binding studies in nuclear fractions (rat), **184**, 840
 mediated bronchial contractions *in vivo*, enhancement by low-concentration endothelin-1 (guinea pig), **187**, 717
 release
 by connective tissue-type mast cells, induction by stem cell factor (rat), **183**, 1076
 from pulmonary and peritoneal mast cells, effect of endothelin-1 (guinea pig), **189**, 1196
- Histamine receptors
 H₁, and mepyramine binding protein, separate determination by [³H]mepyramine assay with quinine, **189**, 378
 H₃, ligands thioperamide and (*R*)- α -methylhistamine, effects on histidine decarboxylase (murine brain), **185**, 121
- Histidine
 essential residue on N-terminal presequence of peroxisomal 3-ketoacyl-CoA thiolase, replacement, resulting conversion of thiolase to mitochondrial signal

- peptide (rat), **186**, 811
- His 25 in heme oxygenase, role in catalytic activity (rat), **182**, 981
- His 42 and His 188, role in aldose reductase catalytic action, analysis with site-directed mutagenesis (human), **183**, 327
- His 72 and His 163 in fatty acid ester synthase-III, site-specific mutagenesis (human), **184**, 706
- His 704, identification as sole catalytic His residue in neutral endopeptidase by mutational analysis (rat), **184**, 883
- iron-binding residues in lipoxygenase L-1, identification (soybean), **186**, 686
- in 5-lipoxygenase, site-specific mutagenesis: mutant characterization (human), **186**, 1265
- residues at active site of pancreatic α -amylase, functional roles (human), **183**, 286
- Histidine decarboxylase
- cerebral, effects of histamine receptor H_3 ligands thioperamide and (*R*)- α -methylhistamine (mouse), **185**, 121
- Histone kinase, *see* Protamine kinase
- Histones
- degradation in sperm, and acrosome reaction
- egg jelly components responsible for, identification (starfish), **187**, 274
- pretreatment effects of egg jelly components (starfish), **187**, 268
- H1, nucleoside triphosphate binding and mediation of hydrolysis, **182**, 309
- H1⁰, encoding gene, basal level transcription, requirement of multiple *cis*-acting elements of the proximal promoter region (mouse), **188**, 1153
- H1 and H3, photo-induced crosslinking to DNA in deoxyribonucleoprotein (bovine), **187**, 261
- H2B and H3, encoding genes, structural changes in different tissues (chicken), **184**, 317
- H3 and H4, acetylation and methylation in immature erythrocytes, relationship (chicken), **185**, 414
- HIV, *see* Human immunodeficiency virus
- Hoechst 33258
- effect on
- bleomycine-catalyzed site-specific DNA cleavage, **183**, 292
- higher-order structure of DNA, fluorescence microscopic analysis, **188**, 1274
- Homeobox, *see* Genes, homeobox
- Homopurines
- homopyrimidine domain in platelet-derived growth factor A-chain promoter, S1 nuclease-sensitive, binding of epidermal growth factor receptor 1, **188**, 433
- Homopyrimidines
- homopurine domain in platelet-derived growth factor A-chain promoter, S1 nuclease-sensitive, binding of epidermal growth factor receptor 1, **188**, 433
- Hormone receptors
- specificity, generation by amino-terminal processing of peptide YY, **186**, 1299
- Hormones
- mineralocorticoid, action in plant cells (*Chlamydomonas reinhardtii*), **186**, 1102
- HS-142-1
- effects on cell lines stably expressing natriuretic peptide receptors (*Aureobasidium* sp.), **189**, 336
- non-peptide ANP antagonist, effects on hypervolemia-induced diuresis and natriuresis in anesthetized rat, **182**, 824
- 5-HT, *see* Serotonin
- Human immunodeficiency virus
- associated reverse transcriptase, inhibition by phosphorothioate oligonucleotide duplexes, **186**, 1249
- gp41, N-terminal fusogenic domain, apolipoprotein A-1 interaction with, implications for viral entry, **186**, 95
- infected CEM cells, changes in mass levels of alkylacylglycerol and ceramide, **187**, 209
- RNA, single-stranded regions, 1,10-phenanthroline-copper complex as footprinting reagent for, **187**, 1503
- type 1
- antiviral activity of
- sulfonated azo dye Quinobene (CEM cells), **187**, 1409
- [Tyr^{5,12}, Lys⁷]-polyphemusin II analog T-22 (MT-4 cells), **189**, 845
- aspartyl protease, transglutaminase-catalyzed post-translational modification, **187**, 1211
- gene expression, differential modulation by suboptimal and optimal activation signals (human), **182**, 1172
- induction in infected T cells, inhibition by Tat antagonist Ro 5-3335, **189**, 250
- integration activity and DNA-binding, role of integrase N-terminal region, **185**, 874
- integration protein, inhibition by aurointricarboxylic acid monomers, monomer analogs, and polymer fractions, **185**, 85
- proteinase, inhibition by
- disulfonates, **188**, 624
- flavones, **188**, 631
- short peptides derived from terminal segments, **184**, 980
- proteinase, statine-containing inhibitors, potency and antiviral activity, **188**, 865
- proviral DNA synthesis, role of viral proteinase, **179**, 17; *erratum*, **187**, 1200
- replication, inhibition by statine-based tripeptides, **188**, 873
- reverse transcriptase, structure-activity analyses (human), **183**, 1131
- selective inhibition by 9-(*c*-4,*t*-5-bishydroxymethylcyclopent-2-en-*r*-1-yl)-9*H*-adenine (-) enantiomer (human MT-4 cells), **184**, 154
- type 1_{IIB}, tRNA content, cell type-dependent variability, **185**, 1005
- types 1 and 2, reverse transcriptase sensitivity to inhibition by natural products, comparison, **185**, 370
- Hunter's syndrome, *see* Mucopolysaccharidosis, type II
- Huperzine A
- inhibition of cholinesterases, mechanism (*Huperzia ser-rata*), **184**, 719
- Hyaluronan
- binding proteins in hepatocytes, analysis: differentiation of divalent cation-independent and divalent cation-dependent activities (rat), **189**, 1591

Subject Index

Hybridization

chromatin, in differential staining *in situ* by species-specific satellite DNA probes (human, mouse), **182**, 1313

Hybridization probes

nonspecific primer and PCR generated, in physical ordering of large restriction fragments in *Staphylococcus aureus* genome, **185**, 1055; *erratum*, **187**, 1200

Hydration

linear DNA stretched into fibers, effect of mechanical tension (bovine thymus), **188**, 78

Hydrogen

C-1', in deoxyribose, abstraction in DNA strand scission by dynemicin A, **188**, 584

–deuterium isotope, effect in oscillating peroxidase–oxidase reaction, **186**, 612

–sodium exchange

in cerebral capillary endothelial cells, inhibition by benzoylguanidine derivative (pig), **184**, 112

and proton transport, analysis in vesicles isolated from salmon kidneys during migration from salt to fresh water, **186**, 24

Hydrogenase, *see also* Cytochrome-*c*₃ hydrogenase

iron-containing and nickel–iron–selenium-containing, reactivity with oxido-reduction partner cytochrome *c*₃ (*Desulfovibrio desulfuricans*, *D. vulgaris*), **189**, 633

Hydrogen bonding

and aromatic stacking, role in molecular recognition: spectroscopic study of guanine base interaction with cytosine and tryptophan molecules, **183**, 577

Hydrogen peroxide

effect on cell cycle-dependent phosphorylation of HSP28 in normal osteoblasts and *ras*-transformants (mouse), **187**, 1418

modulation of K⁺ channels (*Xenopus* oocytes), **186**, 1681

stimulation of osteoclastic bone resorption (rat), **183**, 1153

and vanadate, selective inhibition of protein-tyrosine phosphatase *in vitro* (rat), **188**, 773

–vanadyl ion system, generation of hydroxyl radicals, role in DNA cleavage (rat), **189**, 1090

Hydrolysates

peptic, hemoglobin, opioid peptides from, isolation and characterization (bovine), **189**, 101

Hydrolysis

GTP, by post-translationally modified rho protein, augmentation by amphiphilic agents (porcine brain), **186**, 448

linoleic acid monoepoxides catalyzed by soybean fatty acid epoxide hydrolase, enantioselectivity, **187**, 171

nucleoside triphosphates by histone H1, **182**, 309

papain-catalyzed, steady-state kinetic constants for, effects of P2' substituents, **187**, 615

phosphatidylinositol 4,5-bisphosphate, inhibition by phospholipase C- γ_1 and - γ_2 SH2/SH3 proteins, **182**, 1402

phosphatidylinositol in skin, mediation by angiotensin II binding to Ang II receptors and differential effects of receptor subtype (rat), **186**, 285

phosphoinositide in cultured astrocytes, regulation by sphingosine and psychosine (rat), **186**, 790

polyphosphoinositides by platelet-activating factor-induced phospholipase C-dependent mechanism (rat

cerebral cortex), **183**, 300

pyridine nucleotide, inhibition by butylated hydroxytoluene, prevention of cumene hydroperoxide-induced Ca²⁺ release from liver mitochondria (rats), **185**, 698

RNA via oxyphosphorane intermediate, **187**, 1523

synthetic epidermal mitosis inhibiting pentapeptide by serum enzyme, protective effect of pentapeptide phosphorylation by calf thymus protein kinase NII, **183**, 474

Hydroperoxide dehydrase

and lipoxygenase, purification and interactions (flaxseed), **188**, 858

11-Hydroperoxyeicosatetraenoic acid

identification as major dioxygenation product of lipoxygenase isolated from hairy root cultures (*Solanum tuberosum*), **189**, 1349

19-Hydroperoxy,20-hydroxyarachidic acid

neutrophil chemoattractant, characterization, **186**, 269

Hydrophobicity

amino acid side chains in P2' position, effect on steady-state kinetic constants for papain-catalyzed hydrolysis, **187**, 615

related parameters, development for prenylated proteins, **186**, 1437

2-Hydroxy acid dehydrogenases

primary structures, comparison: evolutionary relationship of NAD⁺-dependent D-lactate dehydrogenase, **184**, 60

3-Hydroxyacyl-CoA dehydrogenase

–enoyl-CoA hydratase bifunctional enzyme, peroxisomal, regulation by T₃ (rat), **185**, 211

long-chain, identification as multifunctional mitochondrial membrane-bound β -oxidation enzyme (human liver), **183**, 443

N^G-Hydroxy-L-arginine

effect on synthesis and vasorelaxant activity of aortic endothelium-derived relaxing factor (rabbit), **189**, 711

N^ω-Hydroxy-L-arginine

oxidation by NADPH and O₂ to NO and citrulline, catalysis by cytochrome P450 (rat liver), **187**, 880

25-Hydroxycholecalciferol-1 α -hydroxylase

suppression by 22-oxacalcitriol (rat kidney), **185**, 191

3 β -Hydroxy-5 α -cholest-8(14)-en-15-one

synergistic action with (25R)-26-hydroxycholesterol in lowering of 3-hydroxy-3-methylglutaryl CoA reductase activity levels (CHO-K1 cells), **186**, 569

(25R)-26-Hydroxycholesterol

synergistic action with 3 β -hydroxy-5 α -cholest-8(14)-en-15-one in lowering of 3-hydroxy-3-methylglutaryl CoA reductase activity levels (CHO-K1 cells), **186**, 569

8-Hydroxydeoxyguanosine

photosensitized formation by riboflavin in cellular DNA (murine lymphoma cells), **187**, 809

12(R)-Hydroxyeicosatetraenoic acid

synthesis by 3-methylcholanthrene- and clofibrate-inducible cytochrome P450 in ciliary epithelium (pig), **187**, 455

20-Hydroxyeicosatetraenoic acid

excretion of glucuronide conjugate in urine (human), **185**, 728

Hydroxyguanine

effect on synthesis and vasorelaxant activity of aortic endothelium-derived relaxing factor (rabbit), **189**, 711

8-Hydroxyguanine

accumulation in 8-hydroxyguanine DNA endonuclease-deficient *MutM* mutant (*Escherichia coli*), **188**, 372

DNA strand cleavage at, induction by hot piperidine treatment, **188**, 1

8-Hydroxyguanine DNA endonuclease

deficiency, and 8-hydroxyguanine accumulation in *MutM* mutant (*Escherichia coli*), **188**, 372

Hydroxylation

ethylbenzene by cytochrome P450cam, **189**, 488

 ω -Hydroxylation

(Z)-9-octadecenoic, (Z)-9,10-epoxystearic, and 9,10-dihydroxystearic acids by microsomal cytochrome P450 systems (*Vicia sativa*), **184**, 183

Hydroxyl radicals

generation

from linoleic acid hydroperoxide in presence of epinephrine and iron, **183**, 945

in vanadyl ion-hydrogen peroxide system, role in DNA cleavage (rat), **189**, 1090

3-Hydroxy-3-methylglutaryl CoA reductase

CHO-K1 cell activity levels, lowering by synergistic action of two oxysterols, **186**, 569

degradation, and 3-hydroxy-3-methylglutaryl CoA synthase repression, oxysterol regulatory potencies, correlation with oxysterol receptor affinities, **186**, 182

feedback-type inhibition by ubiquinone (rat liver), **184**, 1280

microsomal, regulatory role in mutant overproducing sterols (*Nicotiana tabacum*), **186**, 888

Hydroxymethylglutaryl-CoA reductase (NADPH)

localization, partial purification, and regulation (pea plastid), **184**, 530

3-Hydroxy-3-methylglutaryl CoA synthase

repression, and 3-hydroxy-3-methylglutaryl CoA reductase degradation, oxysterol regulatory potencies, correlation with oxysterol receptor affinities, **186**, 182

3 β -Hydroxy-5-oxo-5,6-secholestan-6-al

evaluation as biomarker for ozone exposure (rat), **188**, 618

Hydroxyproline

luteinizing hormone-releasing hormone derivative containing, precursor and deaminated forms, detection in hypothalamus (rat), **189**, 1368

in urine, in mathematical model for study of bone turnover in growing rats, **185**, 47

2 β -(3-Hydroxypropoxy)-1 α ,25-dihydroxyvitamin D₃

effect on expression of osteocalcin gene in tibia *in vivo* (rat), **189**, 1231

3 α -Hydroxysteroid dehydrogenase

amino acid sequence; relationship to chlordecone reductase (human liver), **187**, 760

11 β -Hydroxysteroid dehydrogenase

catalytic function in transfected CHO cells, role of Tyr-179 and Lys-183, **188**, 222

5-Hydroxytryptamine receptors, *see* Serotonin receptors

Hydroxyurea

reaction with tyrosyl radical of ribonucleotide reductase R2 protein, EPR stopped-flow analysis, **188**, 879

Hyperaldosteronism

glucocorticoid-suppressible, linked chimeric gene, encoding of fused P450 protein with aldosterone synthase activity (human), **189**, 885

Hyperammonemia

congenital, effects on cerebral and hepatic levels of energy metabolism intermediates (sparse-fur mouse), **184**, 746

Hyperglycemia

and osmotic stress, effects on aldose reductase gene expression in human renal proximal tubule cells, **187**, 201

Hyperlipidemia

affected Nagase analbuminemic rats, and control rats and humans, plasma levels of lipid hydroperoxides and antioxidants, **189**, 518

type I, lipid interface recognition defect in, contributing lipoprotein lipase heterozygous mutation, **182**, 70

Hyperosmolarity

effects on platelet-derived growth factor mRNA levels in cultured vascular endothelial cells (human), **187**, 664

Hyperplasia

compensatory renal, after unilateral nephrectomy, inhibition by anti-epidermal growth factor antibody (mouse), **187**, 1015

intimal, fucoidan as non-anticoagulant inhibitor (rat), **184**, 773

Hyperpolarization

coronary artery by cromakalim, role in inhibition of phospholipase C activation by agonist U46619 (pig), **187**, 1517

Hypersensitivity

delayed, reaction sites, precursor of macrophage-chemotactic factor in, identification as complement factor H (guinea pig), **185**, 505

Hypertension

associated tissue angiotensin I-converting enzyme activity, inhibitor sensitivity and effects of chloride (hamster), **183**, 1117

essential

association with polymorphism of angiotensin I-converting enzyme gene (human), **184**, 9

obesity in, association with RFLP for low-density lipoprotein receptor gene (human), **189**, 965

renal brush border membrane vesicles from affected rats, sodium uptake, effects of amiloride analogs, **183**, 55

spontaneous

evidence for role of SA gene (rat), **188**, 64

hypotensive effect associated with phospholipase C- δ 1 gene mutation (rat), **187**, 1359

Hypertrophy

renal, after unilateral nephrectomy, effect of anti-epidermal growth factor antibody (mouse), **187**, 1015

Hypervolemia

induced diuresis and natriuresis, effects of HS-142-1 in anesthetized rat, **182**, 824

Hypochlorous acid

and cathepsin G, additive enhancement of neutrophil collagenase (human), **184**, 560

Hypoglycemia

inducing effect of (1 $\rightarrow$ 6)- α -D-glucopyranan (mouse),

Subject Index

- 188, 16**
- Hypotension**
 associated with phospholipase C- δ 1 gene mutation in spontaneously hypertensive rats, analysis, **187, 1359**
- Hypothalamus**
 detection of precursor and deaminated forms of luteinizing hormone-releasing hormone and (hydroxyproline⁹)LHRH (rat), **189, 1368**
 identification of calcitonin gene-related peptide (sheep), **187, 1474**
 medial basal, pro-opiomelanocortin gene expression, effect of adrenalectomy (rat), **186, 418**
 thyrotropin-releasing hormone-potentiating peptide, isolation and amino acid sequence (bovine), **189, 1110**
- Hypotonicity**
 stimulation of slowly activating K⁺ current I_{SK} expressed in oocytes (*Xenopus laevis*), **184, 804**
- Hypoxia**
 ischemia-related, induced cerebral injury, subsequent CNS neuron rescue, role of insulin-like growth factor I (rat), **182, 593**
- I**
- ICI 198615**
 inhibition of endothelin-1-induced bronchoconstriction in early phase during anesthesia (dog), **183, 1197**
- Iduronate sulfatase**
 encoding gene, C¹³²⁷ to T substitution, association with mucopolysaccharidosis II (human fibroblasts), **183, 809**
- Immortalization**
 SV40T antigen-transformed human diploid fibroblasts, associated loss of collagenase gene expression, **189, 148**
- Immune responses**
 cecropin gene induction as, analysis in blood cell line mbn-2 (*Drosophila melanogaster*), **188, 1169**
 cell-mediated, in toxoplasmosis, effects of three forms of antigen (mouse), **189, 640**
- Immunocytochemistry**
 in analysis of protein kinase C expression and intracellular distribution in aortic endothelial cells (bovine), **189, 40**
 in localization of 6-pyruvoyl tetrahydropterin synthase (human), **182, 810**
- Immunofluorescence assay**
 multi-color, in assay of P-selectin interaction with peripheral blood lymphocyte subpopulations (human), **186, 173**
- Immunoglobulins**
 heavy chain genes, rearranged, from B cell lines, cloning with anchored polymerase chain reaction (human), **182, 1260**
- IgE**, mediated histamine release in leukocytes, inhibition by myosin light chain kinase inhibitors (human, rat), **183, 48**
- IgG**
 and formyl-methionyl-leucyl-phenylalanine, neutrophils stimulated with, superoxide production, role of tyrosine phosphorylation (human), **183, 789**
 Graves' disease-associated, recognition of linear epitopes in thyrotropin receptor (human), **188, 28**
 internalization by HEp2 cells, role of placental alkaline phosphatase (human), **182, 624**
 proteolysis by glomerular epithelial cells, mechanism (rabbit), **186, 639**
 from patients with Graves' disease, heterogeneous responses of recombinant human thyrotropin receptors, **186, 1391**
 surface, crosslinking in WEHI 231 cells, role in activation of src-related tyrosine kinases, **187, 1536**
- Immunophilins**
 FKBP12 and FKBP13, gene chromosomal band assignments (human), **189, 819**
 hsp90-binding, FKBP59-HBI, calmodulin-binding activity (rabbit), **187, 1330**
- IMP dehydrogenase**
 inhibitor benzamide riboside, cytotoxicity to myelogenous leukemia K562 cells (human), **186, 1600**
- Indoleamine 2,3-dioxygenase**, *see* Indoleamine-pyrrole 2,3-dioxygenase
- Indoleamine-pyrrole 2,3-dioxygenase**
 gene structure (human), **189, 530**
- Indolicidin**
 neutrophil bactericidal peptide, cDNA cloning and sequencing (bovine), **187, 467**
- Indomethacin**
 inhibition of endothelin-1-induced bronchoconstriction in early phase during anesthesia (dog), **183, 1197**
- Infertility**
 induction by immunization with synthetic peptide segments of human sperm protein (rat), **183, 538**
- Inflammation**
 affected areas, *in vivo* targeting with electroloaded neutrophils (rat), **186, 860**
 phorbol ester-induced, blocking by phospholipase A₂ inhibitor BMS-181162 (murine skin), **189, 272**
- Influenza virus**
 membrane fusion with phosphatidylcholine liposomes containing viral receptors, **186, 378**
 type A, conglutinin as inhibitor of, isolation and functional characterization (bovine blood), **187, 1270**
- Inhibin α**
 gene encoding, and promoter, characterization (mouse), **186, 293**
- Initiation factors**
 eIF-4E, phosphorylation by protamine kinase, **183, 431**
- Inositol**
 uptake in BC3H1 cells, promotion by growth factors, **182, 1008**
- Inositolglycan**
 mediators, generation from hepatic plasma membranes, role of guanine nucleotide-binding proteins (rat), **186, 1151**
- Inositol hexakisphosphate receptors**
 identification as clathrin assembly protein AP-2 (rat brain), **187, 158**
- Inositol phosphates**
 activin A- and angiotensin II-induced production in hepatocytes, effects of pertussis toxin (rat), **186, 205**

Inositol phospholipids

form associated with mitochondria in brain, evidence (rat), **187**, 1077

suppression of F-actin gelating activity of smooth muscle filamin (chicken), **184**, 1261

Inositol trisphosphate

role in germ cell-mediated stimulation of Sertoli cells (rat), **184**, 217

Inositol 1,4,5-trisphosphate

binding in cardiac microsomes, two types (dog), **189**, 728

masses in freshly isolated hepatocytes, effects of epidermal growth factor and vasopressin (rat), **187**, 1055

role in vascular smooth muscle Ca^{2+} mobilization by endothelin-1 and -3 (rat aorta), **183**, 694

myo-Inositol 1,4,5-trisphosphate

inhibition of lialen phosphotyrosine phosphatase (pig), **189**, 1404

Inositol 1,4,5-trisphosphate 3-kinase

cerebral cortical, effect of focal cerebral ischemia (rat), **184**, 871

Inositol 1,4,5-trisphosphate receptors

cAMP-dependent phosphorylation, inhibition of Ca^{2+} release from platelet membranes (human), **184**, 893

expression in K562 cells, induction by interleukin-3 and granulocyte macrophage-colony stimulating factor (human), **187**, 438

Insulin

effects on

ion transport in pulmonary epithelium, role of tyrosine kinase (fetal rat), **187**, 802

lipid synthesis by isolated adipocytes (rat), **188**, 807

induced phosphorylation

and activation, cGMP-inhibited cAMP phosphodiesterase (human platelets), **186**, 517

particulate cGMP-inhibited, low K_M cAMP phosphodiesterase in 3T3-L1 adipocytes, **183**, 1070

inhibition of norepinephrine overflow from peripheral sympathetic nerve ending (rat), **188**, 330

mediated hepatic glucose uptake, role of Kupffer cells (rat), **186**, 455

mutant, binding to normal and mutated insulin receptors (human), **188**, 318

and pancreatic islet amyloid polypeptide content, parallelism and dissociation, determination by IAPP in islet B and D cells (rat), **182**, 886

and phorbol ester, divergent effects on insulin-like growth factor binding protein-1 production and mRNA in H4IIE hepatoma cells (rat), **182**, 262

and protein kinase C activation, differential regulation of mRNAs encoding three protein-tyrosine phosphatases (rat), **188**, 1305

regulation of GLUT3 facilitative glucose transporter in L6 muscle cells (rat), **186**, 1129

resistant patients, phosphofructokinase 1 kinetics, **185**, 559

responsive tyrosine aminotransferase transcription, role of multiple *cis*-acting promoter regions (rat hepatoma cells), **187**, 778

secreting HIT T15 β -cells, membrane-associated ATP-regulated K^+ channels, incorporation into planar lipid bilayers, **186**, 1037

secretion, inhibition by KN-62: Ca^{2+} /calmodulin-dependent protein kinase II inhibitor (rat), **189**, 128

signaling to pyruvate dehydrogenase, role of carboxy terminal 110 amino acid portion of insulin receptor (NIH 3T3 cells), **189**, 906

stimulation of

Ca^{2+} -independent/phospholipid-dependent protein kinase C in adipocytes (rat), **183**, 814

2-deoxyglucose transport in skeletal muscle, effect of sphingoid bases (rat), **188**, 358

gene 33 expression in H4IIE cells (rat), **189**, 931

hexose uptake by adipocytes, role of protein kinase C (rat), **188**, 142

stimulatory effects in hepatocytes, inhibition by transforming growth factor α (guinea pig, rat), **183**, 560

T- and R-states in solution, pH-dependent conformational changes: circular dichroic studies in pH range 6–10, **186**, 1115

Insulin-like growth factor

binding proteins, *see* Insulin-like growth factor binding proteins

Insulin-like growth factor I

encoding gene, identification of two cell type-specifically regulated promoters (human), **187**, 1219

gene promoter, characterization (rat), **189**, 972

induction of p21^{ras} GTPase-activating protein association with phosphatidylinositol 3-kinase (rat), **189**, 1503

regulation of GLUT3 facilitative glucose transporter in L6 muscle cells (rat), **186**, 1129

role in CNS neuron rescue after hypoxic-ischemic injury to brain (rat), **182**, 593

stimulation of

c-jun proto-oncogene transcription in Balb/c 3T3 fibroblasts (mouse), **183**, 524

MCF-7 cell proliferation, correlation with *c-fos*, *c-jun* and *c-myc* expression (human), **188**, 1067

Insulin-like growth factor II

and myogenin, induction and peak gene expression during BC3H-1 muscle cell differentiation (mouse), **183**, 1084

N-terminal hexapeptide fragment, stimulation of thymidine incorporation into fibroblasts (human), **187**, 279

secretion into milk from mammary gland (goat), **183**, 1230

Insulin-like growth factor binding proteins

acid-labile subunit cDNA, cloning and nucleotide sequence (rat liver), **188**, 304

cloning and analysis of 5' promoter region (rat liver), **185**, 993

detection in serum (horse), **189**, 1255

identification in breast cancer cells (human), **183**, 1003

IGFBP-1

cloning and analysis of 5' promoter region (rat liver), **185**, 993

production in hepatoma cells

effect of epidermal growth factor (human), **189**, 1177

H4IIE, and mRNA levels, effects of phorbol esters and insulin (rat), **182**, 262

IGFBP-2, mRNA, post-transcriptional regulation in diabetic liver (rat), **189**, 1031

IGFBP-5, gene expression, differential regulation at post-transcriptional level in retinoic acid-sensitive and

Subject Index

- resistant MCF-7 cells (human), **188**, 1122
- IGFBP-5 and -6, identification in breast cancer cells (human), **183**, 1003
- IGFBP-6, O-glycosylation (human), **186**, 301
- Insulin-like growth factor II receptors
- mannose 6-phosphate receptors, distribution on Hep G2 cells, effect of brefeldin A (human), **185**, 719
- Insulin receptors
- associated tyrosines 1158, 1162, and 1163, order of autophosphorylation, analysis in transfected CHO cell lines (human), **186**, 244
 - carboxy terminal 110 amino acid portion, role in insulin signaling to pyruvate dehydrogenase (NIH 3T3 cells), **189**, 906
 - extracellular domain, identification of disulfide bridge connecting α -subunits (human), **189**, 650
 - normal and α subunit-mutated, binding of mutant insulins (human), **188**, 318
 - phosphorylation and exogenous kinase activity, effect of deletion of 69 residues from carboxyl terminus of β -subunit (human), **188**, 86
 - related receptor, cDNA isolation and preferential expression in kidney (rat brain), **187**, 934
 - signaling complex, identification of phosphatidylinositol 3-kinase as member (rat), **189**, 1024
 - tyrosine kinase domain, auto-dephosphorylation, **189**, 1457
- Insulin receptor substrate-1
- related gene, cloning and increased expression in hepatocellular carcinoma (human), **183**, 280
- Integrase
- HIV-1, N-terminal region, role in integration activity and DNA-binding, **185**, 874
 - from Moloney murine leukemia virus and HIV-1, zinc binding, **189**, 813
- Integration
- Halobacterium salinarum* bacterio-opsin into microsomal membranes, **187**, 1480
 - hepatitis B virus DNA, association with expression of erb B-like gene in hepatocellular carcinoma (human), **188**, 344
- Integration host factor
- from *Escherichia coli*, interaction with *algD* promoter critical for control of mucoidy in *Pseudomonas aeruginosa*, **189**, 837
- Integrins
- $\alpha 5 \beta 1$, and fibronectin, mediated attachment in hepatic epithelial cells, effect of Rous sarcoma virus transformation (rat), **189**, 350
 - $\alpha \beta_3$, binding to denatured collagen type I via RGD sites: affinity of integrins for damaged extracellular matrix (human), **182**, 1025
 - function, regulatory role of GM3 ganglioside: effect on $\alpha 5 \beta 1$ -liposomes (mouse), **186**, 1397
 - β subunit, mutations, identification in Japanese patients with severe leukocyte adhesion deficiency, **184**, 1460
- Interferon- α
- induction of lipolysis and inhibition of lipoprotein lipase activity in cultured adipocytes by prostaglandin-independent mechanism (mouse), **186**, 237
 - interaction with interleukin- 1β or tumor necrosis factor- α , effect on hepatitis B virus enhancer activity (human hepatoma cells), **183**, 904
 - sequence homology with other proteins, analysis by homology search computer program (human), **186**, 211
 - stimulation of 5-fluorouracil metabolic activation (HT-29 cells), **182**, 1232
- Interferon- γ
- effect on interleukin- 1α -stimulated expression of urokinase-type plasminogen activator in endothelial cells *in vitro* (human), **188**, 463
 - induction by monophosphoryl lipid A: prophylaxis against sepsis and septic shock (mouse), **182**, 269
 - induction of
 - nitric oxide synthase in macrophages, inhibition by interleukin-10 (mouse), **182**, 1155
 - nitric oxide synthesis by macrophages, role of protein kinase C (mouse), **188**, 997
 - phospholipase D-dependent triphasic activation of protein kinase C in endothelial cells (rat), **189**, 1732
 - inhibition of vascular smooth muscle cell proliferation through NO generation (rat), **188**, 409
- Interferons
- regulation of 202 gene expression in L929 cells (mouse), **187**, 628
- Interleukin-1
- effect on Mn-superoxide dismutase expression in pulmonary arterial and microvascular endothelial cells (rat), **188**, 453
 - enhancement of IL-6 receptor β chain (gp130) expression in epithelial cells (human), **185**, 902
 - impairment of vascular contraction and relaxation in isolated rabbit aorta (human), **182**, 733
 - and IL-6, effects on leukocyte common antigen-related phosphatase expression *in vitro* (rat mesangial cells), **188**, 34
 - and IL-1 receptor and IL-1/IL-1 receptor complexes, nuclear internalization and DNA binding activity, **187**, 1166
 - induction of
 - lipolysis and inhibition of lipoprotein lipase activity in cultured adipocytes by prostaglandin-independent mechanism (mouse), **186**, 237
 - Mn-superoxide dismutase in hepatoma cells (human), **182**, 1100
 - regulation of cytochrome P450 IID in C3H/HeJ mouse, **182**, 617
 - suppression of pulmonary cytochrome P450 and superoxide anion production (rat), **185**, 1083
 - and tumor necrosis factor, synergistic stimulation of NO hemoglobin production (rat), **189**, 392
 - up-regulation of hepatocyte growth factor gene expression in dermal fibroblasts (human), **188**, 235
- Interleukin- 1α
- expression in nasopharyngeal carcinoma cell lines, heterogeneity (human), **187**, 121
 - production in Sertoli cells, activation by lipopolysaccharide, latex beads, and residual bodies (rat), **185**, 154
 - recombinant, binding to and inhibition by synthetic peptide corresponding to IL-1 receptor residues 86–93 (human), **188**, 912

Subject Index

- stimulated expression of urokinase-type plasminogen activator in endothelial cells *in vitro*, effect of interferon- γ (human), **188**, 463
- Interleukin-1 β
- effects on
 - epidermal growth factor receptor expression in chondrocytes (rabbit), **183**, 14
 - NO production, aconitase activity, and glucose oxidation rates in pancreatic islets (mouse, rat), **182**, 333
 - expression in nasopharyngeal carcinoma cell lines, heterogeneity (human), **187**, 121
 - induction of
 - activin A gene expression in bone marrow stromal cell line (human), **188**, 310
 - endothelin production in umbilical vein endothelial cells, associated intracellular signal transduction (human), **188**, 565
 - interaction with interferon- α , effect on hepatitis B virus enhancer activity (human hepatoma cells), **183**, 904
 - recombinant, binding to and inhibition by synthetic peptide corresponding to IL-1 receptor residues 86-93 (human), **188**, 912
 - stimulated retinal pigment epithelial cells, expression of tumor necrosis factor- α *in vitro* (human), **187**, 1029
 - stimulation of cytosolic phospholipase A₂ in rheumatoid synovial fibroblasts (human), **184**, 712
- Interleukin-2
- activated T cells, p70 S6 kinase phosphorylation, inhibition by rapamycin (human), **186**, 1315
 - functional structure, analysis by multiple cysteine substitutions (human), **188**, 949
 - gene expression and protein production, effect of fluorouracil (rat spleenocytes), **187**, 305
 - induction of erythroid differentiation and Tyr phosphorylation in ELM-I-1 cells transfected with human IL-2 receptor β chain cDNA, **188**, 352
- Interleukin-3
- and granulocyte/macrophage colony-stimulating factor, induction of inositol trisphosphate receptor expression in K562 cells (human), **187**, 438
 - induced translocation and down-regulation of protein kinase C (human platelets), **185**, 670
 - zinc binding activity and associated domain localization (human), **187**, 859
- Interleukin-4
- effect on macrophage respiratory burst, species dependence (human, mouse), **182**, 727
 - enhancement of mineralization of osteoblast-related cells *in vitro* (human), **189**, 1521
- Interleukin-6
- down-regulation of cytochrome P450 IA1, IA2, and IIIA3 mRNA expression in hepatoma cells (human), **184**, 960
 - enhancement of IL-6 receptor β chain/gp130 expression in epithelial cells (human), **185**, 902
 - expression in nasopharyngeal carcinoma cell lines, heterogeneity (human), **187**, 121
 - expression and release by normal and transformed bronchial epithelial cells (human), **187**, 596
 - and IL-1, effects on leukocyte common antigen-related phosphatase expression *in vitro* (rat mesangial cells), **188**, 34
 - induction of Mn-superoxide dismutase in hepatoma cells (human), **182**, 1100
 - phosphorylation at serine-54: early event in secretory pathway in fibroblasts (human), **185**, 524
 - receptor-binding peptide from, isolation and proton NMR study (human), **189**, 211
 - regulation of cytochrome P450 IID in C3H/HeJ mouse, **182**, 617
 - semi-random mutagenesis at C-terminal four amino acids, effect on biological activity, **187**, 18
- Interleukin-8
- expression in nasopharyngeal carcinoma cell lines, heterogeneity (human), **187**, 121
 - inhibition of nitric oxide synthase induction in peritoneal neutrophils (rat), **186**, 680
- Interleukin-10
- cDNA clones from RNA of cultured OX8⁺OX22⁻ thymic duct T cells, synthesis and characterization (rat), **189**, 1
 - inhibition of nitric oxide synthase induction by interferon- γ in macrophages (mouse), **182**, 1155
- Interleukin-1 receptors
- and IL-1 and IL-1/IL-1 receptor complexes, nuclear internalization and DNA binding activity, **187**, 1166
 - type 1
 - mRNA and expressed protein, levels in dermal fibroblasts from patients with systemic sclerosis, **184**, 1504
 - residues 86-93, corresponding synthetic peptide, binding of recombinant IL-1 α and γ subtypes and inhibition of IL-1 (human), **188**, 912
- Interleukin-2 receptors
- α and β chains, third molecule associated with, analysis, **184**, 1288
 - β chain cDNA, human, transfected ELM-I-1 cells, IL-2-induced erythroid differentiation and Tyr phosphorylation, **188**, 352
- Interleukin-6 receptors
- β chain/gp130 expression, enhancement by IL-6, IL-1, and TNF in epithelial cells (human), **185**, 902
 - generation, rate-limiting effect of protein kinase C (COS-7 cells), **189**, 794
- Interleukin-6 responsive element
- identification in hemopexin gene (rat), **185**, 420
- Internalization
- nuclear, interleukin-1, IL-1 receptors, and IL-1/receptor complexes (human, mouse), **187**, 1166
- Intestine
- Ca²⁺ transport, 1 α ,25-dihydroxyvitamin D₃-stimulated, identification of 1 β ,25-dihydroxyvitamin D₃ as antagonist (chicken), **189**, 1450
 - duodenum, perfused, transcaltachia, induction by parathyroid-related peptide (chicken), **186**, 69
 - fucosylation, enzymes in, effects of soluble β -galactoside-binding lectins and fucosyltransferase protein inhibitor (rat), **185**, 617
 - jejunum, glucose transporter mRNA levels, developmental changes (rat), **183**, 626
 - production of truncated forms of apolipoprotein B, role of ApoB lengths in determination (human), **189**, 1069

Subject Index

- small
 expression of
 plasma membrane calcium pump (human), **183**, 499
 secretin precursor gene (rat), **183**, 390
 morphological changes and sterol absorption in diabetes mellitus, determination by plasma post-heparin diamine oxidase and plant sterol levels (rat), **186**, 398
 villus-to-crypt axis, *Escherichia coli* heat-stable enterotoxin receptor expression gradient (rat), **186**, 483
- Intima
 hyperplasia, fucoidan as non-anticoagulant inhibitor (rat), **184**, 773
 neo-, *see* Neointima
- Intrinsic factor
 mediated transcytosis of [⁵⁷Co]cobalamin across polarized renal epithelial cells, inhibition by leupeptin and ammonium chloride (opossum), **182**, 439
- Iodide
 thyrotropin-stimulated accumulation in FRTL-5 cells, attenuation by 1,25-dihydroxycholecalciferol via reduction of iodide porter number, **182**, 1435
- Iodide porters
 number in FRTL-5 cells, reduction by 1,25-dihydroxycholecalciferol, in attenuation of thyrotropin-stimulated iodide accumulation, **182**, 1435
- Iodothyronine deiodinase
 type I, inhibition by selenouracil derivatives, **189**, 1362
- Iodothyronine 5-deiodinase
 localization in posterior pituitary (rat), **188**, 272
- Ion channels, *see also specific types*
 cationic Ca-dependent, detection in mast cell granule membranes reconstituted into lipid bilayers (rat), **185**, 793
 low-conductance, formation by porin in planar lipid bilayers (*Pseudomonas aeruginosa*), **186**, 645
 membrane, voltage-dependent formation by zervamicins, **186**, 8
- Ionomycin
 and phorbol myristate acetate, optimal activation signal for lymphocytes and promonocytic cells, effect on cytokine and HIV-1 gene expression (human), **182**, 1172
- Ionophore A23187, *see* Calcimycin
- Ion selectivity
 Ba²⁺ inward current oscillations, analysis in *ras*-transformed fibroblasts with bradykinin-evoked cytoplasmic Ca²⁺ oscillations, **185**, 162
 cation channel in fetal lung epithelium, effects of [Ca²⁺]_i and β agonist action (rat), **187**, 648
- Ion transport
 pulmonary epithelium, effects of insulin and tyrosine kinase inhibitor (fetal rat), **187**, 802
- Iridoids
 sensitivity of HIV-1 and -2 reverse transcriptase to inhibition by, comparison, **185**, 370
- JRL-1620
¹²⁵I-labeled, reversible binding to endothelin ET_B receptor, **185**, 867
- Iron
 binding histidine residues in lipoxygenase L-1, identification (soybean), **186**, 686
 binding by 5-lipoxygenase, involved amino acids, mutagenesis studies (human), **182**, 1482; *erratum*, **184**, 1133
 and epinephrine, in generation of hydroxyl radical from linoleic acid hydroperoxide, **183**, 945
 induced microsomal lipid peroxidation, role of superoxide radical generated in inner membranes (rat liver), **186**, 1087
 oxidation by casein, **182**, 1047
- Iron centers
 modification of electron transfer through, by NO synthase inhibitors L-NAME and L-NMMA, **187**, 797
- Irradiation, *see also specific types*
 augmentation of granulocyte/macrophage colony-stimulating factor RNA levels in cancer cells: stabilization through AU-rich region (human), **189**, 986
- Ischemia
 focal cerebral
 effects on cortical inositol 1,4,5-trisphosphate 3-kinase and 5-phosphatase (rat), **184**, 871
 subsequent induction of *Krox*-20 expression (rat), **188**, 1104
 related hypoxic injury to brain, subsequent CNS neuron rescue, role of insulin-like growth factor I (rat), **182**, 593
 -reperfusion
 induced hepatic injury, therapeutic effects of superoxide dismutase derivatives modified with mono- or polysaccharides (rat), **189**, 191
 induced myocardial injury, protective effect of tumor necrosis factor-α pretreatment (rat), **184**, 1056
- Islet amyloid polypeptide
 content in islet B and D cells, relationship to insulin content (rat), **182**, 886
 establishment of hypersensitive radioimmunoassay with antiserum specific for N-terminal region, **186**, 1065
 gene transcripts, characterization and identification of polyadenylation site (human), **189**, 1569
- Islet cells
 B and D, islet amyloid polypeptide content, relationship to insulin content (rat), **182**, 886
 isolated pancreatic, [Ca²⁺]_i, effect of cholecystokinin C-terminal octapeptide (rat), **184**, 878
- Islets
 pancreatic, insulin secretion, effect of Ca²⁺/calmodulin-dependent protein kinase II inhibitor KN-62 (rat), **189**, 128
- Isoaspartyl protein carboxyl methyltransferase, *see* Protein-L-isoaspartate(D-aspartate) O-methyltransferase
- Isocitrate lyase
 phosphorylation *in vivo* (*Acinetobacter calcoaceticus*), **182**, 367
- Isodomoic acid A
 and α-kainic acid, X-ray structural comparison, **187**, 325
- Isoflurane
 effect on [³H]ryanodine binding to cardiac and skeletal ryanodine receptors (pig), **186**, 595
- Isomerization
 B-Z, poly(dA-dT), inhibition by 9-aminoacridine, **185**, 110
- Isopeptides
 endothelin, and ET receptor subtype, concomitant expres-

- sion by adrenal gland (human), **182**, 1115
- Isoprenylation
 post-translational, rho protein, effect on interaction with amphiphilic agents (porcine brain), **186**, 448
- 5-Isopropyl-2'-deoxyuridine
 antiherpetic, poly(dA-dT,ip⁵dU) containing, structure, **185**, 96
- Isoproterenol
 induction of phosphorylation of particulate cGMP-inhibited low-K_M cAMP phosphodiesterase in 3T3-L1 adipocytes, **183**, 1070
- 1-(5'-Isoquinolinesulfonyl)-2-methylpiperazine, *see* H7
- Isosorbide dinitrate
 and other organic nitrates, generation of NO in vascular microsomes, comparison (bovine), **185**, 932
- Isradipine
³H-labeled, binding to skeletal muscle dihydropyridine receptors, inhibition by dantrolene and azumolene (pig), **187**, 894

J

- Jaundice
 affected LEC rat, Cu-metallothionein induction in liver, **185**, 548
- Juvenile hormone esterase
 repressive growth blocking peptide, isolation from plasma (*Pseudaletia separata*), **185**, 1141

K

- Kainic acid
 and isodomoic acid A, X-ray structural comparison, **187**, 325
- Kallikrein
 induction of endothelium-dependent relaxation in isolated coronary artery, mediation by kinins (pig), **185**, 693
- Kanamycin kinase
 conserved C-terminal residues, site-specific mutations: phenotypic and structural analysis of mutant enzymes, **185**, 925
- Keratin
 peptide K1, differentiated, detection in HSC-3 and HSC-5 cells, **182**, 1440
- Keratinocytes
 expression of bipterin-dependent tyrosine hydroxylase and phenylethanolamine-N-methyltransferase (human), **189**, 72
- induction of microvascular endothelial tubular morphogenesis: role of transforming growth factor α (human), **189**, 601
- tyrosine phosphorylation of 41- and 43-kDa proteins, induction by hepatocyte growth factor (mouse), **185**, 860
- Ketimines
 sulfur-containing, reducing properties, **183**, 481
- 3-Ketoacyl-CoA thiolase, *see* Acetyl-CoA C-acyltransferase
- α -Ketoglutarate
 dependent aspartyl-asparaginyl β -hydroxylase, identification and characterization (fruit fly, moth), **189**, 233

Kexin

- mammalian homolog furin, truncated soluble form, proteolytic cleavage of proalbumin and complement Pro-C3 *in vitro*, **189**, 1353

Kidney

- anemic, nuclear extract, in *in vitro* reconstitution of human erythropoietin gene transcription system (mouse), **182**, 137
- angiotensin type-1 receptor partial cDNA, PCR amplification: AT_{1B} receptor subtype (rat), **185**, 204
- chronic failure, derived sera, detection of erythroid differentiation factor/activin A (human), **183**, 273
- compensatory hyperplasia and hypertrophy after unilateral nephrectomy, effects of anti-epidermal growth factor antibody (mouse), **187**, 1015
- cortex and inner medulla, expression of CHIP28 water channel mRNA (rat), **188**, 1267
- cytochrome P450 E1, alcohol-inducible form, mRNA levels, elevation after pyridine administration (rat), **186**, 846
- diethylstilbestrol-induced tumors, membrane phosphoproteins, enhanced tyrosine phosphorylation (hamster), **186**, 228
- 1,25-dihydroxyvitamin D effects: induction of calmodulin-binding proteins (rat), **185**, 636
- direct gene introduction *in vivo* utilizing Sendai virus and liposomes (rat), **186**, 129
- distal tubule, A6, calcium channel activation by shear stress (*Xenopus laevis*), **184**, 198
- expression of
 receptor gene for hepatocyte growth factor after unilateral nephrectomy and renal injury (rat), **187**, 1454
- secretin precursor gene (rat), **183**, 390
- fatty acid synthase and S14 gene transcription *in vitro*, mechanisms, **182**, 631
- 25-hydroxycholecalciferol-1 α -hydroxylase levels, suppression by 22-oxacalcitriol (rat), **185**, 191
- inner medullary slices exposed to hyperosmotic media, cell volume regulation, moderation by Na-dependent K⁺ efflux (rat), **185**, 36
- intact, hepatocyte growth factor mRNA induction in response to distant organ injury (rat), **186**, 991
- isolated tubules, endothelin-1 mRNA, detection by reverse transcription and polymerase chain reaction (rat), **188**, 108
- and other organs, [¹⁴C]sialic acid-GM3 and [³H]sphingosine-GM1 distribution after intravenous injection (rat), **189**, 1410
- preferential expression of insulin receptor-related receptor cDNA (rat), **187**, 934
- processed protein related to human HSP (60) chaperonin, identification (bovine), **185**, 683
- vesicles isolated during salt-to-fresh water migration, proton transport and Na⁺/H⁺ exchange (salmon), **186**, 24
- Kidney cells
 BHK
 lipid classes, selective incorporation of 5-methyl-BDY-3-dodecanoic acid, **187**, 1594
- selection of glycosylation-defective mutants, **186**, 102
- COS, kinase activity of human insulin receptor, effect of deletion of 69 residues from carboxyl terminus of

- receptor β -subunit (monkey), **188**, 86
- COS-1
- amplified P450c21 expression (monkey), **186**, 426
 - cell-surface expression of transfected dipeptidyl-peptidase IV with mutations at active site sequence (monkey), **185**, 776
- COS-7
- expressed endothelin ET_A receptors, ET-1 binding, effect of truncation of receptor N-terminal extracellular or C-terminal intracellular domains (monkey), **187**, 1241
 - expressed rat angiotensin II receptor, amino acid residues for ligand binding, identification by site-directed mutagenesis (monkey), **187**, 1426
 - expression of angiotensin II type 1A receptor (monkey), **186**, 277
 - generation of soluble interleukin-6 receptor, rate-limiting effect of protein kinase C (monkey), **189**, 794
 - targeting of aequorin (monkey), **189**, 1008
 - glomerular mesangial, type-1 angiotensin II receptor gene down-regulation, distinct pathways (rat), **185**, 142
 - LLC-PK1, expression of platelet-activating factor receptor (pig), **187**, 767
 - MDCK, c-met mRNA expression, effect of hepatocyte growth factor (dog), **187**, 1454
 - NRK, ts-110, Moloney murine sarcoma virus transformed secreted metalloproteinase, substrate preference (rat), **189**, 21
 - proximal tubule, aldose reductase gene expression, effects of osmotic stress and hyperglycemia, **187**, 201
- Kinetics
- [¹⁴C]sialic acid-GM3 and [³H]sphingosine-GM1 after intravenous injection (rat), **189**, 1410
 - phosphofructokinase from granulocytes isolated from insulin-resistant patients, **185**, 559
- Kinins
- mediation of
 - kallikrein-induced endothelium-dependent relaxation in isolated coronary artery, (dog), **185**, 693
 - neointimal antiproliferation effect of ramipril in carotid artery after endothelial denudation (rat), **182**, 283
- KN-62
- Ca²⁺/calmodulin-dependent protein kinase II-inhibiting, effect on insulin secretion (rat), **189**, 128
- KT5926
- inhibition of IgE-mediated histamine release in leukocytes (human, rat), **183**, 48
- Kupffer cells
- associated 80-kDa protein, identification as carcinoembryonic antigen binding site (rat), **188**, 671
 - role in insulin-mediated hepatic glucose uptake *in vivo* (rat), **186**, 455

L

- D-Lactate dehydrogenase
- NAD⁺-dependent
 - gene cloning and overexpression in *Escherichia coli* (*Lactobacillus bulgaricus*), **185**, 705
 - primary structure and evolutionary relationships: comparison with 2-hydroxy acid dehydrogenases (*Lactobacillus bulgaricus*), **184**, 60
- L-Lactate dehydrogenase
- related activity, ϵ -crystallin with, kinetic constants and substrate specificity (duck lens), **186**, 874
 - substrate inhibition, decrease via Thr246 mutations (*Bacillus stearothermophilus*), **182**, 1309
- Lactoferrin
- encoding gene, structural organization (mouse), **189**, 1725
- Laminin
- binding by soluble and membrane-bound galactoside-binding proteins, dichotomy, (human), **186**, 1674
 - gene expression in mesangial cells, effect of high glucose concentrations (rat), **185**, 1048
- Laminin receptors
- cDNA, cloning and genomic analysis: phylogeny and expression profiles (human), **184**, 1165
 - 67-kDa, encoding gene, increased expression in small cell lung cancer (human), **182**, 746
- Lamins
- A, B, and C, expression in hemopoietic cell lines of erythroid lineage (human, mouse), **185**, 271
 - A and C, expression in P19 embryonal carcinoma cells, post-transcriptional regulation (mouse), **189**, 1639
- Lanosterol
- accumulation in *Saccharomyces cerevisiae* treated with 6-amino-2-*n*-pentylthiobenzothiazole, **189**, 85
- Lanosterol 14 α -demethylase
- effect of substrate 4 β -methyl group (yeast), **183**, 1266
- Lanosterol synthase
- preferential cyclization of 2,3(*S*):22(*S*),23-dioxidosqualene compared to 2,3(*S*)-oxidosqualene (rat liver), **188**, 898
 - vertebrate, affinity labeling with tritiated suicide substrate (pig, rat liver), **187**, 32
- Lanthanide
- La³⁺, activation and inactivation of osteoclast Ca²⁺ receptor (rat), **187**, 907
- Lasalocid
- induced Cl⁻ transport in erythrocyte suspensions, ¹⁹F, ³¹P, and ³⁵Cl NMR studies (human), **184**, 915
- Latex beads
- activation of interleukin-1 α production in Sertoli cells (rat), **185**, 154
- Lavage
- bronchoalveolar, heptanal and nonanal identification after low-level ozone exposure (rat), **188**, 129
- Leber hereditary optic neuropathy
- associated ND-6 mitochondrial DNA mutation, analysis (human), **187**, 1551
- Lecithin:cholesterol acyltransferase, *see* Phosphatidylcholine:sterol acyltransferase
- Lectins
- binding specificity in epidermal cells, related fucosyltransferase activity, differentiation-associated changes (newborn rat), **189**, 27
 - Ca-dependent, and fish antifreeze proteins, structural and functional comparison, **185**, 335
 - β -galactoside-binding, soluble and protein inhibitor of fucosyltransferase, effects on intestinal fucosylation

- enzymes (rat), **185**, 617
- Leishmania donovani*
- killing by hamycin *in vitro*, **182**, 86
- Leishmania mexicana*
- and other trypanosomatids, putrescine uptake, differential regulation, **188**, 120
- Lens
- ATP binding to α -crystallin in, ^{31}P NMR analysis (bovine), **189**, 1578
- intact, glutathione synthesis and antioxidant metabolism, ^{13}C NMR measurement (rabbit), **186**, 931
- Lentiviruses
- ovine, antibody response in sheep, analysis with bacteria-expressed viral gene products, **188**, 20
- Leucine
- analog 4-amino-6-methylhept-2-enoic acid as probe for localization of proteolytic control sites in hepatocytes, evaluation, **186**, 1327
- Leucine-tRNA ligase
- temperature-sensitive mutant, *ilvGMEDA* operon repression control, maintenance at restrictive temperature (*Escherichia coli* K-12), **187**, 1106
- Leucine zippers
- and signal peptide, DNA-binding protein nucleobindin with, cDNA cloning (mouse), **187**, 375
- Leucopyrokinin
- structurally related pheromonotropic neuropeptide, isolation and primary structure (armyworm larvae), **182**, 534
- Leucyl-tRNA synthetase, *see* Leucine-tRNA ligase
- Leukocidin
- F-component, from methicillin-resistant *Staphylococcus aureus*, gene cloning and nucleotide sequence, **184**, 640
- Leukocyte adhesion deficiency
- severe, identification of associated mutations in Japanese patients, **184**, 1460
- Leukocytes
- chemoattractant peptides for, secreted by periovulatory follicles, sequence analysis (sheep), **184**, 848
- chemotactic activity of FK506-binding protein, inhibition by FK506 (human), **186**, 1178
- mononuclear, plasma membrane receptors, binding of aldosterone, photoaffinity labeling study (human), **189**, 1424
- polymorphonuclear, *see* Neutrophils
- Leukotriene
- transcellular biosynthesis during neutrophil-glomerular endothelial cell interactions, promotion by cell adhesion, **186**, 1307
- Leukotriene B_4
- chemotactic metabolite production by hepatocytes in presence of ethanol (human), **185**, 604
- induced steady-state Ca rise in eosinophils, relationship to superoxide generation (guinea pig), **187**, 670
- Leukotriene- C_4 synthase
- induction in differentiating human erythroleukemia cells, **189**, 1043
- Leupeptin
- generation of cytotoxic fragments from Alzheimer amyloid protein precursor in cDNA-transfected glioma cells (human), **187**, 1249
- inhibition of intrinsic factor-mediated transcytosis of [^{57}Co]cobalamin across polarized renal epithelial cells (opossum), **182**, 439
- Leydig cells
- metabolism of 19-norandrogens, effect of 5α -reductase inhibitor (pig), **183**, 1254
- LH-RH, *see* Luteinizing hormone-releasing hormone
- Lichenase
- secondary structure, algorithmic prediction and FTIS estimation, **184**, 612
- Ligation
- single-strand, to single-stranded cDNA, in cloning of acidic fibroblast growth factor 5' untranslated exons (bovine), **188**, 843
- Light
- induced H^+ release from uncoupled thylakoid membranes, inhibition by *N*-ethylmaleimide (spinach), **182**, 1277
- Limb bud
- expression and distribution of cellular retinoic acid binding protein type II (chicken embryo), **185**, 217
- Limbs
- development, associated differential expression of *msh*-related homeobox genes *Chox-7* and *Chox-8* (chicken embryo), **182**, 121
- regeneration, associated activity of protein kinase C in central nervous system (newt), **184**, 433; *erratum*, **185**, 1163
- Linalool monooxygenase
- and camphor, electron donors, reconstitution of cytochrome P450_{2B4} (rabbit), **187**, 310
- Linoleic acid hydroperoxide
- generation of hydroxyl radical in presence of epinephrine and iron, **183**, 945
- Linoleic acid monoepoxides
- hydrolysis catalyzed by soybean fatty acid epoxide hydrolase, enantioselectivity, **187**, 171
- γ -Linolenic acid
- metabolism in red alga: mechanism of conjugated tetraene fatty acid formation (*Lithothamnion corallioides*), **188**, 1220
- Lipase, *see* Triacylglycerol lipase
- Lipid hydroperoxides
- and antioxidants, plasma levels in hyperlipidemic Nagase analbuminemic and control rats and in humans, comparison, **189**, 518
- Lipid interface recognition
- defect in type I hyperlipidemia, role of heterozygous mutation in lipoprotein lipase gene (human), **182**, 70
- Lipid peroxidation
- microsomal
- NADPH-independent inhibition (rat liver), **186**, 74
- role of superoxide radical generated in inner membranes (rat liver), **186**, 1087
- and superoxide generation, relationship to NADH-Q oxidoreductase inhibition by rotenone, piericidin A, and MPP, **189**, 47
- Lipids
- bilayers
- mast cell granule membrane reconstituted, detection of Ca-dependent cation channel (rat), **185**, 793

Subject Index

- planar
 formation of low conductance ion channel by porin (*Pseudomonas aeruginosa*), **186**, 645
 incorporation of ATP-regulated K⁺ channels from membranes of insulin-secreting HIT T15 β -cells, **186**, 1037
- bipolar, vesicles containing, lateral motion of pyrene-labeled phosphatidylcholine in, pressure dependence (*Sulfolobus acidocaldarius*), **188**, 1241
- chromaffin granule membrane, interaction with dopamine- β -monooxygenase (bovine), **188**, 678
- mixed, dispersions, phase behavior in, determination by sphingolipid headgroup, **188**, 1247
- phase alterations in guard cell plasmalemma, regulation of abscisic acid-induced stomate closure and reversal by umbelliferone (*Vicia faba*), **186**, 652
- polymorphism, regulation of phospholipid import into mitochondria (mouse), **186**, 1384
- synthesis by isolated adipocytes, effect of insulin incubation (rat), **188**, 807
- transport studies, 5-methyl-BD¹⁸-3-dodecanoic acid as potential probe for, analysis by selective incorporation into lipid classes of BHK cells, **185**, 1594
- vesicle system, protein kinase C activity, dual modulation by sphingosine, **187**, 635
- Lipocortin, *see* Annexin
- α -Lipoic acid, *see* Thioctic acid
- Lipolysis
 enhancement by cytokines in cultured adipocytes by prostaglandin-independent mechanism (mouse), **186**, 237
 mathematical analysis based on interrelationship of physicochemical and biochemical data (human), **186**, 746
 very-low-density lipoproteins by lipoprotein lipase, effect on monocyte adhesion to aortic endothelial cells, **189**, 1653
- Lipopolysaccharide
 activation of
 interleukin-1 α production in Sertoli cells (rat), **185**, 154
 neutrophils, inhibition by GMP-140, ¹H NMR study (human), **183**, 1062
 and cytokines, induction of macrophage-type nitric oxide synthase in retinal pigmented epithelial cells (bovine), **186**, 854
 down-regulation of CD4 expression in cultured microglia (mouse), **189**, 869
Escherichia coli, macrophages activated by, nitric oxide production, detection by ESR with CO-hemoglobin (rat), **184**, 1119
Helicobacter pylori, effect on gastric sulfomucin synthesis and secretion (rat), **184**, 1411
 induction of prostaglandin H synthase-2 in alveolar macrophages (rabbit), **187**, 1123
 and *Propionibacterium acnes*, inducible nitric oxide purified from liver of treated rats, polyclonal antibody against, **187**, 1291
 -serum complex, role in translocation of G protein to membrane and priming of neutrophils via CD14 (human), **183**, 1280
- Lipoprotein lipase
 deficiency in southern-Italian family, role of G $\rightarrow$ C change at donor splice site of intron 1, **187**, 620
 enhancement of cellular binding of low-density and very-low-density lipoproteins, role of heparan sulfate proteoglycans (bovine), **185**, 582
 heterozygous mutation, contribution to lipid interface recognition defect in type I hyperlipidemia (human), **182**, 70
 inhibition by cytokines in cultured adipocytes by prostaglandin-independent mechanism (mouse), **186**, 237
 mediated lipolysis of very-low-density lipoproteins, effect on monocyte adhesion to aortic endothelial cells (bovine), **189**, 1653
- Lipoprotein receptors
 for low-density lipoproteins
 binding by apolipoprotein E5(Glu₃ $\rightarrow$ Lys) mutant produced by site-directed mutagenesis, **187**, 1180
 gene expression, restriction fragment length polymorphism for, association with obesity in essential hypertensives, **189**, 965
 induction in vascular smooth muscle cells by cAMP-elevating agents, enhancement by lysosome inhibitors (human), **182**, 830
- Lipoproteins
 -bacteriochlorophyll complexes, photothermal spectroscopic analysis (*Chromatium minutissimum*), **186**, 327
 distribution of plasma epoxyeicosatrienoates (rat) **182**, 1320
 effects on phosphoinositide and calcium signalling responses in smooth muscle cells (human), **188**, 1295
 high-density, antagonism of inhibitory effects of oxidized low-density lipoprotein and lysolecithin on soluble guanylyl cyclase, **182**, 302
 low-density
 inhibition of nitrite accumulation in endothelial cell cultures (murine brain), **186**, 315
 oxidized
 arrhythmogenic effects in Purkinje fibers (rabbit), **182**, 548
 induction of platelet-derived growth factor A chain expression in smooth muscle cells (human), **186**, 1410
 inhibitory effects on soluble guanylyl cyclase, antagonism by high-density lipoproteins, **182**, 302
 phospholipase A₂-modified, uptake by macrophages at enhanced rate, **185**, 465
 and very-low-density lipoproteins, cellular binding enhancement by lipoprotein lipase, role of heparan sulfate proteoglycans (bovine), **185**, 582
 yolk-associated, with vitellogenin-degrading proteinase function, isolation (sand crayfish), **186**, 498
 very-low-density, lipoprotein lipase-mediated lipolysis, effect on monocyte adhesion to aortic endothelial cells (human), **189**, 1653
- Liposomes
 α 5 β 1, functional effect of GM3 ganglioside: regulatory role in integrin function (mouse), **186**, 1397
 cationic, interaction with DNA: transfection of lentil protoplasts, **186**, 1417
 from chromaffin granule membrane lipids, interaction with dopamine- β -monooxygenase (bovine), **188**, 678
 effects on P-glycoprotein function in multidrug-resistant tumor cells (human), **187**, 1098
 phosphatidylcholine, containing viral receptors, mem-

- brane fusion with influenza virus, **186**, 378
- phospholipid, phase behavior and dynamic properties, effects of glycolipids, **186**, 1294
- pH-sensitive, oligonucleotides encapsulated in, efficiency toward Friend retrovirus, **183**, 879
- reconstituted, permeability, effect of lens MIP26 protein glycation (bovine), **186**, 632
- Lipoxygenase**
- active site, sulfur-containing amino acids at, analysis with platinum complex (soybean), **182**, 779
- generated arachidonic acid metabolites, mediation of cell killing and Mn-superoxide dismutase induction by tumor necrosis factor- α (human, mouse), **188**, 538
- and hydroperoxide dehydrase, purification and interactions (flaxseed), **188**, 858
- isolated from hairy root cultures, dioxygenation catalyzed by, identification of 11-hydroperoxyeicosatetraenoic acid as major product (*Solanum tuberosum*), **189**, 1349
- wildtype L-1, iron-binding histidine residues, identification (soybean), **186**, 686
- 5-Lipoxygenase**, *see* Arachidonate 5-lipoxygenase
- Lisonopril**
- inhibition of angiotensin I-converting enzyme in spontaneously hypertensive hamster, **183**, 1117
- Lithothamnion corallioides**
- 6,9,12-octadecatrienoic acid metabolism: mechanism of conjugated tetraene fatty acid formation, **188**, 1220
- Liver**, *see also* Hepatocytes
- with acute necrosis induced by *Propionibacterium acnes* and lipopolysaccharide, purified inducible nitric oxide synthase, polyclonal antibody against (rat), **187**, 1291
- apolipoprotein B mRNA editing, dietary and estrogen modulation (mouse), **188**, 135
- aromatic L-amino acid decarboxylase holoenzyme content, evaluation (rat), **186**, 1242; *erratum*, **189**, 1252
- ATP-citrate lyase in, regulation at transcriptional and post-transcriptional levels (rat), **189**, 264
- catalase gene expression, depression in tumor-bearing nude mouse, **189**, 1084
- chiroinositol-containing phospholipids, identification and characterization (bovine), **184**, 1042
- cholesterogenesis, biphasic effect of oleic acid (rat), **183**, 21
- cirrhotic and tumor portions, deleted mtDNA, quantitative comparison (human), **182**, 913
- collagen subunit COL1A(I) and glyceraldehyde-3-phosphate dehydrogenase mRNA levels, carbon tetrachloride-induced increase, suppression by prostacyclin (rat), **185**, 981
- compensatory cell proliferation, DNA methylation pattern during, effect of *N*-methyl-*N*-nitrosourea (rat), **184**, 107
- copper accumulation, relationship to metallothionein induction (LEC rat), **184**, 1393
- copper metallothionein induction (LEC rat), **185**, 548
- cytosol, detection of heat-stable substances causing oxidative activation of fructose 1,6-bisphosphatase (chicken), **182**, 600
- diabetic, post-transcriptional regulation of insulin-like growth factor-binding protein-2 mRNA (rat), **189**, 1031
- DNA, covalent modifications in, circadian rhythm (mouse), **189**, 545
- energy metabolism intermediates, effects of congenital hyperammonemia (sparse-fur mouse), **184**, 746
- expression of
- cellular retinoic acid-binding protein type II in adult (human), **189**, 1397
- lung-type prostaglandin F synthase (bovine), **183**, 1238
- secretin precursor gene (rat), **183**, 390
- tyrosine aminotransferase and serine dehydratase after partial hepatectomy, comparison (rat), **182**, 753
- fat-storing cells, hepatocyte growth factor gene expression and downregulation by transforming growth factor- β during cell growth (rat), **183**, 739
- fatty acid synthase and S14 gene transcription *in vitro*, mechanisms **182**, 631
- glycogen metabolism *in vivo*, ^{13}C NMR study (baboon), **182**, 900
- 3 α -hydroxysteroid dehydrogenase, amino acid sequence and relationship to chlordecone reductase (human), **187**, 760
- injury**
- hepatocyte growth factor mRNA induction in kidney and spleen in response to, analysis (rat), **186**, 991
- induced by ischemia/reperfusion, therapeutic effects of superoxide dismutase derivatives modified with mono- or polysaccharides (rat), **189**, 191
- insulin-mediated glucose uptake *in vivo*, role of Kupffer cells (rat), **186**, 455
- intracellular distribution of endothelin-1 receptors (rat), **184**, 498
- intracellular proteins, tyrosine phosphorylation, evaluation as indicator of TCDD exposure *in vivo* (mouse), **189**, 59
- metallothionein and zinc levels, elevation in mice bearing experimental tumors, **189**, 645
- microsomal lipid peroxidation, NADPH-dependent inhibition (rat), **186**, 74
- molybdenum hydroxylases, subcellular localization (guinea pig), **185**, 54
- nuclear proteins, proteolysis, stimulation by phenylmethylsulfonyl fluoride (chicken), **189**, 179
- and other organs, [^{14}C] sialic acid-GM3 and [^3H] GM1 sphingosine distribution after intravenous injection (rat), **189**, 1410
- oxidative stress response, activation by 1.2-centimorgan deletion in chromosome 7 (neonatal mouse), **182**, 1160
- regeneration**
- associated selective changes in protein kinase C isoenzymes in hepatic nuclei (rat), **182**, 1333
- cytosolic thyroid hormone-binding protein synthesis during, regulation by 3,3',5-triiodo-L-thyronine (rat), **189**, 257
- after partial hepatectomy, associated protein phosphatase PP1 and PP2A gene expression and activity (rat), **185**, 291
- role of intracellular histamine: binding studies in nuclear fractions (rat), **184**, 840
- selenoprotein mRNAs, differential regulation in selenium deficiency (rat), **185**, 260
- smooth endoplasmic reticulum, localization of membrane-as-

Subject Index

- sociated carbonyl-reducing enzyme (mouse), **189**, 736
- sulfotransferase isoenzymes, sex-related intralobular distribution (rat), **183**, 872
- superoxide dismutase endocytosis (rat), **184**, 727
- t protein regulation by T₃: identification as peroxisomal enoyl-CoA hydratase-3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme (rat), **185**, 211
- transthyretin gene expression, repression by peroxisome proliferator clofibrate (rat), **188**, 799
- tryptophan 2,3-dioxygenase, substrate stabilization, role of lysosomes (rat), **183**, 306
- type C chronic disease, detection of anti-NS1/E2 antibodies in affected patients, **183**, 925
- Long-chain acyl-CoA dehydrogenase
with β -oxidation activity toward 15–20 carbon-length fatty acids, detection in fibroblasts (human), **182**, 1002
- Long terminal repeats
hybrid, amphotropic retroviruses with, construction as tool for gene therapy of cystic fibrosis, **187**, 187
- Long-term potentiation
associated Ca²⁺-independent form of kinase C, effect of calpain (rat hippocampus), **189**, 1515
- Lung
angiotensin I-converting enzyme activity in spontaneously hypertensive hamster, **183**, 1117
- bronchoalveolar lavage, identification of heptanal and nonanal after low-level ozone exposure (rat), **188**, 129
- cytosol, detection of mineralocorticoid receptors (rat), **183**, 405
- endothelin-1 content, regulation by budesonide (rat), **188**, 1116
- endothelin receptor subtypes, distribution revealed by radioligand binding assay (pig), **182**, 144
- expression of
hepatocyte growth factor mRNA after distal organ injuries (rat), **182**, 802
- secretin precursor gene (rat), **183**, 390
- histamine-mediated bronchial contractions *in vivo*, enhancement by low-concentration endothelin-1 (guinea pig), **187**, 717
- membrane β -adrenergic receptor density, effect of eosinophil peroxidase (guinea pig), **189**, 1613
- and other organs, [¹⁴C] sialic acid-GM3 and [³H]-GM1 sphingosine distribution after intravenous injection (rat), **189**, 1410
- ozone exposure, cholesterol ozonation product levels as biomarkers (rat), **188**, 618
- vascular endothelium, free radical-induced injury, protection by ginsenosides (rabbit), **189**, 670
- Luteinizing hormone
secretion by thymocytes, role in autocrine regulation of T-cell proliferation (human), **187**, 1187
- Luteinizing hormone-releasing hormone
and (hydroxyproline⁹)LHRH, precursor and deaminated forms, detection in hypothalamus (rat), **189**, 1368
- Luteinizing hormone-releasing hormone receptors
up-regulation, role of Ca²⁺ calmodulin-dependent kinase (rat), **183**, 666
- Lycopene cyclase
from *Escherichia coli* transformed with different *crt* genes, *in vitro* assays, **185**, 9
- Lyme disease
etiologic agent *Borrelia burgdorferi*, 23S and 5S ribosomal RNA genes, detection of tandem repeat, **183**, 952
- Lymphoblastoid cells
XPD, DNA endonuclease complex defective in incising pyrimidine dimer-containing nucleosomal DNA in, isolation (human), **189**, 782
- Lymphocytes
activated monocytes, chemoattraction to platelet-derived growth factor AA homodimers, demonstration (human), **186**, 1510
- B, *see* B cells
- CR2-positive, transformed, tyrosine phosphorylation and proliferation, induction by C3d-derived 16-amino acid synthetic peptide (human), **188**, 833
- effects of immunosuppressive molecules produced by Sertoli cells *in vitro* (mouse), **186**, 1639
- expression of HIV-1 and cytokine genes, differential modulation by suboptimal and optimal activation signals (human), **182**, 1172
- HIV-1 replication in, effects of short peptides derived from viral protease terminal segments (human), **184**, 980
- isolated, silver toxicity, protective effect of cysteine (human), **189**, 1444
- mitogenesis, histamine and calcium as intracellular mediators, independent regulation (murine spleen), **182**, 786
- mitogenic activation by periodic acid, role of Ca²⁺ (human, rat), **183**, 144
- mononuclear, phytohemagglutinin-activated, proliferation, effects of anchored anti-HLA class I monoclonal antibodies (human), **188**, 278
- natural killer, *see* Natural killer cells
- peripheral blood, cell cycle progression, association with distinct patterns of Op18 phosphorylation (human), **185**, 197
- stearoyl-CoA desaturase gene expression (mouse), **186**, 531; *erratum*, **187**, 1201
- T, *see* T cells
- tumor necrosis factor- α production, stimulation by 4,4'-diisothiocyanatostilbene-2,2'-disulfonic acid (human), **189**, 1268
- Lymphokines
mRNA, up-regulation, correlation with down-regulation of TcR, CD4, CD8, and Ick mRNA: cyclosporin A effect on activated T cells, **186**, 603
- Lymphotoxin
ligand binding and antiproliferative effects in U-937 cells, inhibition by soluble recombinant p60 and p80 TNF receptors (human), **182**, 638
- Lyophilization
 γ II-crystallins, effect on stability (bovine), **187**, 39
- Lysine
Lys-164, with role in substrate-binding site of hepatic uricase, identification by site-directed mutagenesis (rat), **187**, 101
- Lys-183, and Tyr-179, role in 11 β -hydroxysteroid dehydrogenase catalytic function in transfected CHO cells, **188**, 222
- Lys-263, role in aldose reductase catalytic action, analysis

Subject Index

- by site-directed mutagenesis (human), **183**, 327
- subsite residue in Taka-amylase A, crosslinked modification, augmentation of maltosidase activity (*Aspergillus oryzae*), **183**, 321
- Lysolecithin**
- effects on $[Ca^{2+}]_i$ and thymidine incorporation into DNA in smooth muscle cells (rat), **183**, 156
- inhibition of guanylyl cyclase, antagonism by high-density lipoproteins, **182**, 302
- Lysosomes**
- acidification in pancreatic adenocarcinoma cells, role of cystic fibrosis transmembrane conductance regulator (human), **184**, 300
- hepatic, role in substrate stabilization of tryptophan 2,3-dioxygenase (rat), **183**, 306
- 85-kDa sialoglycoprotein, cDNA cloning and sequencing from metastatic islet tumor cell line (human), **184**, 604
- Lysozymes**
- ozonation in presence of oleate in sodium di-2-ethylhexyl-sulfosuccinate reverse micelles, **187**, 473
- M**
- α -2 Macroglobulin
- encoding gene and promoter, structure (human), **184**, 596
- Macrophage chemotactic factor**
- plasma precursor, and complement factor H, in delayed hypersensitivity reaction sites, relationship (guinea pig), **185**, 505
- Macrophages**
- activated, expression of tumor necrosis factor-independent tumoricidal activity, role of nitric oxide synthase induction (rat), **184**, 1364
- alveolar
- cytostatic activity in bleomycin-treated rat, inhibition, role of increase in nitrosylated hemoglobin in cocultured erythrocytes, **182**, 151
- prostaglandin H synthase-2 induction by lipopolysaccharide (rabbit), **187**, 1123
- superoxide production, stimulation by zinc hydroxide (rat), **185**, 1115
- HD11, nitric oxide production in closed culture system, direct measurement in headspace gas (chicken), **184**, 36
- hepatic, prostanoid and superoxide formation, stimulation by protein kinase C β -isoform (rat), **183**, 1247
- K^+ current, activation by platelet activating factor (mouse), **182**, 372
- J-774 A.1, uptake of phospholipase A_2 -modified low-density lipoproteins at enhanced rate, **185**, 465
- monocyte-derived, nitrate production, evaluation (human), **186**, 775
- nitric oxide synthesis, induction by interferon- γ , role of protein kinase C (mouse), **188**, 997
- NO synthase**
- induction by interferon- γ , inhibition by interleukin-10 (mouse), **182**, 1155
- inhibition by 3-amino-1,2,4-triazole (mouse), **183**, 150
- peritoneal, chemotaxis, stimulation by Alzheimer's disease amyloid β -protein (mouse), **189**, 1096
- pulmonary, KC mRNA expression (rat), **184**, 922
- respiratory burst, effect of interleukin-4, species dependence (human, mouse), **182**, 727
- Magnesium**
- intracellular, regulation by superoxide in amnion cells (human), **182**, 906
- modulation of NADPH oxidase activation at G protein level (human neutrophils), **186**, 391
- Malaria**
- chemotherapy, *de novo* heme biosynthesis pathway in *Plasmodium falciparum* as potential target, **187**, 744
- Malate**
- pyruvate antiporter, detection in mitochondria (rat liver), **182**, 931
- Malate dehydrogenase**
- substrate specificity, role of arginine 102 (*Escherichia coli*), **189**, 1057
- Maleic anhydride**
- and polyethylene glycol derivatives, comb-shaped copolymers, in chemical modification of L-asparaginase (*Escherichia coli*), **184**, 144
- Maltosidase**
- increased activity after crosslinked modification at subsite Lys residue in Taka-amylase A (*Aspergillus oryzae*), **183**, 321
- Mammary gland**
- mammary-derived growth inhibitor-related to polypeptide, expressed during pregnancy, purification (bovine), **189**, 406
- secretion of insulin-like growth factor II into milk (goat), **183**, 1230
- Mannose**
- inhibition of *Trypanosoma cruzi* metacyclogenesis, **187**, 108
- Mannose 6-phosphate receptors**
- insulin-like growth factor II receptors, distribution on Hep G2 cells, effect of brefeldin A (human), **185**, 719
- Mapping**
- with monoclonal antibody, orientation of antigenic peptide bound in antigen binding groove of H-2K^b, **186**, 1449
- Mast cells**
- connective tissue-type, histamine release, induction by stem cell factor (rat), **183**, 1076
- peritoneal and pulmonary, histamine release, effect of endothelin-1 (guinea pig), **189**, 1196
- platelet-activating factor biosynthesis *in vitro*, role of Ca^{2+} and G proteins (mouse), **184**, 1425
- Mastoparan**
- interaction with rho proteins, role of post-translational isoprenylation (porcine brain), **186**, 448
- Matrix association regions**
- in α -globin gene, detection and localization (mouse), **182**, 78
- Maturation-promoting factor**
- concentrations in embryonic cells, mathematical models, **184**, 782
- McArdle's disease**
- metabolic anomalies associated with glycogen phosphorylase deficiency in forearm muscle in patients, ^{31}P NMR study, **185**, 16
- Meiosis**
- oocyte, maturation, induction by thapsigargin (surf clam), **189**, 79

Subject Index

- Melanins
production from enkephalins by tyrosinase, **184**, 1190
- Melanotropin
up-regulation of MSH receptors in Cloudman S91 melanoma cells (mouse), **188**, 1325
- Melanotropin receptors
up-regulation by MSH in Cloudman S91 melanoma cells (mouse), **188**, 1325
- Melittin
effect on phosphatidylcholine small unilamellar vesicle susceptibility to phospholipases A², C, and D, **182**, 682
interaction with rho proteins, role of post-translational isoprenylation (porcine brain), **186**, 448
- Membrane fusion
pH-dependent, influenza virus with phosphatidylcholine liposomes containing viral receptors, **186**, 378
- Membrane metallo-endopeptidase
His 704, identification as sole catalytic His residue by mutational analysis (rat), **184**, 883
inhibitor candoxatriol, atrial natriuretic peptide in urine from treated rat, characterization, **182**, 1270
- Membrane order
in Jurkat T cells, effect of cigarette smoke (rat), **185**, 624
- Membrane potential
changes, effects on cyclosporin-induced inhibition of T-cell proliferation (human), **185**, 363
oscillation in β -cells, triggering by high external Ca²⁺ levels during K(ATP) channel blockade (mouse), **187**, 872
probe, in characterization of depolarization-induced calcium release from sarcoplasmic reticulum *in vitro* (rabbit), **184**, 538
- Membranes
anterior pituitary, phospholipid composition, effect of essential fatty acid deficiency (rat), **183**, 1047
binding of macrophage arachidonate-mobilizing phospholipase A², role of Ca²⁺ (mouse), **184**, 118; *erratum*, **185**, 1162
bound endogenous protein, inhibition of L-type calcium channel phosphorylation by cAMP-dependent protein kinase, **186**, 1588
bound galactoside-binding proteins, and soluble proteins, dichotomy in laminin-binding properties (human), **186**, 1674
cardiac, endothelin-1 binding, inhibition by K⁺ channel opener BRL 38227 (rat), **185**, 630
cerebral
microsomal, cleavage of farnesylated COOH-terminal heptapeptide of murine N-ras (rat), **187**, 1336
purification of GTPase-activating protein for human rap2b (bovine), **189**, 717
chloride permeability, effect of cAMP levels (CHO cells), **186**, 251
chromaffin granule, lipid interaction with dopamine- β -monooxygenase (bovine), **188**, 678
endoplasmic reticulum, anchoring of murine cytochrome P450 1A1, sequences controlling, analysis (yeast), **184**, 1490
erythrocyte
bending fluctuations, effects of atrial natriuretic peptide (human), **188**, 1003
effects of velnacrine and *N*-methylacridinium: relevance to tacrine and Alzheimer's disease (human), **185**, 596
fusion in presence of exogenous Ca²⁺, role of calpain activation (human, rabbit, rat), **182**, 939
phospholipids, fatty acid transfer from acyl-L-carnitine pool, analysis (human), **187**, 353
fetal, detection of activin β_A mRNA (human), **182**, 773
granule
in mast cells, reconstitution into lipid bilayer, detection of Ca-dependent cation channel (rat), **185**, 793
in platelets, cytoplasmic procalpain I translocation onto and activation during stimulation with thrombin, analysis (human), **185**, 1122
hepatic lysosomal, nucleotide-activated chloride channels in, analysis (rat), **187**, 254
inner, superoxide radical generated in, role in iron-induced microsomal lipid peroxidation (rat liver), **186**, 1087
from insulin-secreting HIT T15 β -cells, associated ATP-regulated K⁺ channels, incorporation into planar lipid bilayers, **186**, 1037
intercellular, in stratum corneum, model: identification of sphingolipid headgroup as determinant of phase behavior in mixed lipid dispersions, **188**, 1247
lens, MP22 and MP26 proteins, effect of glycation (bovine), **185**, 496
lipid bilayer, containing ionophore A23197, channel formation, **189**, 1038
lung, β -adrenergic receptor density, effect of eosinophil peroxidase (guinea pig), **189**, 1613
microsomal
assembly of hybrid from *Torpedo californica* Na⁺,K⁺-ATPase α subunit and rabbit H⁺,K⁺-ATPase β subunit (*Xenopus* oocytes), **182**, 659
integration of *Halobacterium salinarum* bacterio-opsin (canine pancreas), **187**, 1480
mitochondrial
long-chain 3-hydroxyacyl-CoA dehydrogenase bound to, identification as multifunctional β -oxidation enzyme (human liver), **183**, 443
phospholipase A₂ localization (murine liver), **183**, 719
neutrophil, associated phospholipase A₂, direct activation by GTP-binding protein (human), **183**, 708
oocyte, 1-methyladenine receptors, binding properties (starfish), **186**, 114
osteoclast, depolarization and hyperpolarization, effects on extracellular Ca²⁺-induced elevation of cytosolic free Ca²⁺ levels (rat), **183**, 619
outer, association of *oriC* region of *Escherichia coli* chromosome with, effect of culture conditions, **187**, 970
peribacteroid, limitation of Δ -aminolevulinate uptake by *Rhizobium* bacteroids in legume nodules (French bean, soybean), **184**, 1324
phosphoproteins, enhanced tyrosine phosphorylation in estrogen-induced renal tumors (hamster), **186**, 228
plasma, *see* Plasma membranes
platelet, Ca²⁺ release, inhibition by cAMP-dependent phosphorylation of inositol-1,4,5-trisphosphate receptor (human), **184**, 893

Subject Index

- poliovirus protein 3AB with toxicity to, inducible expression in *Escherichia coli*, **188**, 972
- renal brush border, vesicles, sodium uptake, inhibition by amiloride analogs (hypertensive rat), **183**, 55
- skeletal muscle, cAMP-dependent protein kinase-inhibiting protein, purification and characterization (rabbit), **182**, 232
- submitochondrial particles, superoxide generation and lipid peroxidation, relationship to action of NADH-Q oxidoreductase inhibitors, **189**, 47
- synaptosomal, calmodulin-binding Ca^{2+} -independent protein localization (rat brain), **183**, 725
- thylakoid, *see* Thylakoids
- voltage-dependent channel formation by zervamicins, **186**, 8
- Mepacrine *see* Quinacrine
- Mepyramine
binding protein, and histamine H_1 receptor, separate determination by [^3H]mepyramine assay with quinine, **189**, 378
- Mesangial cells
expression of
hepatocyte growth factor and HGF receptor mRNAs (rat), **182**, 960
leukocyte common antigen-related phosphatase, regulation (rat), **188**, 34
glomerular, cystatin C secretion: autocrine loop for growth promotion *in vitro* (rat), **182**, 1082
metalloproteinase and inhibitor gene expression, effect of high glucose concentrations (rat), **185**, 1048
- Metacyclogenesis
inhibition by mannose (*Trypanosoma cruzi*), **187**, 108
- Metallo-endopeptidase
purification from NB-OK-1 cells and characterization: inactivation of atrial natriuretic peptide by selective cleavage at Ser¹²³-Phe¹²⁵ bond, **182**, 158
- Metalloproteinase
glioma-secreted, immunological identity with type IV collagenase: evidence for type IV collagenase activation by u-PA (rat), **186**, 348
and inhibitor, gene expression in mesangial cells, effect of high glucose concentrations (rat), **185**, 1048
matrix, PUMP, gene synthesis by PCR method and expression in *Escherichia coli* (human), **186**, 143
secreted by ts-110 Moloney murine sarcoma virus-transformed normal rat kidney cells, substrate preference, **189**, 21
- Metallothionein
copper-containing, induction in liver (LEC rat), **185**, 548
hepatic levels, elevation in mice bearing experimental tumors, **189**, 645
induction, relationship to Cu accumulation in liver of LEC rat, **184**, 1393
promoters, metal-inducible activities in rainbow trout liver cells and medaka fry, **185**, 1108
- Methanobacterium thermoautotrophicum*
ribonucleotide reductase from, identification, **184**, 1101
- Methicillin
resistant *Staphylococcus aureus*, leukocidin F-component gene, cloning and nucleotide sequence, **184**, 640
- Methionine
and cysteine, differentiation in lipoxygenase active site using platinum complex (soybean), **182**, 779
gene expression, regulation by vitamin B₁₂, role of *metF* and *metJ* genes and N⁵-methyltetrahydrofolic acid (*Escherichia coli*), **182**, 651
- Methotrexate
effect on thymidine kinase (rat), **187**, 522
- N-Methylacridinium
effects on erythrocyte membrane (human), **185**, 596
- 3-Methyladenine glycosylase I
Escherichia coli tag gene encoding, expression in NIH-3T3 murine fibroblasts, **185**, 41
- 1-Methyladenine receptors
oocyte membrane, binding properties: coupling with pertussis toxin-sensitive G protein (starfish), **186**, 114
- N-Methyl-D-aspartate receptors
isoforms generated by alternative splicing, structures and properties (rat forebrain), **185**, 826
mediation of stimulation of NO-dependent cGMP formation in cultured neurons and astrocytes (rat), **182**, 1362
- Methylated-DNA-protein-cysteine S-methyltransferase
cysteine 102 and 139, functional role, analysis by site-directed mutagenesis (*Escherichia coli*), **187**, 425
proficient and deficient cell lines, genetic and epigenetic differences, **183**, 1184
- Methylation
amyloid precursor protein gene in $\beta/\text{A4}$ region (rabbit), **188**, 905
hepatic DNA, pattern during compensatory cell proliferation, effect of N-methyl-N-nitrosourea (rat), **184**, 107
histones H3 and H4 in immature erythrocytes, relationship to acetylation (chicken), **185**, 414
inhibition of DNA-binding protein interaction with potential c-abl intron regulatory element, **186**, 1515
sensitive DNA-protein interaction at cell cycle regulatory domain of thymidine kinase promoter (human), **189**, 480
- 3-Methylcholanthrene
effect on oxidase activity of hepatic and pulmonary microsomal cytochrome P450 isozymes (rat), **187**, 1262
inducible cytochrome P450, synthesis of 12(R)hydroxy-eicosatetraenoic acid in ciliary epithelium (pig), **187**, 455
- Methylcobalamin
impaired synthesis in cultured astrocytes after short-term Cbl deprivation (human), **184**, 832
- N-Methyl-1-deoxynojirimycin
inhibition of glycoprotein processing at early stage of myogenesis (rat), **184**, 125
- 5-Methyl-4,4-difluoro-4-bora-3a,4a-diazaindacene-3-dodecanoic acid
as probe in lipid transport studies, analysis: selective incorporation into lipid classes of BHK cells, **187**, 1594
- Methylenebisphosphonate
and monofluoro-, difluoro-, and dichloro- derivatives, metabolism by *Dictyostelium discoideum*, **189**, 414
- 4-Methylfecosterol
accumulation in *Saccharomyces cerevisiae* treated with 6-amino-2-n-pentylthiobenzothiazole, **189**, 85

Subject Index

- 3-*O*-Methyl-D-glucose
and 2-deoxy-D-glucose, uptake in cultured neuroblastoma cells, effects of pentobarbital, **184**, 673
- 4 β -Methyl groups
in substrates of lanosterol 14 α -demethylase, effects on substrate recognition (yeast), **183**, 1266
- O⁶-Methylguanine-DNA methyltransferase, *see* Methylated-DNA-protein-cysteine methyltransferase
- (*R*)- α -Methylhistamine
and thioperamide, effects on histidine decarboxylase (murine brain), **185**, 121
- 29-Methylidene-2,3-oxidosqualene
affinity labeling of vertebrate oxidosqualene cyclase, **187**, 32
- Methyl jasmonate
conditioning of parsley suspension cells, induced increase in phenylpropanoid defense response elicitation, **189**, 304
- N*-Methyl-*N*-nitrosoarene
effect on methylation pattern of hepatic DNA during compensatory cell proliferation (rat), **184**, 107
- N*-Methyl-4-phenylpyridinium
NADH-Q oxidoreductase inhibition by, relationship to superoxide generation and lipid peroxidation, **189**, 47
- N*-Methylscopolamine
noncompetitive antagonism of muscarinic receptor-mediated Ca²⁺ mobilization (human), **189**, 919
- 3-Methylsulfonyl-4-piperidinobenzoyl guanidine hydrochloride
inhibition of Na⁺/H⁺ exchange in cerebral capillary endothelial cells (pig), **184**, 112
- N*⁵-Methyltetrahydrofolic acid
and *metF* and *metJ* genes, role in vitamin B₁₂ regulation of methionine gene expression (*Escherichia coli*), **182**, 651
- 5'-Methylthioadenosine
role in calvaria cell differentiation (rat), **182**, 817
- 4-Methylzymosterol
accumulation in *Saccharomyces cerevisiae* treated with 6-amino-2-*n*-pentylthiobenzothiazole, **189**, 85
- Metyrapone reductase
membrane-associated, localization in smooth endoplasmic reticulum of liver (mouse), **189**, 736
- Micelles
reverse
ribosome solubilization in, analysis, **186**, 1546
sodium di-2-ethylhexylsulfosuccinate, lysozyme ozonation in presence of oleate in, analysis, **187**, 473
- Microcirculation
during cardiomyopathy, acetylcholine-induced vasoconstriction in, reversal by L-arginine (hamster), **184**, 1372
- Microglia
chemotaxis, stimulation by Alzheimer's disease amyloid β -protein (rat), **189**, 1096
cultured, CD4 expression, down-regulation by immunosuppressants and lipopolysaccharide (mouse), **189**, 869
- Microscopy
atomic force, revealed cisplatin-induced alterations in DNA oriented fibers prepared by wet spin method, **182**, 201
- Microsomes
cardiac, detection of two types of inositol trisphosphate binding (dog), **189**, 728
- cytochrome P450 systems, ω -hydroxylation of (Z)-9-octadecenoic, (Z)-9,10-epoxystearic, and 9,10-dihydroxystearic acids (*Vicia sativa*), **184**, 183
- glucose-6-phosphatase, effects of proteases and protease inhibitors (rat liver), **183**, 590
- hepatic
cytochrome P450 LM2(Fe²⁺)-CO complex, high-pressure-induced inactivation (rabbit), **188**, 216
cytochrome P450 metabolic intermediate complex, identification in beer-fed rat, **189**, 899
exocyclic-keto reductase activities for progesterone and S-warfarin in adult male (rat), **184**, 338
N^o-hydroxy-L-arginine oxidation to NO and citrulline by NADPH and O₂, catalysis by cytochrome P450 (rat liver), **187**, 880
lipid peroxidation, NADPH-dependent inhibition (rat), **186**, 74
oxidation of C₈ to C₁₁ aliphatic aldehydes to carboxylic acids (mouse), **188**, 114
and pulmonary, cytochrome P450 isozymes, differential oxidase activity after treatment with cytochrome P450 inducers (rat), **187**, 1262
UDP-glucuronosyltransferases, inhibitory effects of ω,ω,ω -triphenylalcohols and UDP derivatives (rat liver), **187**, 140
- 3-hydroxy-3-methylglutaryl-CoA reductase, regulatory role in mutant overproducing sterols (*Nicotiana tabacum*), **186**, 888
- lipid peroxidation, role of superoxide radical generated in inner membranes (rat liver), **186**, 1087
- membranes, assembly of hybrid from *Torpedo californica* Na⁺K⁺-ATPase α subunit and rabbit H⁺K⁺-ATPase β subunit (*Xenopus* oocytes), **182**, 659
- pulmonary, superoxide anion production, effect of interleukin-1 (rat), **185**, 1083
- vascular, NO generation from organic nitrates, comparison (bovine), **185**, 932
- Microtubules
cerebral, crosslinking with synapsin I, cyclic inhibition-potential by protein kinase FA (swine), **184**, 973
interaction with nucleoside diphosphate kinase cloned from *Dictyostelium discoideum*, analysis (porcine brain), **187**, 65
self-assembly *in vitro*, inhibition by avian NAD⁺ ADP-ribosyltransferase (chicken), **184**, 414
- Milk
insulin-like growth factor II secretion into, analysis (goat), **183**, 1230
- Mimetics
peptide, *see* Peptide mimetics
- Mineralization
bone, inhibiting cytokines, differential regulation of phospholipase A₂ (rat calvarial cells), **188**, 1047
osteoblast-related cells *in vitro*, enhancement by interleukin-4 (human), **189**, 1521
- Mineralocorticoid hormone
action in plant cells (*Chlamydomonas reinhardtii*), **186**, 1102

- Mineralocorticoid receptors
detection in lung cytosol (rat), **183**, 405
- Minocycline
selective inhibition of endothelial growth (bovine, pig), **188**, 740
- Mithramycin
role in *in vitro* inhibition of *c-myc* transcription (human), **185**, 553
- Mitochondria
associated ATPase, organotin-flavone complexes as fluorescent probes for, analysis (rat), **188**, 365
cardiac, F_1 ATPase adenine nucleotide content, changes during ATP synthesis in dimethyl sulfoxide (bovine), **182**, 697
detection of associated inositol phospholipid (rat brain), **187**, 1077
- DNA
age-associated oxygen damage and mutations (human heart), **189**, 979
copy number in tissue, determination with exponential polymerase chain reaction (rat), **183**, 553
deleted from cirrhotic and tumor portions of liver, quantitative comparison (human), **182**, 913
plasmid, electrophoretic profiles: replication by rolling circle mechanism (*Neurospora crassa*), **186**, 1669
dysfunction, role of bis-pyridinium oxime binding to DNA (yeast), **186**, 1567
 H^+ -ATP synthase subunit d, structural analysis by cDNA cloning and specific antibodies (rat), **182**, 1130
- hepatic
cumene hydroperoxide-induced Ca^{2+} release, prevention by butylated hydroxytoluene (rats), **185**, 698
detection of pyruvate-malate antiporter (rat), **182**, 931
membrane-bound long-chain 3-hydroxyacyl-CoA dehydrogenase, identification as multifunctional β -oxidation enzyme (human), **183**, 443
phospholipase A_2 localization in outer membrane contact sites and inner membrane (mouse), **183**, 719
increased activities in pigmented cells and nucleotide sequence of large mitochondrial rRNA (goldfish), **189**, 445
isolation from Epstein-Barr virus-transformed B lymphocytes and characterization (human), **186**, 16
ND2 gene, point mutation, association with Alzheimer's disease, **186**, 491
 β -oxidation, disorder of, identification as trifunctional protein deficiency (human), **188**, 1139
phospholipid import, regulation mediated by lipid polymorphism (mouse), **186**, 1384
reduction of 5,5'-dithiobis-(2-nitrobenzoic acid), role of Ca^{2+} -sensitive thioredoxin reductase (rat liver), **184**, 1088
related particles, quinone-dependent NADH dehydrogenation (*Setaria digitata*), **186**, 698
succinate-dependent reduction of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyltetrazolium bromide in 32D cells, inhibition by calphostin C, mechanism (mouse) **185**, 806
transport of bovine cytochrome P450(SCC) expressed by baculovirus expression system (*Spodoptera frugiperda*), **184**, 471
- tRNA^{Leu} mutation, identification in patient with fatal cardiomyopathy, **186**, 47
- Mitogenesis
BHK-21 cells, vascular endothelial growth factor-induced, role of glycosylation, **182**, 1340
lymphocytes, histamine and calcium as intracellular mediators, independent regulation (murine spleen), **182**, 786
- Mitogenicity
murine schwannoma-derived growth factor homolog in mammary carcinoma SC2G cells, **185**, 103
- Mitogens
activated T cells, p70 S6 kinase phosphorylation, inhibition by rapamycin (human), **186**, 1315
- Mitosis
CHO cells, fibronectin receptor function during, assessment, **189**, 1429
- Models
computer, 3-D structure of two inorganic pyrophosphatases (*Saccharomyces cerevisiae*, *S. pombe*), **186**, 122
hepatorenal tyrosinemia, metabolic studies: absence of perinatal abnormalities (mouse), **187**, 340
mathematical
bone turnover in growing rats, **185**, 47
cellular concentrations of cyclin and maturation-promoting factor in embryonic cells, **184**, 782
- S-Modulin
rod photoreceptor cGMP phosphodiesterase light sensitivity-regulating, Ca^{2+} -dependent, purification and characterization (frog), **186**, 411
- Molecular dynamics
restrained, in conformational study of cyclo(1,5)-Ac-Pen-Arg-Gly-Asp-Cys-NH₂ in water, **187**, 1042
- Molecular recognition
role of hydrogen bonding and aromatic stacking: spectroscopic study of guanine base interaction with cytosine and tryptophan molecules, **183**, 577
- Molecular structure
bradykinin γ -turn peptide mimetics, **187**, 999
chymosin, X-ray crystallographic analysis: adoption of self-inhibited form, **184**, 1074
conformation, *see* Conformation
glutenin high molecular weight subunit, anisotropy, analysis by small-angle X-ray scattering by synchrotron orbital radiation (wheat), **186**, 1057
hairpin, intra-exon, loss from mRNA precursor of dystrophin gene due to partial gene deletion, **182**, 495
hemoglobin, and preliminary crystallographic data (reindeer), **187**, 1063; *erratum*, **189**, 1253
peptide/protein, analysis with chemical shift index method, **184**, 1008
phosphorylated synthetic τ peptide: reversible β -pleated sheet formation, **182**, 63
- secondary
Bacillus licheniformis endo- β 1,3-1,4-D-glucanase, algorithmic prediction and FTIR estimation, **184**, 612
DNA in cisplatin-DNA monoadducts: role of superhelical density on *in vitro* evolution into diadducts, **189**, 111
endothelin, role in binding and functional activity (rab-

Subject Index

- bit, rat), **183**, 572
- peptide T of HIV gp120, dominant reverse turn, effect of chemical glycosylation, **184**, 1125
- tertiary, sodium channel (squid), **186**, 1158
- three-dimensional, glycosylated butyrylcholinesterase, computer model (human serum), **189**, 1280
- thyrotropin receptor: single subunit (human), **187**, 887
- Moloney murine sarcoma virus
- enhancer-promoter element, mediated memory of butyrate-induced transcription state, demonstration, **189**, 141
- ts-110, transformed normal rat kidney cells, secreted metalloproteinase, substrate preference, **189**, 21
- Molybdenum hydroxylases
- subcellular localization in liver (guinea pig), **185**, 54
- Monensin
- induced Cl^- transport in erythrocyte suspensions, ^{19}F , ^{31}P , and ^{35}Cl NMR study (human), **184**, 915
- Monoclonal antibodies
- anti-HLA class I, anchored, effect on phytohemagglutinin-activated lymphocyte proliferation (human), **188**, 278
- calcein β subunit, detection of general and testis-specific isoforms (rat), **182**, 34
- to CD18 and L-selectin, inhibition of neutrophil-glomerular endothelial cell adhesion and transcellular leukotriene biosynthesis, **186**, 1307
- CDw 60, binding to acetylated forms of ganglioside G_{D3} , **187**, 1343
- to dopamine D2 receptor, production and characterization (rat), **184**, 661
- 422F11, anti-idiotypic, and anti- S_3 polyclonal antibody, cerebral nicotinic receptors isolated by, comparison (rat), **182**, 1303
- to fibronectin, P3D4 and P1F1, recognizing Hep II and CS-1 regions, differential effects on lymphocyte adhesion (human), **186**, 135
- GB-1, recognizing 80-kDa GABA-binding protein, preparation and characterization (bovine brain), **182**, 722
- human astrocytoma-specific, detected antigens, relationship to c-kit protooncogene product (mouse), **182**, 474
- in identification of retinoic acid receptor α (human, mouse, rat), **182**, 1032
- K^{b} -specific, in mapping of orientation of antigenic peptide bound in binding groove of H-2K $^{\text{b}}$, **186**, 1449
- light chain carbohydrate alteration, in generation of specificity-variant antibodies (human), **189**, 625
- MLS 128, recognizing Tn antigen, in analysis of cancer-associated glycoproteins in human tumor cells, **187**, 217
- to 6-pyruvoyl tetrahydropterin synthase, production and use in immunocytochemical localization of enzyme (human), **182**, 810
- R13 anti-mouse erythrocyte, in purification of murine heat-stable antigen, **187**, 773
- recognition of trypanastigote stage-specific epitope on gp 183 required for attachment to myoblasts (*Trypanosoma cruzi*), **182**, 6
- thyroid cancer-specific, production and properties (human), **187**, 404
- Val1, in identification of post-meiotic expression of testis-specific $\beta 1$ isoform of calcineurin regulatory subunit (rat), **187**, 828
- Monocyte chemotactic and activating factor
- expression in nasopharyngeal carcinoma cell lines, heterogeneity (human), **187**, 121
- Monocytes
- adhesion to aortic endothelial cells, effect of lipoprotein lipase-mediated lipolysis of very low density lipoproteins (human), **189**, 1653
- chemotaxis to endothelin-1 and effects of calcium channel blockers (human), **189**, 994
- derived macrophages, nitrate production, evaluation (human), **186**, 775
- differentiation, differential expression of 33- and 36-kDa forms of annexin 3 along, analysis (human), **189**, 1471
- lymphocyte- or cytokine-activated, chemoattraction to platelet-derived growth factor AA homodimers, demonstration (human), **186**, 1510
- related cells, HL60 cells induced to, expression of *src*-related protein-tyrosine kinase *lyn* (human), **185**, 91
- N^{G} -Monomethyl-L-arginine
- induction of nitric oxide synthesis in isolated arterial rings (rat), **188**, 590
- Monophenol monooxygenase
- endogenous inhibitors, identification and isolation (housefly), **184**, 86
- production of melanins from enkephalins (mushroom, sepia), **184**, 1190
- Monophosphoryl lipid A
- prophylactic use in sepsis and septic shock (mouse), **182**, 269
- Monosaccharides
- modified superoxide dismutase derivatives, therapeutic effects on hepatic injury induced by ischemia/reperfusion (rat), **189**, 191
- Morphogenesis
- microvascular endothelial tubular, induction by keratinocytes: role of transforming growth factor α (human), **189**, 601
- Motilin
- sequence responsible for biological activity (rabbit duodenal muscle), **183**, 36
- MPP, *see* N-Methyl-4-phenylpyridinium
- Mucin
- β -adrenergic-stimulated secretion, inhibition by antibody to CFTR-derived synthetic peptide incorporated into submandibular cells (rat), **188**, 1146
- CTM-A, tracheobronchial, carboxy terminus, molecular cloning (dog), **189**, 958
- gastric, glycosulfatase activity toward, detection in extracellular material (*Helicobacter pylori*), **183**, 506
- MUC1, expression, analysis with antibodies to cytoplasmic domain: conservation among mammals, **185**, 167
- secreted from murine epithelial cells transfected with full-length human MUC1 cDNA, lack of cytoplasmic tail, **185**, 1
- Mucoidy
- control in *Pseudomonas aeruginosa*, associated *algD* promoter, interactions with *Escherichia coli* integration host factor, **189**, 837
- Mucopolysaccharidosis
- type II, intermediate form, associated $\text{C}^{1,327}$ to T substitution

tion in iduronate sulfatase gene (human fibroblasts), **183**, 809

Mucosa

gastric

calcium channels, activation by platelet-derived growth factor (rat), **186**, 1496
fractions, differential distribution of nitric oxide synthase (rat), **184**, 680
prostaglandin contents, effect of age (human), **186**, 1443
specific control of cathepsin E gene expression, analysis (guinea pig), **187**, 1401
sulfomucin synthesis and secretion, effect of *Helicobacter pylori* lipopolysaccharide (rat), **184**, 1411

Muscarinic receptors

G protein-coupled, transforming, activation, induction of rapid tyrosine phosphorylation of cellular proteins (murine fibroblasts), **188**, 155
HM1, G protein coupling, associated third cytoplasmic loop domains, mutational analysis (human kidney cells), **188**, 1111
M₂, mediated catecholamine secretion in adrenal medulla, role of dopamine D₁ receptors (cat), **183**, 1019
M₅, functional expression in yeast (rat), **182**, 1180
mediated Ca²⁺ mobilization, noncompetitive antagonism by muscarinic antagonists (human), **189**, 919
stimulated phosphoinositide turnover in CNS, activation by series of arecoline bioisosteres, steric and electronic requirements (rat), **187**, 1389

Muscle

cardiac

ryanodine receptors, [³H]ryanodine binding to, selective alteration by volatile anesthetics (pig), **186**, 595
specific expression of ventricular Myomy cDNA (rat), **183**, 176

skeletal, *see* Skeletal muscle

smooth, *see* Smooth muscle

Muscle cells

BC3H-1, induction and peak gene expression of insulin-like growth factor II and myogenin during differentiation (mouse), **183**, 1084

in Duchenne muscular dystrophy, associated alterations in protein degradation and 2-D protein pattern (MDX mouse), **189**, 1484

L6

detection of GLUT3 facilitative glucose transporter: regulation by cellular differentiation, insulin, and insulin-like growth factor-I (rat), **186**, 1129
intracellular proteolysis, inhibition by tetracyclines, **188**, 767

smooth, *see* Smooth muscle cells

Muscular atrophy

spinal and bulbar, X-linked, number of CAG repeats in androgen receptor gene in affected families, detection by primer extension method, **182**, 507

Muscular dystrophy

Duchenne, muscle cells in, associated alterations in protein degradation and 2-D protein pattern (MDX mouse), **189**, 1484

Musk xylene

induction of cytochrome P-450IA2 (rat), **184**, 149

Mutagenesis

deletion, stem cell factor cDNA: C-terminal sequences essential for biological activity *in vitro* (mouse), **188**, 292
in identification of amino acid residues involved in iron binding and activity of 5-lipoxygenase (human), **182**, 1482; *erratum*, **184**, 1133

semi-random, interleukin-6 at C-terminal four amino acids, effect on biological activity, **187**, 18

site-directed

aldose reductase His⁴², His¹⁸⁸, and Lys²⁶³ residues (human), **183**, 327

in analysis of

domains for G-protein coupling in angiotensin II receptor type I (rat), **189**, 677

role of Glu-195 in subtilisin J weak Ca²⁺-binding site in subtilisin J heat stability (*Bacillus subtilis*), **188**, 184

role of tyrosine-7 in catalytic activity of class π glutathione S-transferase (human), **182**, 1122

apolipoprotein E mutant apo E5(Glu₃→Lys) produced by, low-density lipoprotein receptor binding activity, **187**, 1180

conserved residues of endoglucanase CelC (*Clostridium thermocellum*), **189**, 807

cysteine 102 and 139 in O⁶-alkylguanine-DNA-alkyltransferase (*Escherichia coli*), **187**, 425

2Fe-2S cluster ligands of bovine adrenodoxin expressed in *Escherichia coli*, **188**, 1131

histidine residues His 72 and His 73 in fatty acid ethyl ester synthase-III (human), **184**, 706

in identification of amino acid residue involved in hepatic uricase substrate-binding site (rat), **187**, 101

neutral endopeptidase: identification of His 704 as only catalytic His (rat), **184**, 883

putative heparin-binding and receptor-binding region of basic fibroblast growth factor: structure-function relationship (human), **185**, 1098

rat angiotensin II receptor, in identification of amino acid residues for ligand binding in transfected COS-7 cells, **187**, 1426

Mutants

casein kinase-2 β subunit, properties, **188**, 228

deletion, *Escherichia coli*, transformed with different *crt* genes, carotenogenic membrane-bound enzymes from, *in vitro* assays, **185**, 9

endothelin receptor, with truncated N-terminal extracellular or C-terminal intracellular domains, COS-7 cell expressed, abrogated ET-1 binding (human), **187**, 1241

γ -glutamyltranspeptidase, deficiency in processing to subunits (*Escherichia coli*), **189**, 173

glycosylation-defective BHK cell lines, selection, **186**, 102

immune escape, hepatitis B virus, detection of Gly¹⁴⁵ to Arg substitution in HBs antigen (human), **184**, 1152

insulin, binding to normal and mutated insulin receptors (human), **188**, 318

5-lipoxygenase, produced by site-specific mutagenesis of histidine residues, characterization (human), **186**, 1265
mutator, *Escherichia coli*, 8-hydroxyguanine DNA endonuclease deficiency and 8-hydroxyguanine accumulation, **188**, 372

ram p25, produced by Gly19→Val substitution, character-

Subject Index

- ization, **189**, 330
- stationary-phase death, identification (*Escherichia coli*), **188**, 1054
- sterol-overproducing, regulatory role of microsomal 3-hydroxy-3-methylglutaryl-CoA reductase (*Nicotiana tabacum*), **186**, 888
- temperature-sensitive
Escherichia coli RNPA, alteration of RNA I metabolism in, **186**, 1463
 leucyl-transfer RNA synthetase, *ilvGMEDA* operon repression control, maintenance at restrictive temperature (*Escherichia coli* K-12), **187**, 1106
 X-linked, BHK21 cells, complementation by ubiquitin-activating enzyme E1 cDNA, **184**, 1015
- Mutations
argJ, induction in *proB* strain of *Streptomyces lividans* by ethidium bromide, **189**, 1101
- deletion
 in central helix of calmodulin, effect on casein kinase II-catalysed phosphorylation of calmodulin, **188**, 754
 on chromosome 7, 1.2 centimorgan, activation of oxidative stress response in liver (neonatal mouse), **182**, 1160
- C-terminal
 12 amino acids of GLUT1 protein, effect on transport activity in CHO cells, **184**, 865
 69 residues of insulin receptor β -subunit, effect on phosphorylation and exogenous kinase activity (human), **188**, 86
 partial, dystrophin gene, induction of exon skipping and loss of intra-exon hairpin structure from mRNA precursor, **182**, 495
- dipeptidyl-peptidase IV at the active site sequence, effects on cell-surface expression in transfected rat, **185**, 776
- flrA* regulatory locus, phenotypic effects on amino acid biosynthesis and excretion in haploid and diploid strains (*Escherichia coli*), **183**, 343
- frameshift, in adenomatous polyposis coli gene, association with familial adenomatous polyposis: identification in Italian family, **184**, 1357
- α -L-fucosidase gene, generating stop codon, identification in fucosidosis patient, **189**, 1063
- G_{α} gene, detection in families with pseudohypoparathyroidism, **189**, 343
- heterozygous, lipoprotein lipase gene, role in lipid interface recognition defect in type I hyperlipidemia (human), **182**, 70
- HM1 muscarinic receptor, in analysis of third cytoplasmic loop domains of G protein coupling of receptor (human), **188**, 1111
- missense
 cardiac β myosin heavy chain gene, identification in Japanese patient with hypertrophic cardiomyopathy, **188**, 379
 p53 gene in human gastric carcinoma, **182**, 215
- mitochondrial DNA
 age-associated, and age-associated damage to heart, analysis (human), **189**, 979
 ND-6 gene, associated with Leber hereditary optic neuropathy, analysis (human), **187**, 1551
- mitochondrial tRNA^{Leu}, identification in patient with fatal cardiomyopathy, **186**, 47
- p53 gene, analysis in
 gastric carcinoma (human), **182**, 215
 primary lung cancer in Japanese patients, **183**, 1139
- phospholipase C- δ 1 gene, associated hypotensive effect in spontaneously hypertensive rat, **187**, 1359
- Pit-1 gene, identification in children with combined pituitary hormone deficiency, **189**, 851
- point
 associated β /A4 amyloid precursor protein overexpression, role in Alzheimer's disease (murine embryonal carcinoma cells), **182**, 165
 c-Ki-ras gene, detection in TE1 and TE2 esophageal carcinoma cells (human), **187**, 515
 glutamate receptor GluR1 subunit, glutamine-to-histidine, effects on inward rectification and calcium permeability (*Xenopus laevis* oocyte), **182**, 1089
 mitochondrial NADH dehydrogenase subunit 2 in Alzheimer's brain, detection in codon 331, **182**, 238
 mitochondrial ND2 gene
 association with Alzheimer's disease, analysis, **186**, 491
 detection by single nucleotide primer extension and mispairing PCR-RFLP, comparison (human), **189**, 1202
 P-450_{C18} gene in corticosterone methyl oxidase II-deficient patients: congenitally defective aldosterone biosynthesis, **182**, 974; *erratum*, **184**, 1529
 topoisomerase I gene in CPT-11-resistant lung cancer cells, detection (human), **188**, 571
- severe leukocyte adhesion deficiency-associated, identification in Japanese patients **184**, 1460
- site-specific, in conserved C-terminal residues of aminoglycoside 3'-phosphotransferase II, phenotypic and structural analysis, **185**, 925
- substitution
 aequorin, single amino acids, effect on calcium affinity, **187**, 1091
 Alzheimer's disease-associated tau 2 epitope, Ser $\rightarrow$ Pro, effect on secondary structure (bovine), **188**, 162
 HBs antigen, Gly¹⁴⁵ to Arg, detection in immune escape mutant of hepatitis B virus (human), **184**, 1152
 iduronate sulfatase gene, C¹³²⁷ to T, association with mucopolysaccharidosis II (human fibroblasts), **183**, 809
 interleukin-2, at multiple cysteines: analysis of functional structure (human), **188**, 949
 Δ^5 -ketosteroid isomerase, tyrosine $\rightarrow$ glycine at position 14, specific activation of mutant by phenols (*Pseudomonas testosteroni*), **184**, 1386
 lipoprotein lipase, G $\rightarrow$ C change at donor splice site of intron 1, role in lipoprotein lipase deficiency in southern-Italian family, **187**, 620
 TSH receptors, serine for cysteines 494 or 569, effects on receptor activity and response to thyroid-stimulating autoantibodies (rat), **189**, 1754
 Thr246 in lactate dehydrogenase, associated decrease of substrate inhibition (*Bacillus stearothermophilus*), **182**, 1309
- transthyretin
 detection in familial cardiac amyloidosis (human),

- 187, 460**
 familial amyloidotic polyneuropathy-associated
 detection in Japanese patient, **187, 397**
 identification and characterization (human), **182, 520**
 vacuolar membrane H⁺-ATPase catalytic subunit VMA1
 at junction sites, inhibition of VMA1 processing by
 protein splicing (yeast), **188, 40**
- Mycoplasma**
 related organisms, detection and identification in plants by
 PCR, **186, 1503**
- Myelin**
 cerebral preparations, identification of water-soluble pro-
 teases (bovine), **186, 89**
 peripheral, PMP-22 (Pas-II/SR13/GAS-3), encoding
 cDNA from fetal spinal cord, isolation and sequence
 determination (human), **186, 827**
- Myelin proteins**
 renaturation by octyl glucoside detergent (human brain),
189, 1534
- Myeloperoxidase**
 recombinant, expression with baculovirus expression sys-
 tem (human), **187, 1572**
- Myoblasts**
 nonfusing, BC3H1 derived from brain neoplasm
 expression of G_i proteins, regulation by glucose (mouse),
182, 1193
 inositol uptake, promotion by growth factors (mouse),
182, 1008
Trypanosoma cruzi attachment, trypomastigote stage-spe-
 cific gp 183 epitope required for, recognition by
 monoclonal antibody, **182, 6**
- Myocardium, see also Heart**
 altered protein kinase C activity in diabetic rat, **187, 703**
 neonatal cell culture, expression of α - and β -myosin
 heavy chain gene, stimulation by endothelin-1 (rat),
183, 1260
- Myofilaments**
 thick, crossbridge movement, suppression by thiourea in
 ATP-free medium (king crab), **186, 321**
- Myogenesis**
 early stage, action of glycoprotein processing inhibitors at,
 analysis (rat), **184, 125**
- Myogenic cells**
 in limb buds in early developmental stages, expression of
 MyoD1, regulation by retinoic acid (chicken), **187, 245**
- Myogenin**
 and insulin-like growth factor II, induction and peak gene
 expression during BC3H-1 muscle cell differentia-
 tion (mouse), **183, 1084**
- Myoinositol**
 phospholipids with, identification and characterization
 (bovine liver), **184, 1042**
- Myometrium**
 cyclic-nucleotide phosphodiesterase calcium-calmodulin-
 sensitive isoform in, selective activation by 1.15-kDa
 peptide (human), **184, 700**
 Na⁺,K⁺-ATPase activity and α and β subunit mRNA
 expression in, regulation during pregnancy (rat),
188, 1191
- Myosin**
 ATP-dependent interaction with actin in smooth muscle,
 regulatory effect of myosin light chain kinase (bo-
 vine), **184, 1204**
 heavy chain
 α and β gene expression in neonatal myocardial cells,
 stimulation by endothelin-1 (rat), **183, 1260**
 β gene
 missense mutation in Japanese patient with hyper-
 trophic cardiomyopathy, **188, 379**
 repression region with partial position dependency
 (human), **189, 504**
 gene activation by catecholamine (human heart), **188,**
547
 isoforms, expression in neointimas and media of post-
 stenotic dilatation of carotid artery (rabbit), **185, 459**
 in native thick filaments, assembly-dependent phosphory-
 lation, analysis (*Caenorhabditis elegans*), **186, 1528**
 phosphorylation, role in exocytosis of adrenal chromaffin
 cells (bovine), **185, 1016**
 subfragment 1
 binding to F-actin, analysis (rabbit), **188, 94**
 and caldesmon, interaction with C-terminus of actin
 (rabbit), **184, 239**
 interaction with F- and G-actin in equilibrium (rabbit
 muscle), **183, 970**
 sequence 632–642, corresponding synthetic peptide,
 inhibition of actomyosin activity, **189, 1143**
- Myosin ATPase**
 activity and superprecipitation, effects of peptide inhib-
 itors of smooth muscle myosin light chain kinase
 (bovine, chicken), **187, 1279**
 inhibition by synthetic peptide of sequence 632–642 on
 myosin fragment 1, **189, 1143**
- Myosin light chain kinase**
 functional effects of 65-kDa caldesmon-binding protein
 (chicken), **184, 1212**
 inhibitors, inhibition of IgE-mediated histamine release in
 leukocytes (human, rat), **183, 48**
 inhibitor wortmannin, inhibition of Ca²⁺-dependent cate-
 cholamine release from adrenal chromaffin cells
 (bovine), **185, 1016**
 smooth muscle
 peptide analogs of pseudosubstrate domain, effects on
 actomyosin ATPase activity and superprecipitation
 (bovine, chicken), **187, 1279**
 regulatory effect on ATP-dependent interaction of actin
 and myosin (bovine), **184, 1204**
 substrate-based inhibitors (bovine, chicken, swine),
185, 379
- Myotubes**
 nuclear envelope, localization of fast-twitch skeletal mus-
 cle Ca²⁺-ATPase isoform (chicken), **186, 219**

N

- NAD⁺ ADP-ribosyltransferase**
 accumulation kinetics in thymocytes undergoing con-
 canavalin A-induced proliferation and dexametha-
 sone-induced apoptosis (rat), **188, 1261**
 ADP-ribosylation of chicken red cell tubulin and inhibi-

Subject Index

- tion of microtubule self-assembly *in vitro* (turkey), **184**, 414
- nuclear, transcript levels and enzymatic activity in carcinogen-initiated primary hepatocytes, effects of exposure to tumor promoters (neonatal rat), **182**, 1066
- protein kinase C-catalyzed phosphorylation, inhibition of DNA binding (bovine thymus), **187**, 730
- NADH**
- oxidation by hepatic plasma membrane, stimulation by ceruloplasmin (pig), **186**, 951
- quinone-dependent dehydrogenation in mitochondria-related particles (*Setaria digitata*), **186**, 698
- NADH-cytochrome c reductase**
- rotenone-sensitive, in skeletal muscle of endurance athletes, effects of L-carnitine, **188**, 102
- NADH dehydrogenase**
- mitochondrial, subunit 2, from Alzheimer's brains, detection of point mutations in codon 331, **182**, 238
- NADH oxidase**
- plasma membrane, stimulation by ceruloplasmin (porcine liver), **186**, 951
- NADH-Q oxidoreductase**
- inhibition by rotenone, piericidin A, and MPP, relationship to superoxide generation and lipid peroxidation, **189**, 47
- NADPH**
- identification as stimulatory cofactor for nitric oxide-induced ADP-ribosylation reaction (human platelets), **182**, 1166
- and O₂, oxidation of N^ω-hydroxy-L-arginine to NO and citrulline, catalysis by cytochrome P450 (rat liver), **187**, 880
- oxidation by dihydropyrimidine dehydrogenase, stereochemistry (porcine liver), **182**, 609
- NADPH-cytochrome P450 reductase**
- coexpression with cytochrome P450 1A1 in *Saccharomyces cerevisiae*, associated increase in 7-ethoxycoumarin-*O*-deethylase activity (human), **185**, 641
- NADPH oxidase**
- activation
- modulation by Mg²⁺ at G protein level (human neutrophils), **186**, 391
- in neutrophils, 47-kDa cytosolic factor required for, purification and properties (bovine), **186**, 731
- inhibition, effect on endothelial leukocyte adhesion molecule-1 mRNA expression in umbilical vein endothelial cells (human), **184**, 1339
- neutrophil respiratory burst-associated, reconstitution with recombinant p47-*phox* and p67-*phox* and plasma membrane (human), **186**, 509
- phagocyte, cytochrome *b*₅₅₈ component, identification as flavoprotein (pig), **186**, 1368
- Nafenopin**
- effects on nuclear poly(ADP-ribose) polymerase transcript levels and enzymatic activity in carcinogen-initiated primary hepatocytes (neonatal rat), **182**, 1066
- Nandrolone**
- metabolism by Leydig cells, effect of 5 α -reductase inhibitor (pig), **183**, 1254
- Natriuresis**
- hypervolemia-induced, effects of HS-142-1 in anesthetized rat, **182**, 824
- Natriuretic peptides, *see specific types*
- Natriuretic peptide receptors
- CHO cells stably expressing, effects of non-peptide ANP antagonist HS-142-1, **189**, 336
- C-type, membrane-bound GC-A and GC-B, cloning and characterization (rat brain), **183**, 743
- guanylate cyclase-coupled, GC-A and -B, mRNA colocalization in tissues (rat), **189**, 610
- Natural killer cells**
- subpopulations, interaction with P-selectin (human), **186**, 173
- Neoglycoproteins**
- containing sialyl Le^x and sialyl Le^a, binding by L-selectin and E-selectin, comparison, **184**, 1048
- Neointima**
- formation after vascular injury, mediation by angiotensin II (rat), **187**, 1510
- Neoplasms**
- colonic, gastrin post-translational processing (human), **189**, 1165
- Nephrectomy**
- unilateral
- effect on expression of hepatocyte growth factor mRNA in lung (rat), **182**, 802
- subsequent compensatory renal hyperplasia and hypertrophy, effects of anti-epidermal growth factor antibody (mouse), **187**, 1015
- subsequent expression of receptor gene for hepatocyte growth factor (rat), **187**, 1454
- Nerve cells**
- amyloid β protein toxicity, protective effect of vitamin E (rat), **186**, 944
- Nerve fibers**
- structure, rapid changes induced by electric current pulses, analysis (garfish), **188**, 559
- Nerve growth factor**
- induced B-50/GAP-43 expression, inhibition by antisense oligomers, effects on neurite outgrowth (PC12 cells), **187**, 839
- regulation of interaction of single-stranded DNA-binding protein with sequences in bovine preprotachykinin promoter (PC12 cells), **187**, 1395
- response element, identification in neuropeptide Y gene and induction of binding proteins (rat), **189**, 1553
- suppression of neutrophil apoptosis (mouse), **186**, 1050
- synthesis and secretion by fibroblast cells in culture (human), **184**, 373
- Nerves**
- airway sensory, low pH-evoked activation, inhibition by capsazepine (guinea pig), **189**, 537
- noradrenergic, transmural stimulation, vascular response, effects of endothelial and non-endothelial NO (rat), **186**, 150
- peripheral
- neurofibromatosis 1 gene transcripts expressed in, GAP domain, detection of additional exon (human), **188**, 851
- sympathetic, norepinephrine overflow, inhibition by

Subject Index

- insulin (rat), **188**, 330
- Nervous system, *see also* Central nervous system
 sulfoglycolipid binding to adhesive protein amphoterin
 (rat), **182**, 689
- Neural cells
 nonoxidative ethanol metabolism: fatty acid ethyl ester
 synthase III expression *in vitro* (human, mouse, rat),
185, 938
- Neurites
 formation, effect of N1E-115 neuroblastoma cell growth
 inhibition by *c-myc* or *N-myc* antisense oligodeoxy-
 nucleotides (mouse), **185**, 915
- outgrowth
 in PC12 cells
 effects of inhibition of nerve growth factor-induced
 B-50/GAP-43 expression by antisense oligomers
 (rat), **187**, 839
 growth factor-induced, prevention by dipeptide
 inhibitors of ubiquitin-mediated protein turnover
 (rat), **189**, 280
 in PC12H cells, benzyloxycarbonyl-leucyl-leucyl-leuci-
 nal-induced, proteins responsible for, isolation and
 characterization (rat), **187**, 419
 from telencephalic neurons *in vitro*, promotion by actin
 (chicken embryo), **182**, 39
- Neuroblastoma cells
 glucose uptake, suppression by barbiturates, role of hex-
 okinase inhibition, **184**, 673
- Neurocalcin
 cDNA isolation and characterizatn (bovine brain), **185**, 147
 expression in retinal amacrine cells and ganglion cells
 (bovine), **186**, 1207
- Neurofibromatosis
 type I
 related gene transcripts expressed in peripheral nerve
 and neurofibromas, GAP domain, detection of addi-
 tional exon (human), **188**, 851
 two mRNA types expressed in gastric cancers, GTPase-
 activating protein activities (human), **187**, 332
- Neurofilaments
 network in dorsal root ganglion neurons, rapid and re-
 versible disruption, induction by okadaic acid (rat),
186, 524
- Neurokinin A receptors
 characterization and SR 48968 non-peptide antagonist
 selectivity in mammalian smooth muscle, **184**, 1418
- Neurokinin-3 receptors
 cDNA, deduced amino acid sequence and heterologous
 expression (human), **184**, 966
- Neuromuscular junction
 active zone, localization of *smg* p25A/rab3A p25 (rat),
186, 1345
- Neurons
 and astrocytes, cultured, stimulation of NO-dependent
 cGMP formation in, mediation by different receptors
 (rat), **182**, 1362
 central nervous system, rescue after hypoxic-ischemic
 injury to brain, role of insulin-like growth factor I
 (rat), **182**, 593
 cerebral cortical, cultured, aluminum-induced functional
 and morphological changes after long-term applica-
 tion (rat), **189**, 1317
- cytoplasmic Ca activation by amyloid β -protein fragment
 25-35 (rat), **184**, 1441
- dorsal root ganglion, rapid and reversible disruption of
 neurofilament network, induction by okadaic acid
 (rat), **186**, 524
- expression of murine and human GLUT3 glucose trans-
 porter proteins (rat), **182**, 703
- telencephalic, neurite outgrowth *in vitro*, promotion by
 actin (chicken embryo), **182**, 39
- Neuropathy
 Leber hereditary optic, *see* Leber hereditary optic neu-
 ropathy
- Neuropeptide F
 related nonapeptide tyrosine phenylalanine, isolation from
 brain (squid), **186**, 1616
- Neuropeptides
 Cam-HrTH-I, Trp-substituted, from adipokinetic hor-
 mone-red pigment-concentrating hormone family, iso-
 lation from corpus cardiacum (*Carausius morosus*),
189, 1303
 <Glu-Trp-Leu-Lys-Gly-Arg-Phe-NH₂ (pol-RFamide II),
 isolation (*Polyorchis penicillatus*), **183**, 375
 pheromone biosynthesis-activating, cDNA cloning and
 nucleotide sequence (silkworm), **189**, 221
 pheromonotropic, structurally related to leucopyrokinin,
 isolation and primary structure (armyworm larvae),
182, 534
 TE-6, primary structure (*Ascaris suum*), **187**, 1323
- Neuropeptide Y
 encoding gene, nerve growth factor-response element in,
 identification and induction of binding proteins (rat),
189, 1553
- Neuropeptide Y₁ receptors
 different signal transduction systems in SK-N-MC cells
 (human), **187**, 1565
- Neuropeptide Y₂ receptors
 binding activity, selective enhancement by cysteamine
 (bovine hippocampus), **184**, 380
- Neurotoxicity
 β /A4 amyloid precursor protein in murine P19 cells, asso-
 ciation with β /A4 overexpression, **182**, 165
- Neurotoxin E
 botulinum, from *Clostridium botulinum* and *C. butyricum*
 strains, amino acid sequence, **183**, 107
- Neurotransmitters
 release, inhibition by tetanus toxin, role of synaptobrevin
 proteolysis, **189**, 1017
- Neurotrophic factor
 rat brain-derived, biologically active, synthesis in and
 purification from *Escherichia coli*, **186**, 1553
 related activity, detection in embryonic cells (*Drosophila*
melanogaster), **184**, 73
- Neutral endopeptidase, *see* Membrane metallo-endopeptidase
- Neutrophil collagenase
 additive enhancement by cathepsin G and HOCl (human),
184, 560
- Neutrophils
 activation by lipopolysaccharide, inhibition by GMP-140,

Subject Index

- ^1H NMR study (human), **183**, 1062
- apoptosis, suppression by nerve growth factor (mouse), **186**, 1050
- arachidonic acid-derived chemoattractant, characterization, **186**, 269
- associated NADPH oxidase, activation, modulation by Mg^{2+} at G protein level (human), **186**, 391
- binding to E- and P-selectins, effect of *Pasteurella haemolytica* A1 glycoprotease (human), **188**, 760
- calcium-dependent expression of CR3 α chain epitope CD11b (human), **187**, 195
- chemoattraction to platelet-derived growth factor AA homodimers, demonstration (human), **186**, 1510
- copurification of 130-kDa NO synthase and 22-kDa link protein (human), **189**, 558
- cytosolic Ca^{2+} levels, Fc γ - and complement receptor-mediated elevation (human), **185**, 246
- differential expression of 33- and 36-kDa forms of annexin 3 (human), **189**, 1471
- electroloaded, in *in vivo* targeting of inflamed areas (rat), **186**, 860
- electropermeabilized, *N*-formyl-methionyl-leucyl-phenylalanine-induced superoxide production, suppression by spermine (human), **182**, 20
- electroporated, migration, effect of calcium and calcium-antagonists (rabbit), **182**, 864
- formyl-methionyl-leucyl-phenylalanine- and IgG-stimulated, superoxide production, role of tyrosine phosphorylation (human), **183**, 789
- N*-formyl peptide-challenged, staurosporine enhancement of PAF formation, mediation by intracellular PAF binding sites (human), **189**, 771
- interaction with bovine glomerular endothelial cells, transcellular leukotriene biosynthesis during, promotion by cell adhesion (human), **186**, 1307
- NADPH-oxidase activation, 47-kDa cytosolic factor required for, purification and properties (bovine), **186**, 731
- peritoneal, nitric oxide synthase induction, inhibition by interleukin-8 (rat), **186**, 680
- phorbol myristate acetate-stimulated, inactivation and oxidative modification of Cu,Zn-superoxide dismutase (human), **189**, 1129
- priming by lipopolysaccharide-serum complex via CD14 (human), **183**, 1280
- respiratory burst, associated NADPH oxidase, reconstitution with recombinant p47-*phox* and p67-*phox* and plasma membrane (human), **186**, 509
- stimulated, platelet-activating factor production, enhancement by triacsin C pretreatment (rat), **188**, 1280
- whole-cell cationic currents, modulation by Ca^{2+} -dependent and -independent mechanisms (human), **185**, 531
- Nickel
- Ni^{2+} , osteoclast Ca^{2+} receptor activation, analysis (rat), **187**, 913
- Ni(II) -desferal complex, cleavage of plasmid DNA, **182**, 588
- Nicotinamide-nucleotide adenyltransferase
- nuclear matrix-associated, detection in placenta (human), **189**, 1275
- Nifedipine
- effects on
- endothelin-1 monocyte chemotaxis (human), **189**, 994
- migration of electroporated neutrophils (rabbit), **182**, 864
- Nigericin
- induced Cl^- transport in erythrocyte suspensions, ^{19}F , ^{31}P , and ^{35}Cl NMR studies (human), **184**, 915
- Nitrendipine
- effect on migration of electroporated neutrophils (rabbit), **182**, 864
- Nitric oxide, *see also* Endothelium-derived relaxing factor
- activation of purified cytosolic guanylate cyclases, comparison (bovine lung, human placenta), **183**, 312
- and citrulline
- formation by cytochrome P450-catalyzed N^G -hydroxy-L-arginine oxidation by NADPH and O_2 (rat liver), **187**, 880
- nitric-oxide synthase-catalyzed formation in equimolar quantities from L-arginine (rat cerebellum), **185**, 960
- endothelium- and smooth muscle-derived, effects on responses to sympathetic nerve stimulation: implications for endotoxin shock (rat), **186**, 150
- formation
- from L-arginine
- by constitutive NO synthase in corpus cavernosum (rabbit), **186**, 308
- effect of gamma irradiation (mouse), **186**, 1423
- reversible inhibition of constitutive nitric oxide synthase (rat cerebellum), **189**, 242
- by cytochrome P450-catalyzed oxidation of aromatic amidoximes, **185**, 452
- in hepatocytes from chronically endotoxemic rats, direct stimulation by endotoxin and tumor necrosis factor α , **185**, 430
- induction by
- interferon- γ , antiproliferative effect on vascular smooth muscle cells (rat), **188**, 409
- N^G -monomethyl-L-arginine in isolated arterial rings (rat), **188**, 590
- lipopolysaccharide-treated rats, detection by ESR with CO-hemoglobin, **184**, 1119
- by macrophages, induction by interferon- γ , role of protein kinase C (mouse), **188**, 997
- from organic nitrates in vascular microsomes, comparison (bovine), **185**, 932
- pancreatic islets, and aconitase activity and glucose oxidation rates, effects of interleukin-1 β (mouse, rat), **182**, 333
- induced ADP-ribosylation reaction, identification of NADPH as stimulatory cofactor (human platelets), **182**, 1166
- mediation of tumor necrosis factor- α cytotoxicity in endothelial cells (bovine), **186**, 475
- modification of amino acid residues in hemoglobin (human), **183**, 598
- oxidation by oxygen, monitoring in biological systems with porphyrinic sensor, **188**, 734
- produced by macrophages in closed culture system, direct measurement in headspace gas (chicken), **184**, 36

Nitric oxide hemoglobin

formation in erythrocytes cocultured with alveolar macrophages from bleomycin-treated rats, **182**, 151
production, synergistic stimulation by recombinant interleukin-1 and tumor necrosis factor (rat), **189**, 392

Nitric-oxide reductase

turnover, dithiothreitol oxidation during, analysis: nitroxyl generation (*Paracoccus denitrificans*), **183**, 983

Nitric-oxide synthase

calcium-dependent, induction in chondrocytes, effects of glucocorticoids (rabbit), **188**, 209
catalysis of NO and citrulline formation in equimolar quantities from L-arginine (rat cerebellum), **185**, 960
constitutive

in corpus cavernosum, in biosynthesis of NO and citrulline from L-arginine (rabbit), **186**, 308
cytosolic isoform, reversible inhibition by NO formed from L-arginine (rat cerebellum), **189**, 242

differential distribution between cell fractions isolated from gastric mucosa (rat), **184**, 680

inducible, purified from liver of rats treated with *Propionibacterium acnes* and lipopolysaccharide, polyclonal antibody against, preparation, **187**, 1291

induction

by interferon- γ in macrophages, inhibition by interleukin-10 (mouse), **182**, 1155

macrophage-type enzyme in retinal pigmented epithelial cells by lipopolysaccharide and cytokines (bovine), **186**, 854

in peritoneal neutrophils, inhibition by interleukin-8 (rat), **186**, 680

role in expression of tumor necrosis factor-independent tumoricidal activity in activated macrophages (rat), **184**, 1364

macrophage, inhibition by 3-amino-1,2,4-triazole (mouse), **183**, 150

130-kDa, and 22-kDa link protein, co-purification (human neutrophils), **189**, 558

purification from brain and immunological characterization and tissue distribution (bovine), **183**, 238

Nitric-oxide synthase inhibitors

L-NAME and L-NMMA, modification of electron transfer through iron centers, analysis, **187**, 797

Nitrite reductase

reduction of nitrite at type 2 copper centers (*Achromobacter cycloclastes*), **187**, 1529

Nitrites

accumulation in endothelial cell cultures, inhibition by low-density lipoprotein (murine brain), **186**, 315

production in monocyte-derived macrophages, evaluation (human), **186**, 775

reduction by *Achromobacter cycloclastes* nitrite reductase, type 2 copper centers as site, **187**, 1529

N-Nitro-L-arginine

enhancement of photorelaxation in aorta, pulmonary artery, and corpus cavernosum (rabbit), **186**, 1522

Nitrogen oxides

formation by N^o-hydroxy-L-arginine oxidation by heme-proteins **184**, 1158

Nitroglycerin

and other organic nitrates, generation of NO in vascular microsomes, comparison (bovine), **185**, 932

Nitroprusside

effects on guanylate cyclases in retinal rod outer segments (bovine), **185**, 909

S-Nitrosocaptopril

role as angiotensin-converting enzyme inhibitor and nitroso group carrier, **189**, 206

N-Nitrosodimethylamine

initiated primary hepatocytes, nuclear poly(ADP-ribose) polymerase transcript levels and enzymatic activity in, effects of tumor promoters (neonatal rat), **182**, 1066

Nitroso groups

S-nitrosocaptopril as carrier and as angiotensin-converting enzyme inhibitor, **189**, 206

S-Nitrosothiols

interaction with endothelin-1, effect on Ca²⁺ mobilization in vascular smooth muscle cells (rat), **183**, 849

Nitrous oxide

concentration, effect on nitrous-oxide reductase reaction rate: allosteric effect (*Wolfinella succinogenes*), **187**, 135

Nitrous-oxide reductase

reaction rate, effect of N₂O concentration: allosteric effect (*Wolfinella succinogenes*), **187**, 135

Nitroxide radicals

metabolism *in vivo*, effects of inspired oxygen concentration (mouse), **182**, 1108

Nitroxyl

generation in oxidation of dithiothreitol during nitric oxide reductase turnover (*Paracoccus denitrificans*), **183**, 983

release by *N,O*-diacylated-*N*-hydroxyarylsulfonamides: HNO precursors with potent smooth muscle relaxant properties (rabbit), **187**, 1367

NK-1 receptors

pulmonary, cDNA, isolation and characterization (human), **180**, 1110; *erratum*, **182**, 1514

Nodules

legume, associated *Rhizobium* bacteroids, Δ -aminolevulinate uptake, limitation by peribacteroid membrane, **184**, 1324

Nonactin

induced Cl⁻ transport in erythrocyte suspensions, ¹⁹F, ³¹P, and ³⁵Cl NMR studies (human), **184**, 915

Nonanal

identification in bronchoalveolar lavage after low-level ozone exposure (rat), **188**, 129

Nonapeptides

tyrosine phenylalanine, neuropeptide F-related, isolation from brain (squid), **186**, 1616

Noradrenalone

activation of 3,4-dihydroxyphenylserine to, analysis: sequential stereoselective action of tandem target enzymes, **189**, 33

19-Norandrostenedione

metabolism by Leydig cells, effect of 5 α -reductase inhibitor (pig), **183**, 1254

Norepinephrine

³H-labeled, binding to hepatocytes, effect of D-galactosamine (rat), **184**, 654

Subject Index

- overflow from peripheral sympathetic nerve endings, inhibition by insulin (rat), **188**, 330
- 19-Nortestosterone, *see* Nandrolone
- Nuclear envelope
- myotube, localization of fast-twitch skeletal muscle Ca^{2+} -ATPase isoform SERCA1a (chicken), **186**, 219
- Nuclear factors
- anterior pituitary, binding both cAMP-responsive element and AP1 factor binding site, characterization (pig), **188**, 170
 - κB , activation in T cells, inhibition by α -lipoic acid (human), **189**, 1709
 - αCEF1 , interaction with motif 1 of αA -crystallin lens-specific enhancer: identification of contact sites (chicken), **184**, 24
 - cellular differentiation-dependent, binding to thymidylate synthase gene, identification (human), **185**, 127
 - interacting with
 - acute phase promoter element of α_1 -acid glycoprotein gene, identification (rabbit), **189**, 1464
 - α -globin gene domain silencer element at 3'-side, characterization (chicken), **188**, 416
 - ubiquitously expressed, binding to 5'-region conserved in carcinoembryonic antigen-related genes (mouse), **185**, 893
- Nuclear localization signal
- related function of synthetic peptides from steroid/thyroid hormone receptor superfamily, **182**, 289
- Nuclear magnetic resonance
- ^{13}C
- in analysis of glycogen metabolism in liver *in vivo* (baboon), **182**, 900
 - in measurement of glutathione synthesis and antioxidant metabolism in intact ocular lens (rabbit), **186**, 931
- ^{35}Cl , ^{19}F , and ^{31}P , in analysis of ionophore-induced Cl^- transport in erythrocyte suspensions, **184**, 915
- ^1H , in analysis of
- GMP-140 inhibition of neutrophil activation by lipopolysaccharide (human), **183**, 1062
 - isolated interleukin-6 receptor-binding peptide (human), **189**, 211
 - solution conformation of cyclo(GRGDSPA): effects of solution conformation on physiological activity, **182**, 966
- ^{31}P
- in analysis of
 - cyclo(L,5)-Ac-Pen-Arg-Gly-Asp-Cys-NH₂ in water, **187**, 1042
 - metabolic anomalies associated with glycogen phosphorylase deficiency in forearm muscle (human), **185**, 16
 - ATP/ α -crystallin complex: functional implications (bovine), **189**, 1578
 - ATP signal in tumor cell lines, increase after cisplatin treatment (human, rat), **183**, 114
- Nuclear matrix
- associated nicotinamide-nucleotide adenyllyltransferase, detection in placenta (human), **189**, 1275
 - low-affinity histamine binding after partial hepatectomy (rat), **184**, 840
- Nuclease
- degradation of oligodeoxynucleotides containing 1-(4'-thio- β -D-ribofuranosyl)-thymine, resistance, **184**, 797
 - S1, sensitive homopurine/homopyrimidine domain in platelet-derived growth factor A-chain promoter, binding of epidermal growth factor receptor 1, **188**, 433
- Nuclease-sensitive element
- c-myc* promoter, identification of tandem H-DNA structure, **185**, 264
- Nucleobindin
- gene cloning and sequencing (mouse), **187**, 375
- Nucleoproteins
- binding sites, avian species-specific tandem repeats with, identification and analysis, **182**, 447
 - from Capan-2 cells, formation of specific complexes with 17-1A antigen gene promoter, **186**, 1353
 - human antioxidant response element complex, identification of jun-B as member of complex, **188**, 992
 - interaction with single-stranded DNA of *rolC* gene 5'-upstream region in cultured carrot cells, **188**, 727
 - proteolysis, stimulation by phenylmethylsulfonyl fluoride (chicken liver), **189**, 179
 - scaffold, P123 and P130, affinity of highly repetitive bent DNA for, analysis (rat liver), **184**, 853
- Nucleoside diphosphate kinase
- interaction with tubulin and microtubules, analysis (*Dicotylellum discoideum*), **187**, 65
 - Nm23 gene-encoded, amino acid sequence identity with differentiation inhibiting factor for mouse M1 cells (human), **182**, 987
- Nucleoside triphosphates
- binding and hydrolysis by histone H1, **182**, 309
- Nucleotide sequence
- A1 adenosine receptor cDNA (human), **187**, 919
 - ABO blood groups genes from various primates, comparison, **189**, 154
 - acetyl CoA:deacetylcephalosporin C *O*-acetyltransferase cDNA (*Acremonium chrysogenum*), **182**, 995
 - α , acid glycoprotein gene (rabbit), **185**, 69
 - acidic fibroblast growth factor genomic clone (bovine), **184**, 945
 - acidic seminal fluid protein cDNA (bovine), **183**, 232
 - actin2 cDNA (bovine), **187**, 1022
 - activin receptor cDNA (rat), **183**, 672
 - activin type II receptor
 - human cDNA, **184**, 310
 - murine gene, **185**, 404
 - adenosine receptor A2b cDNA (human brain), **187**, 86
 - adenosine receptor RA2 cDNA (rat brain), **185**, 304
 - adenosylmethionine decarboxylase cDNA (mouse), **189**, 424
 - adhesion molecule β subunit gene 1.2 kb intron (human), **184**, 1460
 - ADH3 gene active site for catalytic properties (human), **184**, 1001
 - adrenergic receptor, $\alpha_2\text{-C2-}$, murine homolog of human gene, **186**, 1280
 - Ah receptor cDNA (mouse), **184**, 246
 - alcohol/hydroxysteroid sulfotransferase cDNA (human), **187**, 448
 - amelogenin cDNA (mouse), **188**, 1253

- amyloid precursor protein gene
 β /A4 region (rabbit), **188**, 905
 homologous to human β -APP (*Xenopus laevis*), **189**, 1561
- angiotensin II receptors
 AT₁ cDNA
 human, **183**, 8, 910, 989
 rat, **184**, 1067
 AT₁ genomic DNA (rat), **183**, 1025
 AT₁ isoform genes (mouse), **185**, 253
 AT_{1A} gene (human), **186**, 277
 AT_{1A} and AT_{1B} cDNA, comparison (rat pituitary), **183**, 1090
 AT_{1B} partial cDNA (rat kidney), **185**, 204
 antifreeze protein type II cDNA (fish liver), **185**, 335
aprJ gene (*Bacillus stearothermophilus*), **184**, 277
 avian species-specific DNA tandem repeats with nuclear protein binding sites, **182**, 447
- bradykinin B2 receptor
 cDNA (human lung fibroblasts), **184**, 260
 gene (human), **187**, 1306
- brain-derived neurotrophic factor 5'-flanking region (human), **182**, 325
- calbindin-D9K cDNA (human), **185**, 663
- calcineurin B isoform β 1 and β 2 cDNAs (mouse), **187**, 537
- calmodulin-dependent protein phosphatase testis-specific catalytic subunit gene (human), **188**, 265
- CAP-50 cDNA (rabbit), **186**, 1227
- carrot gene segment clones: proliferating cell nuclear antigen homologs, **184**, 576
- β -casein gene, **183**, 750
- casein kinase II α genomic loci and associated pseudogene (mouse), **186**, 723
- CDEI-binding fusion protein cDNA (mouse), **189**, 1336
- CD44E-encoding genomic fragment (human), **182**, 569
- cefG gene encoding acetyl-CoA:deacetylcephalosporin C O-acetyltransferase (*Acremonium chrysogenum*), **186**, 40
- CHIP28 water channel cDNA (rat kidney), **188**, 1267
- cholecystokinin receptor cDNA (human), **189**, 296
- cholesterol 7 α -hydroxylase cDNA (human), **185**, 588
- clone expressing *Plasmodium vivax* recombinant antigen with apolipoprotein B-100-like sequences, **184**, 668
- collagen type VII cDNA (human), **183**, 958
- complement C4B/steroid 21-hydroxylase gene and C4A/CYP21P intergenic sequences (human), **186**, 256
- COUP transcription factor cDNAs (bovine ovary), **189**, 496
- CP94 lens fiber cell beaded-filament structural protein cDNA (rat), **186**, 190
- Cu/Zn superoxide dismutase cDNA (rat), **186**, 936
- cyanide hydratase gene (*Gloeocercospora sorghi*), **187**, 1048
- cystathionine γ -lyase cDNA (human liver), **189**, 749
- cytochrome *b₅* cDNA (rabbit), **185**, 845
- cytoplasmic protein-tyrosine phosphatase cDNA (human), **189**, 1223
- dopamine β -hydroxylase gene (mouse), **189**, 590
- DRG* cDNA encoding developmentally regulated GTP-binding protein (murine brain), **189**, 363
- eclosion hormone cDNA (*Bombyx mori*), **182**, 514
- elafin gene: deduction of preproelafin structure (human), **185**, 240
- endothelial tyrosine kinase cDNA, homology with platelet-derived growth factor receptor cDNA (rat), **186**, 706
- estrogen receptor gene, upstream region (human), **183**, 996
- ethylene-forming enzyme gene (*Pseudomonas syringae* pv. *phaseolicola* PK2), **188**, 826
- extracellular signal-regulated kinase 1 and ERK2 cDNAs (human T cells), **182**, 1416
- familial amyloidotic polyneuropathy-associated trans-thyretin mutation (human), **182**, 520
- fau gene encoding ribosomal protein S30 fused to ubiquitin-like protein (human), **187**, 927
- ferredoxin synthetic gene, 2[4Fe-4S] (*Clostridium pasteurianum*), **185**, 341
- α -fetoprotein variant cDNA (rat), **185**, 648
- fibroblast growth factor receptor 1 gene promoter region (murine SC-3 mammary carcinoma cells), **183**, 688
- FKBP2 gene (human), **189**, 819
- FK-506- and rapamycin-binding protein cDNA (human), **185**, 298
- N-formyl peptide receptor cDNA (human granulocytes), **184**, 582
- α -1,3 fucosyltransferase cDNA (human), **187**, 152
- β -1,4-galactosyltransferase cDNA (embryonic chicken brain), **189**, 1215
- gastrin receptor cDNA cloned from ECL carcinoid tumor (mouse), **187**, 1151
- glnA* glutamate synthetase gene (*Calothrix* sp. PCC 7601), **189**, 1296
- glucocerebrosidase gene promoter regions (human, mouse), **184**, 1477
- glucocorticoid-suppressible hyperaldosteronism chimeric P450 gene (human), **189**, 885
- glucotransferase catalytic site DNA (*Streptococcus mutans*), **189**, 1184
- γ -glutamylcysteine synthetase full-length cDNA (human liver), **185**, 29
- glutathione synthetase II putative gene and flanking regions (*Anaplasma centrale*), **182**, 1040
- gonadotropin-releasing hormone receptor cDNA human pituitary, **189**, 289
 rat pituitary, **189**, 1645
- G protein β -subunit G β 4 cDNA (murine brain), **183**, 350
- granulin gene (human), **188**, 57
- GSAA4 clone at 5' end: identification of serum amyloid A locus SAA4 as pseudogene (human), **183**, 362
- GTP cyclohydrolase I cDNAs (human), **187**, 359
- guanylate cyclase-A cDNA, partial (rat retina), **182**, 851
- guanylin precursor cDNA (rat), **185**, 812
- H⁺-ATP synthase subunit d cDNA (rat mitochondria), **182**, 1130
- HC12 DNA: human homolog of yeast ribosomal protein YL41, **187**, 901
- hemoglobin major component cDNA (*Paramecium caudatum*), **182**, 195
- hemopexin gene 5' flanking region (rat), **185**, 420
- heparin-binding factor family member HB-GAM/PTN, exon-intron junctions of GB7-3 clone (murine fibroblasts), **183**, 701
- heparin-binding fibroblast growth factor receptor gene splice variants (rat), **183**, 423

Subject Index

- heparan sulfate proteoglycan cDNA (rat brain), **188**, 395
 hepatitis C virus isolates from Thailand (human), **183**, 334
 high-mobility-group-like protein Pf16 gene fragment (*Plasmodium falciparum*), **182**, 412
 hippocalcin cDNA (rat brain), **189**, 511
 5-hydroxytryptamine type 1B receptor gene (human), **185**, 517
 genomic clone (human), **184**, 752
 indoleamine 2,3-dioxygenase gene: exon 1 and 5'-flanking region (human), **189**, 530
 indolicidin cDNA (bovine), **187**, 467
 inhibin α gene, characterization (mouse), **186**, 293
 inositol hexakisphosphate receptor cDNA (rat brain), **187**, 158
 insulin-like growth factor binding protein complex acid-labile subunit cDNA (rat liver), **188**, 304
 type 1 gene 5' promoter region (rat liver), **185**, 993
 insulin receptor-related receptor cDNA (rat), **187**, 934
 insulin receptor substrate-1-like protein genomic DNA fragment (human), **183**, 280
 interleukin-10 cDNA (rat), **189**, 1
 intestinal mucin-like protein (human), **183**, 821
 islet amyloid polypeptide gene (human), **189**, 1569
 isoaspartyl protein carboxyl methyltransferase cDNAs (human), **185**, 277
 KC cDNA (rat lung), **184**, 922
 Kunitz-type protease inhibitor domain gene of protease nexin-2/amyloid β -protein precursor (human), **186**, 1138
 D-lactate dehydrogenase gene (*Lactobacillus bulgaricus*), **185**, 705
 lactoferrin gene exon/intron boundaries (mouse), **189**, 1725
 laminin receptor cDNA (human), **184**, 1165
 large mitochondrial rRNA cDNA (goldfish), **189**, 445
 leukocidin F-component gene from methicillin-resistant *Staphylococcus aureus*, **184**, 640
 leukocyte common antigen-related phosphatase cDNA (rat), **188**, 34
 lipoprotein lipase gene: heterozygous mutation contributing to lipid interface recognition defect, **182**, 70
 5-lipoxygenase gene promoter (guinea pig), **185**, 489
 lung-type prostaglandin F synthase cDNA (bovine liver), **183**, 1238
luxG, open reading frames, downstream correspondence with *Bacillus subtilis* riboflavin synthesis genes (*Photobacterium leiognathi*), **186**, 690
 lysosomal sialoglycoprotein hLGP85 cDNA from metastatic islet tumor cell line (human), **184**, 604
 matrix metalloproteinase PUMP gene (human), **186**, 143
mau gene cluster (*Paracoccus denitrificans*), **184**, 1181
 ME491/CD63 antigen gene 5'-flanking region (human), **185**, 436
 medRNA and rRNA genes, tandem arrangement and phylogenetic analysis (*Bodo caudatus*), **182**, 1053
N-methyl-D-aspartate receptor cDNA, truncated form (rat forebrain), **185**, 826
 mitochondrial NADH dehydrogenase subunit 2-related cDNA: point mutations in codon 331 in Alzheimer's brains, **182**, 238
 mitochondrial tRNA^{Leu} gene, interspecies comparison, **186**, 47
 neurocalcin cDNA (bovine brain), **185**, 147
 neurofibromatosis type 1 protein isoform cDNA (human), **187**, 984
 neuron-specific HPC-1 antigen cDNA (bovine brain), **187**, 1144
 NK-1 receptor cDNA (human lung), **180**, 1110; *erratum*, **182**, 1514
 NHPI protein containing HMG-Box cDNA (*Babesia bovis*), **184**, 31; *erratum*, **185**, 800
 non-receptor protein-tyrosine-phosphatase cDNA from P19 embryonal carcinoma cells (mouse), **184**, 1241
 nucleobindin gene (mouse), **187**, 375
 p56^{lck}, signal-transducing region (murine egg), **182**, 527
 pancreatic triglyceride lipase cDNA (rabbit), **188**, 964
 pectin lyase gene (*Pseudomonas marginalis*), **182**, 14
 pheromone biosynthesis activating neuropeptide cDNA (silkworm), **189**, 221
 pigment dispersing hormone precursor cDNA (crab), **189**, 1509
 plasminogen PRG B cDNA (human), **186**, 1108
 platelet-activating factor receptor gene, clone HV3 (human heart), **189**, 617
 platelet-derived growth factor A chain isoform cDNAs (rabbit aorta), **184**, 811
 PMP-22 (Pas-II/SR13/GAS-3) cDNA from fetal spinal cord (human), **186**, 827
 preproendothelin-3 cDNA (rat), **186**, 588
 progenitor toxin nontoxic-nonhemagglutinin component-encoding gene, type C (*Clostridium botulinum*), **183**, 1273
 prolactin receptor cDNA: deduction of double antenna structure (chicken), **188**, 490
prospero gene cDNA (*Drosophila melanogaster*), **182**, 1326
 prostaglandin endoperoxide synthase cDNA (human platelets), **182**, 433
 prostatic acid phosphatase exons and flanking regions (human), **184**, 1468
 protein-tyrosine phosphatase cDNA LC-PTP (human), **186**, 1607
 murine testis, **185**, 818
 pyruvate kinase L-gene exon-intron junctions and promoter region (human), **188**, 516
 6-pyruvoyltetrahydropterin synthase cDNA (human liver), **189**, 1437
 rapamycin-binding protein and 25-kDa FK506- cDNA (human hippocampus), **184**, 733
 recoverin cDNA (human retina), **187**, 234
 retinoic acid receptor β splice junctions (human), **188**, 695
 ribosomal protein L11 cDNA (rat), **185**, 356
 S25 cDNA (rat), **186**, 1688
 RNase superfamily-related gene cDNA (chicken bone marrow cells), **185**, 231
 saposin cDNA (mouse), **184**, 1266
 sarafotoxin S6C gene (*Atractaspis engaddensis*), **189**, 1527
 schwannoma-derived growth factor cDNA (mouse), **185**, 103
 skeletal muscle protein phosphatase inhibitor-2 cDNA (rabbit), **186**, 1168
 smooth muscle protein gene WS3-10 overexpressed in

Subject Index

senescent fibroblasts (human), **187**, 1

sodium channel cDNA (squid), **186**, 61

soluble intercellular adhesion molecule 1, cDNA (human), **185**, 1022

spermidine/spermine *N*¹-acetyltransferase gene (human), **187**, 1493

steroid 21-hydroxylase/complement C4B gene and C4A/CYP21P intergenic sequences (human), **186**, 256

thioltransferase gene (*Saccharomyces cerevisiae*), **187**, 949

thromboxane A₂ receptor cDNA (mouse), **184**, 1197

thymosin β_4 cDNA (*Xenopus laevis*), **184**, 93

thyroid hormone receptor $\beta 1$ gene promoter (human), **185**, 78

thyrotropin receptor cDNA

- 1.3-kb variant: mRNA lacking transmembrane domain (human), **187**, 1135
- transcript alternatively spliced form (human), **188**, 1214

thyrotropin-releasing hormone receptor cDNA (rat), **184**, 367

tracheobronchial mucin clone pCTM-A (dog), **189**, 958

transforming growth factor β type III receptor cDNA (human, pig), **189**, 356

transketolase cDNA, partial (human brain), **183**, 1159

tyrosinase-related protein gene upstream and downstream regions (human), **184**, 568

tyrosine hydroxylase gene: structural comparison with other species (mouse), **182**, 348

tyrosine kinase

- hyk* cDNA (mouse), **189**, 1747
- receptor-like molecule cDNA (murine neuroblastoma), **189**, 1077

trypsin inhibitor cDNA (*Acacia confusa*), **184**, 1524

urinary stone protein cDNA: identity with osteopontin (human), **184**, 859

vacuolar H⁺-ATPase 16-kDa proteolipid subunit genes (human liver), **183**, 856

vascular endothelial cell growth factor cDNA from AIDS-associated Kaposi's sarcoma cells (human), **183**, 1167

ventricular cDNA Myomy with muscle-restricted expression (rat), **183**, 176

visinin cDNA, comparison in normal and *rd* retina (chicken), **183**, 456

visinin-related Ca²⁺-binding protein cDNA (rat brain), **184**, 1219

von Willebrand factor cDNA, species comparison (human, pig), **182**, 561

X-linked phosphoglycerate kinase-1 cDNA (tamar wallaby), **187**, 26

Y chromosome DNA probe (human), **189**, 581

Nucleus

- endogenous and exogenous translocation of fibroblast growth factor-1, analysis in NIH 3T3 cells (mouse), **188**, 982
- extracts, transacting factor binding to L-type pyruvate kinase, *in vitro* analysis (rat brain, liver), **189**, 1119
- hepatic, protein kinase C isoenzymes in, selective changes during liver regeneration (rat), **182**, 1333
- histamine storage pool, role in liver regeneration (rat), **184**, 840
- isolated, DNA degradation, quantification by propidium

iodide staining (murine thymocytes), **183**, 532

partial localization of annexin 1 in endothelial cells (bovine, human), **186**, 432

protein kinase A RII β subunit mRNA, stabilization by inhibitors of RNA and protein synthesis (rat), **183**, 632

tumor cell, internalization of interleukin-1, IL-1 receptors, and IL-1/receptor complexes (human, mouse), **187**, 1166

O

Obesity

- in essential hypertensives, association with RFLP for low-density lipoprotein receptor gene, **189**, 965

Occlusion

- arterial, acute, subsequent collateral circulation development, enhancement by basic fibroblast growth factor (rat), **185**, 510

6,9,12-Octadecatrienoic acid, *see* γ -Linolenic acid

(Z)-9-Octadecenoic acid, *see* Oleic acid

rac-3-Octadecyloxy-2-methoxy-propyl-phosphonocholine synthesis and antineoplastic properties, **187**, 603

Octyl glucoside

- detergent, renaturation of cerebral myelin proteins (human), **189**, 1534

Okadaic acid

- and calyculin A, comparative effects on HL60, HL60/ADR, and K562 cells (human), **187**, 488
- effects on $\alpha 2,3$ sialyltransferase activity and sialoglycoprotein composition in cultured C6 glioma cells (rat), **186**, 1575
- induction of

 - membrane translocation of protein kinase C in tumor and nontumor cells (human, mouse, rat), **189**, 950
 - rapid and reversible disruption of neurofilament network in dorsal root ganglion neurons (rat), **186**, 524
 - transcription factors AP-1 and NF- κ B and tumor necrosis factor α in B cells (human), **187**, 51

inhibition of phosphatidylethanolamine biosynthesis in hepatocytes (rat), **182**, 1226

and related protein phosphatase 1 and 2A inhibitors, induction of differentiation in breast tumor cells (human), **189**, 1261

Oleate

- in reverse micelles of sodium di-2-ethylhexylsulfosuccinate, lysozyme ozonation in presence of, analysis, **187**, 473

Oleic acid

- biphasic effect on cholesterologenesis (rat liver), **183**, 21
- ω -hydroxylation by microsomal cytochrome P450 system (*Vicia sativa*), **184**, 183

Oligodeoxynucleotides

- c-myc* or *N-myc* antisense, inhibition of N1E-115 neuroblastoma cell growth, effects on differentiation and neurite formation (mouse), **185**, 915
- 1-(4'-thio- β -D-ribofuranosyl)-thymine-containing, synthesis, nuclease resistance, and base pairing properties, **184**, 797

Oligomers

- antisense, inhibition of nerve growth factor-induced B-

Subject Index

- 50/GAP-43 expression, effects on neurite outgrowth (PC12 cells), **187**, 839
- Oligomycin
sensitivity of adriamycin-resistant small cell pulmonary carcinoma cell line (human), **182**, 877
- Oligonucleotides
antisense, specific blockade of basic fibroblast growth factor gene expression in aortic endothelial cells (bovine), **188**, 1205
d(ApG) platinated nonanucleotide duplex, synthesis and characterization, **182**, 555
encapsulated in pH-sensitive liposomes, efficiency toward Friend retrovirus, **183**, 879
phosphorothioate, duplexes, inhibition of HIV-1 reverse transcriptase, **186**, 1249
triple helix formation, in transcriptional inhibition of T₇ bacteriophage early promoter region, **189**, 1674
- Oligosaccharides
O-glycosylated, linked to hepatocyte growth factor α chain, structure and linkage site identification (human), **189**, 1329
3'-sulfated-Le^a and -Le^x, high-affinity binding of L-selectin, adhesive specificity, role of sulfate, **188**, 244
- Omeprazole
as ligand for hepatic Ah receptor, evaluation (human), **188**, 820
- Oocytes, *see also* Eggs
detection of TAPA-1 mRNA (mouse), **186**, 1201
development into blastocyst, associated expression and function of glucose transporter GLUT1 (mouse), **188**, 8
expressed cardiac calcium channels, cAMP-dependent modulation (*Xenopus laevis*), **182**, 1059
expression of
human bradykinin B2 receptor gene (*Xenopus laevis*), **187**, 1306
human neurokinin-3 receptor cDNA (*Xenopus laevis*), **184**, 966
injected with poly(A)⁺ mRNA from rat calcitonin-secreting cell line, expression of Ca²⁺ receptors (*Xenopus laevis*), **184**, 1235
meiotic maturation, induction by thapsigargin (clam), **189**, 79
membranes, 1-methyladenine receptors, binding properties (starfish), **186**, 114
microsomal membranes, assembly of hybrid from *Torpedo californica* Na⁺.K⁺-ATPase α subunit and rabbit H⁺.K⁺-ATPase β subunit (*Xenopus laevis*), **182**, 659
protein kinase C, purification and characterization (*Xenopus laevis*), **182**, 105
receptor-mediated regulation of potassium channel Isk (*Xenopus laevis*), **184**, 1135
slowly activating K⁺ current I_{SK}, stimulation by hypotonic solution (*Xenopus laevis*), **184**, 804
transient-type rat K channels expressed in, modulation by stimulation of coexpressed metabotropic glutamate receptor (*Xenopus laevis*), **189**, 430
uptake of conjugated bile acid, induction by microinjection of ileal Poly A⁺ mRNA (*Xenopus laevis*), **186**, 1455
- Opioid peptides
from hemoglobin peptic hydrolysate, isolation and characterization (bovine), **189**, 101
LVV-hemorphin-7, hemoglobin-derived, isolation from cerebrospinal fluid of patients with cerebrovascular bleeding, **184**, 1060
- δ -Opioid receptors
targeting independent of receptor binding, promotion by aspartic acid in deltorphin I and dermenkephalin (rat brain), **187**, 1203
- Organotin
-flavone complexes, 5-coordinate, fluorescence properties: potential mitochondrial ATPase probes, **188**, 365
- Ornithine acetyltransferase
encoding gene *argI*, mutation, induction in *proB* strain of *Streptomyces lividans* by ethidium bromide, **189**, 1101
- Ornithine decarboxylase
developmental expression (murine brain), **184**, 1114
 α -difluoromethylornithine-induced inactivation, reversibility (rat hepatoma cells), **187**, 443
gene overexpression, enhancement of papilloma formation in response to murine skin tumor promotion (human), **187**, 493
- Orobol
effect on cytoplasmic free calcium in isolated hepatocytes (rat), **182**, 894
- Osmotic stress
and hyperglycemia, effects on aldose reductase gene expression in renal proximal tubule cells (human), **187**, 201
- Osteoarthritis
relationship between synovial estradiol levels and estradiol receptor concentrations in affected knee (human), **183**, 1287
- Osteoblasts
expression of cellular retinoic acid-binding protein type II in adult (human), **189**, 1397
local microenvironment provided by, role in bone resorption in osteosclerotic mouse, **184**, 67
- MC3T3-E1
effects of lysine-rich 18-kDa protein from bovine tibia, **186**, 1288
normal and *ras*-transformants, cell cycle-dependent phosphorylation of HSP28 by transforming growth factor β_1 and H₂O₂ (mouse), **187**, 1418
proliferation and function, modulation by vitamin K₂ (mouse), **187**, 814
transfected, type I collagen synthesis, inhibition by constitutive expression of *c-fos* gene (mouse), **182**, 1389
propagation of Ca²⁺ pulses between, analysis (rat), **186**, 1212
- related cells
cAMP formation stimulated by parathyroid hormone-related protein, inhibition by tumor necrosis factor α via protein kinase C (rat), **182**, 341
mineralization *in vitro*, enhancement by interleukin-4 (human), **189**, 1521
- osteosarcoma
collagen synthesis, regulation by parathyroid hormone and PTH-related peptide, role of cAMP-dependent protein kinase (rat), **184**, 525

- growth inhibition by platelet factor 4 (human), **187**, 287
- proliferation and differentiation, stimulation by estrogen and progesterone (human), **186**, 54
- Osteoblast-specific factor 1
- biologically active, expression in *Escherichia coli* and purification (human), **185**, 224; *erratum*, **187**, 561
- Osteocalcin
- gene expression in tibia *in vivo*, effect of active vitamin D₃ analogs and dexamethasone (rat), **189**, 1231
- Osteoclasts
- bone resorption
- and cytoplasmic spreading, role of Na⁺/H⁺ antiporter (rat), **188**, 1097
- stimulation by hydrogen peroxide (rat), **183**, 1153
- calcium receptor
- activation and inactivation by La³⁺ (rat), **187**, 907
- sensitivity to activation by Cd²⁺ and Ni²⁺ (rat), **187**, 913
- isolated, identification of osteopontin (rabbit), **186**, 911
- membrane depolarization and hyperpolarization, effects on extracellular Ca²⁺-induced elevation of cytosolic free Ca²⁺ levels (rat), **183**, 619
- progenitors, defective, role in lack of bone resorption in osteosclerotic mouse, **184**, 67
- signal transduction, role of ryanodine receptor (rat), **188**, 1332
- Osteopontin
- cDNA sequence, comparison with urinary stone protein (human), **184**, 859
- identification in isolated osteoclasts (rabbit), **186**, 911
- synthesis and secretion by clonal dental pulp cells RDP4-1 and RPC-C2A (rat), **189**, 892
- Osteoporosis
- femoral head affected by, collagen in, post-translational modification (human), **185**, 801
- Osteosclerosis
- associated lack of bone resorption, role of defective osteoclast progenitors (mouse), **184**, 67
- Ouabain
- digitalis-like immunoreactive substances structurally related to, identification and preliminary characterization (human), **188**, 1024
- Ovarian follicles
- periovarulatory, secreted leukocyte chemoattractant peptides, sequence analysis (sheep), **184**, 848
- Ovary
- as source of activin/EDF production, analysis (mouse), **188**, 921
- Ovine progressive pneumonia virus
- associated transmembrane glycoprotein, antibodies to, detection with *env* gene-derived recombinant antigen, **183**, 1040
- 22-Oxalacetic acid
- metabolism by vitamin D-inducible pathway in cultured parathyroid cells (bovine), **189**, 759
- suppression of 25-hydroxycholecalciferol-1 α -hydroxylase (rat kidney), **185**, 191
- Oxidase
- associated activity of hepatic and pulmonary microsomal cytochrome P450 isozymes after treatment with cytochrome P450 inducers (rat), **187**, 1262
- peroxidase, oscillating reaction, hydrogen-deuterium isotope effect, **186**, 612
- Oxidation
- adamantanone by *Pseudomonas putida* carrying camphor catabolic plasmid, **186**, 1429
- cytochrome P450-catalyzed, aromatic amidoximes, formation of NO by, **185**, 452
- glucose, rate in pancreatic islets, effects of interleukin-1 β (mouse, rat), **182**, 333
- hepatic microsomal, C₈ to C₁₁ aliphatic aldehydes to carboxylic acids (mouse), **188**, 114
- N^ω-hydroxy-L-arginine by hemoproteins, in formation of nitrogen oxides and citrulline, **184**, 1158
- induced persistent activation of protein kinase C in hippocampal homogenates, analysis (rat), **187**, 1439
- iron by casein, description and physiological significance, **182**, 1047
- NADH by
- dihydropyrimidine dehydrogenase, stereochemistry (porcine liver), **182**, 609
- hepatic plasma membrane, stimulation by ceruloplasmin (pig), **186**, 951
- nitric oxide by oxygen, monitoring in biological systems with porphyrinic sensor, **188**, 734
- by periodic acid, associated mitogenic activation of lymphocytes, role of Ca²⁺ (human, rat), **183**, 144
- protein, in skeletal muscle of resting and exercised rats, inhibition by vitamin E, **189**, 801
- related modification and inactivation of Cu,Zn-superoxide dismutase by stimulated neutrophils (human), **189**, 1129
- secondary alcohols by alcohol dehydrogenase, role of amino acids at positions 93 and 94 (human), **183**, 93
- trichloroethylene by toluene dioxygenase, **185**, 443
- β -Oxidation,
- long-chain fatty acids by fibroblasts: evidence for long-chain acyl-CoA dehydrogenase (human), **182**, 1002
- mitochondrial, disorder of, identification as trifunctional protein deficiency (human), **188**, 1139
- Oxidative stress
- plasma lipid hydroperoxide levels as markers, and antioxidant levels, comparison in hyperlipidemic Nagase albuminemic and control rats and in humans, **189**, 518
- protective effect of genes involved in cell survival during dormancy (*Escherichia coli*), **188**, 1054
- related response, activation in liver by 1.2-centimorgan deletion in chromosome 7 (neonatal mouse), **182**, 1160
- 2,3-Oxidosqualene
- epoxidation to 2,3;22,23-squalene dioxide by squalene epoxidase (porcine liver), **185**, 323
- 2,3(S)-Oxidosqualene
- and 2,3(S):22(S),23-dioxidosqualene, specificity of lanosterol synthase for, comparison, **188**, 898
- Oxidosqualene cyclase, *see* Lanosterol synthase
- 2,3-Oxidosqualene-lanosterol cyclase, *see* Lanosterol synthase
- 2-Oxoglutarate
- , arginine-dependent simultaneous formation of ethylene and succinate from, simultaneous catalysis by *Pseudomonas syringae*-associated enzyme, **188**, 483

Subject Index

Oxygen

- induced age-associated damage in mitochondrial DNA, analysis (human heart), **189**, 979
- inspired, concentration, effects on redox reaction of nitroxide radicals *in vivo* (mouse), **182**, 1108
- oxidation of nitric oxide, monitoring in biological systems with porphyrinic sensor, **188**, 734
- reactive, reduction by adult T cell leukemia-derived factor/human thioredoxin, analysis, **186**, 1220
- singlet, formation, quantum yield data, in physico-chemical modeling of role of free radicals in photodynamic therapy, **189**, 1548

Oxygen reaction

- acceleration in cytochrome-*c* oxidase deficient in Cu_A, flow-flash measurement (*Nitrosomonas europaea*), **182**, 1264

Oxyphosphorane

- intermediate, role in RNA hydrolysis, **187**, 1523

Oxysterols

- regulatory potencies for 3-hydroxy-3-methylglutaryl CoA reductase degradation and 3-hydroxy-3-methylglutaryl CoA synthase repression, and receptor affinities, correlation, **186**, 182

Oxytocin

- gene expression regulation in luteinizing granulosa cells, role of COUP transcription factor (bovine), **189**, 496

Ozonation

- lysozyme in presence of oleate in sodium di-2-ethylhexyl-sulfosuccinate reverse micelles, **187**, 473

Ozone

- exposure, cholesterol ozonation products as biomarkers (rat), **188**, 618
- identification of heptanal and nonanal in bronchoalveolar lavage after low-level exposure (rat), **188**, 129

P

PAF, PAF-acether, *see* Platelet-activating factor

Palmitic acid

- transfer from acyl-L-carnitine pool to membrane phospholipids in intact erythrocytes, analysis (human), **187**, 353

Pancreas

- acinar cells, triacylglycerol lipase in, stimulation by carbachol (rat), **184**, 626
- acini, intact and permeabilized, amylase secretion, inhibition by mepacrine (rat), **184**, 408
- exocrine, GP2 secretory behavior (rat), **184**, 888
- islets, NO production, aconitase activity, and glucose oxidation rates, effects of interleukin-1 β (mouse, rat), **182**, 333

Pancreastatin

- and somatostatin, secretion by QGP-1N cells, role of interaction of cAMP pathway and phosphoinositide turnover system (human), **185**, 1041

Pancreatic colipase

- pancreatic lipase interaction, immunochemical analysis with immobilized synthetic peptides (pig), **189**, 1374

Pancreatic lipase, *see* Triacylglycerol lipase

Papain

- catalyzed hydrolysis, steady-state kinetic constants for,

- effects of P2' substituents, **187**, 615

Paracoccus denitrificans

- mau* gene cluster, genetic organization **184**, 1181

Paralytic shellfish poison, *see* Saxitoxin

Paramyosin

- in native thick filaments, assembly-dependent phosphorylation, analysis (*Caenorhabditis elegans*), **186**, 1528

Parathyroid cells

- calcium receptor, dissociation from Ga³⁺ inhibition of parathyroid hormone release, **186**, 556
- cultured, 22-oxacalcitriol metabolism by vitamin D-inducible pathway (bovine), **189**, 759

Parathyroid gland

- associated vasopressor factor, partial purification (human), **188**, 323
- endothelin receptors, localization and modulation of parathyroid hormone secretion (human), **184**, 1448

Parathyroid hormone

- and cAMP-agonists, regulation of 1,25-dihydroxyvitamin D₃ receptor in UMR 106 cells (rat), **185**, 881
- effect on epidermal growth factor receptor expression in chondrocytes (rabbit), **183**, 14
- and PTH-related peptide, regulation of collagen synthesis in UMR-106 cells, role of cAMP-dependent protein kinase (rat), **184**, 525
- related peptide, induction of transcalcachia (chicken), **186**, 69

related protein

- encoding gene, preferential utilization of GC-rich promoter and PTHrP 1-139 coding pathway in amnion (human), **189**, 938
- stimulation of cAMP formation in osteoblast-like cells, inhibition by tumor necrosis factor α via protein kinase C (human, rat), **182**, 341

secretion by parathyroid cells

- inhibition by Ga³⁺ without interaction with Ca²⁺ receptor of parathyroid cell (bovine), **186**, 556
- modulation by endothelin receptors (human), **184**, 1448
- stimulation of bone resorption, relationship to cAMP-dependent protein kinase activation (mouse), **182**, 1356

Parietal cells

- acid-secreting, individual, cytosolic free Ca²⁺, effects of gastrin (rat), **183**, 1097

Particles

- mitochondria-related, quinone-dependent NADH dehydrogenation (*Setaria digitata*), **186**, 698

PCR, *see* Polymerase chain reaction

PDGF *see* Platelet-derived growth factor

Pectin lyase

- gene cloning and nucleotide sequence (*Pseudomonas marginalis*), **182**, 14

Pentaerythritol trinitrate, *see* Pentrinitrol

Pentobarbital

- suppression of glucose utilization in neuroblastoma cells, role of hexokinase inhibition, **184**, 673

Pentoxylresorufin *O*-deptylase

- pyridine pretranslational induction (rat), **185**, 676

Pentrinitrol

- and other organic nitrates, generation of NO in vascular microsomes, comparison (bovine), **185**, 932

Peptide amides

- boc-Gln-Arg-Arg-methylcoumarin amide, Kex2-like cleaving activity, detection in adrenal medullary chromaffin granules (bovine), **185**, 398
- calcitonin fragments derived from N-terminal truncation, calcitonin antagonist activity, **187**, 8
- glucagon-like, GLP-1(7-36), effect on glucagon secretion and cAMP levels in glucagon-secreting In-R1-G9 cells, **186**, 503

Peptide histidine isoleucine

- inducing cAMP increase in rat platelets, organ distribution and characterization (pig), **187**, 1587

Peptide mapping

- binding sites of photoaffinity-labeled juvenile hormone-binding protein (*Manduca sexta* larvae), **182**, 466

Peptide mimetics

- γ -turn, of bradykinin, design, synthesis, and conformational analysis, **187**, 999

Peptides, *see also specific types*

- 1.15-kDa, selective activation of calcium-calmodulin-sensitive cyclic-nucleotide phosphodiesterase from human myometrium, **184**, 700
- acridine-linked, with SPKK motif, selective binding of AT sequences in DNA, **184**, 930
- acting on rat platelets, isolation from human pheochromocytoma and characterization, **185**, 134
- amyloid β -, synthetic, covalent modification in formic acid solutions, **184**, 686
- analogs of pseudosubstrate domain of smooth muscle myosin light chain kinase, effects on actomyosin ATPase activity and superprecipitation (bovine, chicken), **187**, 1279
- antigenic, bound in antigen binding groove of H-2K^b, orientation, mapping with monoclonal antibody, **186**, 1449
- antimicrobial, brevinin-1 and -2, isolation from skin and characterization (frog), **189**, 184
- Arg-Gly-Asp, extracellular proteins binding, modulation of cell adhesion (mouse), **183**, 544
- calcitonin carboxy terminal, CCP II, expression in normal thyroid tissue (human), **185**, 330
- calcitonin gene-related, *see* Calcitonin gene-related peptide
- carboxy-terminal, from p47^{phox}, phosphorylation by protein kinase C and neutrophil protein kinase (human), **187**, 940
- chemical shift index analysis: α -CH values revealing dynamic helices and α_L sites, **184**, 1008
- cyclo(1,5)-Ac-Pen-Arg-Gly-Asp-Cys-NH₂, in water, conformational study by NMR and molecular dynamics, **187**, 1042
- cyclo(GRGDSPA), solution conformation, ¹H NMR study: conformational effects on physiological activity, **182**, 966
- elafin-related, synthesis and structure-activity relationships (human skin), **185**, 967
- endothelin-1 analog IRL 1620, synthesis and identification as ET_B receptor agonist, **184**, 953
- endothelin-related, detection, interference by free hemoglobin (human, pig, rat), **189**, 777
- gastrin-releasing, *see* Gastrin-releasing peptide
- gelsolin Asp¹⁸⁷, substitution with Asn residue, resultant formation of amyloid fibrils *in vitro*, **183**, 227
- growth-blocking, repressing juvenile hormone esterase, isolation from plasma (*Pseudaletia separata*), **185**, 1141
- inducing cAMP increase in rat platelets, organ distribution and characterization (pig), **187**, 1587
- leukocyte chemoattractant, secreted by periovulatory follicles, sequence analysis (sheep), **184**, 848
- natriuretic, *see specific types*
- neuro-, *see* Neuropeptides
- N-terminal, HIV gp41 and SIV gp32, apolipoprotein A-1 interaction with, implications for viral entry, **186**, 95
- opioid, *see* Opioid peptides
- poly-, *see also specific polypeptides*
- parathyroid hormone-related
 - induction of transcaltachia (chicken), **186**, 69
 - and parathyroid hormone, regulation of collagen synthesis in UMR-106 cells, role of cAMP-dependent protein kinase (rat), **184**, 525
- platelet thrombin receptor agonist, minimal sequence requirement (human), **184**, 790
- Pro-17-Gly, derived from highly conserved domain (I) region of p53 gene, binding of hsp70, **184**, 167
- receptor-binding, from interleukin-6, isolation and proton NMR study (human), **189**, 211
- RGD sites, integrin $\alpha_3\beta_3$ binding to denatured collagen type I via, analysis: affinity of integrins for damaged extracellular matrix (human), **182**, 1025
- RNA polymerase sigma subunit region 2.2, proteins cross-reacting with antibodies to, identification (*Escherichia coli*), **184**, 634
- short
 - analogs of myosin light chain kinase phosphorylation site, effects on contractile protein systems (bovine, chicken, swine), **185**, 379
 - derived from terminal segments of HIV-1 protease, inhibition of viral protease, **184**, 980
 - signal, for peroxisomal targeting: conversion of N-terminal presequence of peroxisomal 3-ketoacyl-CoA thiolase to mitochondrial signal peptide (rat), **186**, 811
- synthetic
 - antibodies, in discrimination of catalytic subunits of protein phosphatases 1 and 2A (bovine, rabbit), **185**, 657
 - C3d-derived, induction of specific tyrosine phosphorylation and proliferation of resting B cells and transformed CR2-positive lymphocytes (human), **188**, 833
 - CFTR-derived, antibody to, submandibular cell-incorporated, inhibition of β -adrenergic-stimulated mucin secretion (rat), **188**, 1146
 - corresponding to interleukin-1 receptor residues 86-93, binding of recombinant IL-1 α and β subtypes and IL-1 inhibition (human), **188**, 912
 - corresponding to sequence 632-642 on myosin subfragment 1, inhibition of actomyosin activity, **189**, 1143
 - in identification of human 55-kDa tumor necrosis factor receptor binding site, **188**, 503
 - immobilized, in immunochemical analysis of pancreatic colipase-lipase interaction, **189**, 1374
 - nuclear localization signal, from steroid-thyroid hormone receptor superfamily, comparison, **182**, 289

Subject Index

- representing TSH-binding regions in human thyrotropin receptors, antibodies to, biological effects, **182**, 1369
 [Tyr^{5,12}, Lys⁷]-polyphemusin II analog T22, anti-HIV-1 activity (MT-4 cells), **189**, 845
- tau, synthetic phosphorylated, reversible β -pleated sheet formation, **182**, 63
- tau 2, Alzheimer-associated, Ser $\rightarrow$ Pro mutation on secondary structure and phosphorylation effect on antibody recognition (bovine), **188**, 162
- thrombin receptor-activating, structure-activity studies (human), **188**, 604
- thyrotropin receptor-related, associated immunoreactivity, in peripheral blood of Graves disease, characterization (human), **186**, 1074
- thyrotropin-releasing hormone-potentiating, isolation and amino acid sequence (bovine hypothalamus), **189**, 1110
- vasoactive intestinal, *see* Vasoactive intestinal peptide
- YY, amino terminal processing, in generation of hormone receptor specificity, **186**, 1299
- Peptide T**
- HIV gp120, chemical glycosylation at natural and artificial sites, stabilization or rearrangement of dominant reverse turn structure, **184**, 1125
- Peptidylamidoglycolate lyase**
- detection in cultured endothelial cells (bovine aorta), **184**, 323
- Peptidyl-dipeptidase A**
- functional role of tyrosine-200 (human testis), **184**, 306
- gene polymorphism, association with essential hypertension (human), **184**, 9
- germinal promoter in somatic and germinal cells, functional study (human, rabbit), **189**, 134
- S-nitrosocaptopril as inhibitor and as nitroso group carrier, **189**, 206
- tissue activity, inhibitor sensitivity, and effects of chloride in spontaneously hypertensive hamster, **183**, 1117
- Peptidylglycine α -monooxygenase**
- detection in cultured endothelial cells (bovine aorta), **184**, 323
- Peptidyl thiobenzyl esters**
- in mapping of neutrophil proteinase 3 substrate binding site (human), **188**, 1318
- Periodic acid**
- mitogenic activation of lymphocytes, role of calcium (human, rat), **183**, 144
- Peritoneal cavity**
- lipopolysaccharide-treated rats, nitric oxide production in, detection by ESR with CO-hemoglobin (rat), **184**, 1119
- Permeability**
- calcium, effects of glutamine-to-histidine point mutation in glutamate receptor GluR1 subunit (*Xenopus laevis* oocyte), **182**, 1089
- reconstituted liposomes, effect of lens MIP26 protein glycation (bovine), **186**, 632
- water, endothelial cells, effect of atrial natriuretic factor (bovine), **185**, 386
- Peroxidase**
- oxidase, oscillating reaction, hydrogen-deuterium isotope effect, **186**, 612
- Peroxisomes**
- lipids, *see* Lipid peroxidation
- proliferator clofibrate, repression of transthyretin gene expression in liver (rat), **188**, 799
- targeting, signal peptide for, analysis: conversion of N-terminal presequence of peroxisomal 3-ketoacyl-CoA thiolase to mitochondrial signal peptide (rat), **186**, 811
- Pertussis toxin**
- effects on activin A- and angiotensin II-induced inositol phosphate production in hepatocytes (rat), **186**, 205
- sensitive endothelium-dependent relaxation in porcine coronary artery, induction by guanosine 5'-O-(3-thiotriphosphate), **189**, 324
- sensitive G protein
- coupling with 1-methyladenine receptor in oocyte membrane (starfish), **186**, 114
- role in regulation of ATP-induced Ca²⁺ influx in PC12 cell clone (rat), **188**, 1184
- P-glycoprotein**
- cell line expressing, surface membrane vinblastine binding activity, characterization (human), **188**, 440
- expressed in multidrug-resistant HOB1 in lymphoma cells, role in Adriamycin resistance development (human), **189**, 92
- functionally active homodimer, detection in multidrug-resistant tumor cells (human), **185**, 284
- function in multidrug-resistant tumor cells, effect of liposomes (human), **187**, 1098
- interaction with hydrophobic component of urine (rat), **186**, 796
- MDR1 gene-encoded, mediation of digoxin transport (CHO cells), **189**, 551
- pH**
- acid, effect on OmpF and OmpC channel size *in vivo* (*Escherichia coli*), **189**, 1498
- effects on
- conformation of insulin T- and R-states in solution: CD studies in pH range 6-10, **186**, 1115
- quercetin-induced suppression of heat shock gene expression and thermotolerance development in HT-29 cells (human), **186**, 1121
- solubility of native δ -endotoxin crystals (*Bacillus thuringiensis* var. *san diego*), **184**, 692
- intracellular
- effect of extracellular ATP in cell cultures (human, mouse), **182**, 836
- exercise-induced changes in finger flexor muscles of patients with glycogen phosphorylase deficiency, ³¹P NMR study (human), **185**, 16
- low, evoked activation of airway sensory nerves, inhibition by capsazepine (guinea pig), **189**, 537
- role in endonuclease activation during apoptosis in HL-60 cells (human), **186**, 782
- Phase behavior**
- mixed lipid dispersions, determination by sphingolipid headgroup, **188**, 1247
- phospholipid liposomes, effect of glycolipids, **186**, 1294
- Phenamil**
- effect on sodium uptake in renal brush border membrane vesicles from hypertensive rats, **183**, 55

o-Phenanthroline

- copper complex, role as footprinting reagent for single-stranded regions of *Escherichia coli* lac-derived RNA and HIV RNA, **187**, 1503

Phenobarbital

effects on

- nuclear poly(ADP-ribose) polymerase transcript levels and enzymatic activity in carcinogen-initiated primary hepatocytes (neonatal rat), **182**, 1066
- oxidase activity of hepatic and pulmonary microsomal cytochrome P450 isozymes (rat), **187**, 1262

Phenoloxidase, *see* Monophenol monooxygenase

Phenols

- specific activation of tyrosine→glycine mutant of Δ^5 -ketosteroid isomerase (*Pseudomonas testosteroni*), **184**, 1386

Phenol sulfotransferase, *see* Aryl sulfotransferasePhenylalanine hydroxylase, *see* Phenylalanine-4-monooxygenase

Phenylalanine-4-monooxygenase

- purified, inactivation by dithiothreitol *in vitro* (rat liver), **182**, 92

Phenylethanolamine-N-methyltransferase

- expression by keratinocytes (human), **189**, 72

Phenylmethylsulfonyl fluoride

- stimulation of nuclear protein proteolysis (chicken liver), **189**, 179

Phenylpropanoids

- associated defense responses, elicitation, increase in parsley suspension cells after methyl jasmonate conditioning, **189**, 304

Pheromones

- biosynthesis, activating peptide, cDNA cloning and nucleotide sequence (silkworm), **189**, 221

Phomopsis A

- and other antimetabolic agents, binding selectivity fungal tubulins (*Phomopsis leptostromiformis*), **187**, 722

Phorbol 12,13-dibutyrate

- induction of p34^{cdc2} histone H1 kinase stimulation in Swiss 3T3 fibroblasts (mouse), **188**, 1084
- and insulin, effects on insulin-like growth factor binding protein-1 production and mRNA in H4IIE hepatoma cells, comparison (rat), **182**, 262
- modulation of Ba²⁺ current oscillations in *ras*-transformed fibroblasts (mouse), **182**, 1240

4- α -Phorbol-12,13-didecanoate

- modulation of Ba²⁺ current oscillations in *ras*-transformed fibroblasts (mouse), **182**, 1240

Phorbol 12-myristate 13-acetate

- induction of cytoskeletal reorganization in fibroblasts during aging *in vitro* (human), **182**, 1423
- and ionomycin, suboptimal and optimal activation signals for lymphocytic and promonocytic cells, effects on cytokine and HIV-1 gene expression (human), **182**, 1172
- modulation of Ba²⁺ current oscillations in *ras*-transformed fibroblasts (mouse), **182**, 1240

5-Phosphatase

- cerebral cortical, effect of focal cerebral ischemia (rat), **184**, 871

Phosphate

- effect on activity of plasma amine oxidase (bovine), **189**, 722
- enhancement of high mobility group-like protein P1 for DNA (HeLa cells, rat liver), **185**, 1091
- inorganic, as reaction product of C–P bond cleavage activity in cell-free extracts of *Pseudomonas fluorescens* isolate, **184**, 1022

Phosphatidylcholine

- diacylglycerol formation from, analysis in angiotensin II-stimulated vascular smooth muscle cells (rat), **187**, 1460
- effects on farnesol inhibition of leukemia cell growth (human), **186**, 543
- increased metabolism in oncogene-transformed cells, correlation with resistance to ionizing radiation (murine fibroblasts), **183**, 652
- liposomes containing viral receptors, membrane fusion with influenza virus, **186**, 378
- pyrene-labeled, lateral motion in bipolar lipid vesicles, pressure dependence (*Sulfolobus acidocaldarius*), **188**, 1241

- small unilamellar vesicles, differential susceptibility to phospholipases A₂, C, and D in presence of membrane active peptides, **182**, 682

Phosphatidylcholine:sterol acyltransferase

- exon I of encoding gene, amino acid exchange in, association with fish eye disease (human), **182**, 583; *erratum*, **184**, 549

Phosphatidylethanolamine

- biosynthesis in hepatocytes, inhibition by okadaic acid (rat), **182**, 1226

Phosphatidylinositol

- extracellular, effect on *c-myc* gene-expressed and unexpressed human cancer cell lines (soybean), **182**, 644
- hydrolysis in skin, mediation by angiotensin II binding to Ang II receptors and differential effects of receptor subtype (rat), **186**, 285

Phosphatidylinositol 3,4-bisphosphate

- synthesis, correlation with protein-tyrosine phosphorylation in thrombin-activated platelets (human), **186**, 1480

Phosphatidylinositol 4,5-bisphosphate

- hydrolysis, inhibition by phospholipase C- γ_1 and - γ_2 SH2/SH3 proteins, **182**, 1402
- inhibition of protein-tyrosine kinase (human erythrocytes), **187**, 853

Phosphatidylinositol 3-kinase

- agonist-induced association with p21^{ras} GTPase-activating protein (rat), **189**, 1503
- identification as non-tyrosine phosphorylated member of insulin receptor signaling complex (rat), **189**, 1024
- inhibition by quercetin and analogs (bovine brain), **186**, 624

Phosphatidylinositol 4-phosphate

- inhibition of protein-tyrosine kinase (human erythrocytes), **187**, 853

Phosphatidylinositol-4-phosphate phosphatase

- membrane-bound, identification of two distinct enzymes in bovine brain, **186**, 562

Phosphatidylinositol 3,4,5-trisphosphate

- synthesis, correlation with protein-tyrosine phosphorylation in thrombin-activated platelets (human), **186**, 1480

Phosphatidylserine

Subject Index

- synthesis in glioma C6 cells, inhibition by glutamate, acetylcholine, thapsigargin, and ionophore A23187 (rat), **186**, 1582
- Phosphoenolpyruvate carboxykinase (GTP)
cytosolic, expression and regulation in 3T3-L1 adipocytes (mouse), **189**, 925
- Phosphofructokinase 1, *see* 6-Phosphofructokinase
- 6-Phosphofructokinase
from granulocytes isolated from patients with insulin resistance, kinetic behavior (human), **185**, 559
- Phosphoglycerate kinase
type 1, X-linked, PCR-derived cDNA clones, sequencing (tamar wallaby), **187**, 26
- Phosphoinositidase C
 β , γ , and δ isoforms, subcellular localization in PC12 cells, **187**, 114
- Phosphoinositides
and calcium, signalling responses in smooth muscle cells, effects of lipoproteins, angiotensin II, and platelet-derived growth factor (human), **188**, 1295
hydrolysis in cultured astrocytes, regulation by sphingosine and psychosine (rat), **186**, 790
metabolism in skeletal muscle, effect of high K⁺ exposure (frog), **182**, 767
muscarinic receptor-stimulated turnover in CNS, activation by series of arecoline bioisosteres, steric and electronic requirements (rat), **187**, 1389
turnover
in antipodal plasma membranes of colonic epithelial cells, effects of 1,25-dihydroxycholecalciferol (human, rat), **187**, 1128
system for, interaction with cAMP pathway secretion of pancreastatin and somatostatin by QGP-1N cells (human), **185**, 1041
- Phospholamban
encoding gene, 5' flank, identification of highly conserved region (rat), **188**, 927
- Phospholipase A₂
acidic, from venom, structure at 2.8 Å resolution (*Agkistrodon halys blomhoffii*), **184**, 137
cytosolic
functional enzyme in U937 cells, size, characterization by radiation inactivation, **183**, 121
ontogeny in brain (rat), **185**, 350
stimulation by interleukin-1 β in rheumatoid synovial fibroblasts (human), **184**, 712
differential regulation by cytokines inhibiting bone formation and mineralization (rat calvarial cells), **188**, 1047
direct activation by GTP-binding protein in peripheral polymorphonuclear leukocytes (human), **183**, 708
inhibitor with topical anti-inflammatory activity: BMS-181162 (human), **189**, 272
low-density lipoprotein modified by, uptake by macrophages at enhanced rate, **185**, 465
macrophage arachidonate-mobilizing, membrane binding and catalytic activity, role of Ca²⁺ (mouse), **184**, 118; *erratum*, **185**, 1162
mitochondrial, localization in outer membrane contact sites and inner membrane (murine liver), **183**, 719
non-pancreatic, natural and recombinant, expression, purification, and biochemical comparison (human), **187**, 544
pancreatic, mode of interaction with *n*-dodecylphosphorylcholine, X-ray crystallographic analysis (bovine), **187**, 821
proliferative effect in chondrocytes via specific binding sites (rat), **186**, 1025
purification from human spermatozoa and partial amino acid sequence, **182**, 208
role in tumor necrosis factor-induced apoptotic DNA fragmentation in aortic endothelial cells (bovine), **188**, 1312
substrate level modulation *in vitro* by 12-*O*-tetradecanoylphorbol-13-acetate (porcine pancreas), **185**, 185; *erratum*, **188**, 956
susceptibility of phosphatidylcholine small unilamellar vesicles in presence of membrane active peptides, **182**, 682
- Phospholipase C
activation by agonist U46619 in coronary artery, effect of cromakalim-induced hyperpolarization (pig), **187**, 1517
 α isoform, phosphatidylinositol-specific, from seminal vesicles, identification as proteolytic fragment of PI-PLC δ (sheep), **188**, 1176
 γ 1 and γ 2 isoforms
identification as substrates of B cell antigen receptor-associated protein-tyrosine kinase (human), **183**, 411
recombinant SH2/SH3 proteins in, purification and inhibition of phosphatidylinositol 4,5-bisphosphate hydrolysis, **182**, 1402
 δ 1 isoform, gene mutation in spontaneously hypertensive rats, associated hypotensive effect, **187**, 1359
related signal transduction pathway, angiotensin II AT_{1A} receptor coupling with, analysis (rat), **186**, 1094
role in platelet-activating factor-induced hydrolysis of polyphosphoinositides (rat cerebral cortex), **183**, 300
stimulation by mutationally activated G protein α_{16} subunit (COS-1 cells), **188**, 1018
susceptibility of phosphatidylcholine small unilamellar vesicles in presence of membrane active peptides, **182**, 682
- Phospholipase D
dependent triphasic activation of protein kinase C in endothelial cells, induction by interferon- γ (rat), **189**, 1732
muscarinic stimulation in PC12 cells, enhancement by wortmannin (rat), **188**, 510
susceptibility of phosphatidylcholine small unilamellar vesicles in presence of membrane active peptides, **182**, 682
- Phospholipids
chiroinositol-containing, identification and characterization (bovine liver), **184**, 1042
composition in anterior pituitary membranes, effect of essential fatty acid deficiency (rat), **183**, 1047
erythrocyte membrane, fatty acid transfer from acyl-L-carnitine pool, analysis (human), **187**, 353
import into mitochondria, regulation mediated by lipid polymorphism (mouse), **186**, 1384
inhibition of lial phosphotyrosine phosphatase (pig),

- 189, 1404**
liposome, phase behavior and dynamic properties, effects of glycolipids, **186, 1294**
transverse mobility, modifications in activated platelet plasma membranes, ESR analysis (human), **189, 465**
- Phosphoprotein phosphatase**
inhibitors calyculin A and okadaic acid
comparative effects on HL60, HL60/ADR, and K562 cells (human), **187, 488**
regulation of β -galactoside α 2,3 sialyltransferase: O-glycan sialylation in cultured C6 glioma cells (rat), **186, 1575**
- type 1**
activator protein kinase FA, activation mechanism in cerebral synaptosomes (pig), **182, 129**
serine/threonine-specific, absence in *Dictyostelium discoideum* extracts, **184, 1142**
- types 1 and 2A**
catalytic subunits, differentiation by antibodies against synthetic peptides (bovine rabbit), **185, 657**
cell cycle-dependent gene expression and activities in NIH 3T3 fibroblasts (mouse), **187, 507**
gene expression and activity in liver regeneration after partial hepatectomy (rat), **185, 291**
inhibition by okadaic acid in B cells, effect on levels of transcription factors AP-1 and NF- κ B and tumor necrosis factor α (human), **187, 51**
inhibitors related to okadaic acid, induction of differentiation in breast tumor cells (human), **189, 1261**
- type 2A, calmodulin-dependent, testis-specific catalytic subunit gene, cloning and characterization (human), 188, 265**
- Phosphoproteins**
anti-oncogene p53, phosphorylation, associated conformational shift in concanavalin-A activated T lymphocytes (human), **189, 1701**
B-50/GAP-43, nerve growth factor-induced expression, inhibition by antisense oligomers, effects on neurite outgrowth (PC12 cells), **187, 839**
cytosolic, Op18, phosphorylation during cell cycle progression (human lymphocytes), **185, 197**
membrane, enhanced tyrosine phosphorylation in estrogen-induced renal tumors (hamster), **186, 228**
pp100, cytokine-induced phosphorylation, localization at tyrosine residues (murine myeloid cells), **188, 1040**
- Phosphoramidon**
inhibition of angiotensin I-converting enzyme in spontaneously hypertensive hamster, **183, 1117**
rhamnose moiety, role in inhibition of endothelin converting enzyme *in vivo* (rat), **186, 1146**
- Phosphorescence quenching**
in cytochrome *c* oxidase, modification by valinomycin, **189, 1477**
- Phosphorus**
-carbon bond, cleavage activity in cell-free extracts of *Pseudomonas fluorescens* isolate, **184, 1022**
metabolites containing, exercise-induced changes in finger flexor muscles of patients with glycogen phosphorylase deficiency, ^{31}P NMR study (human), **185, 16**
- Phosphorylation**
Alzheimer amyloid β /A4 protein precursor, augmentation of secretory processing, **187, 1285**
anti-oncogene phosphoprotein p53, associated conformational shift in concanavalin-A activated T lymphocytes (human), **189, 1701**
assembly-dependent, myosin and paramyosin of native thick filaments (*Caenorhabditis elegans*), **186, 1528**
calmodulin, casein kinase II-catalyzed, alteration by amino acid deletions in central helix of calmodulin, **188, 754**
cAMP-dependent, inositol-1,4,5-trisphosphate receptor, inhibition of Ca^{2+} release from platelet membranes (human), **184, 893**
cell cycle-dependent, HSP28 by transforming growth factor β_1 and H_2O_2 in osteoblasts and *ras* transformants, analysis (mouse), **187, 1418**
cytokine-induced, pp100, localization at tyrosine residues (murine myeloid cells), **188, 1040**
effects on
conformational gap of Alzheimer epitope tau 2 with Ser $\rightarrow$ Pro mutation (bovine), **188, 162**
P1 protein binding to DNA (HeLa cells, rat liver), **185, 1091**
urokinase-type plasminogen activator isolated from metastatic Detroit 562 cells (human), **182, 1473**
Epstein-Barr virus nuclear antigen 2, **186, 1694**
eukaryotic protein synthesis initiation factor 4E by protamine kinase, **183, 431**
glycine receptor by protein kinase C, modulation by glycinergic ligands (rat), **188, 813**
hyper-, tyrosine residues in Jurkat T-cell line, induction by *N*-ethylmaleimide, **187, 73**
insulin-induced, cGMP-inhibited cAMP phosphodiesterase (human platelets), **186, 517**
insulin receptor, effect of deletion of 69 residues from carboxyl terminus of β -subunit (human), **188, 86**
interleukin-6 at serine-54 in fibroblasts: early event in secretory pathway (human), **185, 524**
isocitrate lyase from *Acinetobacter calcoaceticus* *in vivo*, **182, 367**
L-type calcium channel by cAMP-dependent protein kinase, inhibition by endogenous membrane-bound protein, **186, 1588**
by myosin light chain kinase in smooth muscle, inhibition by MLC kinase peptide analogs (bovine, chicken, swine), **185, 379**
myosin, role in exocytosis of adrenal chromaffin cells (bovine), **185, 1016**
Op18, characterization during cell cycle progression (human lymphocytes), **185, 197**
p47-phox carboxy-terminal peptide by protein kinase C and neutrophil protein kinase (human), **187, 940**
p53 protein, inhibition in MCF-7 cells, association with inhibition of DNA synthesis by transforming growth factor- β 1 (human), **183, 1175**
p70 S6 kinase in interleukin-2- and mitogen-activated T cells, inhibition by rapamycin (human), **186, 1315**
particulate cGMP-inhibited low K_M cAMP phosphodiesterase, induction by insulin and isoproterenol in 3T3-L1 adipocytes, **183, 1070**

Subject Index

- PLC- γ_1 , epidermal growth factor-stimulated, modulation by ethanol in A431 cells (human), **185**, 1062
- protein kinase C-catalyzed, poly ADP-ribose polymerase, inhibition of DNA binding, **187**, 730
- protein-tyrosine
- cellular proteins, induction by transforming G protein-coupled receptor activation (murine fibroblasts), **188**, 155
 - 41- and 43-kDa proteins in keratinocytes, induction by hepatocyte growth factor (mouse), **185**, 860
 - as indicator of TCDD exposure *in vivo* and *in vitro* (human, mouse), **189**, 59
 - induction by interleukin-2 in ELM-I-1 cells transfected with human IL-2 receptor β chain cDNA, **188**, 352
 - role in superoxide production by neutrophils stimulated with formyl-methionyl-leucyl-phenylalanine and IgG (human), **183**, 789
 - in thrombin-activated platelets, correlation with phosphatidylinositol 3,4-bisphosphate synthesis (human), **186**, 1480
 - in transformed CR-2-positive lymphocytes and normal resting B lymphocytes, induction by C3d-derived 16-amino acid synthetic peptide (human), **188**, 833
- recombinant spliced variants of α -subunit of stimulatory guanine-nucleotide binding regulatory protein by protein kinase A catalytic subunit, **186**, 1081
- retinoblastoma gene product in myeloid leukemia cells during cell cycle (human), **184**, 212
- skeletal muscle calpastatin, modulation of inhibitory efficiency (rat), **187**, 751
- surface receptor-bound urokinase-type plasminogen activator in metastatic Detroit 562 cells (human), **182**, 1466
- synthetic epidermal mitosis inhibiting pentapeptide by protein kinase NII *in vitro*, protective effect on pentapeptide hydrolysis by serum enzyme (bovine thymus), **183**, 474
- temperature-dependent 43-kDa axonemal protein in spermatozoa, role in regulation of flagellar motility (chicken), **185**, 740
- tyrosine, effect on dityrosine formation, **188**, 252
- Phosphoserine
- and Thr(P) and Tyr(P), efficiencies as specificity determinants for casein kinase I, comparison, **182**, 1460
- 3-Phosphoshikimate 1-carboxyvinyltransferase
- inactivation by substrate analog pyruvate in presence of sodium cyanoborohydride (*Escherichia coli*), **185**, 317
- Phosphothreonine
- and Ser(P) and Tyr(P), efficiencies as specificity determinants for casein kinase I, comparison, **182**, 1460
- Phosphotyrosine
- and Ser(P) and Thr(P), efficiencies as specificity determinants for casein kinase I, comparison, **182**, 1460
- Phosphotyrosine phosphatase, *see* Protein-tyrosine-phosphatase
- Photoaffinity labeling
- electroplax sodium channel domains III and IV with tetrodotoxin derivative (*Electrophorus electricus*), **184**, 900
 - juvenile hormone-binding protein: binding site mapping (*Manduca sexta* larvae), **182**, 466
 - plasma membrane receptors for aldosterone from mononuclear leukocytes (human), **189**, 1424
- Photobacterium leiognathi*
- lux* genes, linkage with genes corresponding in sequence to *Bacillus subtilis* riboflavin synthesis genes, **186**, 690
- Photodynamic therapy
- modified type 1 mechanism: effect of photosensitizers in chemical and biological processes, **186**, 1032
 - role of free radicals, physico-chemical modeling with quantum yield data of singlet oxygen formation, **189**, 1548
- Photoreceptors
- rod, Ca^{2+} -dependent cGMP phosphodiesterase regulator S-modulin, purification and characterization (frog), **186**, 411
- Photorelaxation
- in aorta, pulmonary artery, and corpus cavernosum, enhancement by BAY K 8644 or *N*-nitro-L-arginine (rabbit), **186**, 1522
- Photosensitization
- associated 8-hydroxydeoxyguanosine formation in cellular DNA by riboflavin, **187**, 809
- Photosensitizers
- effects on chemical and biological processes: modified type 1 mechanism in photodynamic therapy, **186**, 1032
 - excited, interaction with stable free radicals, analysis with quantum yield data of singlet oxygen formation: photodynamic therapy model, **189**, 1548
- Photosystem II
- direct interaction between chlorophyll-protein complexes CP29 and CP47 in, **184**, 1094
- Phytoene desaturase
- from *Escherichia coli* transformed with different *crt* genes, *in vitro* assays for, **185**, 9
- Phytohemagglutinin
- activated lymphocytes, proliferation, effects of anchored anti-HLA class I monoclonal antibodies (human), **188**, 278
- Piericidin A
- NADH-Q oxidoreductase inhibition by, relationship to superoxide generation and lipid peroxidation, **189**, 47
- Pigmentation
- role in mitochondrial activity (goldfish cells), **189**, 445
- Pigment dispersing hormone
- precursor, cDNA cloning and sequencing (crab), **189**, 1509
- Piperidine
- hot, induced DNA strand cleavage at 8-hydroxyguanine residue, **188**, 1
- Pirenzepine
- noncompetitive antagonism of muscarinic receptor-mediated Ca^{2+} mobilization (human), **189**, 919
- Pituitary
- anterior
 - cAMP-responsive element and AP1 factor binding site, common nuclear factors bound to, characterization (pig), **188**, 170
 - effects of endothelins in dispersed cells, mediation by ET-A receptor (rat), **187**, 590
 - membranes, phospholipid composition, effect of essential fatty acid deficiency (rat), **183**, 1047
 - and neurointermediate lobes, detection of tyrosine

Subject Index

- hydroxylase mRNA (female rat), **189**, 1716
- normal and tumoral, detection of thyrotropin-releasing hormone mRNA by reverse transcription-polymerase chain reaction (human), **182**, 182
- prolactin association with annexin V (rat), **186**, 894
- thyrotropin-releasing hormone receptor mRNA levels, differential regulation by thyroid hormone *in vivo* and in GH₃ cells (rat), **184**, 367
- gonadotropin-releasing hormone receptor cDNA, isolation and expression (human), **189**, 289
- posterior
- bovine, sodium pump inhibitor, purification, structure, and cardiovascular effect in rat, **189**, 691
 - localization of iodothyronine 5-deiodinase (rat), **188**, 272
- pro-opiomelanocortin gene expression, effect of adrenalectomy (rat), **186**, 418
- secretory vesicles, thiol and aspartyl proteolytic activities (bovine), **183**, 449
- somatotropes, cytosolic free calcium levels, effect of activin A (rat), **185**, 974
- Pituitary hormone deficiency
- combined, *see* Combined pituitary hormone deficiency
- pK_a
- thiol group in glutathione in class Pi glutathione S-transferase-glutathione complex, effect of tyrosine-7 in enzyme (human), **184**, 194
- Placenta
- clathrin-coated vesicles, localization of placental alkaline phosphatase (human), **183**, 803
 - detection of
 - activin β_A mRNA (human), **182**, 773
 - nuclear matrix-associated nicotinamide-nucleotide adenyltransferase (human), **189**, 1275
 - expression of
 - growth hormone receptors (human), **182**, 481
 - plasma membrane calcium pump (human), **183**, 499
 - purification of Ca²⁺-binding protein S-100P (human), **182**, 1246
- Plant cells
- parsley, in suspension culture, conditioning by methyl jasmonate for increased elicitation of phenylpropanoid defense responses, **189**, 304
 - thale cress, cultured, detection of polyamine channels in protoplasts and vacuoles, **182**, 1187
- Plants
- mycoplasma-related organisms in, detection and identification by PCR, **186**, 1503
- Plasma, *see also* Blood, Serum
- activin A/EDF levels, competitive protein binding assay with follistatin (human), **185**, 1148
 - brain natriuretic peptide levels and molecular forms (human), **185**, 760
 - epoxyeicosatrienoates, structural characterization and quantification (rat), **182**, 1320
 - immune complexes from systemic lupus erythematosus patient, double-stranded antigen DNA cloned from, antibody generation in mouse, **183**, 797
 - isolation of growth blocking peptide repressive against juvenile hormone esterase (*Pseudaletia separata*), **185**, 1141
 - lipid hydroperoxide and antioxidants levels, comparison in hyperlipidemic Nagase analbuminemic and control rats and in humans, **189**, 518
 - post-heparin diamine oxidase and plant sterol levels in streptozotocin diabetes (rat), **186**, 398
- Plasmalemma
- guard cell, lipid phase alterations, regulation of abscisic acid-induced stomate closure and reversal by umbelliferone (*Vicia faba*), **186**, 652
- Plasma membranes
- antipodal, colonic epithelial cells, phosphoinositide turnover, effects of 1,25-dihydroxycholecalciferol (human, rat), **187**, 1128
 - asymmetric distribution of positively charged regions of epidermal growth factor receptors, requirement for ligand-induced receptor functions, **184**, 1301
 - calcium pump, expression in placenta and small intestine (human), **183**, 499
 - dermal fibroblasts from patients with systemic sclerosis, interleukin-1 receptor type I density, **184**, 1504
 - G protein translocation to, role of lipopolysaccharide-serum complex (human), **183**, 1280
 - hepatic
 - generation of inositolglycan mediators, role of guanine nucleotide-binding proteins (rat), **186**, 1151
 - NADH oxidation, stimulation by ceruloplasmin (pig), **186**, 951
 - mononuclear leukocyte, binding of aldosterone, photoaffinity labeling study (human), **189**, 1424
 - particulate, protein-tyrosine-phosphatase and guanylate cyclase, effects of angiotensin AT₂ receptor (rat), **183**, 206
- platelet
- cytoplasmic procaspin I translocation onto and activation during stimulation with thrombin, analysis (human), **185**, 1122
 - phospholipid transverse mobility modifications in activated cells, ESR analysis (human), **189**, 465
 - and recombinant p47-phox and p67-phox, in reconstitution of neutrophil respiratory burst-associated NADPH oxidase (human), **186**, 509
 - renal, calcium pump, detection of fourth isoform (rat), **184**, 387
 - Trypanosoma brucei* bloodstream form, pyruvate transport across, mediation by facilitated diffusion carrier, **184**, 1028
- Plasmids
- camphor catabolic, in microbial oxidation of adamantanone (*Pseudomonas putida*), **186**, 1429
 - cleavage by complexes of desferal with Cu(II), Ni(II), and Co(III), **182**, 588
 - mitochondrial, electrophoretic profiles: replication by rolling circle mechanism (*Neurospora crassa*), **186**, 1669
 - and transposons, conjugal transfer from *Escherichia coli* into *Porphyromonas gingivalis*, **186**, 1012
 - tRNA-embedded-ribozyme trimming, construction, **186**, 1271
- Plasminogen
- fragments, binding to umbilical vein endothelial cells

Subject Index

- (human), **188**, 703
 related gene, PRG B, expression in cancer cells (human), **186**, 1108
- Plasminogen activator
 tissue-type
 binding protein for, analysis in endothelial cells (human), **187**, 956
 recombinant, sulfated glycoprotein *N*-glycans in, biosynthesis (human), **189**, 1681
- urokinase-type
 activation of glioma-secreted metalloproteinase identical to type IV collagenase (rat), **186**, 348
 interleukin-1 α -stimulated expression in endothelial cells *in vitro*, effect of interferon- γ (human), **188**, 463
 phosphorylated, from metastatic Detroit 562 cells, enzymatic properties (human), **182**, 1473
 surface receptor-bound, phosphorylation in metastatic Detroit 562 cells (human), **182**, 1466
- Plasmodium falciparum*
 de novo heme biosynthesis pathway: chemotherapeutic target, **187**, 744
 gene encoding high-mobility-group-like protein Pf16, cloning and characterization, **182**, 412
- Plasmodium vivax*
 recombinant antigen PV12 with apolipoprotein B-100-like sequence, cloning and serological characterization, **184**, 668
- Plastids
 hydroxymethylglutaryl-CoA reductase localization, partial purification, and regulation (pea), **184**, 530
- Platelet-activating factor
 activation of
 K⁺ current in macrophages (mouse), **182**, 372
 polyphosphoinositide hydrolysis by phospholipase C-dependent mechanism (rat cerebral cortex), **183**, 300
 biosynthesis in cultured mast cells, role of Ca²⁺ and G proteins (mouse), **184**, 1425
 formation in
 N-formyl peptide-challenged neutrophils, staurosporine enhancement, mediation by intracellular PAF binding sites (human), **189**, 771
 stimulated leukocytes, enhancement after triacsin C pretreatment (rat), **188**, 1280
- Platelet-activating factor receptors
 expression in renal tubular cell line (pig), **187**, 767
 gene expressed in heart, molecular cloning and characterization (human), **189**, 617
- Platelet-derived endothelial cell growth factor
 thymidine phosphorylase activity, identification (human), **184**, 1311
- Platelet-derived growth factor
 AA homodimer, effects on
 DNA and protein synthesis in vascular smooth muscle cells from normal and spontaneously hypertensive rats, **188**, 524
 fibroblasts, neutrophils, and lymphocyte- or cytokine-activated monocytes (human), **186**, 1510
- A chain
 gene expression in smooth muscle cells, induction by oxidized low-density lipoproteins (human), **186**, 1410
 gene transcripts, identification and regulated expression during development and by angiotensin II (rabbit), **184**, 811
 promoter S1 nuclease-sensitive homopurine/homopyrimidine domain, binding of epidermal growth factor receptor 1, **188**, 433
 activation of gastric mucosal calcium channels (rat), **186**, 1496
 effects on phosphoinositide and calcium signalling responses in smooth muscle cells (human), **188**, 1295
 gene expression in retinal pigment epithelial cells *in vitro* (human), **189**, 66
 induction of *c-fos* and *c-myc* mRNA in aortic smooth muscle cell primary culture without elevation of intracellular Ca²⁺ levels (rat), **188**, 1198
 mRNA levels in cultured vascular endothelial cells, effects of high glucose and hyperosmolarity (human), **187**, 664
 receptor cDNA, homology with endothelial tyrosine kinase cDNA (rat), **186**, 706
 recombinant BB homodimer expressed in yeast, N-terminal truncated α -factor leader, effect on biological activity, **187**, 1193
 regulation of pleiotropin gene expression, **184**, 427
- Platelet factor 4
 inhibition of osteoblast-like osteosarcoma cell growth (human), **187**, 287
- Platelets
 activated, plasma membranes, phospholipid transverse mobility modifications in, ESR analysis (human), **189**, 465
 adhesion, mediating functional domains of human and porcine von Willebrand factor, primary structure comparison, **182**, 561
 ADP-stimulated, GPIIIa glycoprotein binding to snake venom peptide triflavin (human), **189**, 1236
 aggregation, minimal sequence requirement of thrombin receptor agonist peptide for induction (human), **184**, 790
 association of pp60^{src} with G_i, induction by epinephrine (human), **186**, 440
 cAMP levels, increase-inducing peptides, organ distribution and characterization (pig), **187**, 1587
 cGMP-inhibited cAMP phosphodiesterase, insulin-induced phosphorylation and activation (human), **186**, 517
 detection and localization of annexin (human), **189**, 1739
 identification of calvasculin and calcyclin (human), **189**, 1310
 interleukin-3-induced translocation and down-regulation of protein kinase C (human), **185**, 670
 -lymphocyte adhesion, mediation by P-selectin (human), **186**, 173
 peptides from human pheochromocytoma acting on, isolation and characterization (rat), **185**, 134
 protein-tyrosine kinase p72^{syk} activation by wheat germ agglutinin (pig), **185**, 1128
 purification and characterization of calpain activator (human), **182**, 461
 selectin-dependent tumor cell adhesion to, inhibition by blocking tumor cell *O*-glycosylation, **182**, 1288

- thrombin-induced Ca^{2+} oscillation, analysis (human), **183**, 864
- thrombin-stimulated
- cytoplasmic procalpain I translocation onto plasma and granule membranes and activation (human), **185**, 1122
 - protein-tyrosine phosphorylation, correlation with phosphatidylinositol 3,4-bisphosphate synthesis (human), **186**, 1480
- Platination
- $5'\text{d}(\text{CTCAGCCTC})^3$: synthesis and characterization of nonanucleotide duplex, **182**, 555
- Platinum
- complex with, in analysis of sulfur-containing amino acids in lipoxigenase active site (soybean), **182**, 779
- Pleiotropin
- gene expression, regulation by platelet-derived growth factor, **184**, 427
 - gene organization (human), **187**, 1113
- PN 200-110, *see* Isradipine
- Pneumonia
- ovine progressive, identification of lentivirus gp40 N'-terminal region as serological marker, **188**, 20
- Poliovirus
- associated toxic membrane protein 3AB, inducible expression in *Escherichia coli*, **188**, 972
- Polyadenylate
- mRNA, ileal, microinjection of *Xenopus* oocytes, induction of conjugated bile acid uptake (guinea pig, rabbit), **186**, 1455
- Polyadenylation
- in islet amyloid polypeptide gene, site identification (human), **189**, 1569
- Poly(ADP-ribose)
- α -glycosidic bonds, acid lability (bovine), **184**, 544
- Poly(ADP-ribose)polymerase, *see* NAD^+ ADP-ribosyltransferase
- Polyamine channels
- detection in protoplasts and vacuoles of *Arabidopsis thaliana* cells, **182**, 1187
- Polyamines
- enhancement of γ -aminobutyraldehyde dehydrogenase activity (bovine brain), **189**, 450
 - uptake into mammalian cells, feedback repression, role of active protein synthesis, **186**, 81
- Polyanions
- effects on injury-induced intimal hyperplasia: fucoidan as nonanticoagulant inhibitor (bovine, rat), **184**, 773
- Polychlorinated biphenyls
- degrading bacteria, catechol 2,3-dioxygenase cloning and characterization, **187**, 609
- Polyketides
- marine, effects on protein-tyrosine kinase activity of pp60 $_{v\text{-src}}$, **184**, 765
- Polylysine
- activation of recombinant rabbit skeletal muscle casein kinase I α , **189**, 944
- Polymerase chain reaction
- amplification of
 - angiotensin type-1 receptor cDNA: detection of AT $_{1B}$ receptor subtype (rat kidney), **185**, 204
 - carrot genes, for analysis of proliferating cell nuclear antigen homologs, **184**, 576
 - coding sequence of type X collagen gene from genomic DNA, **187**, 420
 - anchored, in cloning of rearranged immunoglobulin heavy chain genes from B cell lines (human), **182**, 1260
 - in assay of reporter gene mRNA levels for determination of heterologous promoter activity, comparison with enzymatic assay, **189**, 912
 - in cloning of protein phosphatase inhibitor-2 cDNA (rabbit skeletal muscle), **186**, 1168
 - competitive, in assessment of angiotensin II receptor mRNA expression regulation (rat), **182**, 1094
 - derived cDNA clones for X-linked phosphoglycerate kinase-1, sequencing (tamar wallaby), **187**, 26
 - in detection of
 - guanylate cyclase-A mRNA expression in retina (rat), **182**, 851
 - and identification of mycoplasma-related organisms in plants, **186**, 1503 - exponential, in determination of copy number of mitochondrial DNA in tissue (rat), **183**, 553
 - in identification of A 2 mutation (human), **187**, 366
 - mispairing, and RFLP and single-nucleotide primer extension, in detection of point mutation in mitochondrial ND2 gene, comparison (human), **189**, 1202
 - and nonspecific primers, hybridization probes generated by, in physical ordering of large restriction fragments in *Staphylococcus aureus* genome, **185**, 1055; *erratum*, **187**, 1200
 - reverse transcription, in detection of
 - basic fibroblast growth factor transcript expression in granulosa and cumulus cells from *in vitro* fertilization patients (human), **187**, 1227
 - endothelin-1 mRNA in isolated renal tubules (rat), **188**, 108
 - thyrotropin-releasing hormone mRNA in normal and tumoral anterior pituitary (human), **182**, 182 - RNA, based assay of DNA topoisomerase I gene expression in camptothecin-11 acquired- and native-resistant tumor cells (human), **184**, 618
 - in synthesis of matrix metalloproteinase PUMP gene (human), **186**, 143
- Polyneuropathy
- familial amyloidotic, associated transthyretin mutation, identification and characterization in patient, **182**, 520
- Polyoxyethylene allyl methyl diether
- and maleic anhydride, comb-shaped copolymer, in chemical modification of L-asparaginase (*Escherichia coli*), **184**, 144
- Polyoxyethylene 2-methyl-2-propenyl methyl diether
- and maleic anhydride, comb-shaped copolymer, in chemical modification of L-asparaginase (*Escherichia coli*), **184**, 144
- Polypeptide composition
- 8S form of prollyl-tRNA synthetase (rat liver), **187**, 1071
- Polypeptides
- COR15, cold-regulated, *cor15* gene-encoded, cryoprotective activity (*Arabidopsis thaliana*), **183**, 1103

Subject Index

- folding, reduction-driven, ΔT_f mechanism, **188**, 611
 guanylin precursor, characterization: cloning of guanylin cDNA (rat), **185**, 812
 islet amyloid, *see* Islet amyloid polypeptide
 mammary-derived growth inhibition-related, expressed during pregnancy, purification (bovine), **189**, 406
 pituitary adenylate cyclase-activating, stimulation of adrenaline secretion in cultured chromaffin cells (rat), **182**, 403
 p51 subunit of HIV-1 reverse transcriptase, role in enzyme processivity, **184**, 986
 synthetic epidermal mitosis inhibiting pentapeptide, phosphorylation *in vitro* by calf thymus protein kinase NII, protective effect on hydrolysis by serum enzyme, **183**, 474
- Polyphemusin**
 synthetic analog T-22, anti-HIV-1 activity in MT-4 cells, **189**, 845
- Polyphosphoinositides**
 platelet-activating factor-induced hydrolysis, role of phospholipase C (rat cerebral cortex), **183**, 300
- Polysaccharides**
 modified superoxide dismutase derivatives, therapeutic effects on hepatic injury induced by ischemia/reperfusion (rat), **189**, 191
 synthetic, effects on blood glucose level: (1 $\rightarrow$ 6)- α -D-glucopyranan (mouse), **188**, 16
- Polyvinyl alcohol**
 matrix, *Anacystis nidulans* biological samples and fragments in, skew orientation, **184**, 441
- Poly-N-p-vinylbenzyl-D-lactonamide**
 primary cultured adult hepatocytes on, receptor-mediated formation of multilayer aggregates (rat), **184**, 225
- Porins**
 formation of low conductance ion channel in planar lipid bilayers (*Pseudomonas aeruginosa*), **186**, 645
 OmpF and OmpC, acid pH effect on channel size *in vivo* (*Escherichia coli*), **189**, 1498
- Porphyrinic sensors**
 in monitoring of nitric oxide oxidation by oxygen in biological systems, description, **188**, 734
- Porphyromonas gingivalis**
 conjugal transfer of *Escherichia coli* plasmid and transposon DNA into, **186**, 1012
- Post-translational processing**
Acacia confusa trypsin inhibitor, implications of nucleotide sequence of cDNA, **184**, 1524
 collagen of osteoporotic femoral head, analysis (human), **185**, 801
 transglutaminase-catalyzed, HIV-1 aspartyl protease, **187**, 1211
- Potassium**
 effect on phosphoinositide metabolism in skeletal muscle at high exposure levels (frog), **182**, 767
 efflux in submandibular cells, effect of acetylcholine in neonatal and adult rats, **188**, 1161
 ionic current in macrophages, activation by platelet activating factor (mouse), **182**, 372
 mediated aldosterone secretion, maintenance, role of Ca^{2+} -calmodulin system (bovine), **182**, 254
 Na-dependent efflux, moderation of volume regulation by cells in renal inner medullary slices exposed to hyperosmotic media (rat), **185**, 36
- Potassium channels**
 ATP-sensitive
 blockade, membrane potential oscillations in β -cells during, triggering by high external Ca^{2+} levels (mouse), **187**, 872
 effectors, inhibition of regulatory effects of somatostatin and growth hormone-releasing factor on GH secretion (rat), **187**, 1007
 calcium-activated, detection in chondrocytes (pig), **182**, 1429
 cardiac, cloning and modulation by endothelin-1 (rat), **184**, 1484
 IsK, receptor-mediated regulation by in oocytes (*Xenopus laevis*), **184**, 1135
 from membranes of insulin-secreting HIT T15 β -cells, incorporation into planar lipid bilayers, **186**, 1037
 modulation by hydrogen peroxide (*Xenopus* oocytes), **186**, 1681
 transient-type cloned from heart, functional modulation (rat), **189**, 430
- Potassium currents**
 I_{SK} , slowly activating, expressed in oocytes, stimulation by hypotonic solution (*Xenopus laevis*), **184**, 804
- Potential**
 long-term, *see* Long-term potentiation
- Preadipocytes**
 differentiation in primary culture, inhibition by prostaglandin $\text{F}_{2\alpha}$ (rat), **183**, 438
 expression of multiple growth factor mRNAs (chicken), **187**, 1298
 TA1, terminal differentiation, role of collagens (mouse), **187**, 1314
- Pregnancy**
 mammary-derived growth inhibitor-related polypeptide expressed during, purification (bovine), **189**, 406
 Na^+ , K^+ -ATPase, activity and α and β subunit mRNA expression during, regulation in myometrium (rat), **188**, 1191
- Pregnanes**
 planar and non-planar, effects on vasoreactivity of resistance arteries (human), **186**, 1
- Prenylamine**
 effect on migration of electroporated neutrophils (rabbit), **182**, 864
- Preprotachykinin**
 promoter, bovine, sequences within, interaction with single-stranded DNA binding protein in PC12 cells: regulation by nerve growth factor, **187**, 1395
- Pressure**
 effect on lateral motion of pyrene-labeled phosphatidylcholine in bipolar lipid vesicles (*Sulfolobus acidocaldarius*), **188**, 1241
 high, induced inactivation of cytochrome P450 LM2(Fe^{2+})-CO complex (rabbit liver), **188**, 216
- Primer extension analysis**
 in detection of number of CAG repeats in androgen receptor gene in families with X-linked spinal and bulbar

- muscular atrophy, **182**, 507
- Prions**
 associated soluble protein, detection in human cerebrospinal fluid, implications for prion-related encephalopathy, **184**, 1398
 pre-mRNA, cleavage by hammerhead ribozyme in complex cell-free model systems, characterization (hamster), **186**, 1171
- Proacrosin**
 antibodies, immunoreactive testicular protein band (pig), **184**, 760
- Progelatinase A**
 -tissue inhibitor of metalloproteinase complex, activation by stromelysin (human), **185**, 852
- Progesterone**
 exocyclic-keto reductase activity for, analysis in hepatic microsomes from adult male (rat), **184**, 338
 regulation of angiotensin II receptor type 1 subtype mRNA levels in tissues (rat), **183**, 1090
 stimulation of proliferation and differentiation of osteoblast-like cells (human), **186**, 54
- Prolactin**
 association with annexin V in anterior pituitary gland (rat), **186**, 894
- Prolactin receptors**
 double antenna structure, deduction from cDNA sequence (chicken), **188**, 490
 and estrogen receptors, expression in breast cancer cells, coordinate regulation by sodium butyrate (human), **182**, 740
 long form, absence of ATP/GTP binding site (rat), **183**, 610
- Proline iminopeptidase**
 purification and properties (*Streptomyces plicatus*), **184**, 1250
- Prolyl-tRNA synthetase**
 8S form, polypeptide composition (rat liver), **187**, 1071
- Promonocytes**
 expression of HIV-1 and cytokine genes, differential modulation by suboptimal and optimal activation signals (human), **182**, 1172
- Promoters**
 17-1A antigen gene, formation of specific complexes with nuclear proteins from Capan 2 cells, **186**, 1353
 acute phase responsive, interacting with nuclear factors in α_1 -acid glycoprotein gene, identification (rabbit), **189**, 1464
 adenovirus major late, transcriptionally active chromatin assembly on, effect of DNA supercoiling, **186**, 963
algD, critical for control of mucoidy in *Pseudomonas aeruginosa*, interaction with *Escherichia coli* integration host factor, **189**, 837
 bacteriophage T₇, early, transcriptional inhibition by oligonucleotide triple helix formation, **189**, 1674
 bovine preprotachykinin, sequences in, interaction with single-stranded DNA binding protein: regulation by nerve growth factor (PC12 cells), **187**, 1395
 cellular retinol-binding protein I, retinoic acid response element from, activation by RAR/RXR heterodimer (rat), **187**, 1558
c-myc, nuclease sensitive element in, identification of tandem H-DNA structure, **185**, 264
 $\delta 1$ crystallin, Sp1 site, DNA binding factors interacting with, developmental regulation (chicken), **183**, 659
 cytomegalovirus, heterologous activity, discordant estimates as determined by reporter gene mRNA and enzyme activity, **189**, 912
 fibroblast growth factor 1 gene, characterization (mouse), **183**, 688
 germinal angiotensin I-converting enzyme, in germinal and somatic cells, functional study (human, rabbit), **189**, 134
 α_{2u} -globulin genes, binding by estrogen receptor complexes (rat), **182**, 174
 GP91-phox gene, proximal, sequence-specific binding of HMG-I(Y) proteins, **187**, 563
 hemopexin gene, proximal region, characterization (rat), **185**, 420
 histone H1⁰ gene, multiple cis-acting elements of proximal region, role in basal level transcription, **188**, 1153
 inhibin α gene, functional study (mouse), **186**, 293
 insulin-like growth factor 1 gene
 cell type-specifically regulated, identification (human), **187**, 1219
 characterization (rat), **189**, 972
 insulin-like growth factor-binding protein 1 gene, analysis (rat), **185**, 993
 5-lipoxygenase gene, cloning and nucleotide sequence (guinea pig), **185**, 489
 α -2 macroglobulin gene, structure (human), **184**, 596
 ME491/CD63 antigen gene, related activity of gene 5'-flanking sequences, analysis (human), **185**, 436
 multidrug resistance-1 gene
 activation in response to heat shock stress (human), **187**, 677
 response to serum starvation (human), **183**, 917
 parathyroid hormone-related protein gene, GC-rich region, preferential utilization as coding pathway in normal amnion (human), **189**, 938
 pyruvate kinase L-gene
 binding to transacting factors *in vitro*, **189**, 1119
 identification in erythroid cells (human), **188**, 516
 T7, in inducible expression of toxic poliovirus membrane protein 3AB in *Escherichia coli*, comparative studies, **188**, 972
 thymidine kinase, cell cycle regulatory domain, methylation-sensitive protein-DNA interaction (human), **189**, 480
 thyroid hormone receptor $\beta 1$ gene, cloning and characterization (human), **185**, 78
 transferrin receptor gene, supercoil-dependent structural alteration (human), **183**, 62
 tyrosine aminotransferase gene, multiple cis-acting regions, role in insulin-responsive TAT transcription (rat hepatoma cells), **187**, 778
 tyrosinase-related protein gene, activity, enhancement by TRP gene downstream region (human), **184**, 568
 viral latent BC-R2, repression in Epstein-Barr virus-negative cell lines, **189**, 1695
 Pro-opiomelanocortin
 mRNA levels in hypothalamus and pituitary, effects of

Subject Index

- adrenalectomy (rat), **186**, 418
- Propidium iodide
staining of isolated nuclei, in quantification of DNA degradation (murine thymocytes), **183**, 532
- Propionibacterium acnes*
and lipopolysaccharide, inducible nitric oxide purified from liver of treated rats, polyclonal antibody against, **187**, 1291
- Prostacyclin
suppression of carbon tetrachloride-induced increase in hepatic COL1A(I) and glyceraldehyde-3-phosphate dehydrogenase mRNA levels (rat), **185**, 981
- Prostaglandin E₁
induction of low-density lipoprotein receptors in vascular smooth muscle cells, enhancement by lysosome inhibitors (human), **182**, 830
specific binding to hepatocytes, enhancement by D-galactosamine-induced cell damage (rat), **184**, 654
- Prostaglandin endoperoxide synthase
immunoaffinity purification and cDNA cloning (human platelets), **182**, 433
- Prostaglandin endoperoxide synthase-1
expression in baculovirus-*Spodoptera frugiperda* cell system (sheep), **183**, 975
- Prostaglandin F_{2α}
inhibition of adipocyte precursor differentiation in primary culture (rat), **183**, 438
- Prostaglandin-F synthase
lung-type, expressed in liver, cDNA sequencing and expression in *Escherichia coli* (bovine), **183**, 1238
- Prostaglandin H synthase-2
induction by lipopolysaccharide in alveolar macrophages (rabbit), **187**, 1123
- Prostaglandins
contents in gastric mucosa, age effects (human), **186**, 1443
formation in hepatic macrophages, stimulation by protein kinase C β -isoform (rat), **183**, 1247
relationship to cytokine effects on lipolysis and lipoprotein lipase in cultured fat cells (mouse), **186**, 237
- Protamine kinase
p34^{cdc2}/H1, stimulation in Swiss 3T3 fibroblasts, induction by protein kinase C activators (mouse), **188**, 1084
phosphorylation of eukaryotic protein synthesis initiation factor 4E, **183**, 431
- Protamines
P2, isolation from sperm nuclei and identification as zinc finger proteins with Cys2/His2 motif (human), **182**, 540
- Proteases, *see* Proteinases
- Proteasomes
essential subunit encoded by *PR53* gene, homologous to mammalian proteasome subunit C5, localization to chromosome 2 (yeast), **182**, 452
- Proteinase 3
neutrophil-associated, substrate binding site, mapping with peptidyl thiobenzyl esters (human), **188**, 1318
- Proteinase inhibitors
 α_1 -inhibitor III, differential gene expression in transfected hepatocytes and hepatoma cells (human, mouse, rat), **183**, 184
- two forms in hemolymph, isolation (locust), **189**, 790
- Proteinases
24-kDa, with α - and β -fibrinogenase activity, isolation and characterization (rattlesnake venom), **187**, 389
650- and 950-kDa, purification from sperm and characterization (sea urchin), **182**, 667
alkaline, 120-kDa, purification and characterization (*Trypanosoma cruzi*), **187**, 1466
aspartyl and thiol-dependent activities in pituitary secretory vesicles, characterization (bovine), **183**, 449
effect on microsomal glucose-6-phosphatase (rat liver), **183**, 590
- HIV-1
aspartyl, transglutaminase-catalyzed post-translational modification, **187**, 1211
inhibition by
disulfonates, **188**, 624
flavones, **188**, 631
short peptides derived from proteinase terminal segments, **184**, 980
role in synthesis of proviral DNA, **179**, 17; *erratum*, **187**, 1200
statine-containing inhibitors, potency and antiviral activity, **188**, 865
- inhibitors
inhibiting protein synthesis in rabbit reticulocytes, isolation from cornea and properties (bovine), **184**, 269
protease nexin-2, associated Kunitz-type protease inhibitor domain, expression, purification, and characterization (human), **186**, 1138
tripeptide derivative, inhibition of DNA polymerase (rat liver), **185**, 1133
- Kex2, related proteolysis in bovine adrenal medullary chromaffin granules (yeast), **185**, 398
- vitellogenin-degrading, yolk-associated low-density lipoprotein with, isolation (sand crayfish), **186**, 498
- water-soluble, identification in purified brain myelin (bovine), **186**, 89
- Protein disulfide-isomerase
C-terminal truncation, effect on activity (bovine liver), **183**, 714
- Protein-glutamine γ -glutamyltransferase
catalysis of post-translational modification of HIV-1 aspartyl protease, **187**, 1211
role in blood coagulation: detection of N^ε(γ -glutamyl) lysine crosslinks (horseshoe crab), **188**, 655
tissue, mRNA levels in endothelial cells, cell cycle-dependent changes (bovine), **187**, 14
- Protein inhibitor of fucosyltransferase
and endogenous soluble β -galactoside-binding lectins, effects on intestinal fucosylation enzymes (rat), **185**, 617
- Protein-L-isoaspartate(D-aspartate) O-methyltransferase
mRNA, alternative splicing: generation of C-terminal -RDEL sequence in isozyme II (human), **185**, 277
- Protein kinase
Ca²⁺/calmodulin-dependent
CamPKII, specific inhibitor KN-62, inhibition of insulin secretion (rat), **189**, 128
role in LH-RH receptor up-regulation (rat), **183**, 666
calmodulin-dependent, phosphorylating high molecular

Subject Index

- weight calmodulin-binding protein, characterization (bovine heart), **186**, 819
- cAMP-dependent, *see* Protein kinase A
- extracellular signal-regulated: ERK1 and ERK2 cDNA characterization and ERK2 mRNA detection in T cells (human), **182**, 1416
- inhibitors
- effects on mitogenic activity of human hepatocyte growth factor on rat hepatocytes *in vitro*, **185**, 22
 - H7, structure and biological activities, variation with commercial source, **187**, 657
- neutrophil, p47-*phox* carboxy-terminal peptide as substrate (human), **187**, 940
- p34^{cdc2} and p34^{cdc2}-like, inhibition by staurosporine in mammary carcinoma cells (mouse), **184**, 81
- pp42 and pp44, mitogen-activated, stimulation by angiotensin II in aortic smooth muscle cells *in vitro* (rat), **188**, 257
- Protein kinase A
- activation, relationship to stimulation of bone resorption by parathyroid hormone (mouse), **182**, 1356
 - catalytic activity, inhibition by protein purified from rabbit skeletal muscle membrane, **182**, 232
 - catalytic subunit
 - interaction with pulmonary type V cyclic GMP phosphodiesterase: modulation of noncatalytic binding sites, **189**, 1389
 - phosphorylation of recombinant spliced variants of α -subunit of stimulatory guanine-nucleotide-binding regulatory protein, **186**, 1081
 - phosphorylation of L-type calcium channel, inhibition by endogenous membrane-bound protein, **186**, 1588
 - regulation of endocytosis in T84 epithelial cells, **184**, 1173
 - role in regulation of collagen synthesis by parathyroid hormone and PTH-related peptide in UMR-106 cells (rat), **184**, 525
 - subunit RI α , different sized mRNAs for, half-lives, regulation in response to inhibition of transcription and translation (rat Sertoli cells), **184**, 454
 - subunit RII β , mRNA, stabilization by inhibitors of RNA and protein synthesis in cytoplasmic and nuclear compartments (rat), **183**, 632
 - type II, regulatory subunit, identification as RII β isoform in ovary (rabbit), **184**, 43
- Protein kinase C
- activation
 - by endothelin, role in ET inhibition of atrial natriuretic factor-stimulated cGMP production in rat aortic muscle cells, **182**, 395
 - in vascular smooth muscle cells, Ca²⁺ influx through dihydropyridine-sensitive channels linked to, increase by glucocorticoids (rat), **188**, 934
 - activators, induction of p34^{cdc2} histone H1 kinase stimulation in Swiss 3T3 fibroblasts (mouse), **188**, 1084
 - α and δ isoenzymes in hepatic nuclei, selective changes during liver regeneration (rat), **182**, 1333
 - in aortic endothelial cells, immunocytochemical expression and localization (bovine), **189**, 40
 - β -isoform, stimulation of prostanoid and superoxide formation in hepatic macrophages (rat), **183**, 1247
 - Ca²⁺-independent form, production by calpain in long-term potentiation (rat hippocampus), **189**, 1515
 - Ca²⁺-independent/phospholipid-dependent, stimulation in adipocytes by insulin (rat), **183**, 814
 - in cardiomyocytes, effect of docosahexaenoic acid supplementation (rat), **183**, 893
 - catalyzed phosphorylation of poly ADP-ribose polymerase, inhibition of DNA binding, **187**, 730
 - in central nervous system, activity during limb regeneration, analysis (newt), **184**, 433; *erratum*, **185**, 1163
 - in diabetic myocardium, altered activity (rat), **187**, 703
 - functional inhibition by injection of rat brain PKC intracellular receptors in *Xenopus* oocytes, **188**, 1235
 - in hippocampus, total and synaptosomal activity determination (mouse), **188**, 690
 - and insulin, in differential regulation of mRNAs encoding three protein-tyrosine phosphatases (rat), **188**, 1305
 - mediation of cholecystokinin-induced supramaximal inhibition of pancreatic secretion (rat), **187**, 498
 - membrane translocation in mammalian cells, induction by okadaic acid and calyculin-A, **189**, 950
 - mRNA levels and activity in reconstituted normal epidermis, relationship to cell differentiation (human), **184**, 283
 - oocyte, purification and characterization (*Xenopus laevis*), **182**, 105
 - oxidation-induced persistent activation in hippocampal homogenates (rat), **187**, 1439
 - p47-*phox* carboxy-terminal peptide as substrate (human), **187**, 940
 - phospholipase D-dependent triphasic activation in endothelial cells, induction by interferon- γ (rat), **189**, 1732
 - phosphorylation of glycine receptor, modulation by glycinergic receptors (rat), **188**, 813
 - platelet, translocation and down-regulation induced by interleukin-3, **185**, 670
 - rate-limiting effect on generation of soluble interleukin-6 receptor (COS-7 cells), **189**, 794
 - role in
 - angiotensin II- and K⁺-mediated aldosterone secretion, sustained phase (bovine), **182**, 254
 - bone resorption: effect of 1-alkyl-2-methylglycerol (mouse, rat), **184**, 1317
 - calcitonin gene-related peptide stimulation of intracellular cAMP production in ocular ciliary epithelial cells (human), **188**, 662
 - calphostin C inhibition of succinate-dependent mitochondrial reduction of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyltetrazolium bromide in 32D cells (mouse), **185**, 806
 - induction of nitric oxide synthesis by macrophages (mouse), **188**, 997
 - insulin-stimulated hexose uptake by adipocytes (rat), **188**, 142
 - LH-RH receptor up-regulation (rat), **183**, 666
 - phorbol ester-mediated suppression of cytochrome P450 Cyp1a-1 induction in skin (mouse), **186**, 970
 - regulation of endocytosis in T84 epithelial cells, **184**, 1173
 - tumor necrosis factor α inhibition of parathyroid hormone-related protein-stimulated cAMP formation in osteoblast-like cells (human, rat), **182**, 341

Subject Index

- in vesicle system, dual modulation by sphingosine, **187**, 635
- Protein kinase C receptors
intracellular, injection into *Xenopus* oocytes, inhibition of PKC function (rat brain), **188**, 1235
- Protein kinase FA
activation mechanism in cerebral synaptosomes (pig), **182**, 129
cyclic inhibition-potential of synapsin I crosslinking with brain microtubules (swine), **184**, 973
- Protein kinase NII
phosphorylation of synthetic epidermal mitosis inhibiting pentapeptide *in vitro*, protective effect on pentapeptide hydrolysis by serum enzyme (bovine thymus), **183**, 474
- Protein phosphatase, *see* Phosphoprotein phosphatase
- Protein phosphatase inhibitor-2
skeletal muscle, PCR cloning (rabbit), **186**, 1168
- Proteins
14-3-3, evolutionary conservation (*Xenopus laevis*), **184**, 1456
14.7-kDa, adenovirus E3 region, inhibition of tumor necrosis factor- α -induced arachidonic acid release (C3HA fibroblasts), **188**, 177
18-kDa, lysine-rich, effects on osteoblast-like MC3T3-E1 cells (bovine tibia), **186**, 1288
33-, 35-, and 180-kDa, responsible for benzyloxycarbonyl-leucyl-leucyl-leucinal-induced neurite outgrowth in PC12H cells, isolation and characterization (rat), **184**, 419
41- and 43-kDa, tyrosine phosphorylation in keratinocytes, induction by hepatocyte growth factor (mouse), **185**, 860
43-kDa, axonemal, temperature-dependent phosphorylation: regulation of flagellar motility in spermatozoa (chicken), **185**, 740
47-kDa, cytosolic factor required for NADPH-oxidase activation in neutrophils, purification and properties (bovine), **186**, 731
80-kDa, Kupffer cell-associated, identification as carcinoembryonic antigen binding site (rat), **188**, 671
115-kDa, stable association of p56^{lck} with, **186**, 537
180-kDa, immunological identification as Cl⁻ channel in electric organ (Japanese electric ray), **188**, 1228
acidic seminal fluid, *see* Acidic seminal fluid protein
actin-like, actin2, cloning and sequencing (bovine), **187**, 1022
amyloid, *see* Amyloid
antifreeze, type II, and Ca-dependent lectins, structural and functional comparison (fish liver), **185**, 335
antifungal
22-kDa, isolation and characterization (maize seeds), **182**, 1
25-kDa, isolation and characterization (flax seeds), **187**, 480
band III, analog, evidence in cytochrome c oxidase near-infrared absorption spectra, **184**, 1035
bone morphogenetic
encoding genes, differential transcription in early embryo (*Xenopus laevis*), **186**, 1487
induction of heterotopic bone formation in mouse with collagen-induced arthritis, **186**, 1362
Bp-1, developmental change in subcellular location and interaction with identifier sequence and brain-specific transcript (mouse), **189**, 53
Ca²⁺-binding
histidine-rich, in skeletal muscle sarcoplasmic reticulum, analysis of low-affinity Ca²⁺ and Zn²⁺ binding sites (rabbit), **186**, 659
recoverin-like, isolation and characterization (rat brain), **183**, 245
S-100P, purification from placenta and characterization (human), **182**, 1246
caldesmon-binding, 65-kDa, functional effects on caldesmon and myosin light chain kinase (chicken), **184**, 1212
calmodulin-binding
ACAMP-81, identity with MARCKS protein: partial amino acid analysis and interaction with synapsin I, **182**, 1395
Ca²⁺-independent, localization in synaptosomal membrane and properties (rat brain), **183**, 725
induction in kidney by 1,25-dihydroxyvitamin D (rat), **185**, 636
phosphorylating calmodulin-dependent protein kinase, characterization (bovine heart), **186**, 819
CAP-50, calyculin-associated annexin, molecular cloning (rabbit), **186**, 1227
CDC25, interaction with RAS2 protein *in vitro* (*Saccharomyces cerevisiae*), **186**, 467
cellular retinoic acid-binding, type II
expression in adult osteoblasts and liver (human), **189**, 1397
localization in limb bud (chicken), **185**, 217
cellular retinol-binding, CRBPI, promoter, retinoic acid response element from, activation by RAR/RXR heterodimer (rat), **187**, 1558
c-fos and c-myc, expression in fetal hepatocytes, modulation by hepatocyte growth factor (rat), **189**, 684
chemical shift index analysis: α -CH values revealing dynamic helices and α_L sites, **184**, 1008
-chlorophyll complexes, CP29 and CP47 in photosystem II, direct interaction, **184**, 1094
c-kit, relationship to astrocytoma-specific antigens detected by murine monoclonal antibodies (human), **182**, 474
clathrin assembly, AP-2, identity with rat inositol hexakisphosphate receptor (bovine brain), **187**, 158
c-Myb, transactivation of c-myc gene (human), **186**, 715
complement C4-binding, immunolocalization in amyloid deposits of Alzheimer brain, comparison with serum amyloid P distribution, **186**, 461
CYPIA1 and CYPIA2, negative regulation of cytosolic aldehyde dehydrogenase-3 gene (mouse), **187**, 413
cytosolic thyroid hormone-binding, synthesis during liver regeneration, regulation by 3,3',5-triiodo-L-thyronine (rat), **189**, 257
D
differential expression and regulation in epididymis (rat), **183**, 1109
sense RNA coding region, RNA-binding proteins interacting with, identification *in vitro* (rat), **187**, 318

Subject Index

- decorin core, fragments, interaction with type I collagen, **189**, 165
- degradation and 2-D protein pattern, alterations in Duchenne muscular dystrophy muscle cells (MDX mouse), **189**, 1484
- DNA-binding
- induction by nerve growth factor-reponse element in neuropeptide Y gene (rat), **189**, 1553
 - interaction with potential c-abl intron regulatory element, inhibition by methylation (mouse), **186**, 1515
 - sequence-specific, local similarities to amyloid precursor protein (mouse), **189**, 1336
 - for ssDNA, interaction with sequences in bovine preprotachykinin promoter: regulation by nerve growth factor (PC12 cells), **187**, 1395
- in dystrophin-glycoprotein complex, specific binding by calmodulin (rabbit), **185**, 753
- enhancer-site downstream binding, enrichment in tissues expressing class I alcohol dehydrogenase gene (rat), **188**, 684
- Escherichia coli*, cross-reacting with antibodies against region 2.2 peptide of RNA polymerase sigma subunit, identification, **184**, 634
- extracellular, Arg-Gly-Asp-binding, modulation of cell adhesion (mouse), **183**, 544
- extra-ribosomal, and ATP, differential requirement for ribosome inactivation by RNA *N*-glycosidases, **182**, 579
- FK506- and rapamycin-binding
- 25-kDa, cDNA cloning (human hippocampus), **184**, 733
 - cDNA isolation (human), **185**, 298
 - complex with bound substrate, resistance to proteolysis (*Tolypocladium inflatum*), **182**, 1282
 - leukocyte chemotactic activity, inhibition by FK506 (bovine), **186**, 1178
- fusion, hepatitis C virus E2/NS1 domain-maltose-binding protein
- antibody, detection in type C hepatitis patients, **189**, 565
 - expression in type C chronic liver disease, **183**, 925
- G, *see* G proteins
- GABA-binding, monoclonal antibody recognizing, preparation and characterization (bovine brain), **182**, 722
- galactoside-binding, soluble and membrane-bound, dichotomy in laminin-binding properties (human), **186**, 1674
- glucose transporter, *see* Glucose transporters
- granulocyte-macrophage colony-stimulating factor-binding, identification in supernatant of choriocarcinoma cell line (human), **183**, 252
- GTPase-activating, *see* GTPase-activating proteins
- GTP-binding, *see* G-proteins
- heat shock, *see* Heat shock proteins
- heme, *see* Hemeproteins
- heparin-binding, HBNF and MK, human recombinant, antiviral activity, **189**, 1189
- HG12, highly basic, homologous to yeast ribosomal protein YL41, mRNA characterization by cDNA cloning (human), **187**, 901
- high-mobility-group
- HMG1 and 2, binding to cisplatin-damaged DNA, characterization (bovine), **188**, 1286
 - HMG-I(Y), sequence-specific binding to GP91-phox gene proximal promoter, **187**, 563
- hyaluronan/glycosaminoglycan-binding, analysis: differentiation of divalent cation-independent and divalent cation-dependent activities (rat), **189**, 1591
- Id, expression in BC3H-1 muscle cells, regulation by insulin-like growth factor II (mouse), **183**, 1084
- Ig-binding, 30-kDa, partial characterization (*Pseudomonas maltophilia*), **182**, 1075
- immunomodulatory, Ling Zhi-8, facilitation of cellular interaction via modulation of adhesion molecules (*Ganoderma lucidum*), **186**, 385
- immunosuppressive, produced by Sertoli cells *in vitro*, effects on lymphocytes (mouse), **186**, 1639
- insulin-like growth factor-binding, *see* Insulin-like growth factor-binding protein
- integration, HIV-1, inhibition by aurointricarboxylic acid monomers, monomer analogs, and polymer fractions, **185**, 85
- interleukin-2-binding, 65-kDa, association with interleukin-2 receptor α and β chains, **184**, 1288
- intestinal mucin-like, homology with rat protein and localization on chromosome 11 p 15.5 (human), **183**, 821
- jun-B, identification as member of human antioxidant response element-nuclear protein complex (mouse), **188**, 992
- juvenile hormone-binding, photoaffinity-labeled, binding site mapping (*Manduca sexta* larvae), **182**, 466
- Ku, binding to DNA, mechanisms (HeLa cells), **186**, 574
- lens fiber cell beaded-filament structural, CP94, cDNA sequence homology with cytokeratins (rat), **186**, 190
- link, 22-kDa, and 130-kDa NO synthase, co-purification (human neutrophils), **189**, 558
- mannose-binding, identity with 32-kDa component of R-reactive factor (human), **183**, 645
- MARCKS, identity with ACAMP-81: partial amino acid analysis and interaction with synapsin I, **182**, 1395
- membrane, cAMP-dependent protein kinase-inhibiting, purification and characterization (rabbit skeletal muscle), **182**, 232
- membrane-bound, endogenous, inhibition of phosphorylation of L-type calcium channel by cAMP-dependent protein kinase, **186**, 1588
- membrane carrier, expression in HepG2 cells, relation to transport of sulfbromophthalein and taurocholate (human), **183**, 1203
- methylation-sensitive interaction with DNA at cell cycle regulatory domain of thymidine kinase promoter (human), **189**, 480
- microtubule-associated MAP1B, mRNA, expression in aged hippocampus (rat), **184**, 292
- MIP26, glycation, effect on reconstituted liposome permeability (bovine lens), **186**, 632
- MP22 and MP26, glycation in lens membranes (bovine), **185**, 496
- myelin, *see* Myelin proteins
- NHP1, containing HMG-Box, cDNA clone, characterization (*Babesia bovis*), **184**, 31; *erratum*, **185**, 800
- N-ras, farnesylated COOH-terminal heptapeptide, cleavage by rat brain microsomal membranes (mouse), **187**, 1336

Subject Index

- nuclear, *see* Nucleoproteins
- optomotor-blind and Brachyury, shared homology domain, role in DNA binding (*Drosophila melanogaster*, mouse), **186**, 918
- P1, phosphate groups in, enhancement of affinity for DNA (HeLa cells, rat liver), **185**, 1091
- p47-phox, carboxy-terminal peptide, phosphorylation by protein kinase C and neutrophil protein kinase (human), **187**, 940
- p50^{weel}, identification as tyrosine kinase (human), **186**, 1333
- p53
- expression in brain after middle cerebral artery occlusion (rat), **182**, 1201
 - phosphorylation and cytoplasmic translocation, inhibition in MCF-7 cells, association with inhibition of DNA synthesis by transforming growth factor- β 1 (human), **183**, 1175
- p68, recombinant, differential recognition of secretory vesicles (mouse), **184**, 347
- p110Rb, retinoblastoma gene-encoded, full-length biochemically active, purification, **187**, 697; *erratum*, **188**, 956
- p125^{FAK}, tyrosine phosphorylation, induction by transforming G protein-coupled receptor activation (mouse), **188**, 155
- p130 v-src, substrate, tyrosine phosphorylation, induction by transforming G protein-coupled receptor activation (mouse), **188**, 155
- parathyroid hormone-related
- encoding gene, preferential utilization of GC-rich promoter and PTHrP 1-139 coding pathway in amnion (human), **189**, 938
 - stimulation of cAMP formation in osteoblast-like cells, inhibition by tumor necrosis factor α via protein kinase C (human, rat), **182**, 341
- peripheral myelin, PMP-22 (Pas-II/SR13/GAS-3), encoding cDNA from fetal spinal cord, isolation and sequence determination (human), **186**, 827
- Pf16, high-mobility-group-like, gene cloning and characterization (*Plasmodium falciparum*), **182**, 412
- PLC- γ 1, epidermal growth factor-stimulated phosphorylation, modulation by ethanol in A431 cells (human), **185**, 1062
- prenylated, hydrophobicity parameters for, development, **186**, 1437
- prion, soluble form, detection in human cerebrospinal fluid, implications for prion-related encephalopathy, **184**, 1398
- proacrosin-binding, antibodies, testicular protein band immunoreactive with, demonstration (pig), **184**, 760
- processed form related to human HSP 60 chaperonin, identification in kidney (bovine), **185**, 683
- R2, from ribonucleotide reductase, associated tyrosine radical, reaction with hydroxyurea, EPR stopped-flow analysis, **188**, 879
- rab6, expressed in baculovirus-Sf9 cell systems, characterization of processed and unprocessed forms, **182**, 1499
- rap, stimulating GTPase activity of human rap2b, purification (bovine cerebral membranes), **189**, 717
- Rap2, ras-related, GTPase activity, regulation (bovine brain), **189**, 455
- RAS2
- and G-protein α -chain, expression, role in RAS-linked adenyl cyclase suppression by α -mating factor receptor (yeast), **184**, 1378
 - interaction with CDC25 protein *in vitro* (*Saccharomyces cerevisiae*), **186**, 467
- recombinant oxidase components p47-phox and p67-phox, and plasma membrane, in reconstitution of neutrophil respiratory burst-associated NADPH oxidase (human), **186**, 509
- refolding by adult T cell leukemia-derived factor/human thioredoxin, analysis, **186**, 1220
- retinol-binding, hybrid with purpurin, transthyretin-binding, construction (chicken, rat), **184**, 938
- rho, *see* G proteins, rho
- ribosomal
- L1, encoding gene, splicing of regulatory intron *in vitro*, effect of suboptimal consensus sequences (*Xenopus laevis*), **183**, 680
 - L3, primary structure (rat), **187**, 58
 - L11, primary structure (rat), **185**, 356
 - S25, primary structure (rat), **186**, 1688
 - S30, fused to ubiquitin-like protein, encoding gene fau, structure and expression (human), **187**, 927
- RNA-binding, interacting with coding region of protein D sense RNA *in vitro*, identification (rat), **187**, 318
- S14, encoding gene, transcription *in vitro*, tissue specificity, **182**, 631
- seleno-, *see* Selenoproteins
- SH2/SH3, recombinant, in phospholipase C- γ 1 and - γ 2, purification and inhibition of phosphatidylinositol 4,5-bisphosphate hydrolysis, **182**, 1402
- smg GDS
- activity on multiple small GTP-binding proteins in cytosol fraction of differentiated HL-60 cells (human), **182**, 921
 - stimulated binding of GTP γ S to smg p21B, effect of chlorpromazine, **182**, 1446
- smooth muscle, encoding gene overexpressed in senescent fibroblasts, sequence and expression (human), **187**, 1
- soluble, paralytic shellfish poisoning toxin-induced, in screening for toxic shellfish, analysis (butter clam), **184**, 511
- sperm, synthetic peptide segments, induction of infertility in immunized rat (human), **183**, 538
- stress, 70-kDa, and presecretory proteins, dissociation of complexes between, facilitation by cytosolic factor (yeast), **189**, 1150
- stringent starvation, from *Escherichia coli*, sequence homology to *Drosophila* glutathione S-transferases, **182**, 355
- surfactant, *see* Surfactant protein
- t, hepatic nuclear, regulation by thyroid hormone: identification as peroxisomal enoyl-CoA hydratase-3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme (rat), **185**, 211
- TAPA-1, expression in preimplantation embryos (mouse), **186**, 1201
- Tat, HIV-1, antagonist Ro 5-3335, inhibition of virus

Subject Index

- induction in infected T cells, **189**, 250
- tau, phosphorylated synthetic peptide, reversible β -pleated sheet formation, **182**, 63
- temperature-dependent folding *in vivo*, correlation with temperature effects on expression of *Xenopus* Cu,Zn superoxide dismutase variants in *Escherichia coli*, **186**, 1339
- testicular, band immunoreactive with proacrosin and proacrosin-binding protein antibodies, demonstration (pig), **184**, 760
- tissue-type plasminogen activator-binding, analysis in endothelial cells (human), **187**, 956
- toxic poliovirus membrane, 3AB, inducible expression in *Escherichia coli*, **188**, 972
- transformation-associated, 68- and 64-kDa, secreted by ts-110 Moloney murine sarcoma virus-transformed NRK cells, substrate preferences, **189**, 21
- transport in permeabilized cell of *Schizosaccharomyces pombe*, **186**, 838
- trifluoroacetylated adduct, transient formation in heart after halothane and 2,2-dichloro-1,1,1-trifluoroethane exposure (rat), **184**, 1344
- trifunctional, deficiency, *see* Trifunctional protein deficiency
- tyrosinase-related, encoding gene downstream region, enhancement of promoter activity (human), **184**, 568
- tyrosine phosphorylation
- as indicator of TCDD exposure *in vivo* and *in vitro* (human, mouse), **189**, 59
 - in thrombin-activated platelets, correlation with phosphatidylinositol 3,4-bisphosphate synthesis (human), **186**, 1480
- ubiquitin-like, fused to S30 ribosomal protein, encoding gene *fau*, structure and expression (human), **187**, 927
- ubiquitin-mediated turnover, dipeptide inhibitors, prevention of growth factor-induced neurite outgrowth in PC12 cells (rat), **189**, 280
- urinary stone, cDNA cloning and sequencing: identity with osteopontin (human), **184**, 859
- viral, expression in Sendai virus-infected cells, inhibition by glutathione (monkey kidney), **188**, 1090
- VMA1 catalytic subunit of vacuolar membrane H^+ -ATPase, mutations at junction sites, inhibition of processing by protein splicing (yeast), **188**, 40
- zinc finger, associated Cys2/His2 motif, detection in sperm nuclear P2 protamines (human), **182**, 540
- Protein synthesis
- inhibitors, stabilization of protein kinase A RII β subunit mRNA in cytoplasmic and nuclear compartments (rat), **183**, 632
 - in reticulocytes, inhibition by bovine corneal protease inhibitor (rabbit), **184**, 269
 - role in feedback repression of polyamine uptake into mammalian cells, **186**, 81
 - in vascular smooth muscle cells, stimulation by platelet-derived growth factor AA homodimer in spontaneously hypertensive rat, **188**, 524
- Protein-tyrosine kinase
- B cell antigen receptor-associated, identification of phospholipases C- γ 1 and C- γ 2 as substrates (human), **183**, 411
 - encoding gene *lyn*, B-cell-associated, expression in primary neuroblastomas and modulation during neuroblastoma cell line differentiation (human), **186**, 1403
 - endothelial, cDNA, cloning and comparison with platelet-derived growth factor receptor cDNA (rat), **186**, 706
 - erythrocyte, inhibition by polyphosphoinositides (human), **187**, 853
 - hyk*, expression in embryonic stem cells (mouse), **189**, 1747
 - identity with human p50^{weel}, **186**, 1333
 - inhibitors, blockade of calcium channel currents in vascular smooth muscle cells (rabbit), **189**, 1620
 - insulin receptor-associated, exogenous activity, effect of deletion of 69 residues from carboxyl terminus of β -subunit (human), **188**, 86
 - membrane, enhanced activity in estrogen-induced renal tumors (hamster), **186**, 228
 - p56^{lck}
 - in multi-receptor complex, mRNA, down-regulation, correlation with up-regulation of lymphokine mRNA: cyclosporin A effect on activated T cells (human), **186**, 603
 - stable association with 115-kDa substrate, **186**, 537
 - p72^{syk}, activation by wheat germ agglutinin in platelets (pig), **185**, 1128
 - pp60^{src}, association with G α in human platelets, induction by epinephrine, **186**, 440
 - pp60^{v-src}, effects of marine sponge halenaquinone and other marine quinones (rat), **184**, 765
 - src*-related
 - activation in WEHI 231 cells via crosslinking of surface immunoglobulins, **187**, 1536
 - lyn*, expression in HL60 cells induced to monocyte-like or granulocyte-like cells (human), **185**, 91
- Protein-tyrosine kinase receptors
- related molecule Nbk-1, identification in neuroblastomas (mouse), **189**, 1077
- Protein-tyrosine-phosphatase
- intracellular, cDNA cloning, nucleotide sequence, and expression (murine testis), **185**, 818
 - LC-PTP, chromosomal mapping and molecular cloning (human), **186**, 1607
 - leukocyte common antigen-related, cDNA cloning and regulation in mesangial cells *in vitro* (rat), **188**, 34
 - lienal, inhibition by phospholipids and inositol trisphosphate (pig), **189**, 1404
 - mRNAs, differential regulation by insulin and protein kinase C activation (rat), **188**, 1305
 - non-receptor, differential expression in differentiating P19 embryonal carcinoma cells (mouse), **184**, 1241
 - PTPG1, cytoplasmic, cDNA cloning and characterization (human), **189**, 1223
 - selective inhibition by H₂O₂ and vanadate *in vitro* (rat), **188**, 773
 - stimulation by angiotensin AT₂ receptor in plasma membrane particulate (rat), **183**, 206
- Proteoglycans
- in Alzheimer's disease fibroblasts, characterization (human), **184**, 1293
 - heparan sulfate
 - cDNA cloning, sequencing, and identification as glypican (rat brain), **188**, 395

Subject Index

- role in lipoprotein lipase enhancement of cellular binding of low-density and very-low-density lipoproteins (bovine), **185**, 582
- Proteolysis**
 in activation of hepatocyte growth factor single-chain precursor by extracellular serine-protease, **189**, 1631
 amyloid β precursor by thrombin (mouse), **185**, 1000
 control sites in hepatocytes, localization, 4-amino-6-methylhept-2-enoic acid as leucine analog probe for, evaluation, **186**, 1327
 heavy chain of MHC class I antigen, mediation by complement component C1r (human), **187**, 832
 IgG by glomerular epithelial cells, mechanism, **186**, 639
 intracellular, in L6 muscle cells, inhibition by tetracyclines, **188**, 767
 Kex2-like activity in adrenal medullary chromaffin granules, analysis (bovine), **185**, 398
 nuclear proteins, stimulation by phenylmethylsulfonyl fluoride (chicken liver), **189**, 179
 proalbumin and complement Pro-C3 *in vitro* by truncated soluble form of furin (rat), **189**, 1353
 resistance of FKBP/FK-506 complex (*Tolypocladium inflatum*), **182**, 1282
 synaptobrevin, role in inhibition of neurotransmitter release by tetanus toxin, **189**, 1017
 thyroglobulin: origin of electrophoretic doublet (bovine, human), **186**, 1185
- Prothymosin α**
 expression during G1 in proliferating B or T lymphocytes (mouse), **185**, 953
- Protoheme IX farnesyltransferase**
cyoE gene encoding, role in heme O biosynthesis (*Escherichia coli*), **189**, 1491
- Proton pumping**
 electron transport-coupled, and plasmalemma ATPase, effect of D₂O (maize), **182**, 870
- Protons**
 light-induced release from uncoupled thylakoid membranes, inhibition by *N*-ethylmaleimide (spinach), **182**, 1277
- Proton transport**
 and Na⁺/H⁺ exchange, analysis in vesicles isolated from salmon kidneys during migration from salt to fresh water, **186**, 24
- Protoplasts**
 detection of polyamine channels in *Arabidopsis thaliana* cells, **182**, 1187
 guard cell, plasmalemma lipid phase alterations, regulation of abscisic acid-induced stoma closure and reversal by umbelliferone (*Vicia faba*), **186**, 652
 transfection by liposomes interacting with DNA, evaluation (lentil), **186**, 1417
- Pseudogenes**
 casein kinase II α , from XbaI fragment, characterization (mouse), **186**, 723
 serum amyloid A locus SAA4, identification (human), **183**, 362
 steroid 21-hydroxylase, and complement C4A gene, and CYP21/C4B genes, intergenic sequences, comparison and identification of regulatory elements (human), **186**, 256
- Pseudohypoparathyroidism**
 type 1a, detection of G α mutations in families with, **189**, 343
- Pseudomonas aeruginosa***
 mucoidy control in, associated *algD* promoter, interaction with *Escherichia coli* integration host factor, **189**, 837
- Pseudomonas fluorescens***
 isolate, cell-free extracts, detection of C-P bond cleavage activity, **184**, 1022
- Pseudomonas putida***
 camphor catabolic plasmid-carrying, oxidation of adamantane, **186**, 1429
 catechol 2,3-dioxygenase cloning and characterization, **187**, 609
- Pseudomonas syringae***
 derived enzyme, arginine-dependent simultaneous catalysis of ethylene and succinate from 2-oxoglutarate, **188**, 483
- Psychosine**
 and sphingosine, regulation of phosphoinositide hydrolysis in cultured astrocytes (rat), **186**, 790
- Purinergic receptors**
 P₂, regulation of potassium channel *IsK* in oocytes (*Xenopus laevis*), **184**, 1135
- Purines**
 conserved, exocyclic amino groups, role in hammerhead ribozyme cleavage, **183**, 605
- Purkinje cells**
 developing, expression of presynaptic *trans*-1-amino-1,3-cyclopentanedicarboxylic acid receptor (rat), **189**, 1287
- Purkinje fibers**
 arrhythmic effects of oxidized low-density lipoproteins (rabbit), **182**, 548
- Purpurin**
 -retinol-binding protein hybrid, transthyretin-binding, construction (chicken, rat), **184**, 938
- Putrescine**
 uptake, differential regulation in trypanosomatids (*Crithidia fasciculata*, *Leishmania mexicana*, *Trypanosoma cruzi*), **188**, 120
- Pyrazole**
 effect on oxidase activity of hepatic and pulmonary microsomal cytochrome P450 isozymes (rat), **187**, 1262
- Pyrene**
 labeled phosphatidylcholine, lateral motion in bipolar lipid vesicles, pressure dependence (*Sulfolobus acidocaldarius*), **188**, 1241
- Pyridine**
 effect on levels of alcohol-inducible cytochrome P450 E1 mRNA (rat kidney), **186**, 846
 pretranslational induction of pentoxifyresorufin *O*-dephentylase (rat), **185**, 676
- Pyridine nucleotides**
 hydrolysis, inhibition by butylated hydroxytoluene, prevention of cumene hydroperoxide-induced Ca²⁺ release from hepatic mitochondria (rat), **185**, 698
- Pyrimidines**
 dimers, XPD cell nucleosomal DNA with, DNA endonuclease complex defective in incising, isolation (hu-

man), **189**, 782

Pyrogenesis

induction by endothelin in conscious rabbit, **186**, 1322

Pyrophosphatases

inorganic, computer-assisted structural analysis (*Saccharomyces cerevisiae*, *S. pombe*), **186**, 122

Pyruvate

inactivation of *Escherichia coli* 5-enolpyruvylshikimate 3-phosphate synthase in presence of sodium cyanoborohydride, **185**, 317

—malate antiporter, detection in mitochondria (rat liver), **182**, 931

substrate inhibition of lactate dehydrogenase, decrease via Thr246 mutations (*Bacillus stearothermophilus*), **182**, 1309

transport across plasma membrane in *Trypanosoma brucei* bloodstream form, mediation by facilitated diffusion carrier, **184**, 1028

Pyruvate dehydrogenase

insulin signaling to, role of carboxy terminal 110 amino acid portion of insulin receptor (NIH 3T3 cells), **189**, 906

Pyruvate kinase

L-type, encoding gene
promoter elements, binding to transacting factors *in vitro*, **189**, 1119
structural analysis and identification of promoter activity in erythroid cells (human), **188**, 516

6-Pyruvoyltetrahydropterin synthase

cDNA cloning and heterologous expression (human liver), **189**, 1437

monoclonal antibodies, production and use in immunocytochemical localization of enzyme (human pituitary), **182**, 810

purification and amino acid sequence analysis by tandem mass spectrometry (salmon liver), **182**, 953

Q

Quercetin

and analogs, inhibition of phosphatidylinositol 3-kinase (bovine brain), **186**, 624
induced suppression of heat shock gene expression and thermotolerance development in HT-29 cells, effect of pH (human), **186**, 1121

Quinacrine

inhibition of amylase secretion from intact and permeabilized pancreatic acini (rat), **184**, 408

Quinine

in [³H]mepyramine binding assay, for separate determination of histamine H₁ receptor and mepyramine-binding protein (bovine brain), **189**, 378

Quinobene

synthesis and identification as potent anti-HIV agent (CEM cells), **187**, 1409

Quinones

marine and synthetic, effects on protein-tyrosine kinase activity of pp60^{v-src}, **184**, 765

Quisqualate receptors

AMPA-insensitive, mediation of stimulation of NO-dependent cGMP formation in cultured astrocytes

(rat), **182**, 1362

R

Radiation

ionizing, resistance in oncogene-transformed cells, correlation with changes in biochemical pathways of mitogenic signal transduction (murine fibroblasts), **183**, 652

synchrotron orbital, in small angle X-ray scattering study of glutenin high molecular weight subunit: structural anisotropy (wheat), **186**, 1057

Radiation inactivation

in determination of
erythrocyte water channel protein functional size *in situ* (rabbit), **184**, 1331
size of functional phospholipase A₂ from leukemia cells (human), **183**, 121

Radio frequency spectrometry

in whole rat electron paramagnetic resonance imaging of nitroxide free radical, **183**, 829

Radioimmunoassay

hypersensitive, for islet amyloid polypeptide, establishment with antiserum specific for N-terminal region, **186**, 1065

Ramipril

neointimal antiproliferation effect after endothelial denudation of carotid artery, mediation by kinins (rat), **182**, 283

Rapamycin

binding protein, 25-kDa, cDNA cloning (human hippocampus), **184**, 733

and FK-506, binding protein, cDNA isolation (human), **185**, 298

inhibition of p70 S6 kinase phosphorylation in interleukin-2- and mitogen-activated T cells (human), **186**, 1315

Ra-reactive factor

32-kDa polypeptide component, identity with mannose-binding protein (human), **183**, 645

Reconstitution

apomyoglobin with extended biliverdins (equine heart), **183**, 1209

Recoverin

cDNA isolation (human retina), **187**, 234
family member hippocalcin, molecular cloning and selective expression in hippocampus (rat), **189**, 511
related Ca²⁺-binding protein, isolation and characterization (rat brain), **183**, 245

Rectification

inward, suppression by glutamine-to-histidine point mutation in glutamate receptor GluR1 subunit (*Xenopus laevis* oocyte), **182**, 1089

Redox cycling

glutathione conjugates of *tert*-butyl hydroquinone, role in butylated hydroxyanisole toxicity, **189**, 309

Red pigment-concentrating hormone

—adipokinetic hormone family, Trp-substituted neuropeptide belonging to, isolation from corpus cardiacum (*Carausius morosus*), **189**, 1303

Subject Index

Reduction

- by S-aminoethylcysteine ketimine and related sulfur-containing ketimines, analysis, **183**, 481
- based dehalogenation of tetrachloro-*p*-hydroquinone by *Flavobacterium* extract, identification of glutathione as reducing agent, **182**, 361
- biliverdins to bilirubins, effects of conformation and basicity, **188**, 48
- driven polypeptide folding, ΔT_f mechanism, **188**, 611
- oxidation, nitroxide radicals, *in vivo* effects of inspired oxygen concentration (mouse), **182**, 1108

Relaxin

- direct stimulation of cardiac atrial activity *in vitro* (rat), **186**, 999

Renaturation

- cerebral myelin proteins by octyl glucoside detergent (human), **189**, 1534

Reperfusion

- ischemia
 - induced hepatic injury, therapeutic effects of superoxide dismutase derivatives modified with mono- or polysaccharides (rat), **189**, 191
 - induced myocardial injury, protective effect of tumor necrosis factor- α pretreatment (rat), **184**, 1056

Replication

- defective LZ10 virus, infection of feather buds, associated production of localized region of β -galactosidase activity (chicken), **186**, 1020
- DNA in UV-irradiated *Escherichia coli*, daughter strand gaps in leading and lagging strands, size measurement, **184**, 1496

HIV-1 in

- lymphocytes, inhibition by short peptides derived from viral protease terminal segments, **184**, 980
- T cells, inhibition by statine-based tripeptides (human), **188**, 873
- mitochondrial plasmids by rolling circle mechanism, evidence from electrophoretic profiles (*Neurospora crassa*), **186**, 1669
- Sendai virus in infected cells *in vitro*, inhibition by glutathione (monkey kidney), **188**, 1090

Repressors

- associated region in β -myosin heavy chain gene, with partial dependency, detection (human), **189**, 504

Residual bodies

- activation of interleukin-1 α production in Sertoli cells (rat), **185**, 154

Resistance

- adriamycin, role of P-glycoprotein expressed in multidrug-resistant HOB1 lymphoma cells (human), **189**, 92
- insulin, granulocytes from patients with, phosphofructokinase 1 kinetics, **185**, 559
- multidrug, tumor cells with, detection of functionally active P-glycoprotein homodimer (human), **185**, 284
- oncogene-transformed cells to ionizing radiation, correlation with changes in biochemical pathways of mitogenic signal transduction (murine fibroblasts), **183**, 652
- thermal, *see* Thermotolerance

Respiratory burst

- macrophages, effect of interleukin-4, species dependence

(human, mouse), **182**, 727

neutrophil, associated NADPH oxidase, reconstitution with recombinant p47-*phox* and p67-*phox* and plasma membrane (human), **186**, 509

Respiratory chain enzymes, *see specific enzymes*

Respiratory deficiency

experimentally induced, affected HeLa cells, fluorescence microscopic and flow cytometric analysis, **187**, 991

Restriction fragment length polymorphisms

low-density lipoprotein receptor gene, association with obesity in essential hypertensives, **189**, 965

Reticulocytes

protein synthesis, inhibition by bovine corneal protease inhibitor (rabbit), **184**, 269

Retina

DNA fragmentation, association with retinal ganglion cell death (chicken embryo), **183**, 1056

expression of guanylate cyclase-A mRNA, detection by PCR (rat), **182**, 851

isolation of recoverin cDNA and gene (human), **187**, 234
rd mutant, vixinin as site of mutation, evaluation (chicken), **183**, 456

Retinoblastoma

gene product in myeloid leukemia cells, phosphorylation during cell cycle (human), **184**, 212

Retinoic acid

and activin, synergistic effect on *c-jun* mRNA levels in P19 embryonal carcinoma cells (mouse), **184**, 1350

adipocyte-specific response domain, S14 gene transcription-controlling, localization (3T3-L1 fibroblasts), **188**, 470

all-*trans* isomer

and all-*cis*- isomer and oxidized derivatives, differentiation-inducing activity in promyelocytic leukemia HL-60 cells (human), **189**, 1136

effect on leukotriene- C_4 synthase induction in differentiating erythroleukemia cells (human), **189**, 1043

antiestrogenic effect in breast cancer cells (human), **183**, 100
 cellular, binding protein type II, expression in adult osteoblasts and liver (human), **189**, 1397

effect on epidermal growth factor receptor expression in chondrocytes (rabbit), **183**, 14

enhancement of activin-induced erythroid differentiation of erythroleukemia cells (mouse), **187**, 347

regulation of

glutathione S-transferase gene expression in smooth muscle tumor cells (hamster), **184**, 1108

MyoD1 expression in myogenic limb buds in early developmental stages (chicken), **187**, 245

resistant and sensitive MCF-7 cells, insulin-like growth factor-binding protein-5 gene expression, differential regulation at post-transcriptional level (human), **188**, 1122

Retinoic acid receptors

α subtype, identification with monoclonal antibodies (human, mouse, rat), **182**, 1032

β 2 isoform, genomic organization (human), **188**, 695

biospecific adsorbent for affinity chromatographic purification, synthesis (human), **187**, 711

nuclear, subtype γ , synthetic retinoids selective for, identi-

Subject Index

- fication (human), **186**, 977
 -retinoid X receptor heterodimer, activation of retinoic acid response element from cellular retinol-binding protein I (rat), **187**, 1558
 Retinoic acid response element
 from cellular retinol-binding protein I, activation by RAR/RXR heterodimer (rat), **187**, 1558
 Retinoids
 synthetic, selective for nuclear retinoic acid receptor γ , identification (human), **186**, 977
 Retinoid X receptors
 -retinoic acid receptor heterodimer, activation of retinoic acid response element from cellular retinol-binding protein I (rat), **187**, 1558
 Retinol, *see* Vitamin A
 Retroviruses
 amphotropic, with hybrid LTR, construction as tool for gene therapy of cystic fibrosis, **187**, 187
 related sequences, overexpression in advanced prostatic tumors (rat), **182**, 318
 U3-based vectors, in gene expression, evaluation, **184**, 330
 Reverse transcriptase, *see* RNA-directed DNA polymerase
 RFLP, *see* Restriction fragment length polymorphisms
 Rhamnose
 moiety of phosphoramidon, role in inhibition of endothelin-converting enzyme *in vivo* (rat), **186**, 1146
Rhizobium
 Δ -aminolevulinate uptake, limitation by peribacteroid membrane in legume nodules (French bean, soybean), **184**, 1324
Rhizoxin
 and other antimitotic agents, binding to fungal tubulins, selectivity (*Rhizopus chinensis*), **187**, 722
 Rhodamine-123
 sensitivity of adriamycin-resistant small cell pulmonary carcinoma cell line (human), **182**, 877
 Rhodopsin kinase
 farnesylation *in vivo* (rat), **183**, 468
 Riboflavin
 mediated photosensitized formation of 8-hydroxydeoxyguanosine in cellular DNA, analysis (murine lymphoma cells), **187**, 809
 Riboflavin synthetase
 encoding genes, correspondence with genes linked with *lux* genes of *Photobacterium leiognathi* (*Bacillus subtilis*), **186**, 690
 Ribonucleases
 S-peptide, and angiogenin, homologous N-terminal fragments: helix similarity, **182**, 1491
 S2 and S3, expression in Sf9 cells using baculovirus expression system (*Petunia inflata*), **187**, 299
 Ribonucleoside-diphosphate reductase
 associated protein R2, tyrosyl radical in, reaction with hydroxyurea, EPR stopped-flow analysis, **188**, 879
 Ribonucleotide reductase, *see also* Ribonucleoside-diphosphate reductase
 effect of 8-azidoadenosine (murine adenocarcinoma cells), **187**, 432
 from *Methanobacterium thermoautotrophicum*, identification, **184**, 1101
 Ribosomes
 inactivation by RNA *N*-glycosidases, differential requirement of ATP and extra-ribosomal proteins, **182**, 579
 70S, reactivation of denatured fungal glucose-6-phosphate dehydrogenase and *Escherichia coli* alkaline phosphatase (*Escherichia coli*), **183**, 774
 solubilization in reverse micelles (porcine liver), **186**, 1546
 Ribozymes
 hammerhead
 cleavage of prion pre-mRNA in complex cell-free model systems, characterization (hamster), **186**, 1171
 cleavage, role of exocyclic amino groups of conserved purines, **183**, 605
 triple, transcribed from single DNA template, role in cleavage of hepatitis B virus RNA, **189**, 743
 tRNA-embedded, trimming plasmid, construction, **186**, 1271
 Ribulose-bisphosphate carboxylase
 isolation and characterization from thermophilic hydrogen-oxidizing *Bacillus schlegelii*, **182**, 425
 Ricin
 blocked, residual binding capacity in immunoconjugates, role in immunoconjugate cytotoxicity (human lymphoid and lung carcinoma cells), **183**, 758
 RNA
 anti-sense, inhibition of major histocompatibility complex II gene expression in transgenic mouse, **186**, 832
 BC-1, purification and interaction with Bp-1 protein (mouse), **189**, 53
 binding proteins interacting with coding region of protein D sense RNA *in vitro*, identification (rat), **187**, 318
 cellular, from cultured OX8⁺OX22⁺ thoracic duct T cells, interleukin-10 cDNA clones from, synthesis and characterization (rat), **189**, 1
 Escherichia coli lac-derived, and HIV, single-stranded regions, 1,10-phenanthroline-copper complex as footprinting reagent for, **187**, 1503
 granulocyte/macrophage colony-stimulating factor, increase in irradiated cancer cells: stabilization through AU-rich region (human), **189**, 986
 hepatitis B virus, cleavage by three ribozymes transcribed from single DNA template, **189**, 743
 hydrolysis via oxyphosphorane intermediate, **187**, 1523
 messenger
 acidic fibroblast growth factor, 3' untranslated region, heterogeneity (bovine), **184**, 945
 acidic seminal fluid protein, characterization by cDNA cloning (bovine), **183**, 232
 activin β_A , regulation by cAMP in HT1080 cells (human), **182**, 773
 S-adenosylmethionine decarboxylase
 and ornithine decarboxylase, developmental expression in brain (mouse), **184**, 1114
 specific protein binding to 5' leader sequence (mouse), **189**, 424
 alternatively spliced form of thyrotropin receptor transcript, molecular cloning and sequencing (human), **188**, 1214
 amelogenin, alternative splicing, contribution to amelogenin heterogeneity (mouse), **188**, 1253
 angiotensin II receptor, expression regulation, assess-

Subject Index

- ment by competitive polymerase chain reaction (rat), **182**, 1094
- angiotensin II receptor subtypes AT_{1A} and AT_{1B}, differential expression and regulation in
- adrenal and liver (rat), **188**, 298
 - brain (rat), **185**, 688
 - tissues (rat), **446**, 446
- apolipoprotein B
- editing in liver, dietary and estrogen modulation (mouse), **188**, 135
 - editing *in vitro*, modulation by fasting and refeeding with high carbohydrate diet (rat), **183**, 899
 - levels in hepatocyte culture media, effects of epidermal growth factor (monkey), **186**, 199
- aromatase, formation by alternative use of tissue-specific exons 1 in skin fibroblasts (human), **189**, 1001
- ATP-citrate lyase, concentrations, regulation in rat liver, **189**, 264
- basic fibroblast growth factor, expression in granulosa and cumulus cells from *in vitro* fertilization patients, analysis by reverse transcription with nested PCR (human), **187**, 1227
- calcitonin carboxy terminal peptide CCP II, expression in normal thyroid tissue (human), **185**, 330
- c-fos*
- expression in FRTL5 thyroid cells, stimulation by endothelin-1 (rat), **184**, 231
 - induction by platelet-derived growth factor in aortic smooth muscle cell primary culture without elevation of intracellular Ca²⁺ levels (rat), **188**, 1198
- CHIP28 water channel, expression in renal cortex and inner medulla (rat), **188**, 1267
- c-jun*, levels in P19 embryonal carcinoma cells, synergistic effect of actin and retinoic acid (mouse), **184**, 1350
- c-myc*
- expression in normal hepatocytes and hepatoma cells, effects of extracellular matrix and cell density (rat), **184**, 825
 - induction by platelet-derived growth factor in aortic smooth muscle cell primary culture without elevation of intracellular Ca²⁺ levels (rat), **188**, 1198
- collagen type I subunit COL1A and glyceraldehyde-3-phosphate dehydrogenase, increased hepatic levels after carbon tetrachloride exposure, suppression by prostacyclin (rat), **185**, 981
- cytochrome P450 IID, regulation by acute phase mediators in liver of C3H/HeJ mouse, **182**, 617
- cytochrome P450 E1, alcohol-inducible form, elevation after pyridine administration (rat kidney), **186**, 846
- DNA topoisomerase I, in PCR assay of Topo I gene expression in camptothecin-11 acquired- and native-resistant tumor cells (human), **184**, 618
- dystrophin precursor, exon skipping and loss of intron hairpin structure due to gene partial deletion, **182**, 495
- encoded by C-erbA genomic locus, developmental expression (rat), **184**, 739
- endothelin-1, in isolated renal tubules, detection by reverse transcription and polymerase chain reaction (rat), **188**, 108
- endothelin₂ receptor, down-regulation by ET, role of decreased mRNA intracellular stability (rat osteosarcoma cells), **186**, 342
- endothelin receptor ET_A, cAMP-induced up-regulation in aortic smooth muscle cells (rat), **188**, 719
- endothelial leukocyte adhesion molecule-1, expression in endothelial cells, effect of NADPH oxidase inhibition (human umbilical vein), **184**, 1339
- env* gene of Friend retrovirus, translation, inhibition by oligonucleotides encapsulated in pH-sensitive liposomes, **183**, 879
- extracellular signal-regulated kinase 2, detection in T cells (human), **182**, 1416
- α-fetoprotein, variant, characterization (rat), **185**, 648
- G_oα, splice variant in haploid germ cells (male rat), **183**, 41
- β-galactosidase, cellular levels, comparison with enzyme activity in estimation of heterologous promoter activity (human), **189**, 912
- glucose transporter
- differential regulation in adipose tissue during hypermetabolic sepsis (rat), **183**, 417
 - levels in intestine, developmental changes (rat), **183**, 626
- GTP cyclohydrolase I, identification of multiple forms (human), **187**, 359
- guanylate cyclase-A, expression in retina, detection by PCR (rat), **182**, 851
- guanylate cyclase-coupled natriuretic peptide receptors GC-A and -B, colocalization in tissues (rat), **189**, 610
- hepatic selenoproteins, differential regulation in selenium deficiency (rat), **185**, 260
- hepatocyte growth factor
- expression in lung after distal organ injuries (rat), **182**, 802
 - and HGF receptor mRNA, expression in renal epithelial and mesangial cells (rat), **182**, 960
 - induction in intact kidney and spleen in response to distant organ injury (rat), **186**, 991
- HG12, homologous to yeast ribosomal protein YL41, characterization by cDNA cloning (human), **187**, 901
- ileal Poly A⁺, microinjection of *Xenopus* oocytes, induction of conjugated bile acid uptake (guinea pig, rabbit), **186**, 1455
- inflammatory cytokines, expression in nasopharyngeal carcinoma cell lines, heterogeneity (human), **187**, 121
- insulin-like growth factor binding protein-1, levels in H4IIE hepatoma cells, effects of phorbol esters and insulin (rat), **182**, 262
- insulin-like growth factor binding protein-2, post-transcriptional regulation in diabetic liver (rat), **189**, 1031
- interleukin-1 receptor type I, levels in dermal fibroblasts from patients with systemic sclerosis, **184**, 1504
- isoaspartyl protein carboxyl methyltransferase, alternative splicing: generation of C-terminal -RDEL sequence in isozyme II (human), **185**, 277
- KC gene product, expression in pulmonary macrophages and fibroblasts (rat), **184**, 922
- lipoprotein lipase, splicing defect due to G→C change at intron 1, role in LPL deficiency in southern-Italian

Subject Index

- family, **187**, 620
- lymphokines, up-regulation, correlation with down-regulation of TcR, CD4, CD8, and lck mRNA: cyclosporin A effect on activated T cells (human), **186**, 603
- microtubule-associated protein MAP1B, embryonic α -tubulin, and late neural β -tubulin, expression in aged hippocampus (rat), **184**, 292
- multiple growth factors, expression in adipocyte precursor cells (chicken), **187**, 1298
- Na^+ , K^+ -ATPase α and β subunits, expression in myometrium, regulation during pregnancy (rat), **188**, 1191
- neurofibromatosis type I, two types expressed in gastric cancers, GTPase-activating protein activities (human), **187**, 332
- nuclear poly(ADP-ribose) polymerase, levels in carcinogen-initiated primary hepatocytes, effects of tumor promoters (neonatal rat), **182**, 1066
- platelet-derived growth factor A chain, identification and regulated expression during development and by angiotensin II (rabbit), **184**, 811
- platelet-derived growth factor B chain, levels in cultured vascular endothelial cells, effects of high glucose and hyperosmolarity (human), **187**, 664
- poly(A)⁺, from calcitonin-secreting cell line, *Xenopus* oocytes injected with, expression of Ca^{2+} receptors (rat), **184**, 1235
- precursor
- prion, cleavage by hammerhead ribozyme in complex cell-free model systems, characterization (hamster), **186**, 1171
 - self-splicing of group I intron, identification of 2'-amino-2'-deoxyguanosine as cofactor, **183**, 842
- pro-opiomelanocortin, in hypothalamus and pituitary, effect of adrenalectomy (rat), **186**, 418
- protein kinase A subunit RI α , half-lives, regulation in response to inhibition of transcription and translation (rat Sertoli cells), **184**, 454
- protein kinase A subunit RIIB, stabilization by inhibitors of RNA and protein synthesis in cytoplasmic and nuclear compartments (rat), **183**, 632
- protein kinase C, levels and activity in reconstituted normal epidermis, relationship to cell differentiation (human), **184**, 283
- protein-tyrosine phosphatases, differential regulation by insulin and protein kinase C activation (rat), **188**, 1305
- scavenger receptors, expression on renal cell carcinoma cells *in vitro* (human), **189**, 1323
- L-serine dehydratase, expression in hepatoma cells (human, rat), **188**, 336
- TAPA-1, expression in preimplantation embryos (mouse), **186**, 1201
- tenascin, alternative gene splicing products, in differentiation of hepatic fat-storing cells from smooth muscle cells and dermal fibroblasts (rat), **185**, 768
- thymidine kinase, transcription initiation and temporal expression in Chinese hamster cells, **184**, 908
- thyrotropin receptor 1.3-kb variant lacking transmembrane domain, cloning and sequencing (human), **187**, 1135
- thyrotropin-releasing hormone, detection by reverse transcription-polymerase chain reaction in normal and tumoral anterior pituitary (human), **182**, 182
- thyrotropin-releasing hormone receptor, differential regulation by thyroid hormone *in vivo* and *in vitro* (rat), **184**, 367
- tissue transglutaminase, levels in endothelial cells, cell cycle-dependent changes (bovine), **187**, 14
- tyrosine hydroxylase, detection in pituitary anterior and neurointermediate lobes (female rat), **189**, 1716
- in vesicular stomatitis virus-infected cells, selective translation, role of 5' sequence of viral nucleocapsid gene (human), **189**, 1585
- ribosomal
- 5S, and medRNA, encoding genes: tandem arrangement and phylogenetic analysis (*Bodo caudatus*), **182**, 1053
 - 5S and 23S, encoding genes, detection of tandem repeat in Lyme disease etiological agent *Borrelia burgdorferi*, **183**, 952
 - large, of mitochondrial origin in pigmented cells, nucleotide sequence (goldfish), **189**, 445
- synthesis in aortic vascular smooth muscle cells, basal and angiotensin II-induced, blockage by verapamil (rat), **183**, 767
- transcription from T₇ bacteriophage early promoter region, inhibition by oligonucleotide triple helix formation, **189**, 1674
- transfer
- aspartic acid
 - associated recognition mechanism in *Escherichia coli* and yeast, comparison, **189**, 856
 - complexed with aspartyl-tRNA synthetase, footprinting analysis (yeast), **186**, 956
 - embedded-ribozyme trimming plasmid, construction, **186**, 1271
 - HIV-1_{III}B, cell type-dependent variability, **185**, 1005
 - isoleucine, mitochondrial DNA carrying mutation in, identification in patient with fatal cardiomyopathy, **186**, 47
 - selenocysteyl, recognition of UGA in *Beta vulgaris* and *Gliocladium virens*, **184**, 254
 - threonine, identity determinants (*Escherichia coli*), **184**, 478
- RNA I
- metabolism, alteration in temperature-sensitive *Escherichia coli* RNPA mutant, **186**, 1463
- RNA-directed DNA polymerase
- HIV-1
- inhibition by phosphorothioate oligonucleotide duplexes, **186**, 1249
 - p51 subunit, role in enzyme processivity, **184**, 986
 - structure-activity analyses (human), **183**, 1131
 - HIV-1 and HIV-2, sensitivity to inhibition by natural products, comparison, **185**, 370
 - related activity of duck hepatitis B virus polymerase produced by *in vitro* transcription and translation, **189**, 1170
- RNA N-glycosidases
- inactivation of ribosomes, differential requirement of ATP and extra-ribosomal proteins, **182**, 579
- RNA polymerase, *see* DNA-directed RNA polymerase

Subject Index

RNase

superfamily, related gene highly expressed in chicken bone marrow cells, cDNA isolation, **185**, 231

Ro 5-3335

inhibition of HIV-1 induction in infected T cells, **189**, 250

Rotenone

NADH-Q oxidoreductase inhibition by, relationship to superoxide generation and lipid peroxidation, **189**, 47

Rous sarcoma virus

transformation of rat hepatic epithelial cells, associated changes in cell attachment, **189**, 350

RU 31156

blockage of chloride channels (human, rat), **188**, 957

RU 5135

modulation of glycine receptor phosphorylation by protein kinase C (rat), **188**, 813

Ryanodine

³H-labeled, binding to

cardiac and skeletal ryanodine receptors, selective alteration by volatile anesthetics (pig), **186**, 595

junctional sarcoplasmic reticulum Ca²⁺ release channels, effect of hydantoin muscle relaxants (pig), **187**, 894

¹²⁵I-labeled derivative, synthesis and biochemical properties, **183**, 462

Ryanodine receptors

cardiac and skeletal, [³H]ryanodine binding to, selective alteration by volatile anesthetics (pig), **186**, 595

role in osteoclast signal transduction (rat), **188**, 1332

S

Saccharomyces cerevisiae

aging cells, generation time, effect of 17 β -estradiol, **183**, 1191

coexpression of human oxidoreductase and cytochrome P450 1A1 in, associated increase in 7-ethoxyresorufin-O-deethylase activity, **185**, 641

expressed incomplete process of platelet-derived growth factor, effect on biological activity, **187**, 1193

expression and anchoring of murine cytochrome P450 1A1, sequences controlling, analysis, **184**, 1490

functional expression of rat M5 muscarinic acetylcholine receptor, **182**, 1180

maintenance of centromeric vector in, interference by mammalian and viral DNA sequences, **187**, 737

α -mating factor receptor-dependent suppression of RAS-linked adenylyl cyclase, role of RAS2 and G-protein α -chain expression, **184**, 1378

production of soluble and secreted antigenic fragment of HBsAg, **184**, 50

protein splicing of vacuolar membrane H⁺-ATPase catalytic subunit VMA1 in, inhibition by junction site mutations (yeast), **188**, 40

and *S. pombe*, associated inorganic pyrophosphatases, computer-assisted structural analysis, **186**, 122

thioltransferase gene, cloning and sequencing, **187**, 949

treated with 6-amino-2-n-pentylthiobenzothiazole, ergosterol depletion and 4-methyl sterol accumulation in, **189**, 85

Saccharomyces pombe

and *S. cerevisiae*, associated inorganic pyrophosphatases, computer-assisted structural analysis, **186**, 122

Saposin

primary structure (mouse), **184**, 1266

Sarafotoxin

S6C, encoding gene, cloning and sequencing (*Atractaspis engaddensis*), **189**, 1527

Sarcoplasmic reticulum

depolarization-induced calcium release *in vitro*, characterization with membrane potential probe (rabbit), **184**, 538

skeletal muscle

histidine-rich Ca²⁺-binding protein, low-affinity Ca²⁺ and Zn²⁺ binding sites in, analysis (rabbit), **186**, 659

localization of fast-twitch skeletal muscle Ca²⁺-ATPase isoform SERCA1a (chicken), **186**, 219

Saxitoxin

and related paralytic shellfish poisoning toxins, and induced soluble proteins, in screening for toxic shellfish, analysis (butter clam), **184**, 511

Scavenger receptors

expression on renal cell carcinoma cells *in vitro* (human), **189**, 1323

Schizosaccharomyces pombe

cadystin synthesis, induction by wounds in cell wall and incubation with chitosan, **188**, 388

permeabilized cell, protein transport, **186**, 838

Scleroderma

derived fibroblasts, collagen gene expression, effect of transforming growth factor β 1 (human), **187**, 45

Sclerosis

systemic, dermal fibroblasts from affected patients, interleukin-1 receptor type I mRNA and expressed protein levels, **184**, 1504

Secretin

precursor gene, tissue-specific expression (rat), **183**, 390

Secretory granules

insulinoma, Ca²⁺-dependent paired-basic processing endopeptidase, fluorometric assay (rat), **183**, 1

neurohypophysial, distinct dibasic processing endopeptidases with Lys-Arg and Arg-Arg specificities, identification (bovine, rat), **183**, 128

Seeds

22-kDa antifungal protein, isolation and characterization (maize seeds), **182**, 1

E-Selectin

ligand sialyl-Lewis x, human α -1,3 fucosyltransferase capable of forming, cloning and expression, **187**, 152

multi-recognition capability in dynamic flow system, analysis, **189**, 1686

recombinant, mediation of tumor cell adhesion via sialyl-Lea and sialyl-Lex (human), **182**, 1376

and L-selectin

dependent tumor cell adhesion to endothelial cells and platelets, inhibition by blocking O-glycosylation (human), **182**, 1288

ligand specificities, comparison: L-selectin binding to E-selectin ligands sialyl Le^x and sialyl Le^a, **184**, 1048 and P-selectin, binding to myeloid cells, effect of *Pasteurella haemolytica* A1 glycoprotease (human), **188**, 760

Subject Index

- soluble form, detection in supernatants of cytokine-activated endothelial cells (human), **187**, 584
- transfected endothelia, binding to colon carcinoma cells (human), **189**, 315
- L-Selectin**
- antibodies, inhibition of neutrophil-glomerular endothelial cell adhesion and transcellular leukotriene biosynthesis, **186**, 1307
 - high-affinity binding to 3'-sulfated-Le^a and -Le^x oligosaccharides, adhesive specificity, role of sulfate, **188**, 244 and E-selectin
 - dependent tumor cell adhesion to endothelial cells and platelets, inhibition by blocking O-glycosylation (human), **182**, 1288
 - ligand specificities, comparison: L-selectin binding to E-selectin ligands sialyl Le^x and sialyl Le^a, **184**, 1048
- P-Selectin**
- binding to memory T cell and natural killer cell subpopulations (human), **186**, 173
 - and E-selectin, binding to myeloid cells, effect of *Pasteurella haemolytica* A1 glycoprotease (human), **188**, 760
- Selenium**
- binding protein, 56-kDa, covalent binding of acetaminophen metabolite, **182**, 1348
 - deficient diet, association with differential regulation of hepatic selenoprotein mRNAs (rat), **185**, 260
- Selenocysteine**
- tRNA, recognition of UGA in *Beta vulgaris* and *Gliocladium virens*, **184**, 254
- Selenoproteins**
- 56-kDa, covalent binding of acetaminophen metabolite, **182**, 1348
 - mRNAs, differential regulation in selenium deficiency (rat liver), **185**, 260
- Selenouracil**
- derivatives, inhibition of selenoenzyme type I iodothyronine deiodinase, **189**, 1362
- Seminal vesicles**
- phosphatidylinositol-specific phospholipase C α , identification as proteolytic fragment of PI-PLC δ (sheep), **188**, 1176
- Sendai virus**
- in direct *in vivo* gene introduction into kidney (rat), **186**, 129
 - replication and protein expression in infected cells *in vitro*, inhibition by glutathione (monkey kidney), **188**, 1090
- Sepsis**
- hypermetabolic, associated glucose transporter gene expression, differential regulation in adipose tissue (rat), **183**, 417
 - and septic shock, prophylaxis, application of monophosphoryl lipid A, **182**, 269
- Serine**
- analogs of FSH- β -(33-53) and FSH- β -(91-95), inhibitory effect on FSH binding to receptor (human), **184**, 1273
 - position 54 in interleukin-6, phosphorylation in fibroblasts: early event in secretory pathway (human), **185**, 524
 - substitution for cysteines 494 or 569, effects on TSH receptor activity and response to thyroid-stimulating autoantibodies (rat), **189**, 1754
- L-Serine dehydratase**
- mRNAs I and II, expression in hepatoma cells (human, rat), **188**, 336
 - and tyrosine aminotransferase, differential expression in liver after partial hepatectomy (rat), **182**, 753
- Serine proteinase**
- extracellular, proteolytic activation of hepatocyte growth factor single-chain precursor, **189**, 1631
- Serology**
- in characterization of *Plasmodium vivax* recombinant antigen with apolipoprotein B-100-like sequences, **184**, 668
- Serotonin**
- stimulation of Ca²⁺ permeant nonspecific cation channel in hepatic endothelial cells (rat), **186**, 1560
- Serotonin receptors**
- 5-HT_{1B}
 - gene cloning and expression (human), **185**, 517
 - molecular cloning and characterization: 5-HT_{1D}-like pharmacological specificity (human), **184**, 752
- Serotonin transporters**
- imipramine-sensitive, differential regulation by cAMP in Jar choriocarcinoma, PC12 pheochromocytoma, and C33-14-B1 fibroblast cells, **183**, 487
- Sertoli cells**
- germ cell-mediated stimulation, second messenger pathway (rat), **184**, 217
 - immunosuppressive molecules produced by, effects on lymphocytes (mouse), **186**, 1639
 - interleukin-1 α production, activation by lipopolysaccharide, latex beads, and residual bodies (rat), **185**, 154
- Serum, see also Blood, Plasma**
- activin/EDF levels, measurement: extragonadal production (mouse), **188**, 921
 - detection of insulin-like growth factor binding protein (horse), **189**, 1255
 - DNase I, functional characterization in MRL^{-lpr/lpr} mouse, **186**, 739
 - effect on protein kinase C intracellular distribution in aortic endothelial cells (bovine), **189**, 40
 - lipopolysaccharide complex, role in translocation of G protein to membrane and priming of neutrophils via CD14 (human), **183**, 1280
 - mannose-binding protein and Ra-reactive factor, isolation and properties (human), **183**, 645
 - normal and chronic renal failure-derived, detection of erythroid differentiation factor/activin A (human), **183**, 273
 - starvation, induced growth arrest in cultured cells, regulating effect on multidrug resistance 1 promoter (human), **183**, 917
- Serum amyloid P**
- distribution in Alzheimer brains, comparison with complement C4-binding protein distribution, **186**, 461
- Sex reversal**
- C57BL/6J-Y^{DOM}, role of amino acid change in Sry DNA-binding region (mouse), **185**, 310
- Shear stress**
- activation of calcium channel in cultured renal distal tubule cells (*Xenopus laevis*), **184**, 198

Subject Index

- wall, high and low, selectin-mediated cell adhesion at, differential effects of anti-carbohydrate antibodies and sialidases, **189**, 1686
- Shock
- heat-induced, *see* Heat shock
 - septic, prophylaxis, application of monophosphoryl lipid A, **182**, 269
- Sialic acids
- ¹⁴C-labeled, in ganglioside GM3, kinetics and organ distribution after intravenous injection (rat), **189**, 1410
 - detection in cell adhesion molecule contact site A (*Dictyostelium discoideum*), **188**, 794
- Sialidase, *see* Exo- α -sialidase
- Sialoglycoproteins
- gp60, endothelial albumin-binding, and glycophorin gp3, common epitopes (rat), **187**, 1158
 - lysosomal, 85-kDa, cDNA cloning and sequencing from metastatic islet tumor cell line (human), **184**, 604
- Sialylation
- O-glycans in cultured C6 glioma cells: regulation of β -galactoside α 2,3 sialyltransferase by Ca²⁺/calmodulin antagonists and phosphatase inhibitors (rat), **186**, 1575
- Sialyl-Lewis x
- human α -1,3 fucosyltransferase capable of forming, cloning and expression, **187**, 152
- Sialylparagloboside
- as viral receptor, reconstituted phosphatidylcholine liposomes, membrane fusion with influenza virus, **186**, 378
- α 2,3 Sialyltransferase, *see* β -Galactoside α -2,3-sialyltransferase
- Signal transduction
- associated region of CD4-like and *lck* genes, expression in egg (mouse), **182**, 527
 - erythropoietin receptor cytoplasmic domain essential for, identification (mouse), **186**, 1236
 - in extracellular domains of erythropoietin receptor, role of tryptophan residue of Trp-Ser-X-Trp-Ser motif (mouse), **184**, 485
 - through Fc γ and complement receptors, role of Ca²⁺ (human neutrophils), **185**, 246
 - by G_i-coupled receptors, implications of differential regulation of cAMP by endogenous and transfected formylpeptide chemoattractant receptors (human), **183**, 1033
 - GTP-binding protein system, augmentation of transient low-threshold Ca²⁺ current in GH₃ pituitary cells (rat), **187**, 529
 - by insulin receptor, role of phosphatidylinositol 3-kinase (rat), **189**, 1024
 - intracellular, for interleukin-1 β -induced endothelin production in umbilical vein endothelial cells (human), **188**, 565
 - mitogenic, identification as target of oncogenes inducing radioresistance (murine fibroblasts), **183**, 652
 - neuropeptide Y1 receptor in SK-N-MC cells, different systems (human), **187**, 1565
 - in osteoclasts, role of ryanodine receptor (rat), **188**, 1332
 - related pathways, angiotensin II AT_{1A} receptor coupling with, analysis (rat), **186**, 1094
- Silver
- toxicity to Na,K-ATPase and isolated human lymphocytes, protective effects of cysteine, **189**, 1444
- Simian immunodeficiency virus
- gp32, N-terminal fusogenic domain, apolipoprotein A-I interaction with, implications for viral entry, **186**, 95
- Single-nucleotide primer extension
- and mispairing PCR-RFLP, in detection of point mutation in mitochondrial ND2 gene, comparison (human), **189**, 1202
- Single-strand conformation polymorphism
- in identification of polymorphism changing glycine to arginine at position 545 of type X collagen, **187**, 420
- Skeletal muscle
- associated calpastatin, inhibitory efficiency, modulation by phosphorylation (rat), **187**, 751
 - 2-deoxyglucose transport, basal and insulin-stimulated, effect of sphingoid bases (rat), **188**, 358
 - diabetic, Ca²⁺-channel and adrenoceptor status in, analysis (rat), **184**, 353
 - dihydropyridine receptors, binding of [³H]PN200-110, inhibition by dantrolene and azumolene (pig), **187**, 894
 - from endurance athletes, respiratory chain enzymes, effects of L-carnitine, **188**, 102
 - fast-twitch, Ca²⁺-ATPase isoform SERCA1a in, localization to sarcoplasmic reticulum and nuclear envelope of myotubes (chicken), **186**, 219
 - forearm, glycogen phosphorylase deficiency, associated metabolic anomalies, ³¹P NMR study (human), **185**, 16
 - GLUT4 translocation and glucose transport, effects of epinephrine (rat), **187**, 685
 - phosphoinositide metabolism, effect of high K⁺ exposure (frog), **182**, 767
 - in resting and exercised rats, protein oxidation, effect of vitamin E, **189**, 801
 - ryanodine receptors, [³H]ryanodine binding to, selective alteration by volatile anesthetics (pig), **186**, 595
 - skinned fibers, Ca²⁺-induced Ca²⁺ release, enhancement by calpain (rabbit), **185**, 713
 - specific expression of ventricular cDNA Myomy (rat), **183**, 176
- SK&F 96365
- inhibition of histamine-induced formation of endothelium-derived relaxing factor in endothelial cells (human umbilical cord), **186**, 1539
- S6 kinase
- p70, phosphorylation in interleukin-2- and mitogen-activated T cells, inhibition by rapamycin (human), **186**, 1315
- Skin
- cytochrome P450 Cyp1a-1 induction, phorbol ester-mediated suppression, role of protein kinase C (mouse), **186**, 970
 - feather buds, infection by replication-defective LZ10 virus, associated production of localized region of β -galactosidase activity (chicken), **186**, 1020
 - inflammation, blocking by phospholipase A₂ inhibitor BMS-181162 (mouse), **189**, 272
 - phosphatidylinositol hydrolysis, mediation by angiotensin II binding to Ang II receptors and differential effects of receptor subtype (rat), **186**, 285
 - wound healing, associated changes in angiotensin II receptors (rat), **187**, 1083

Subject Index

Smooth muscle

- ATP-dependent interaction of actin and myosin, regulatory effect of myosin light chain kinase (bovine stomach), **184**, 1204
- bronchial, histamine-mediated contractions *in vivo*, enhancement by low-concentration endothelin-1 (guinea pig), **187**, 717
- duodenal, contractile activity of motilin, peptide sequence determining, identification (rabbit), **183**, 36
- mammalian, SR 48968 non-peptide antagonist, selectivity for neurokinin A receptors, **184**, 1418
- myosin light chain kinase, substrate-based inhibitors (bovine, chicken, swine), **185**, 379
- myosin MgATPase, actin-activated, mechanism of inhibition by calponin (rabbit), **187**, 867

vascular

- Ca²⁺ mobilization, stimulation by endothelin-1 and -3, mechanisms (rat aorta), **183**, 694
- coronary arterial strips with intact endothelium, contraction, effect of endothelin-1 (pig), **184**, 518
- injury, subsequent neointima formation, mediation by angiotensin II (rat carotid artery), **187**, 1510
- low-density lipoprotein receptor induction by cAMP-elevating agents, enhancement by lysosome inhibitors (human), **182**, 830
- PDGF-A chain gene transcripts, identification and regulated expression during development and by angiotensin II (rabbit), **184**, 811
- relaxation, role of stimulated endothelial G-proteins (pig), **189**, 324
- rho* p21 activation in, regulation, cooperative function of *rho* GDS and *rho* GDI (bovine aorta), **185**, 473
- RNA synthesis, basal and angiotensin II-induced, blockage by verapamil (rat aorta), **183**, 767
- sustained contraction, role of calponin and caldesmon (pig), **187**, 847
- thoracic aorta, vasorelaxation produced by release of nitroxyl from *N,O*-diacylated-*N*-hydroxyarylsulfonamides (rabbit), **187**, 1367
- venous, detection of vasoconstrictor ET_B-like receptors (dog, monkey, rabbit), **184**, 100

Smooth muscle cells

- accumulating in neointimas and media of poststenotic dilatation of carotid artery, phenotype (rabbit), **185**, 459

aortic

- Ca²⁺ influx through dihydropyridine-sensitive channels linked to protein kinase C activation, enhancement by glucocorticoids (rat), **188**, 934
- c-fos* and *c-myc* mRNA induction by platelet-derived growth factor in primary culture without elevation of intracellular Ca²⁺ levels (rat), **188**, 1198
- protein and DNA synthesis, effects of platelet-derived growth factor AA homodimer in normal and spontaneously hypertensive rats, **188**, 524
- responsiveness to endothelin-1 and ET_A receptor mRNA expression, effects of cAMP (rat), **188**, 719
- arterial, distinguishing from hepatic fat-storing cells and dermal fibroblasts by alternative splicing products of tenascin gene (rat), **185**, 768
- atrial natriuretic factor-stimulated cGMP production, inhibition by endothelin via protein kinase C activation (rat aorta), **182**, 395

- [Ca²⁺]_i and thymidine incorporation into DNA, effect of lysolecithin (rat), **183**, 156

- coronary artery, microsomes, NO generation from organic nitrates, comparison (bovine), **185**, 932

- expression of platelet-derived growth factor chain A gene, induction by oxidized low-density lipoproteins (human), **186**, 1410

- phosphoinositide and calcium signalling responses, effects of lipoproteins, angiotensin II, and platelet-derived growth factor (human), **188**, 1295

vascular

- angiotensin II-stimulated, diacylglycerol formation from phosphatidylcholine (rat thoracic aorta), **187**, 1460

- calcium channel currents, blockade by tyrosine kinase inhibitors (rabbit), **189**, 1620

- Ca²⁺ mobilization, effect of interaction of *S*-nitrosothiols and endothelin-1 (rat), **183**, 849

- cGMP production *in vitro*, stimulation by C-type natriuretic peptide: structural requirements (rat aorta), **183**, 964

- growth in response to elevated glucose (pig), **187**, 552
- pp42 and pp44 protein kinases, stimulation by angiotensin II *in vitro* (rat), **188**, 257

proliferation

- fucoidan as nonanticoagulant inhibitor (bovine, rat), **184**, 773

- inhibition by interferon- γ through NO generation (rat), **188**, 409

SN-38, *see* 7-Ethyl-10-hydroxycamptothecin

Sodium

- dependent K⁺ efflux, moderation of volume regulation by cells in renal inner medullary slices exposed to hyperosmotic media (rat), **185**, 36

- H⁺ antiporter, role in induction and maintenance of cytosolic bone resorption and cytoplasmic spreading, **188**, 1097

-hydrogen exchange

- in cerebral capillary endothelial cells, inhibition by benzylguanidine derivative (pig), **184**, 112

- and proton transport, analysis in vesicles isolated from salmon kidneys during migration from salt to fresh water, **186**, 24

- intracellular, levels in embryonic heart cells, regulation *in vitro* (chicken), **186**, 674

- uptake in renal brush border membrane vesicles from hypertensive rats, effects of amiloride analogs, **183**, 55

Sodium arsenite

- inhibition of tumor necrosis factor- α -induced arachidonic acid release (C3HA fibroblasts), **188**, 177

Sodium butyrate

- coordinate regulation of estrogen receptor and prolactin receptor expression in breast cancer cells (human), **182**, 740

Sodium channels

- electroplax, domains III and IV, photolabeled sites with tetrodotoxin derivative in, analysis (*Electrophorus electricus*), **184**, 900

- primary structure, deduction from cDNA sequence (squid),

Subject Index

- 186, 61**
 α subunit from adult skeletal muscle, encoding gene on 17q, sequence and genomic structure (human), **182, 794**
 tertiary structure model (squid), **186, 1158**
- Sodium cyanoborohydride
E. coli 5-enolpyruvylshikimate 3-phosphate synthase in presence of, inactivation by substrate analog pyruvate, **185, 317**
- Sodium di-2-ethylhexylsulfosuccinate
 reverse micelles, lysozyme ozonation in presence of oleate, **187, 473**
- Sodium fluoride
 effect on endothelium-dependent pertussis toxin-sensitive relaxation in coronary artery (pig), **189, 324**
- Sodium pump, Sodium-potassium pump, *see* ATPase, Na^+, K^+
- Solubility
 pH-mediated, native δ -endotoxin crystals (*Bacillus thuringiensis* var. *san diego*), **184, 692**
- Solubilization
 ribosomes in reverse micelles, analysis, **186, 1546**
- Somatoliberin
 and somatostatin, regulatory effects on somatotropin secretion, inhibition by effectors of K(ATP) channels (rat), **187, 1007**
- Somatostatin
 analog SMS 201-995, growth-stimulatory effect on pancreatic carcinoid cells (human), **185, 577**
 effects on follicle-stimulating hormone secretion and $[\text{Ca}^{2+}]_i$ in FSH-secreting pituitary adenoma cells (human), **182, 1408**
 and pancreastatin, secretion by QGP-1N cells, role of interaction of cAMP pathway and phosphoinositide turnover system (human), **185, 1041**
 and somatoliberin, regulatory effects on somatotropin secretion, inhibition by effectors of K(ATP) channels (rat), **187, 1007**
- Somatostatin-14
 related peptides, isolation in brain (frog), **188, 477**
- Somatostatin receptors
 isolated from GH_4C_1 pituitary cells, partial amino acid sequence (rat), **184, 131**
- Somatotropes
 pituitary, cytosolic free calcium levels, effect of activin A (rat), **185, 974**
- Somatotropin
 secretion, regulatory effects of somatostatin and somatoliberin, inhibition by effectors of K(ATP) channels (rat), **187, 1007**
 triiodothyronine-induced production in cultured GC cells, enhancement by heat stress via action within 5'-flanking region of growth hormone gene (rat), **188, 638**
- Specificity determinants
 for casein kinase I, comparative efficiencies of Ser(P)-, Thr(P)-, and Tyr(P)- residues, **182, 1460**
- Spectrometry
 tandem mass, *see* Tandem mass spectrometry
- Spectrophotometry
 absorption, near-infrared, cytochrome *c* oxidase: evidence for band III analog, **184, 1035**
- Spectroscopy, *see also specific techniques*
 in analysis of hemoglobin from hemipteran *Buenoa mar- garitacea*, **187, 570**
 photothermal, in analysis of bacteriochlorophyll-lipo- chlorophyll complexes (*Chromatium minutissimum*), **186, 327**
- Spermatids
 acrosome, detection of calreticulin (rat testis), **186, 668**
- Spermatogenesis
 post-meiotic phase, associated expression of $\beta 1$ isoform of calcineurin regulatory subunit (rat), **187, 828**
- Spermatozoa
 acrosome reaction and histone degradation, pretreatment effects of egg jelly components (starfish), **187, 268**
 associated protein YWK-II, synthetic peptide segments, induction of infertility in immunized rat (human), **183, 538**
 flagellar motility, regulation by temperature-dependent phosphorylation of 43-kDa axonemal protein (chicken), **185, 740**
 high-molecular-mass proteases, purification (sea urchin), **182, 667**
 mitochondrial DNA detection and copy number determi- nation (sea urchin), **182, 1454**
 motility, inhibition by calreticulin antisera (mouse), **186, 984**
 nuclei, isolation of P2 protamines identified as zinc finger proteins with Cys2/His2 motif (human), **182, 540**
 phospholipase A_2 , purification and partial amino acid sequence (human), **182, 208**
- Spermidine/spermine N^1 -acetyltransferase, *see* Diamine *N*- acetyltransferase
- Spermine
 effect on superoxide production induced by *N*-formyl- methionyl-leucyl-phenylalanine in electroporabili- zed neutrophils (human), **182, 20**
- Spheroplasts
 permeabilized, protein transport (*Schizosaccharomyces pombe*), **186, 838**
- Sphinganine
 desaturation during sphingolipid biosynthesis in cultured cells, analysis, **189, 14**
 effect on basal and insulin-stimulated 2-deoxyglucose transport in skeletal muscle (rat), **188, 358**
- Sphingolipids
 biosynthesis: desaturation studies in neuroblastoma cells, **189, 14**
- Sphingosine
 dual modulation of protein kinase C in vesicle system, mechanism, **187, 635**
 effect on basal and insulin-stimulated 2-deoxyglucose transport in skeletal muscle (rat), **188, 358**
 ^3H -labeled, in ganglioside GM1, kinetics and organ dis- tribution after intravenous injection, analysis (rat), **189, 1410**
 and psychosine, regulation of phosphoinositide hydrolysis in cultured astrocytes (rat), **186, 790**
- SPKK motif
 acridine-linked peptide with, selective binding to AT sequence in DNA, **184, 930**

Spleen

- alternative amelogenin primary RNA transcript, contribution to amelogenin heterogeneity, **188**, 1253
- alternative NMDA isoforms generated by, structure and properties (rat forebrain), **185**, 826
- foam cells, overexpression of apolipoprotein E in absence of hypercholesterolemia (rabbit), **183**, 514
- intact, hepatocyte growth factor mRNA induction in response to distant organ injury (rat), **186**, 991
- transgenic cells, MHC II gene expression, inhibition by anti-sense RNA (mouse), **186**, 832

Splicing

- alternative, tenascin gene, products from, in distinguishing hepatic fat-storing cells from arterial smooth muscle cells and dermal fibroblasts (rat), **185**, 768
- protein, processing of vacuolar membrane H⁺-ATPase catalytic subunit VMA1 by, inhibition by junction site mutations (yeast), **188**, 40
- regulatory intron of L1 ribosomal protein gene, *in vitro* efficiency, effect of suboptimal consensus sequences (*Xenopus laevis*), **183**, 680
- self-, in group I catalytic RNA, identification of 2'-amino-2'-deoxyguanosine as cofactor, **183**, 842

SQ 32,056

- and SQ 32,285 and SQ 32,602, effects on big endothelin pressor response in conscious rats, **182**, 224

2,3;22,23-Squalene dioxide

- formation by 2,3-oxidosqualene epoxidation by squalene epoxidase (porcine liver), **185**, 323

Squalene epoxidase, *see* Squalene monooxygenase

Squalene monooxygenase

- epoxidation of 2,3-oxidosqualene to 2,3;22,23-squalene dioxide (porcine liver), **185**, 323

SR 48968

- selectivity for neurokinin A receptors in mammalian smooth muscle, **184**, 1418

Staining

- differential, chromatin *in situ*, with species-specific satellite DNA probes via hybridization (human, mouse), **182**, 1313

Staphylococcus aureus

- genome, large restriction fragments, physical ordering with nonspecific primer and PCR-generated hybridization probes, **185**, 1055; *erratum*, **187**, 1200
- methicillin-resistant, leukocidin F-component gene, cloning and nucleotide sequence, **184**, 640

Statine

- based tripeptides, inhibition of HIV-1 replication in human T cells, **188**, 873
- HIV-1 proteinase inhibitors containing, potency and antiviral activity, **188**, 865

Staurosporine

- enhancement of platelet-activating factor formation in *N*-formyl peptide-challenged neutrophils, mediation by intracellular PAF binding sites (human), **189**, 771
- inhibition of p34^{cdc2} and p34^{cdc2}-like kinases in mammary carcinoma cells (mouse), **184**, 81

Stearoyl-CoA desaturase

- gene expression in lymphocytes and thymocytes (mouse), **186**, 531; *erratum*, **187**, 1201

Stem cell factor

- cDNA, deletion mutagenesis: C-terminal sequences essential for biological activity *in vitro* (mouse), **188**, 292
- embryonic, expression of tyrosine kinase *hyk* (mouse), **189**, 1747
- induction of histamine release by connective tissue-type mast cells (rat), **183**, 1076

Stereochemistry

- NADPH oxidation by dihydropyrimidine dehydrogenase (porcine liver), **182**, 609

Steroid hormone receptors

- thyroid hormone receptor superfamily, comparison of synthetic nuclear localization signal peptides, **182**, 289

Steroid Δ -isomerase

- tyrosine→glycine mutant, specific activation by phenols (*Pseudomonas testosteroni*), **184**, 1386

Steroidogenesis

- FSH-induced, in ovarian granulosa cells, inhibition by GnRH, role of diacylglycerol and Ca²⁺ (rat), **188**, 198

Sterols

- 4-methyl, accumulation in *Saccharomyces cerevisiae* treated with 6-amino-2-*n*-pentylthiobenzothiazole, **189**, 85
- overproduction by mutant, regulatory role of microsomal 3-hydroxy-3-methylglutaryl-CoA reductase (*Nicotiana tabacum*), **186**, 888
- plant, plasma levels, in determination of intestinal sterol absorption in diabetes mellitus (rat), **186**, 398

Stomach

- isolated mucosal cell fractions, differential distribution of nitric oxide synthase (rat), **184**, 680

mucosa

- specific control of cathepsin E gene expression (guinea pig), **187**, 1401
- sulfomucin synthesis and secretion, effect of *Helicobacter pylori* lipopolysaccharide (rat), **184**, 1411
- mucosal calcium channels, activation by platelet-derived growth factor (rat), **186**, 1496

Stomates

- abscisic acid-induced closure and reversal by umbelliferone, regulation by lipid phase alterations in guard cell plasmalemma (*Vicia faba*), **186**, 652

Stones

- urinary, associated protein, cDNA cloning and sequencing: identity with osteopontin (human), **184**, 859

Stratum corneum

- intercellular membranes, model: identification of sphingolipid headgroup as determinant of phase behavior in mixed lipid dispersions, **188**, 1247

Streptococcus mutans

- cell-associated glucosyltransferase gene, molecular characterization and expression, **187**, 1432
- glucotransferases, catalytic site, molecular genetic analysis, **189**, 1184

Streptolysin-O

- permeabilized acinar cells, amylase release, effect of calyculin A (rat), **189**, 1606

Streptomyces lividans

- proB* strains, ethidium bromide induction of *argJ* mutations, **189**, 1101

Subject Index

- Streptozocin
 induced diabetes
 associated plasma post-heparin diamine oxidase and plant sterol levels (rat), **186**, 398
 myocardium in affected rats, altered protein kinase C activity, **187**, 703
- Stress, *see also specific types*
 heat shock-induced, activation of multidrug resistance-1 gene promoter (human), **187**, 677
- Stromal cells
 activin A expression, induction by interleukin-1 and tumor necrosis factor (human bone marrow), **188**, 310
- Stromelysin
 activation of tissue inhibitor of metalloproteinase/progelatinase A complex (human), **185**, 852
- Strychnine
 modulation of glycine receptor phosphorylation by protein kinase C (rat), **188**, 813
- Submandibular cells
 β -adrenergic-stimulated mucin secretion, inhibition by incorporated antibody to CFTR-derived synthetic peptide (rat), **188**, 1146
 intracellular Ca^{2+} levels and K^{+} and Cl^{-} efflux responses, effects of acetylcholine in neonatal and adult rats, **188**, 1161
- Subtilisin J
 encoding gene, molecular cloning and expression in *Bacillus subtilis* (*Bacillus stearothermophilus*), **184**, 277
 heat stability, effect of weak Ca^{2+} -binding site, role of Glu-195 (*Bacillus subtilis*), **188**, 184
- Succinate
 and ethylene, arginine-dependent simultaneous formation from 2-oxoglutarate, catalysis by *Pseudomonas syringae*-associated enzyme, **188**, 483
- Succinate cytochrome c reductase
 from filarial parasite *Setaria digitata*, analysis, **184**, 448
 in skeletal muscle of endurance athletes, effects of L-carnitine, **188**, 102
- Succinate dehydrogenase
 in skeletal muscle of endurance athletes, effects of L-carnitine, **188**, 102
- Succinate dehydrogenase (ubiquinone)
 mitochondrial, interaction with ubiquinone and vitamin K_3 (bovine heart), **186**, 1656
- Succinate-ubiquinone oxidoreductase, *see* Succinate dehydrogenase (ubiquinone)
- Sugars
 modified oligonucleotides, analysis: synthesis, nuclease resistance, and base pairing of oligodeoxynucleotides containing 1-(4'-thio- β -D-ribofuranosyl)-thymine, **184**, 797
 Xyl 1 $\rightarrow$ 3 Gal 1 $\rightarrow$ (SO_3^{-})3,4 Fuc, identification in acrosome reaction-inducing substance (starfish), **186**, 405
- Sulfates
 role in adhesive specificity of L-selectin high-affinity binding to 3'-sulfated-Le^a and -Le^x oligosaccharides, **188**, 244
- Sulfobromophthalein
 transport in HepG2 cells, relationship to expression of membrane carrier proteins (human), **183**, 1203
- Sulfolipolipids
 binding to adhesive protein amphoterin in nervous system (rat), **182**, 689
- Sulfomucin
 gastric, synthesis and secretion, effect of *Helicobacter pylori* lipopolysaccharide (rat), **184**, 1411
- Sulfur
 amino acids with, analysis at lipoxygenase active site with platinum complex (soybean), **182**, 779
- Supercoiling
 DNA, effect on assembly of transcriptionally active chromatin on adenovirus major late promoter, **186**, 963
- Superoxide dismutase
 Cu,Zn-containing
 encoding gene, isolation, characterization, and interspecific comparison (rat), **186**, 936
 inactivation and oxidative modification by stimulated neutrophils (human), **189**, 1129
 variants, expression in *Escherichia coli*, temperature effects (*Xenopus laevis*), **186**, 1339
 derivatives modified with mono- or polysaccharides, therapeutic effects on hepatic injury induced by ischemia/reperfusion (rat), **189**, 191
 endocytosis by liver (rat), **184**, 727
 Mn-containing
 expression in response to tumor necrosis factor and interleukin-1 in endothelial cells (rat), **188**, 453
 induction in hepatoma cells by tumor necrosis factor, interleukin-1, and IL-6 (human), **182**, 1100
 induction by tumor necrosis factor- α , mediation by lipoxygenase metabolites of arachidonic acid (human, mouse), **188**, 538
- Superoxide radicals
 generation
 by alveolar macrophages, stimulation by zinc hydroxide (rat), **185**, 1115
 in electroporabilized neutrophils, N-formyl-methionyl-leucyl-phenylalanine-induced, suppression by spermine (human), **182**, 20
 in eosinophils, relationship to leukotriene B_4 -induced steady-state Ca rise (guinea pig), **187**, 670
 in hepatic macrophages, stimulation by protein kinase C β -isoform (rat), **183**, 1247
 in inner membranes, role in iron-induced microsomal lipid peroxidation (rat liver), **186**, 1087
 and lipid peroxidation, relationship to NADH-Q oxidoreductase inhibition by rotenone, piericidin A, and MPP, **189**, 47
 by neutrophils stimulated with formyl-methionyl-leucyl-phenylalanine and IgG, role of tyrosine phosphorylation (human), **183**, 789
 in pulmonary microsomes, suppression by interleukin-1 (rat), **185**, 1083
 regulation of intracellular Mg^{2+} in amnion cells (human), **182**, 906
- Superprecipitation
 and actomyosin ATPase activity, effects of peptide inhibitors of smooth muscle myosin light chain kinase (bovine, chicken), **187**, 1279

Suprachiasmatic nucleus

expression of *Drosophila per* gene homologs (hamster, mouse), **184**, 1082

Surfactant protein

SP-D, binding specificity for glucosylceramide (rat lung), **187**, 963

Synapsin I

crosslinking with brain microtubules, cyclic inhibition-potential by protein kinase FA (swine), **184**, 973

interaction with calmodulin-binding protein ACAMP-81, **182**, 1395

Synaptobrevin

proteolysis, role in tetanus toxin inhibition of neurotransmitter release, **189**, 1017

Synaptosomes

cerebral, protein kinase FA activation mechanism, **182**, 129

tetanus toxin action: inhibition of neurotransmitter release linked to synaptobrevin proteolysis, **189**, 1017

Synechococcus spp.

δ -aminolevulinic acid formation in, enantioselective role of (S)- and (R)-diaminvaleric acids, **185**, 60

Synexin

recombinant, differential recognition of secretory vesicles (human), **184**, 347

Systemic lupus erythematosus

immune complexes in plasma of affected patients, double-stranded antigen DNA cloned from, antibody generation in mouse, **183**, 797

T

Tacrine

and velnacrine and *N*-methylacridinium, comparative effects on erythrocyte membrane: relevance to Alzheimer's disease (human), **185**, 596

Taka-amylase A

crosslinked modification at subsite Lys residue, augmentation of maltosidase activity (*Aspergillus oryzae*), **183**, 321

Tandem mass spectrometry

in amino acid sequence analysis of 6-pyruvoyl tetrahydropterin synthase (salmon liver), **182**, 953

Taurocholate

transport in HepG2 cells, relationship to expression of membrane carrier proteins (human), **183**, 1203

Taxotere

effects on murine and human tumor cell lines, **187**, 164

TCDD. *see* 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin

T-cell receptors

in multi-receptor complex, mRNA, down-regulation, correlation with up-regulation of lymphokine mRNA: cyclosporin A effect on activated T cells (human), **186**, 603

T cells

activated, effect of cyclosporin A: correlation of up-regulation of lymphokine mRNA and down-regulation of TcR, CD4, CD8, and lck mRNA (human), **186**, 603

concanavalin A-activated, anti-oncogene phosphoprotein

p53 in, phosphorylation-associated conformational shift (human), **189**, 1701

detection of extracellular signal-regulated kinase 2 mRNA and characterization of ERK1 and ERK2 cDNAs (human), **182**, 1416

HIV-1-infected, virus induction, inhibition by Tat antagonist Ro 5-3335 (human), **189**, 250

HIV-1 replication, inhibition by statine-based tripeptides, **188**, 873

immunocytochemical localization of 6-pyruvoyl tetrahydropterin synthase (human), **182**, 810

interleukin-2- and mitogen-activated, p70 S6 kinase phosphorylation, inhibition by rapamycin (human), **186**, 1315

memory, subpopulations, interaction with P-selectin (human), **186**, 173

MT-4, anti-HIV-1 activity of synthetic [Tyr^{5,12}, Lys⁷]-polyphemusin II analog T-22 (human), **189**, 845

nuclear factor κ B activation in, inhibition by α -lipoic acid (human), **189**, 1709

proliferation

autocrine regulation, role of thymocyte-secreted luteinizing hormone (human), **187**, 1187

cyclosporin-induced inhibition, effects of changes in membrane potential (human), **185**, 363

prothymosin α expression during G1, analysis (mouse), **185**, 953

thermotolerance induction, protection of nuclear DNA topoisomerase I from heat stress, **186**, 166

thoracic duct, OX8⁺OX22⁺, RNA synthesis and characterization of interleukin-10 cDNA clones from (rat), **189**, 1

 ψ -Tectorigenin

effect on cytoplasmic free calcium in isolated hepatocytes (rat), **182**, 894

Temperature

cold, effect on glucose utilization and glucose transporter expression in brown adipose tissue (rat), **185**, 1078

effect on expression of *Xenopus* Cu,Zn superoxide dismutase variants in *Escherichia coli*, **186**, 1339

heat, inhibition of tumor necrosis factor- α -induced arachidonic acid release (C3HA fibroblasts), **188**, 177

inverse temperature transition for hydrophobic folding and assembly, role in reduction-driven polypeptide folding, **188**, 611

restrictive, maintenance of repression control of *Escherichia coli* K-12 ts leucyl-transfer RNA synthetase mutant *ilvGMEDA* operon at, **187**, 1106

subtilisin J heat stability, effect of weak Ca²⁺-binding site, role of Glu-195 (*Bacillus subtilis*), **188**, 184

Tension

mechanical, effect on hydration of linear DNA stretched into fibers (bovine thymus), **188**, 78

Terbutaline

effects on cytosolic Ca²⁺ levels and cation channel ion selectivity in pulmonary epithelium (fetal rat), **187**, 648

Testes determining factor

encoding gene *Sry*, DNA-binding region amino acid change, role in C57BL/6J-Y^{DOM} sex-reversal

Subject Index

- (mouse), **185**, 310
- Testis**
- expression of protein-tyrosine phosphatase (mouse), **185**, 818
 - protein band immunoreactive with proacrosin and proacrosin-binding protein antibodies (pig), **184**, 760
 - specific catalytic subunit of calmodulin-dependent protein phosphatase, cloning and characterization (human), **188**, 265
 - specific isoform $\beta 1$ of calcineurin regulatory subunit, post-meiotic expression (rat), **187**, 828
- Testosterone**
- dependent mammary carcinoma SC2G cells, androgen-responsive expression and mitogenic activity of murine schwannoma-derived growth factor, **185**, 103
 - destruction of transcortin-receptor complex (human), **184**, 491
 - regulation of glutathione *S*-transferase gene expression in smooth muscle tumor cells (hamster), **184**, 1108
- Tetanus toxin**
- inhibition of neurotransmitter release linked to synaptobrevin proteolysis, **189**, 1017
- 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin**
- protein tyrosine phosphorylation as indicator of exposure *in vivo* and *in vitro* (human, mouse), **189**, 59
- Tetrachloro-*p*-hydroquinone**
- reductive dehalogenation by *Flavobacterium* extracts, identification of glutathione as reducing agent, **182**, 361
- Tetracycline**
- and collagenase-inhibiting derivatives, selective inhibition of endothelial growth (bovine, pig), **188**, 740
 - inhibition of intracellular muscle proteolysis in L6 cells, **188**, 767
- 12-*O*-Tetradecanoylphorbol 13-acetate**
- effects on
 - leukotriene- C_4 synthase induction in differentiating erythroleukemia cells (human), **189**, 1043
 - nuclear poly(ADP-ribose) polymerase transcript levels and enzymatic activity in carcinogen-initiated primary hepatocytes (neonatal rat), **182**, 1066
 - mediated suppression of cytochrome P450 *Cyp1a-1* induction in skin, role of protein kinase C (mouse), **186**, 970
 - in substrate level modulation of phospholipase A_2 *in vitro* (porcine pancreas), **185**, 185; *erratum*, **188**, 956
- Tetrahydroisoquinoline carboxylic acid**
- gonadotropin-releasing hormone analogs with, synthesis and theoretical conformation studies (rat), **187**, 1035
- 2,2,5,5-Tetramethylpyrrolidine-1-oxyl-3-carboxylic acid**
- in whole rat EPR imaging by radio frequency spectrometer, **183**, 829
- Tetrapeptides**
- HDEL, at Kex2 enzyme C-terminus, role in α -factor leader proregion cleavage in endoplasmic reticulum (yeast), **183**, 212
- Tetrazolo[1,5-*c*]pyrimidin-5(6H)ones**
- 6-substituted, synthesis: application to modification of 3'-azido-3'-deoxythymidine, **187**, 1545
- Tetrodotoxin**
- derivative, photolabeled sites in electroplax sodium channel domains III and IV with, analysis (*Electrophorus electricus*), **184**, 900
- TGF, see Transforming growth factor**
- Thapsigargin**
- induction of meiotic maturation in oocytes (clam), **189**, 79
 - inhibition of phosphatidylserine synthesis in glioma C6 cells (rat), **186**, 1582
- Thermodesulfobacterium mobile***
- [NiFe] hydrogenase, purification and characterization, **184**, 1256
- Thermotolerance**
- CHO cells, conferral by expressed *Drosophila* heat shock protein *hsp27*, **185**, 116
 - development in HT-29 cells, quercetin-induced suppression, effect of pH (human), **186**, 1121
 - induction in T cells, protection of nuclear DNA topoisomerase I from heat stress, **186**, 166
- Thimet oligopeptidase**
- cerebral, with specificity for generation of N-terminus of Alzheimer β -amyloid protein from precursor, identification (human), **185**, 746
- Thioctic acid**
- inhibition of nuclear factor κ B activation in T cells (human), **189**, 1709
- Thiol groups**
- in glutathione in class Pi glutathione *S*-transferase-glutathione complex, pK_a , effect of tyrosine-7 in enzyme (human), **184**, 194
- Thiols**
- dependent proteolytic activities in pituitary secretory vesicles, characterization (bovine), **183**, 449
 - inhibitory effects on purified phenylalanine hydroxylase *in vitro* (rat liver), **182**, 92
- Thioltransferase**
- gene cloning and sequencing (*Saccharomyces cerevisiae*), **187**, 949
- Thioperamide**
- and (*R*)- α -methylhistamine, effects on histidine decarboxylase (murine brain), **185**, 121
- Thiophene**
- thiophene-*S*-oxide as primary reactive metabolite *in vivo*, identification: dihydrothiophene sulfoxide mercapturic acid formation, **186**, 1624
- Thiophene-*S*-oxide**
- identification as primary reactive metabolite of thiophene *in vivo*: dihydrothiophene sulfoxide mercapturic acid formation, **186**, 1624
- Thioredoxin**
- adult T cell leukemia-derived factor, reactive oxygen-reducing and protein-refolding activities, analysis (human), **186**, 1220
 - gene transcription in conducting airway epithelial cells, up-regulation by retinol (monkey), **183**, 170
- Thioredoxin reductase, see Thioredoxin reductase (NADPH)**
- Thioredoxin reductase (NADPH)**
- Ca^{2+} -sensitive, role in reduction of 5,5'-dithiobis-(2-nitrobenzoic acid) by mitochondria (rat liver), **184**, 1088
- 1-(4'-Thio- β -D-ribofuranosyl)-thymine**
- oligodeoxynucleotides with, synthesis, nuclease resistance, and base pairing properties, **184**, 797
- Thiourea**
- suppression of crossbridge motions of isolated thick myo-

- filaments in ATP-free medium (king crab), **186**, 321
- Threonine**
 residue 246 in lactate dehydrogenase, mutations, associated decrease of substrate inhibition (*Bacillus stearothermophilus*), **182**, 1309
 residue 445 in hepatocyte growth factor α chain, identification as O-glycosylation site (human), **189**, 1329
 tRNA, identity determinants, analysis (*Escherichia coli*), **184**, 478
- Thrombin**
 activated platelets, protein-tyrosine phosphorylation, correlation with phosphatidylinositol 3,4-bisphosphate synthesis (human), **186**, 1480
 induced Ca^{2+} oscillation in human platelets and MEG-01 cells, analysis, **183**, 864
 inhibition of platelet adenylate cyclase, role of tethered-ligand receptor (human), **182**, 1296
 proteolytic processing of amyloid β precursor (mouse), **185**, 1000
 stimulated platelets, cytoplasmic procalcitonin I translocation onto plasma and granule membranes and activation (human), **185**, 1122
 α - and β -, venom protease with associated activity, characterization (rattlesnake), **187**, 389
- Thrombin receptors**
 activating peptides, structure-activity studies (human), **188**, 604
 platelet, agonist peptide, minimal sequence requirement (human), **184**, 790
 tethered-ligand, role in thrombin inhibition of platelet adenylate cyclase (human), **182**, 1296
- Thrombomodulin**
 epidermal growth factor domains, structure-function studies (human), **185**, 567
- Thrombospondin**
 sequence motif CSVTCG, role in CD36 binding, **182**, 1208
- Thromboxane A_2 receptors**
 cDNA cloning, expression, and Northern blot analysis (mouse), **184**, 1197
- Thylakoids**
 inverted repeat region, binding of chloroplast chromosome to, determination (spinach), **184**, 993
 uncoupled membranes, light-induced H^+ release, inhibition by *N*-ethylmaleimide (spinach), **182**, 1277
- Thymidine**
 incorporation into
 DNA in vascular smooth muscle cells, effect of lysolecithin (rat), **183**, 156
 fibroblasts, stimulation by N-terminal hexapeptide fragment of insulin-like growth factor II (human, mouse), **187**, 279
 inhibition of 5-fluoro-2'-deoxyuridine incorporation into DNA of mammary tumor (mouse), **184**, 467
- Thymidine kinase**
 cytosolic and mitochondrial, selective assays in cells and tissue extracts (human), **188**, 712
 effect of methotrexate (rat), **187**, 522
 mRNA, transcription initiation and temporal expression in Chinese hamster cells, **184**, 908
- promoter, cell cycle regulatory domain, methylation-sensitive protein-DNA interaction (human), **189**, 480
- Thymidine phosphorylase**
 associated activity, identification in platelet-derived endothelial cell growth factor (human), **184**, 1311
- Thymidylate synthase**
 encoding gene, cellular differentiation-dependent nuclear factors binding to, identification (human), **185**, 127
- Thymocytes**
 apoptosis, inhibition by zinc (rat), **187**, 1256
 dexamethasone-induced apoptosis and concanavalin A-induced proliferation, early gene expression during, analysis (rat), **188**, 1261
 secretion of luteinizing hormone: role in autocrine regulation of T-cell proliferation (human), **187**, 1187
 stearoyl-CoA desaturase gene expression (mouse), **186**, 531; *erratum*, **187**, 1201
- Thymosin β_4**
 gene expression during embryogenesis (*Xenopus laevis*), **184**, 93
- Thyroglobulin**
 electrophoretic doublet, origin (bovine, human), **186**, 1185
 secreted by FRTL-5 cells, NH_2 terminus, incorporation of TSH-induced galactose (rat), **189**, 1624
- Thyroid**
 normal tissue, expression of calcitonin carboxy terminal peptide CCP II (human), **185**, 330
- Thyroid cells**
 FRTL-5
 cell cycle-related gene expression, induction by thyrotropic hormone (rat), **183**, 265
 c-fos mRNA expression and cell proliferation, effects of endothelin-1 (rat), **184**, 231
 malignant transformation after transfection with human thyrotropin receptor cDNA (rat), **183**, 220
 thyrotropin-stimulated iodide accumulation, attenuation by 1,25-dihydroxycholecalciferol via reduction of iodide porter number (rat), **182**, 1435
 proliferation, inhibition by $\text{TGF}\beta$: effect on expression of TSH-induced cell cycle-related genes (rat), **187**, 225
- Thyroid hormone receptors**
 encoding C-erbA genomic locus, mRNAs from, developmental expression (rat), **184**, 739
 $\beta 1$ gene promoter, cloning and characterization (human), **185**, 78
 -steroid hormone receptor superfamily, comparison of synthetic nuclear localization signal peptides, **182**, 289
- Thyrotropic hormone**, *see* Thyrotropin
- Thyrotropin**
 binding regions in human thyrotropin receptors, synthetic peptides representing, antibodies to, biological effects, **182**, 1369
 induced cell cycle-related gene expression in rat thyroid cells
 analysis, **183**, 265
 uncoupling from $\text{TGF}\beta$ inhibition of proliferation, **187**, 225
 induced galactose incorporation at NH_2 terminus of thyroglobulin secreted by FRTL-5 cells, **189**, 1624
 stimulated iodide accumulation in FRTL-5 cells, attenua-

Subject Index

- tion by 1,25-dihydroxycholecalciferol via reduction of iodide porter number (rat), **182**, 1435
- β subunit gene expression, inhibition by thyroid hormone: modulation by *c-fos* and *c-jun* (human), **189**, 1050
- Thyrotropin receptors
- activity and response to thyroid-stimulating autoantibodies, role of cysteine in receptor extracellular domain and exoplasmic loops of transmembrane domain (rat), **189**, 1754
 - cDNA, transfected rat thyroid cells, malignant transformation (human), **183**, 220
 - linear epitopes, recognition by Graves' disease-associated IgG (human), **188**, 28
 - mRNA
 - alternatively spliced form, molecular cloning and sequencing (human), **188**, 1214
 - 1.3-kb variant lacking transmembrane domain, cloning and sequencing (human), **187**, 1135
 - recombinant human, heterogeneous responses to immunoglobulins from patients with Graves' disease, **186**, 1391
 - related peptide-like immunoreactivity in peripheral blood of Graves' disease, characterization (human), **186**, 1074
 - single subunit structure (human), **187**, 887
 - synthetic human peptides representing TSH-binding regions, antibodies to, biological effects, **182**, 1369
- Thyrotropin-releasing hormone
- effect on Ca^{2+} currents in pituitary hormone-secreting cells (rat), **187**, 529
 - mRNA, detection by reverse transcription-polymerase chain reaction in normal and tumoral anterior pituitary (human), **182**, 182
 - potentiating peptide, isolation and amino acid sequence (bovine hypothalamus), **189**, 1110
 - thionated analogs, biological activities (rat), **184**, 359
- Thyrotropin-releasing hormone receptors
- mRNA, differential regulation by thyroid hormone *in vivo* and *in vitro* (rat), **184**, 367
- Tiazofurin
- and difluorodeoxycytidine, synergistic effects on differentiation and cytotoxicity in tumor cells (human, rat), **184**, 551
- Tight junctions
- aortic endothelial cell monolayers, role in penetrability of 5-(*N*-hexadecanoyl)aminofluorescein (bovine), **184**, 160
- Tissue inhibitor of metalloproteinase
- and metalloproteinase, gene expression in mesangial cells, effect of high glucose concentrations (rat), **185**, 1048
 - progelatinase complex, activation by stromelysin (human), **185**, 852
- Tissues
- colocalization of encoding guanylate cyclase-coupled natriuretic peptide receptor mRNAs GC-A and -B (rat), **189**, 610
 - cytosolic fraction, biosynthesis of *trans,trans,trans*-geranylgeranyl diphosphate (rat), **186**, 157
 - differential expression of angiotensin II receptor type 1 subtypes cDNA (rat), **183**, 1090
 - distribution of glucose transporter GLUT3 (human), **188**, 149
 - drg*, expression during embryonic development (mouse), **189**, 371
 - neural, developing, specific expression of POU domain gene *ZFPOU1* (zebrafish), **187**, 1446
 - nitric oxide synthase distribution (bovine), **183**, 238
 - peptides inducing cAMP increase in rat platelets, distribution and characterization (pig), **187**, 1587
 - specific control of cathepsin E gene expression (guinea pig), **187**, 1401
 - specific response of estrogen receptor gene expression to estrogen (chick), **187**, 1374
- Titin 2, *see* β -Connectin
- α -Tocopherol, *see* Vitamin E
- Toluene dioxygenase
- oxidation of trichloroethylene (*Escherichia coli*), **185**, 443
- Topoisomerase I
- encoding gene, point mutation in CPT-11-resistant lung cancer cells (human), **188**, 571
- Tosyl-1-lysine chloromethyl ketone
- inhibition of microsomal glucose-6-phosphatase (rat liver), **183**, 590
- Tosyl-1-phenylalanine chloromethyl ketone
- inhibition of microsomal glucose-6-phosphatase (rat liver), **183**, 590
- Toxins
- Clostridium botulinum* type C progenitor, nontoxic-non-hemagglutinin component, nucleotide sequence of encoding gene, **183**, 1273
- Toxoplasma gondii*
- excretory/secretory antigens, similarities and variations (mouse), **187**, 294
- Toxoplasmosis
- stimulation of cell-mediated immune response, effect of three forms of antigen (mouse), **189**, 640
- Transacting factors
- binding to L-type pyruvate kinase promoter elements, *in vitro* analysis, **189**, 1119
- Transactivation
- c-myc* gene by c-Myb (human), **186**, 715
- Transcaltachia
- 1 α ,25-dihydroxyvitamin D₃-stimulated, identification of 1 β ,25-dihydroxyvitamin D₃ as antagonist (chicken), **189**, 1450
 - in perfused intestine, induction by parathyroid-related peptide (chicken), **186**, 69
- Transcortin
- receptor complex, destruction by testosterone (human), **184**, 491
- Transcortin receptors
- transcortin complex, destruction by testosterone (human), **184**, 491
- Transcription
- bacteriophage T₇, inhibition by oligonucleotide triple helix formation along early promoter region, **189**, 1674
 - bone morphogenetic protein genes in early embryo, analysis (*Xenopus laevis*), **186**, 1487
 - butyrate-induced, memory by Moloney murine sarcoma virus enhancer-promoter element, **189**, 141
 - calcitonin gene, regulation by cyclic AMP (human), **189**, 1157

Subject Index

- c-jun* proto-oncogene in Balb/c 3T3 fibroblasts, stimulation by insulin-like growth factor I (mouse), **183**, 524
- c-myc* *in vitro*, inhibition by mithramycin (human), **185**, 553
- enhancement by purified estrogen receptor *in vitro* (bovine uterus), **186**, 803
- erythropoietin gene *in vitro* with 5' flanking sequence and nuclear extract from anemic kidney (human), **182**, 137
- fatty acid synthase and S14 genes *in vitro*, tissue specificity, **182**, 631
- H1⁰ histone gene at basal level, requirement of multiple cis-acting elements of proximal promoter region (mouse), **188**, 1153
- inhibition, effect on regulation of half-lives of different sized mRNAs for cAMP-dependent protein kinase subunit RI α (rat Sertoli cells), **184**, 454
- reverse, with nested PCR, in analysis of bFGF transcript expression in granulosa and cumulus cells from *in vitro* fertilization patients (human), **187**, 1227
- thioredoxin gene in conducting airway epithelial cells, up-regulation by retinol (monkey), **183**, 170
- thymidine kinase, initiation in Chinese hamster cells, **184**, 908
- and translation, *in vitro*, duck hepatitis B virus polymerase produced by, DNA polymerase and reverse transcriptase activities, **189**, 1170
- tyrosine aminotransferase gene, insulin-responsive, role of multiple promoter regions (rat hepatoma cells), **187**, 778
- Transcription factors
- AP-1 and NF- κ B, induction by okadaic acid in B cells (human), **187**, 51
- COUP, in regulation of oxytocin gene expression in luteinizing granulosa cells (bovine), **189**, 496
- Ear3/COUP-TF, binding affinity to target response elements, **183**, 492
- Krox-20*, induction after focal cerebral ischemia (rat), **188**, 1104
- Sp1, levels in gastric carcinomas, correlation with epidermal growth factor receptor expression (human), **189**, 1342
- Transcytosis
- intrinsic factor-mediated, [⁵⁷Co]cobalamin across polarized renal epithelial cells, inhibition by leupeptin and ammonium chloride (opossum), **182**, 439
- related activity of acidic fibroblast growth factor: role of aFGF as progression factor rather than transforming factor (Rat-1 cells), **189**, 398
- Transfection
- endothelial cells with E-selectin, in analysis of endothelial cell binding to colon carcinoma cells (human), **189**, 315
- protoplasts by liposomes interacting with DNA, evaluation (lentil), **186**, 1417
- Transferrin, *see also* Disialotransferrin
- role in heme transport in erythroleukemia cells (mouse), **189**, 765
- Transferrin receptors
- distribution on Hep G2 cells, effect of brefeldin A (human), **185**, 719
- gene promoter, supercoil-dependent structural alteration (human), **183**, 62
- Transformation
- hepatic epithelial cells by Rous sarcoma virus, effect on cell attachment (rat), **189**, 350
- malignant, rat thyroid cells after transfection with human thyrotropin receptor cDNA, **183**, 220
- NIH 3T3 cells by *ras* oncogene, depudecin-induced reversion to flat phenotype (mouse), **182**, 379
- ras*-mediated, affected fibroblasts with evoked cytoplasmic Ca²⁺ oscillations, ion selectivity of Ba²⁺ inward current oscillations, **185**, 162
- by *ts-110* Moloney murine sarcoma virus, affected NRK cells, substrate preference of secreted metalloproteinase, **189**, 21
- Transforming growth factor α
- inhibition of glycogen synthesis and stimulatory effects of insulin in hepatocytes (guinea pig, rat), **183**, 560
- recombinant, crystallization and characterization of crystal forms (human), **187**, 146
- role in induction of microvascular endothelial cell tubulogenesis
- by esophageal cancer cells: model for tumor angiogenesis (human), **186**, 1471
- by keratinocytes (human), **189**, 601
- Transforming growth factor β
- inhibition of rat thyroid cell proliferation: effect on TSH-induced cell cycle-related gene expression, **187**, 225
- promotion of inositol uptake in BC3H1 cells, **182**, 1008
- superfamily, classification based on amino acid homology in C-terminus, **184**, 590
- Transforming growth factor β ₁
- binding by fucoidan, analysis, **184**, 773
- downregulation of hepatocyte growth factor gene during cell growth (rat liver), **183**, 739
- effects on
- cell cycle-dependent phosphorylation of HSP28 in normal osteoblasts and *ras*-transformants (mouse), **187**, 1418
- collagen gene expression in systemic scleroderma fibroblasts β 1 (human), **187**, 45
- inhibition of DNA synthesis, association with inhibition of p53 protein phosphorylation and cytoplasmic translocation (MCF-7 cells), **183**, 1175
- Transforming growth factor β receptors
- type III, molecular cloning and characterization (human, pig), **189**, 356
- Transglutaminase, *see* Protein-glutamine γ -glutamyltransferase
- Transin
- gene expression in mesangial cells, effect of high glucose concentrations (rat), **185**, 1048
- Transketolase
- cDNA, cloning and partial sequencing (human brain), **183**, 1159
- Translation
- inhibition, effect on regulation of half-lives of different size mRNAs for cAMP-dependent protein kinase subunit RI α (rat Sertoli cells), **184**, 454
- selective, mRNA in vesicular stomatitis virus-infected cells, role of 5' sequence of viral nucleocapsid gene (human), **189**, 1585
- and transcription, *in vitro*, duck hepatitis B virus polymerase produced by, DNA polymerase and reverse transcriptase activities, **189**, 1170

Subject Index

Translocation

contraction-induced, glucose transporter Glut4 in isolated ventricular cardiomyocytes (rat), **189**, 1207

cytoplasmic, p53 protein, inhibition in MCF-7 cells, association with inhibition of DNA synthesis by transforming growth factor- β 1 (human), **183**, 1175

G protein to membrane, role of lipopolysaccharide-serum complex (human), **183**, 1280

membrane, protein kinase C, induction by okadaic acid and calyculin-A in tumor and nontumor cells (human, mouse, rat), **189**, 950

protein kinase C in platelets, induction by interleukin-3 (human), **185**, 670

Transthyretin

gene expression in liver, repression by peroxisome proliferator clofibrate (rat), **188**, 799

mutation associated with familial amyloidotic polyneuropathy

detection in Japanese patient, **187**, 397

identification and characterization in patient, **182**, 520

point mutation, detection in familial cardiac amyloidosis-affected patient, **187**, 460

purpurin-retinol-binding protein hybrid binding to, construction (chicken, rat), **184**, 938

Triacsin C

pretreatment of stimulated leukocytes, enhancement of platelet-activating factor production (rat), **188**, 1280

Triacylglycerol lipase

pancreatic

molecular cloning and characterization (rabbit), **188**, 964

residues 403-449 of C-terminal extremity, role in binding of porcine colipase (horse), **184**, 206

in pancreatic acinar cells, stimulation by carbachol (rat), **184**, 626

-pancreatic colipase, interaction, immunochemical analysis with immobilized synthetic peptides (horse), **189**, 1374

Triamcinolone acetoneide

regulation of glutathione S-transferase gene expression in smooth muscle tumor cells (hamster), **184**, 1108

Trichloroethylene

oxidation by toluene dioxygenase, **185**, 443

Triflavin

binding to GPIIb of ADP-stimulated human platelets (*Trimeresurus flavoviridis*), **189**, 1237

Trifunctional protein deficiency

identification in patient with mitochondrial β -oxidation disorder (human), **188**, 1139

Triglyceride lipase, *see* Triacylglycerol lipase

Triiodothyronine

differential regulation of thyrotropin-releasing hormone receptor mRNA levels *in vivo* and *in vitro* (rat), **184**, 367

induction of growth hormone in cultured GC cells, enhancement by heat stress via action within 5'-flanking region of growth hormone gene, **188**, 638

modulation of apolipoprotein B gene expression in HepG2 cells (human), **186**, 617

3,3',5-Triiodo-L-thyronine

regulation of cytosolic thyroid hormone binding protein synthesis during liver regeneration (rat), **189**, 257

3,5,3'-Triiodothyronine

inhibition of thyrotropin β subunit gene expression, modulation by *c-fos* and *c-jun* (human), **189**, 1050

regulation of hepatic peroxisomal enoyl-CoA hydratase-3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme (rat), **185**, 211

Tripeptides

derived protease inhibitors, inhibition of DNA polymerase (rat liver), **185**, 1133

statine-based, inhibition of HIV-1 replication in human T cells, **188**, 873

 ω,ω,ω -Triphenylalcohols

and UDP derivatives, inhibitory effects on different UDP-glucuronosyltransferases (rat liver), **187**, 140

Tropoelastin

carboxy terminal domain, associated cysteine residues, formation of intrachain disulfide bond stabilizing loop structure and positively charged pocket (bovine), **186**, 549

Trypanosoma brucei

bloodstream form, pyruvate transport across plasma membrane, mediation by facilitated diffusion carrier, **184**, 1028

Trypanosoma cruzi

metacyclogenesis, inhibition by mannose, **187**, 108

purification and characterization of 120-kDa alkaline proteinase, **187**, 1466

and other trypanosomatids, putrescine uptake, differential regulation, **188**, 120

trypomastigote stage-specific gp 183 epitope required for attachment to myoblasts, recognition by monoclonal antibody, **182**, 6

Trophostin 1

blockade of calcium channel currents in vascular smooth muscle cells (rabbit), **189**, 1620

Trophostin 23

blockade of calcium channel currents in vascular smooth muscle cells (rabbit), **189**, 1620

Trypsin inhibitor

cDNA, sequencing and implications for post-translation processing (*Acacia confusa*), **184**, 1524

Tryptophan

and cytosine, interaction with guanine base, spectroscopic study: molecular recognition by hydrogen bond pairing and aromatic stacking, **183**, 577

stabilization of tryptophan 2,3-dioxygenase in liver, role of lysosomes (rat), **183**, 306

substituted neuropeptide from adipokinetic hormone-red pigment-concentrating hormone family, isolation from corpus cardiacum (*Carausius morosus*), **189**, 1303

in Trp-Ser-X-Trp-Ser motif in extracellular domains of erythropoietin receptor, role in signal transduction (mouse), **184**, 485

Tryptophan 2,3-dioxygenase

degradation by lysosomal system in liver, inhibition by tryptophan (rat), **183**, 306

TSH, *see* Thyrotropin

Tubules

microvascular endothelial, keratinocyte-induced formation: role of transforming growth factor α (human), **189**, 601

- renal, isolated, endothelin-1 mRNA, detection by reverse transcription and polymerase chain reaction (rat), **188**, 108
- Tubulin**
 interaction with nucleoside diphosphate kinase cloned from *Dictyostelium discoideum*, analysis (porcine brain), **187**, 65
 porcine brain and fungal, differential binding of rhizoxin, phomopsin A, vinblastine, and ansamitocin P-3, **187**, 722
 preferential labeling of β -subunit during specific covalent interaction with chloroacetates of 2- and 3-demethylthiocolchicine, **187**, 1350
 red cell, ADP-ribosylation by avian NAD⁺ ADP-ribosyltransferase (chicken), **184**, 414
- α -Tubulin
 embryonic, mRNA, expression in aged hippocampus (rat), **184**, 292
- β -Tubulin
 late neural, mRNA, expression in aged hippocampus (rat), **184**, 292
- Tumor cells, see also Tumors**
 acute myelogenous leukemia, proliferation and differentiation, role of heat shock protein 70 (human), **183**, 733
 astrocytoma, specific antigens detected by murine monoclonal antibodies, relationship to c-kit protooncogene product (human), **182**, 474
 basophilic leukemia, RBL-2H3, IgE-mediated histamine release, inhibition by myosin light chain kinase inhibitors (human, rat), **183**, 48
 bladder cancer, EJ-1 and T24, *c-myc* gene-unexpressed, effect of extracellular phosphatidylinositol (human), **182**, 644
 breast, AU-565, MB-231, and MCF-7, differentiation induction by okadaic acid and related protein phosphatase 1 and 2A inhibitors (human), **189**, 1261
 breast cancer
 antiestrogenic effect of retinoic acid (human), **183**, 100
 DNA synthesis, inhibition by transforming growth factor- β 1, association with inhibition of p53 protein phosphorylation and cytoplasmic translocation (human), **183**, 1175
 MCF-7
 growth rate, effects of *c-fos*, *c-jun*, and *c-myc* expression (human), **188**, 1067
 identification of insulin-like growth factor-binding proteins 5 and 6 (human), **183**, 1003
 retinoic acid-sensitive and -resistant, insulin-like growth factor binding protein-5 gene expression, differential regulation at post-transcriptional level (human), **188**, 1122
 MCF-7 and T-47D, expression of estrogen receptors and prolactin receptors, coordinate regulation by sodium butyrate (human), **182**, 740
 breast carcinoma, expression of plasminogen-related gene PRG B (human), **186**, 1108
 cervical carcinoma
 C-41, antineoplastic effects of *rac*-3-octadecyloxy-2-methoxy-propyl-phosphonocholine, analysis (human), **187**, 603
- HeLa
 cell killing and Mn-superoxide dismutase induction by TNF- α , mediation by lipoxygenase metabolites of arachidonic acid (human), **188**, 538
 with experimentally induced respiratory deficiency, fluorescence microscopic and flow cytometric analysis, **187**, 991
 Ku protein binding to DNA, mechanisms (human), **186**, 574
 pattern of chimeric marker gene expression, cis-platin-induced imbalances, **184**, 1
 serum-free proliferation, stimulation by coenzyme Q, **189**, 8
- choriocarcinoma
 JAr, imipramine-sensitive serotonin transporter, differential regulation by cAMP (human), **183**, 487
 JEG-3, soluble granulocyte-macrophage colony-stimulating factor-binding protein, detection in supernatant, **183**, 252
- colon adenocarcinoma
 CaCo-2
 expression of soluble and cell-bound α -2,6-sialyltransferase, correlation with degree of enterocytic differentiation (human), **184**, 1405
 kinetics of Na⁺-dependent glutamine transporter (human), **188**, 746
 membrane phosphoinositide turnover, effects of 1,25-dihydroxycholecalciferol (human), **187**, 1128
- HT-29
 α -adrenoceptors, characterization (human), **185**, 176
 5-fluorouracil metabolic activation, stimulation by interferon- α (human), **182**, 1232
hsp60/chaperonin gene expression and differentiation, relationship: comparison with HL60 and K562 cells (human), **186**, 371
 quercetin-induced suppression of heat shock gene expression and thermotolerance development, effect of pH (human), **186**, 1121
- colon cancer, Colo205, selectin-dependent adhesion to endothelial cells and platelets, inhibition by blocking *O*-glycosylation (human), **182**, 1288
- colon carcinoma
 binding to E-selectin-transfected endothelia (human), **189**, 315
 COLO 205 and COLO 320, adhesion to recombinant E-selectin via sialyl-Lea and sialyl-Lex (human), **182**, 1376
 colorectal cancer, DiFi, α -adrenoceptors, characterization (human), **185**, 176
 colorectal carcinoma, LS 180, cancer-associated glycoproteins, analysis with monoclonal antibody MLS 128 recognizing Tn antigen (human), **187**, 217
 differentiation and cytotoxic activity of tiazofurin and difluorodeoxycytidine: synergistic action (human, rat), **184**, 551
- embryonal carcinoma
 differentiation, associated expression of complement component and receptor mRNAs, **189**, 863
- P19
c-jun mRNA levels, synergistic effect of activin and retinoic acid (mouse), **184**, 1350

Subject Index

- differentiating, amyloid precursor protein overexpression, role in neurotoxicity (mouse), **182**, 165
- differentiation-related expression of non-receptor protein-tyrosine-phosphatase (mouse), **184**, 1241
- expression of lamins A and C, post-transcriptional regulation (mouse), **189**, 1639
- epidermoid carcinoma
- A431
- glycolysis in, effects of epidermal growth factor (human), **183**, 1216
- growth response, modulation by adenosine (human), **187**, 1486
- Na⁺/K⁺ pump activity, intracellular pH, and uridine uptake in cell cultures, effects of extracellular ATP (human), **182**, 836
- HEp2, IgG internalization, role of placental alkaline phosphatase (human), **182**, 624
- erythroblastic leukemia, ELM-I-1, transfected with human IL-2 receptor β chain cDNA, IL-2-induced erythroid differentiation and Tyr phosphorylation (mouse), **188**, 352
- erythroleukemia
- DS19, heme transport, role of transferrin (mouse), **189**, 765
- expression of lamins A, B, and C (human, mouse), **185**, 271
- F5-5, erythroid differentiation, induction by activins and enhancement by retinoic acid (mouse), **187**, 347
- HEL, differentiating, leukotriene-C₄ synthase induction (human), **189**, 1043
- K562
- cytotoxicity of IMP dehydrogenase inhibitor benzamide riboside (human), **186**, 1600
- and HL60 and HL60/ADR cells, comparative effects of calyculin A and okadaic acid (human), **187**, 488
- hsp60*/chaperonin gene expression and differentiation, relationship: comparison with HL60 and HT29 cells (human), **186**, 371
- inositol trisphosphate receptor expression, induction by interleukin-3 and granulocyte macrophage-colony stimulating factor (human), **187**, 438
- pyruvate kinase L gene structural analysis and promoter activity (human), **188**, 516
- K562/ADM, multi-drug resistant, detection of functionally active homodimer of P-glycoprotein (human), **185**, 284
- K562 and HEL, expression of heparin-binding growth factor receptor genes (human), **183**, 83
- MEL, hemoglobin-synthesizing and undifferentiated, formation of DNA interstrand cross-links, effects of cisplatin and carboplatin (mouse), **182**, 760
- esophageal cancer, induction of tube formation of microvascular endothelial cells, role of transforming growth factor- α : model for tumor angiogenesis (human), **186**, 1471
- esophageal carcinoma, TE1 and TE2, detection of c-Ki-ras gene point mutation (human), **187**, 515
- fibrosarcoma, HT1080, activin β_A mRNA levels, regulation by cAMP (human), **182**, 773
- fme1-2, role of pigmentation in mitochondrial activity and sequence of large mt RNA (goldfish), **189**, 445
- gastric cancer, two neurofibromatosis type 1 mRNA types expressed in, GTPase-activating protein activities (human), **187**, 332
- gastric carcinoma
- missense mutations and deletion of p53 gene (human), **182**, 215
- transcription factor Sp1 levels, correlation with epidermal growth factor receptor expression (human), **189**, 1342
- glioma
- Alzheimer amyloid protein precursor cDNA-transfected, APP processing, effects of protease inhibitors (human), **187**, 1249
- C6, O-glycan sialylation *in vitro*: regulation of β -galactosidase $\alpha_{2,3}$ sialyltransferase by Ca²⁺/calmodulin antagonists and phosphatase inhibitors (rat), **186**, 1575
- GA-1, translocation and induction of α B-crystallin by heat shock (rat), **182**, 844
- nonoxidative ethanol metabolism: fatty acid ethyl ester synthase III expression *in vitro* (human, rat), **185**, 938
- phosphatidylserine synthesis, inhibition by glutamate, acetylcholine, thapsigargin, and ionophore A23187 (rat), **186**, 1582
- hepatic and pancreatic, differential expression of *neu* oncogene (mouse), **186**, 363
- hepatocellular carcinoma, HCC, increased insulin receptor substrate-1-like gene expression (human), **183**, 280
- hepatoma
- AH66, DNA synthesis, enhancement by tumor necrosis factor- α -mediated hepatocyte-Kupffer cell-conditioned media (rat), **183**, 1147
- 1c1c7, cytosolic and nuclear Ah receptors, chemical crosslinkage, **182**, 55
- derived cell lines, apolipoprotein B polymorphisms (human), **183**, 1224
- expressed transfected mutated insulin receptors, binding of mutant insulins (rat), **188**, 318
- FF101, synthesized growth factor FF-GF, purification and characterization (rat), **189**, 654
- H4IIE
- expression of gene 33, stimulation by vanadate and insulin (rat), **189**, 931
- insulin-like growth factor binding protein-1 production and mRNA, divergent effects of phorbol esters and insulin (rat), **182**, 262
- H4IIEC3, dedifferentiated, restoration of expression of hepatic function by transfected DNA from human liver (rat), **188**, 531
- Hep1, and pancreatic tumor cell lines, differential expression of *neu* oncogene (mouse), **186**, 363
- and hepatocytes, differential expression of transfected liver-specific α_1 -inhibitor III gene (human, mouse, rat), **183**, 184
- HepG2
- in analysis of amino acid transport systems (human), **189**, 472
- binding of low-density and very-low-density lipoproteins (human), **185**, 582
- cell surface distribution of endocytic receptors, effects of brefeldin A (human), **185**, 719

Subject Index

- expression of apolipoprotein B gene, modulation by thyroid hormone (human), **186**, 617
- germinal angiotensin I-converting enzyme promoter in, analysis (human), **189**, 134
- synthesis of insulin-like growth factor binding protein-1, effect of epidermal growth factor (human), **189**, 1177
- sulfobromophthalein and taurocholate transport, relationship to expression of membrane carrier proteins (human), **183**, 1203
- HepG2, H4IIE, and HTC, expression of L-serine dehydratase mRNA I and II (human, rat), **188**, 336
- HepG2, HepG2f, and Hep3B, expression of cytochrome P450, IA1, IA2, and IIIA3 mRNAs, down-regulation by interleukin-6 (human), **184**, 960
- HTC, polyamine uptake, feedback repression, role of active protein synthesis (rat), **186**, 81
- H4TG, and normal hepatocytes, *c-myc* expression, effects of extracellular matrix and cell density (rat), **184**, 825
- Hu-H1, Mn-superoxide dismutase, induction by tumor necrosis factor, interleukin-1 and IL-6 (human), **182**, 1100
- KRC-7, insulin-responsive tyrosine aminotransferase transcription, role of multiple cis-acting promoter regions (rat), **187**, 778
- PLC/PRF/5, α -fetoprotein gene expression, down-regulation by hepatocyte growth factor (human), **189**, 385
- histiocytic lymphoma
- selectin-dependent adhesion to endothelial cells and platelets, inhibition by blocking *O*-glycosylation (human), **182**, 1288
 - U-937, ligand binding and antiproliferative effects of tumor necrosis factor and lymphotoxin, inhibition by soluble recombinant p60 and p80 receptors (human), **182**, 638
- histiocytoma, irradiated, increased granulocyte/macrophage colony-stimulating factor levels: RNA stabilization through AU-rich region (human), **189**, 986
- HL-60 (human promyelocytic leukemia)
- adhesion to
 - endothelial cells and platelets, selectin-dependent, inhibition by blocking *O*-glycosylation **182**, 1288
 - recombinant E-selectin via sialyl-Lea and sialyl-Lex **182**, 1376
 - alkaline phosphatase activity during differentiation **182**, 487
 - antineoplastic effects of *rac*-3-octadecyloxy-2-methoxypropyl-phosphonocholine **187**, 603
 - apoptosis, endonuclease activation during, analysis: role of Ca^{2+} and pH **186**, 782
 - binding to E- and P-selectins, effect of *Pasteurella haemolytica* A1 glycoprotease **188**, 760
 - cellular differentiation-dependent nuclear factors binding to thymidylate synthase gene, identification **185**, 127
 - differentiation, induction by
 - activin/erythroid differentiation factor, **187**, 79
 - retinoic acid isomers and oxidized analogs **189**, 1136
 - exposed to 60 Hz electromagnetic fields, [^3H]-uridine uptake in, analysis **189**, 437
 - and HL60/ADR and K562, comparative effects of calyculin A and okadaic acid **187**, 488
 - hsp60*/chaperonin gene expression and differentiation, relationship: comparison with K562 and HT29 cells **186**, 371
 - induced to monocyte-like or granulocyte-like cells, expression of *src*-related protein-tyrosine kinase *lyn* **185**, 91
 - multidrug-resistant, overexpression of gene encoding vacuolar H^+ -ATPase subunit C **182**, 675
 - human and murine, effects of taxotere, **187**, 164
 - human tyrosinase-related gene promoter activity, enhancement by TRP gene downstream region, **184**, 568
 - interaction with endothelial cells, facilitation by immunomodulatory protein Ling Zhi-8 via modulation of adhesion molecules (human), **186**, 385
 - Kaposi's sarcoma, AIDS-associated, expression of vascular endothelial growth factor *in vitro* (human), **183**, 1167
 - leukemia, CEM-C1, growth inhibition by farnesol: effects of phosphatidylcholine and diacylglycerol (human), **186**, 543
 - Lewis lung, cancer procoagulant, purification and properties (mouse), **184**, 819
 - lung cancer
 - H69/LX4, P-glycoprotein-expressing, surface membrane vinblastine binding activity (human), **188**, 440
 - PC-7, CPT-11-resistant, detection of topoisomerase I gene point mutation (human), **188**, 571
 - lung osteosarcoma, expression of plasminogen-related gene PRG B (human), **186**, 1108
 - lymphoblastoma, X3, protein tyrosine phosphorylation as indicator of TCDD exposure *in vitro* (human), **189**, 59
 - lymphoma
 - L5178Y, DNA, photosensitized 8-hydroxydeoxyguanosine formation by riboflavin (mouse), **187**, 809
 - multidrug-resistant HOB1, expressed P-glycoprotein, role in Adriamycin resistance development (human), **189**, 92
 - Walker 256, ATP ^{31}P NMR signal, increase after cisplatin treatment (rat), **183**, 114
 - mammary carcinoma
 - FM3A, staurosporine-induced G2 phase arrest, role of $\text{p34}^{\text{cdc}2}$ kinase inhibition by staurosporine (mouse), **184**, 81
 - SC2G, androgen-responsive expression and mitogenic activity of schwannoma-derived growth factor (mouse), **185**, 103
 - mammary, homologous DNA pairing activities, identification (mouse), **185**, 987
 - mastocytoma, chondroitin 4-sulfate synthesis *in vitro*, effect of brefeldin A (mouse), **183**, 357
 - medullary thyroid carcinoma
 - calcitonin gene transcription, regulation by cyclic AMP (human), **189**, 1157
 - TT, cytoplasmic Ca^{2+} levels and calcitonin secretion, effects of gastrin-releasing peptide (human), **185**, 833
 - megakaryocytic leukemia
 - CMK, expression of heparin-binding growth factor receptor genes (human), **183**, 83
 - MEG-01, thrombin-induced Ca^{2+} oscillation, **183**, 864

Subject Index

- melanoma, S91 Cloudman, melanocyte stimulating hormone receptor up-regulation by MSH (mouse), **188**, 1325
- monocytic leukemia, THP-1, C-type natriuretic peptide isolation and identification (human), **189**, 697
- myeloid leukemia
- M1, differentiation inhibiting factor for, amino acid sequence identity with Nm23/nucleoside diphosphate kinase (mouse), **182**, 987
- phosphorylation of retinoblastoma gene product during cell cycle (human), **184**, 212
- nasopharyngeal carcinoma cell lines, inflammatory cytokine mRNA expression levels, heterogeneity (human), **187**, 121
- neuroblastoma
- differentiation, modulation of B-cell-associated tyrosine kinase gene *lyn* during, analysis (human), **186**, 1403
- heterologous promoter activity as determined by reporter gene mRNA levels and enzyme activity, comparison (human), **189**, 912
- identification of tyrosine kinase receptor-like molecule NbtK-1 (mouse), **189**, 1077
- muscarinic receptor-mediated Ca^{2+} mobilization, non-competitive antagonism by muscarinic antagonists (human), **189**, 919
- NB-OK1
- forskolin-induced neurite outgrowth, suppression by carbachol (human), **182**, 45
- purification of atrial natriuretic peptide-inactivating metallo-endopeptidase (human), **182**, 158
- N1E-115, growth inhibition by *c-myc* or *N-myc* antisense oligodeoxynucleotides, effects on differentiation and neurite formation (mouse), **185**, 915
- Neuro-2A, angiotensin II binding site, identification and characterization (mouse), **182**, 388
- nonoxidative ethanol metabolism: fatty acid ethyl ester synthase III expression *in vitro* (human, mouse), **185**, 938
- SK-N-MC
- different neuropeptide Y1 receptor signal transduction systems (human), **187**, 1565
- endothelin-1 action, noncompetitive antagonistic effect of BQ-123 (human), **184**, 504
- sphingolipid biosynthesis: comparative desaturation of dihydroceramide and sphinganine, **189**, 14
- osteoblastic osteosarcoma
- G-292 and Saos-2, growth inhibition by platelet factor 4 (human), **187**, 287
- HOS TE85, proliferation and function, modulation by vitamin K_2 (mouse), **187**, 814
- ROS 17/2, endothelin_B receptor mRNA down-regulation by ET, role of decreased mRNA intracellular stability (rat), **186**, 342
- Saos-2, cAMP formation stimulated by parathyroid hormone-related protein, inhibition by tumor necrosis factor α via protein kinase C (human), **182**, 341
- UMR-106
- collagen synthesis, regulation by parathyroid hormone and PTH-related peptide, role of cAMP-dependent protein kinase (rat), **184**, 525
- regulation of 1,25-dihydroxyvitamin D_3 receptor gene expression by parathyroid hormone and cAMP-agonists, **185**, 881
- ovarian carcinoma
- ATP ^{31}P NMR signal, increase after cisplatin treatment (human), **183**, 114
- SKOV3 and SKVLB, multidrug-resistant, P-glycoprotein function, effect of liposomes (human), **187**, 1098
- pancreatic
- camptothecin-11 acquired- and native-resistant, DNA topoisomerase I gene expression (human), **184**, 618
- QGP-1N and SUIT-2, cross-sensitivity to camptothecin analog CPT-11 and active metabolite SN-38 (human), **188**, 70
- QGP-1NL, metastatic, cloning and sequencing of cDNA encoding 85-kDa lysosomal sialoglycoprotein (human), **184**, 604
- pancreatic adenocarcinoma, CFPAC-1, lysosome acidification, role of cystic fibrosis transmembrane conductance regulator (human), **184**, 300
- pancreatic carcinoid, BON, growth-stimulatory effect of somatostatin analog (human), **185**, 577
- pancreatic carcinoma, Capan-2, nuclear proteins-17-1A antigen gene promoter complex formation, **186**, 1353
- pancreatic and hepatic, differential expression of *neu* oncogene (mouse), **186**, 363
- pancreatic islet cell carcinoma, QGP-1N, pancreastatin and somatostatin secretion, role of interaction of cAMP pathway and phosphoinositide turnover system (human), **185**, 1041
- pharynx carcinoma, Detroit 562, metastatic phosphorylated urokinase-type plasminogen activator from, properties (human), **182**, 1473
- surface receptor-bound urokinase-type plasminogen activator, phosphorylation (human), **182**, 1466
- pheochromocytoma, PC12
- clone, ATP-induced Ca^{2+} influx, regulation by pertussis toxin-sensitive mechanism (rat), **188**, 1184
- imipramine-sensitive serotonin transporter, differential regulation by cAMP (rat), **183**, 487
- muscarinic stimulation of phospholipase D, enhancement by wortmannin (rat), **188**, 510
- nerve-growth factor-treated, cytoplasmic calcium activation by amyloid β -protein fragment 25-35 (rat), **184**, 1441
- neurite outgrowth
- effects of inhibition of nerve growth factor-induced B-50/GAP-43 expression by antisense oligomers (rat), **187**, 839
- growth factor-induced, prevention by dipeptide inhibitors of ubiquitin-mediated protein turnover (rat), **189**, 280
- phosphoinositidase C β , γ , and δ isoform subcellular localization (rat), **187**, 114
- ssDNA-binding protein interacting with bovine prepro-tachykinin promoter: regulation by nerve growth factor (rat), **187**, 1395
- pituitary
- GH₃, transient low-threshold Ca^{2+} currents, augmentation by GTP-binding protein signal transduction system (rat), **187**, 529
- proliferation *in vitro*, effect of angiotensin II (rat), **183**, 27

Subject Index

- pituitary adenoma, follicle-stimulating hormone-secreting, FSH secretion and $[Ca^{2+}]_i$, effects of activin A and somatostatin (human), **182**, 1408
- pituitary corticotrope, AtT20, early glucocorticoid induction of calmodulin and suppression by corticotropin-releasing factor suppression (mouse), **189**, 1382
- prostate, Dunning R3327, expression and transforming activity of heparin-binding fibroblast growth factor receptor variant gene (rat), **183**, 423
- renal cancer, *c-myc* gene-expressed and -unexpressed cell lines, effect of extracellular phosphatidylinositol (human), **182**, 644
- renal carcinoma, expression of scavenger receptors *in vitro* (human), **189**, 1323
- RINm5F, insulin secretion, effect of Ca^{2+} /calmodulin-dependent protein kinase II inhibitor KN-62, **189**, 128
- small cell lung carcinoma
- GLC₄/ADR, adriamycin-resistant, sensitivity to mitochondrial inhibitors (human), **182**, 877
 - increased expression of 67-kDa laminin receptor gene (human), **182**, 746
 - SW2, cytotoxicity of immunoconjugates containing blocked ricin, analysis (human), **183**, 758
- smooth muscle, DDT₁ MF-2, glutathione S-transferase gene expression in, regulation by glucocorticoid, androgen, and retinoic acid (hamster), **184**, 1108
- squamous cell carcinoma
- HSC-3 and HSC-5, detection of differentiated keratin peptide K1 (human), **182**, 1440
 - irradiated, increased granulocyte/macrophage colony-stimulating factor levels: RNA stabilization through AU-rich region (human), **189**, 986
 - SQC, DNA-damaging agent-treated, alterations of DNA repair gene XRCC1 expression and structure (human), **186**, 900
- T-cell leukemia, CEM
- altered levels of alkylacylglycerol and ceramide (human), **187**, 209
 - potent antiviral activity of sulfonated azo dye Quinobene (human), **187**, 1409
- teratocarcinoma, F9
- basal level transcription of H1⁰ histone gene, requirement of multiple cis-acting elements of proximal promoter region, **188**, 1153
 - calcitonin gene-related peptide secretion and role in growth: autocrine stimulation (mouse), **187**, 381
- testicular, Tera-1, germinal angiotensin I-converting enzyme promoter in, analysis (human), **189**, 134
- T-lymphoma, Jurkat
- cell water organization and membrane order, cigarette smoke-induced increase (rat), **185**, 624; *erratum*, **186**, 601
 - hyperphosphorylation on tyrosine residues, induction by *N*-ethylmaleimide (human), **187**, 73
- Tumorigenesis
- role of acidic fibroblast growth factor as progression factor rather than transforming factor (Rat-1 cells), **189**, 398
- Tumor necrosis factor
- effect on Mn-superoxide dismutase expression in pulmonary arterial and microvascular endothelial cells (rat), **188**, 453
 - enhancement of IL-6 receptor β chain (gp130) expression in epithelial cells (human), **185**, 902
 - independent tumoricidal activity, expression in activated macrophages, role of nitric oxide synthase induction (rat), **184**, 1364
 - induced apoptotic DNA fragmentation in aortic endothelial cells, role of phospholipase A₂ (bovine), **188**, 1312
 - induction of Mn-superoxide dismutase in hepatoma cells (human), **182**, 1100
 - and interleukin-1, synergistic stimulation of NO hemoglobin production (rat), **189**, 392
 - ligand binding and antiproliferative effects in U-937 cells, inhibition by soluble forms of recombinant p60 and p80 TNF receptors (human), **182**, 638
 - regulation of P450 IID in C3H/HeJ mouse, **182**, 617
 - stimulation of lipolysis and reduction of lipoprotein lipase activity in cultured adipocytes by prostaglandin-independent mechanism (mouse), **186**, 237
- Tumor necrosis factor α
- cytotoxicity
 - in endothelial cells, mediation by nitric oxide (bovine), **186**, 475
 - and induction of Mn-superoxide dismutase, mediation by lipoxygenase metabolites of arachidonic acid (human, mouse), **188**, 538
 - and endotoxin, direct stimulation of NO formation in hepatocytes from chronically endotoxemic rat, **185**, 430
 - expression in nasopharyngeal carcinoma cell lines, heterogeneity (human), **187**, 121
 - gene expression in stimulated retinal pigment epithelial cells *in vitro* (human), **187**, 1029
 - induction of
 - activin A gene expression in bone marrow stromal cell line (human), **188**, 310
 - arachidonic acid release, inhibition by adenovirus E3 region 14.7-kDa protein, heat, and sodium arsenite (C3HA fibroblasts), **188**, 177
 - induction by okadaic acid in B cells (human), **187**, 51
 - inhibition of parathyroid hormone-related protein stimulation of cAMP formation in osteoblast-like cells, role of protein kinase C (human, rat), **182**, 341
 - interaction with interferon- α , effect on hepatitis B virus enhancer activity (human hepatoma cells), **183**, 904
 - mediated hepatocyte-Kupffer cell-conditioned media, enhancement of DNA synthesis in hepatoma cells (rat), **183**, 1147
 - pretreatment, protective effect in myocardial ischemia-reperfusion injury (rat), **184**, 1056
 - production in lymphocytes, stimulation by 4,4'-diisothiocyanatostilbene-2,2'-disulfonic acid (human), **189**, 1268
- Tumor necrosis factor receptors
- 55-kDa, binding site identification with synthetic peptides (human), **188**, 503
 - p60 and p80, recombinant soluble forms, inhibition of ligand binding and antiproliferative effects of TNF and lymphotoxin (human U-937 cells), **182**, 638
- Tumors, *see also* Tumor cells
- angiogenesis, model: role of transforming growth factor- α

Subject Index

- in tube formation of microvascular endothelial cells induced by esophageal cancer cells (human), **186**, 1471
- anterior pituitary, detection of thyrotropin-releasing hormone mRNA by reverse transcription-polymerase chain reaction (human), **182**, 182
- breast cancer, DNA, incorporation of 5-fluoro-2'-deoxyuridine, inhibition by thymidine (mouse), **184**, 467
- colorectal carcinoma, and adjacent colonic mucosa, gastrin post-translational processing, analysis (human), **189**, 1165
- enterochromaffin-like carcinoid, gastrin receptor, cDNA cloning and characterization (mouse), **187**, 1151
- esophageal, gastric, and colorectal carcinomas, amplification of *c-met* gene in, analysis (human), **189**, 227
- gastric carcinoma, transcription factor Sp1 levels, correlation with epidermal growth factor receptor expression (human), **189**, 1342
- glioma, secreted metalloproteinase identical to type IV collagenase: u-PA as type IV collagenase activator (rat), **186**, 348
- hepatic, and cirrhotic liver portions, deleted mtDNA, quantitative comparison (human), **182**, 913
- hepatocellular carcinoma, hepatitis B virus integration associated with erb B-like gene expression (human), **188**, 344
- lung cancer, primary, mutations of p53 tumor suppressor gene in Japanese patients, **183**, 1139
- neuroblastoma, primary, expression of B-cell-associated tyrosine kinase gene *lyn* (human), **186**, 1403
- neurofibroma, neurofibromatosis 1 gene transcripts expressed in, GAP domain, detection of additional exon (human), **188**, 851
- papilloma, formation, enhancement in response to skin tumor promotion, effect of human ornithine decarboxylase gene overexpression (mouse), **187**, 493
- pheochromocytoma, produced peptides acting on rat platelets, isolation and characterization (human), **185**, 134
- prostatic
- progressionally advanced, overexpression of retroviral sequences (rat), **182**, 318
 - relatively benign and highly aggressive sublines derived from Dunning R-3327-H adenocarcinoma, differential expression of vimentin (rat), **182**, 1254
- renal cell carcinoma, basic fibroblast growth factor gene expression and immunohistochemical localization (human), **183**, 937
- renal, estrogen-induced, enhanced protein tyrosine phosphorylation (hamster), **186**, 228
- solid, elevated hepatic levels of metallothionein and zinc in mouse with, **189**, 645
- thyroid cancer, specific monoclonal antibodies, production and properties (human), **187**, 404
- transplantation into nude mice, effects on catalase gene expression, **189**, 1084
- Tyrosinase, *see* Monophenol monooxygenase
- Tyrosine
- highly conserved residue at codon 845 of kinase domain of epidermal growth factor receptor, role in transforming activity of EGF-R (human), **186**, 768
 - human insulin receptor, Tyr-1158, -1162, and -1163, order of autophosphorylation in transfected CHO cells, **186**, 244
- phosphorylation
- effect on tyrosine formation, **188**, 252
 - role in superoxide production by neutrophils stimulated with formyl-methionyl-leucyl-phenylalanine and IgG (human), **183**, 789
 - in transformed CR2-positive lymphocytes and normal resting B cells, induction by C3d-derived 16-amino acid synthetic peptide (human), **188**, 833
 - at position 7 of class Pi glutathione S-transferase
 - effect on pK_a of thiol group of glutathione in enzyme-glutathione complex (human), **184**, 194
 - role in enzyme catalytic activity (human), **182**, 1122
 - at position 14 in Δ^5 -ketosteroid isomerase, substitution of glycine, specific activation of resulting mutant by phenols (*Pseudomonas testosteroni*), **184**, 1386
 - at position 200 in angiotensin-converting enzyme, functional role (human testis), **184**, 306
- protein, phosphorylation
- cellular proteins, induction by transforming G protein-coupled receptor activation (murine fibroblasts), **188**, 155
 - 41- and 43-kDa proteins in keratinocytes, induction by hepatocyte growth factor (mouse), **185**, 860
 - as indicator of TCDD exposure *in vivo* and *in vitro* (human, mouse), **189**, 59
 - in thrombin-activated platelets, correlation with phosphatidylinositol 3,4-bisphosphate synthesis (human), **186**, 1480
- residues in
- Jurkat T-cell line, hyperphosphorylation, induction by *N*-ethylmaleimide, **187**, 73
 - pp100, identification as site of cytokine-induced phosphorylation (murine myeloid cells), **188**, 1040
 - Tyr-179, and Lys-183, role in 11β -hydroxysteroid dehydrogenase catalytic function in transfected CHO cells, **188**, 222
- Tyrosine aminotransferase, *see* Tyrosine transaminase
- Tyrosine hydroxylase
- biopterin-dependent, expression by keratinocytes (human), **189**, 72
 - mRNA, detection in pituitary anterior and neurointermediate lobes (female rat), **189**, 1716
- Tyrosine kinase
- domain in insulin receptor, auto-dephosphorylation, **189**, 1457
 - KDR, identification as receptor for vascular endothelial cell growth factor (human), **187**, 1579
 - role in insulin-mediated ion transport in pulmonary epithelium (fetal rat), **187**, 802
- Tyrosinemia
- hepatorenal, metabolic studies in murine model: absence of perinatal abnormalities, **187**, 340
- Tyrosine 3-monooxygenase
- gene isolation and characterization: comparison with human gene (mouse), **182**, 348
- Tyrosine transaminase
- insulin-responsive transcription, role of multiple cis-acting promoter regions (rat hepatoma cells), **187**, 778

Subject Index

- and serine dehydratase, differential expression in liver after partial hepatectomy (rat), **182**, 753
- Tyrosyl radicals
in R2 protein of ribonucleotide reductase, reaction with hydroxyurea, EPR stopped-flow analysis, **188**, 879
- Tryptophan
Trp38, role in glutathione S-transferase P active site, **185**, 1069
- U**
- U46619
activation of phospholipase C in coronary artery, inhibition by cromakalim-induced hyperpolarization (pig), **187**, 1517
- Ubiquinone
feedback-type inhibition of 3-hydroxy-3-methylglutaryl-coenzyme A reductase (rat liver), **184**, 1280
and vitamin K₃, interaction with mitochondrial succinate-ubiquinone oxidoreductase (bovine heart), **186**, 1656
- Ubiquitin
mediated protein turnover, dipeptide inhibitors, prevention of growth factor-induced neurite outgrowth in PC12 cells (rat), **189**, 280
related protein, fused to S30 ribosomal protein, encoding gene *fau*, structure and expression (human), **187**, 927
- Ubiquitin-activating enzyme
E1, cDNA, complementation of temperature-sensitive X-linked BHK21 cell mutants (human, mouse), **184**, 1015
- UDP (uridine 5'-diphosphate)
derivatives, inhibitory effects on UDP-glucuronosyltransferases (rat liver), **187**, 140
- UDP-glucuronosyltransferase
microsomal, inhibitory effects of ω,ω,ω -triphenylalcohols and UDP derivatives (rat liver), **187**, 140
- Ultraviolet light
induced crosslinking of histones H1 and H3 to DNA in deoxyribonucleoprotein, analysis (bovine), **187**, 261
irradiation of
Escherichia coli, subsequent production of similar-sized daughter strand gaps in leading and lagging strands of DNA, analysis, **184**, 1496
normal fibroblasts, enhancement of HPS72 protein expression (human), **186**, 1257
- Ultraviolet photoelectron spectroscopy
in characterization of 2'-deoxyguanosine-5'-phosphate valence electronic properties, **184**, 16
- Umbelliferone
reversal of abscisic acid-induced stomate closure, regulation by lipid phase alterations in guard cell plasmalemma (*Vicia faba*), **186**, 652
- Urate oxidase
substrate-binding site, Lys 164 with role in, identification by site-directed mutagenesis (rat liver), **187**, 101
- Uricase, *see* Urate oxidase
- Uridine
³H-labeled, uptake in HL-60 leukemia cells exposed to 60 Hz electromagnetic fields (human), **189**, 437
uptake in cell cultures, stimulation by extracellular ATP (human, mouse), **182**, 836
- Urine
atrial natriuretic peptide from candoxatril-treated rat, characterization, **182**, 1270
collagen catabolites, in mathematical model for study of bone turnover in growing rat, **185**, 47
hydrophobic component, interaction with P-glycoprotein (rat), **186**, 796
20-hydroxyeicosatetraenoic acid excretion as glucuronide conjugate (human), **185**, 728
immunoreactive endothelin, characterization (human), **182**, 1506
- Urokinase, *see* Plasminogen activator, urokinase-type
- Urokinase receptors
encoding gene, transcriptional activation by endothelin-1 (human), **186**, 1631
- Urotensin II
isolation and primary structure (*Rana ridibunda*), **188**, 578
- Ursodeoxycholic acid, *see* Ursodiol
- Ursodiol
role in activation of glucocorticoid receptor (human), **188**, 942
- Uteroglobin
anti-inflammatory, synthesis and secretion by surfactant-producing pulmonary alveolar type II cells (rabbit), **189**, 662
- UTP (uridine 5'-triphosphate)
in vitro reactivity of aortic fibroblasts to, analysis (rat), **188**, 205
- V**
- Vacuoles
detection of polyamine channels in *Arabidopsis thaliana* cells, **182**, 1187
- Valinomycin
induced Cl⁻ transport in erythrocyte suspensions, ¹⁹F, ³¹P, and ³⁵Cl NMR studies (human), **184**, 915
modification of phosphorescence quenching in cytochrome c oxidase, **189**, 1477
- Vanadate
and hydrogen peroxide, selective inhibition of protein-tyrosine-phosphatase *in vitro* (rat), **188**, 773
stimulation of gene 33 expression in H4IIE cells (rat), **189**, 931
- Vanadyl ions
-hydrogen peroxide system, generation of hydroxyl radicals, role in DNA cleavage (rat), **189**, 1090
- Vascular endothelial cell growth factor
KDR tyrosine kinase as receptor for, identification (human), **187**, 1579
- Vascular permeability factor
and basic fibroblast growth factor, synergistic induction of angiogenesis in microvascular endothelial cells (bovine), **189**, 824
- Vasoactive intestinal peptide
and second conserved region of HIV-1 gp120, spectral and sequence similarities (human), **189**, 705
- Vasoactive intestinal polypeptide
inducing cAMP increase in rat platelets, organ distribution and characterization (pig), **187**, 1587

Subject Index

- Vasoconstriction**
 in microcirculation during cardiomyopathy, induction by acetylcholine, reversal by L-arginine (hamster), **184**, 1372
 and vasodilation, mediation *in vivo* by endothelin ET_b receptor (rat mesenteric artery), **186**, 867
- Vasodilation**
 and vasoconstriction, mediation *in vivo* by endothelin ET_b receptor (rat mesenteric artery), **186**, 867
- Vasopressin**
 effects on inositol 1,4,5-trisphosphate and sn(1,2)-diacylglycerol masses in freshly isolated hepatocytes: comparison with epidermal growth factor (rat), **187**, 1055
- Vasopressin receptors**
 V₂ subtype, internalization in LLC-PK₁ cells: receptor-mediated endocytosis (pig), **186**, 1376
- Vasopressor factors**
 partial purification from parathyroid tissue (human), **188**, 323
- Vasoreactivity**
 resistance arteries, effects of bufalin and pregnanes (human), **186**, 1
- Vasorelaxation**
 aortic endothelium-derived relaxing factor-induced, effects of N^G-hydroxy-L-arginine and hydroxyguanine (rabbit), **189**, 711
 endothelium-dependent pertussis toxin-sensitive, in porcine coronary artery, induction by guanosine 5'-O-(3-thiotriphosphate), **189**, 324
 in isolated coronary arteries, kallikrein-induced endothelium-dependent, mediation by kinins (dog), **185**, 693
 smooth muscle, by nitroxyl release from *N,O*-diacylated-*N*-hydroxyarylsulfonamides (rabbit aorta), **187**, 1367
- Vectors**
 eucaryotic expression, with hammerhead ribozyme targeted to prion pre-mRNA, construction (hamster) **186**, 1171
 plasmid, centromeric, maintenance in yeast, interference by mammalian and viral DNA sequences, **187**, 737
 retroviral, U3-based, gene expression with, evaluation, **184**, 330
- Velnacrine**
 effects on erythrocyte membrane (human), **185**, 596
- Venom**
 acidic phospholipase A₂, structure at 2.8 Å resolution (*Agkistrodon halys blomhoffii*), **184**, 137
 from cobra and other snake species, glycoprotein carbohydrate moieties, characterization, **182**, 294
 24-kDa proteinase with α- and β-fibrinogenase activity, isolation and characterization (rattlesnake), **187**, 389
- Verapamil**
 blockage of basal and angiotensin II-induced RNA synthesis in aortic vascular smooth muscle cells (rat), **183**, 767
 effects on
 endothelin-1 monocyte chemotaxis (human), **189**, 994
 migration of electroporated neutrophils (rabbit), **182**, 864
- Vesicles**
 bipolar lipid, lateral motion of pyrene-labeled phosphatidylcholine in, pressure dependence (*Sulfolobus acidocaldarius*), **188**, 1241
 clathrin-coated, in placenta, localization of placental alkaline phosphatase (human), **183**, 803
 phosphatidylcholine small unilamellar, differential susceptibility to phospholipases A₂, C, and D in presence of membrane active peptides, **182**, 682
 protein kinase C activity, dual modulation by sphingosine, **187**, 635
 renal brush border membrane, sodium uptake, inhibition by amiloride analogs (hypertensive rat), **183**, 55
 renal, isolated during salt-to-fresh water migration, proton transport and Na⁺/H⁺ exchange, analysis (salmon), **186**, 24
 secretory
 differential recognition by annexins, **184**, 347
 isolated from pituitary, thiol and aspartyl proteolytic activities (bovine), **183**, 449
 seminal, *see* Seminal vesicles
 synaptic, localization of *smg* p25A/rab3A p25 (rat), **186**, 1345
- Vesicular stomatitis virus**
 N52-59 peptide, bound in antigen binding groove of H-2K^b, orientation, mapping with monoclonal antibody, **186**, 1449
 nucleocapsid gene, 5' sequence, role in selective mRNA translation in infected cells (human), **189**, 1585
- Vimentin**
 differential expression in prostatic tumors (rat), **182**, 1254
 expression in hemopoietic cell lines of erythroid lineage (human), **185**, 271
- Vinblastine**
 binding activity of surface membranes from P-glycoprotein-expressing cell line, characterization (human), **188**, 440
 and other antimitotic agents, binding to fungal tubulins, selectivity, **187**, 722
- Vincristine**
 resistant HL60 cells, overexpression of gene encoding vacuolar H⁺-ATPase subunit C (human), **182**, 675
- Viral receptors**
 phosphatidylcholine liposomes containing, membrane fusion with influenza virus, **186**, 378
- Visinin**
 biochemical and molecular properties in normal and *rd* retina, comparison (chicken), **183**, 456
 related Ca²⁺-binding protein, cDNA cloning and sequencing (rat brain), **184**, 1219
- Visna virus**
 bacteria-expressed gene products, in analysis of antibody response in sheep to ovine lentivirus, **188**, 20
- Vitamin A**
 binding protein, -purpurin hybrid binding transthyretin, construction (chicken, rat), **184**, 938
 up-regulation of thioredoxin gene transcription in conducting airway epithelial cells (monkey), **183**, 170
- Vitamin B₁₂**
 regulation of methionine gene expression, role of *metF* and *metJ* genes and N⁵-methyltetrahydrofolic acid, **182**, 651
- Vitamin D**
 inducible pathway, metabolism of 22-oxacalcitriol in cultured parathyroid cells (bovine), **189**, 759

Subject Index

Vitamin E

- and cytochrome c, electron transport between, **188**, 190
- inhibition of protein oxidation in skeletal muscle of resting and exercised rats, **189**, 801
- protective effect on amyloid β protein toxicity in nerve cells (rat), **186**, 944

Vitamin K

- dependent γ -carboxylation of 1,25-dihydroxyvitamin D₃ receptor (chicken), **189**, 1543

Vitamin K₂

- modulation of osteoblastic cell proliferation and function *in vitro* (human, mouse), **187**, 814

Vitamin K₃

- and ubiquinone, interaction with mitochondrial succinate-ubiquinone oxidoreductase (bovine heart), **186**, 1656

Vitellogenin

- degrading proteinase, yolk-associated low-density lipoprotein with, isolation (sand crayfish), **186**, 498

Vitellogenin A2

- encoding gene, hormone response element, estrogen receptor-induced bending (*Xenopus laevis*), **185**, 944

Vitreous body

- type IX collagen, intact form, extraction and characterization (bovine), **185**, 392

von Willebrand factor

- platelet adhesion-mediating functional domains, primary structure: species comparison (human, pig), **182**, 561

W

S-Warfarin

- exocyclic-keto reductase activity for, analysis in hepatic microsomes from adult male (rat), **184**, 338

Water

- heavy, *see* Deuterium oxide
- permeability of endothelial cells to, effect of atrial natriuretic factor (bovine), **185**, 386

Water channels

- CHIP28, cDNA isolation and sequencing and mRNA expression in renal cortex and inner medulla (rat), **188**, 1267
- erythrocyte, 30-kDa functional size, determination *in situ* by radiation inactivation (rabbit), **184**, 1331

Water organization

- intracellular, in Jurkat T cells, effect of cigarette smoke (rat), **185**, 624

Wheat germ agglutinin

- activation of protein-tyrosine kinase p72^{syk} in platelets (pig), **185**, 1128

Wortmannin

- enhancement of muscarinic stimulation of phospholipase D in PC12 cells (rat), **188**, 510
- inhibition of

Ca²⁺-dependent catecholamine release from adrenal chromaffin cells (bovine), **185**, 1016

IgE-mediated histamine release in leukocytes (human, rat), **183**, 48

Wound healing

- associated changes in dermal angiotensin II receptors (rat), **187**, 1083

Wounds

- cell wall, induction of cadystin synthesis (*Schizosaccharomyces pombe*), **188**, 388

X

Xanthine oxidase

- subcellular localization in liver (guinea pig), **185**, 54

Xeroderma pigmentosum

- derived XPD cells, DNA endonuclease complex defective in incising pyrimidine dimer-containing nucleosomal DNA in, isolation (human), **189**, 782

X irradiation

- synchrotron, in elemental analysis of growth plate cartilage (bovine), **188**, 1010

X-ray crystallography

- chymosin structure: adoption of self-inhibited form, **184**, 1074

isodomoic acid A and α -kainic acid, comparison, **187**, 325

X-ray diffraction

- in determination of mode of interaction of *n*-dodecylphosphorylcholine with bovine pancreatic phospholipase A₂, **187**, 821

X-ray scattering

- small angle, by synchrotron orbital radiation, in analysis of glutenin high molecular weight subunit: structural anisotropy (wheat), **186**, 1057

Y

Yeast, *see also specific yeasts*

- mitochondrial dysfunction, role of bis-pyridinium oxime binding to DNA, **186**, 1567

tRNA^{Asp} recognition mechanism, comparison with mechanism in *Escherichia coli*, **189**, 856

Yeast Kex2 protease, *see* Kexin

Z

Zervamicins

- formation of voltage-dependent membrane channels (*Emeriellopsis salmosynnemata*), **186**, 8

Zeta-potential

- as parameter in studies of lipolysis in oil-water emulsion, quantitative analysis, **186**, 746

Zidovudine

- tetrazole analog, synthesis by preparation of 6-substituted tetrazolo[1,5-c]pyrimidin-5(6H)ones, **187**, 1545

Zinc

- binding domain of interleukin-3, localization (human), **187**, 859

binding by integrase from Moloney murine leukemia virus and HIV-1, **189**, 813

binding sites in histidine-rich Ca²⁺-binding protein of skeletal muscle sarcoplasmic reticulum, analysis (rabbit), **186**, 659

hepatic levels, elevation in mice bearing experimental tumors, **189**, 645

inducible activities of methallothionein promoters in rainbow trout liver cells and medaka fry, analysis,

Subject Index

- 185**, 1108
inhibition of apoptosis in thymocytes (rat), **187**, 1256
- Zinc finger motif
Cys2/His2, detection in P2 protamines from human sperm,
182, 540
- Zinc hydroxide
stimulation of superoxide production by alveolar macro-
phages (rat), **185**, 1115
- Zymogen granules
pancreatic, recognition by annexins (rat), **184**, 347
